WHAT IS THIS PRODUCT?	

Type: Fonds Commun de Placement (FCP)

Maturity: This product does not have a maturity date

Targeted retail investors: This product may be suitable for retail investors with an intermediate level of knowledge of financial markets and products who seek international bonds and other debt securities exposure and who accept the risk of losing part of the invested capital. This product is not suitable for investors who do not have the recommended investment horizon (3 years).

Objectives:

The investment objective is to achieve, by applying a Socially Responsible Investment (SRI) management approach, over the recommended investment horizon of 3 years, a return (net of charges) above the following simple benchmark: ICE BofAML Euro Financial Index. The benchmark is expressed in EUR. Nets dividends or coupons are reinvested.

To achieve this investment objective, the strategy is based on active management of the portfolio invested mainly in subordinated debt or any securities not considered as ordinary shares issued by financial institutions. The investment process combines a top-down approach (strategic and geographical allocation approach) and a bottom-up approach

(selection of investment vehicles on a fundamental basis after analysing the credit quality of issuers and the characteristics of the securities).

The Fund invests only in bonds or securities issued by issuers whose registered office is in an OECD member country and/or in issues or securities listed on a stock exchange in one of these countries.

To build his portfolio, the portfolio manager conducts his own analysis of the securities. He also refers to agency ratings but does not rely on them solely and mechanically.

The Fund's portfolio comprises:

- up to a maximum of 100% of the net assets in securities issued by issuers in the Investment Grade category (rated as such by the rating agencies) or equivalent based on the management company's analysis and, within a limit of 20% of the net assets, in bonds or securities issued by issuers in the speculative/High Yield category (rated as such by the rating agencies) or equivalent based on the management company's analysis, or not rated by a rating agency. Speculative/High Yield bonds or securities may not exceed a maximum of 70% of the Fund's net assets. - up to a maximum of 10% of the net assets in ordinary shares arising from a conversion or exchange of debt.

- up to a maximum of 10% of the net assets in French or European money market, short-term money market or bond UCITS, provided that these funds themselves invest less than 10% of their assets in other UCIs. These UCIs may be managed by Lazard Frères Gestion; - up to 100% of the net assets in securities with embedded derivatives;

 - up to 30% of the net assets in contingent convertible bonds ("CoCos");
- up to 100% of the net assets in interest-rate and currency futures, interest-rate and currency options, interest-rate and currency swaps, credit derivatives (with CDS limited to a maximum of 40% of the net assets) and forward exchange contracts traded on regulated, over-the-counter or organised markets to hedge and/or expose the portfolio to interest rate and foreign exchange risk. Up to a maximum of 10%, the Fund may use equity futures and options.

The modified duration is managed within a range of 0-8.

The UCI promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the "SFDR"

As part of SRI management, the analyst-managers analyse portfolio companies using extra-financial criteria. A score of 1 to 5 is established for each company based on a quantitative and qualitative approach.

The methodology for covering issuers through ESG analysis is detailed in the prospectus.

SRI selection process: The analyst-manager ensures that an ESG rating that is higher than the average of the top 80% scores of the financial universe of our extra-financial rating partners is maintained.

Benchmark Information: The UCI is actively managed. The management strategy is unconstrained by the securities making up the benchmark index.

Allocation of distributable income:

- Allocation of net income: Accumulation

- Allocation of net realised capital gains: Accumulation

Right of redemption: Orders are executed as indicated in the table below

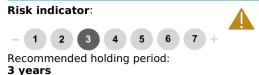

Business day	Day on which NAV is set (d)	The business day following the valuation day (D+1)	Two business days following the valuation day (D+2)

WHAT ARE THE RISKS AND WHAT'S IN IT FOR ME?

The risk indicator assumes that you keep the product for 3 years. The actual risk may be very different if you opt to exit before the end of the recommended holding period, and you may get less in return.

This product provides no capital guarantee or protection. As such, the investor may not get back the full amount of the initial investment during redemption.

Other sizeable risks not taken into account in the indicator:

- Credit risk for Cocos
- Risks associated with derivatives

The synthetic risk indicator is used to assess the risk level of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified this product in the risk class 3 out of 7, which is a risk class between low and medium.

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you get from this product depends on future market performance. Future market developments are uncertain and cannot be accurately predicted.

The unfavourable, intermediate and favourable scenarios presented represent examples using best and worst case performance, as well as the average performance of the product over the past 10 years. The scenarios presented represent examples based on past performance and certain assumptions. Markets could evolve very differently in the future.

WHAT HAPPENS IF LAZARD FRERES GESTION SAS IS UNABLE TO MAKE THE PAYMENTS?

LAZARD FRERES GESTION SAS manages the product but the product's assets are kept by the custodian. Consequently, a default by LAZARD FRÈRES GESTION SAS would not affect the product's assets.

WHAT WILL THIS INVESTMENT COST ME?

The person who sells you this product or who gives you advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest, how long you hold the product and the performance of the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed:

- that in the first year you would get back the amount you invested (annual return of 0.0%)
- that for the remaining holding periods, the product evolves as indicated in the intermediate scenario

- that 10000 EUR are invested

The costs presented do not include any life insurance policy costs.

	If you exit after 1 year	If you exit after 3 years
Total costs	89€	305 €
Impact of annual costs (*)	0.9%	0.9% every year

(*) It shows how costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the

recommended holding period, your average return per year is expected to be 5.1% before deduction of costs and 4.2% after that deduction.
