What is this product?

TYPE OF PRODUCT

The product is a sub-fund of PCFS, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

The objective of the sub-fund is to obtain an absolute return on the investment, independently from the performance of the markets.

The sub-fund will have a high level of diversification and may invest in all asset classes and categories of UCITS or other UCIs (equities, bonds, cash and related eligible instruments like ETF, futures (...)).

The allocation between all these asset classes will reflect the micro and macroeconomic analysis of the Investment Manager (Pure Capital S.A.). Thus, the allocation of the portfolio between the different asset classes and categories of UCITS or other UCIs but also the weighting of geographical zones, sectors, ratings and maturities may vary substantially with the time according to the manager's expectations.

Therefore:

- The sub-fund will be exposed, at most 50% of the net assets of the sub-fund, directly or indirectly to equities and other securities giving or capable of giving, directly or indirectly, access to capital or voting rights, traded on eurozone and/or international markets, potentially including a significant portion of the investments in the emerging countries.
- The sub-fund will be invested, without any restriction, to the full extent and within the limits permitted by the 2010 Law, directly or indirectly in debt securities, i.e. fixed rate bonds, transferable debt securities, treasury bills, variable rate bonds, convertible bonds and inflation-linked bonds, potentially including a significant portion of investments in the emerging countries.
- The sub-fund may also invest in eligible instrument in order to capture trends in the commodity market. The sub-fund may invest up to 15% of the net assets into eligible instrument whose underlying exposure is related to the commodity markets. This will be implemented exclusively through eligible exchange traded commodity securities. These eligible exchange traded commodities securities are structured like a zero coupon note tracking a commodity index. No physical delivery must be considered. No embedded derivatives should be linked to that note.
- The sub-fund may not invest more than 10% of its net assets in shares or units of UCITS or other UCIs. In the case of fund investments, the target fund(s) might have different investment strategies or restrictions.

The sub-fund is actively managed and is not managed in reference to a benchmark.

This class is accumulative.

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 3 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		3 years EUR 10 000		
		If you exit after 1 year	If you exit after 3 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	EUR 5 480	EUR 6 450	
	Average return each year	-45.2%	-13.6%	
Unfavourable scenario	What you might get back after costs	EUR 8 600	EUR 8 860	This type of scenario occurred for an investment in the product between September 2021 and November 2022.
	Average return each year	-14.0%	-3.9%	
Moderate scenario	What you might get back after costs	EUR 10 080	EUR 10 840	This type of scenario occurred for an investment in the product between December 2013 and December 2016.
	Average return each year	0.8%	2.7%	
Favourable scenario	What you might get back after costs	EUR 11 750	EUR 12 160	This type of scenario occurred for an investment in the product between January 2019 and January 2022.
	Average return each year	17.5%	6.7%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if PURE CAPITAL S.A. is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with RBC Investor Services Bank S.A. and are segregated from the assets of other sub-funds of the PCFS. The assets of the Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 431	EUR 769
Annual cost impact (*)	4.3%	2.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.1% before costs and 2.7% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay in when entering this Investment.	Up to EUR 300
