What is this product?

Type

Capitalisation share of a sub-fund of DPAM B, a public SICAV under Belgian law. The units of the fund are capitalisation units which do not give right to a dividend. All income earned by the product is reinvested.

Duration

Indefinite. This product does not have a fixed maturity date.

Objectives and investment policy

Objective: The objective of the sub-fund is to offer investors a long-term capital gain by investing in equity securities and/or debt securities of issuers worldwide. This is an actively managed sub-fund. No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

The sub-fund promotes environmental and social aspects within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. It does not have a sustainable investment objective.

Investment policy: The sub-fund invests mainly, without any sector or geographical restriction, in funds that invest in equities (UCITS and/or other UCIs) and, on an ancillary basis, in other investment funds (UCITS and/or other UCIs). The sub-fund may also invest directly in shares, bonds or other debt securities in a maximum of 20% of its net assets. The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 85% of its net assets. The sub-fund invests at least 75% of its net assets in (i) funds which promote, inter alia, environmental or social characteristics and/or have a sustainable investment objective within the meaning of Regulation 2019/2088 (indirect investments), and/or (ii) securities which meet the environmental and social characteristics it promotes (direct investments). The sub-fund applies binding investment restrictions to (a) companies that do not comply with Global Standards, (b) companies involved in controversial activities, and (c) companies involved in controversies of maximum severity. More information on the product can be found on the website www.dpamfunds.com.

The sub-fund manager will use DPAM funds and third party funds, selection of which is based on a qualitative analysis which concentrates on five points: investment philosophy and prices, performance, risks, transparency and costs. This selection also takes into account environmental, social and governance (ESG) considerations.

Derivative products: The sub-fund may, on an optional basis, use derivatives such as futures and/or forwards in order to achieve the investment objectives

and/or for hedging purposes (hedging of or exposure to the risks associated with certain markets).

Subscription/Redemption: All Subscription Or Redemption requests may be made prior to 12:00 p.m. (Belgian time) on each business day to Banque Degroef Petercam SA.

Intended Retail Investor

Practical information

Custodian: Banque Degroef Petercam Luxembourg S.A, succursale belge

The Key Information Document describes a share class of the sub-fund DPAM B Active Strategy of the SICAV DPAM B.

DPAM B is an undertaking for collective investment in transferable securities incorporated in Belgium (the Home Member State of the SICAV), which complies with the requirements of Directive 2009/65/EC and which is subject to prudential supervision by the FSMA.

In accordance with the applicable legal provisions, the assets of the sub-fund are segregated from the assets of the other sub-funds of the SICAV, which means that the rights of the investors and other creditors of this sub-fund are limited to the assets thereof.

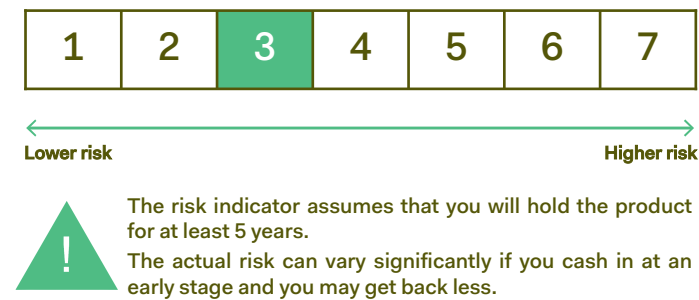

The prospectus and periodic reports are drawn up for all the sub-funds of the SICAV.

Additional information on the sub-fund is available in the prospectus and in the periodic reports, which can be obtained on request, without charge, from the registered office of the SICAV. These documents (which are produced in French, Dutch and English) as well as more extensive information about this product are available on the website: www.dpamfunds.com (tab 'Publications').

All other practical information, including the most recent net asset value of the shares, is available on the website mentioned above (tab 'Net asset value').

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. In other words, the potential losses related to the future performance of the product are below low and average.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 10 years.

Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4 760 EUR	5 260 EUR
	Average return each year	-52.43%	-12.07%
Unfavourable	What you might get back after costs	8 350 EUR	6 130 EUR
	Average return each year	-16.46%	-9.33%
Moderate	What you might get back after costs	10 710 EUR	13 700 EUR
	Average return each year	7.10%	6.50%
Favourable	What you might get back after costs	14 580 EUR	16 210 EUR
	Average return each year	45.75%	10.14%

The figures shown include all costs of the product itself, but not necessarily all fees related to distribution. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 11 2021 et 11 2022.

Moderate scenario: this type of scenario occurred for an investment between 04 2014 and 05 2019.

Favourable scenario: this type of scenario occurred for an investment between 11 2016 and 11 2021.

Your maximum loss cannot exceed the amount of your initial investment.

What happens if DPAM is unable to pay out?

The assets of the product are held with the Custodian and maintained separate from the other assets held by the Custodian.

In the event of a default by DPAM or any other sub-fund of the SICAV, neither of them may use the funds of the product to pay their debts.

However, your investment is not protected by an indemnification or guarantee mechanism.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about all of these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return)

Investing in this product also entails risks that are materially relevant but not included in the risk indicator:

- Liquidity risk: The sub-fund may potentially be exposed to issuers from the real estate sector and/or small caps and/or corporate bonds. The liquidity of such assets may decrease during periods of market stress. This risk may also be associated with the funds in which the sub-fund invests.
- Credit risk: The fund may potentially be exposed to bonds from issuers that do not have an investment grade rating. This risk may also be associated with the funds in which the fund invests.
- Inflation risk: The sub-fund invests in both equities and fixed income securities. A rise in inflation could cause the value of the assets in the portfolio to fall. This risk may also be associated with the funds in which the fund invests.
- Sustainability risk: Environmental and/or social aspects are not systematically part of the sub-fund's investment selection process. This may result in the sub-fund being more exposed to companies that have a negative impact on sustainability. This risk may also be associated with the funds in which the fund invests.

This product does not include any protection from future market performance so you could lose some or all of your investment.

- the other holding periods we have assumed the product performs as shown in the moderate scenario
- that EUR 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	217 EUR	807 EUR
Annual cost impact (*)	2.2%	1.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7,5% before costs and 6,4% after costs.

Composition of costs

We may share part of the costs with the person selling you the product to cover the services they provide to you. These figures include the maximum distribution fee that the person selling you the product may charge (1,0% of the amount invested). This person will inform you of the actual distribution fee.

One-off costs upon entry or exit		If you exit after 1 year
