What is this product?

Type:

The Fund is a sub-Fund of M&G (Lux) Investment Funds 1, a société d'investissement à capital variable (SICAV), organised as an umbrella fund with segregated liability between sub-Funds. Governed and established under Luxembourg Law as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Objective:

The Fund aims to provide a combination of capital growth and income of 5-10% on average per year over any three-year period.

Core investment: the Fund typically invests via derivatives in a mix of assets from anywhere in the world within the following net allocation ranges:

- 0-80% in fixed income securities (including bonds and asset-backed securities)
- 20-60% in company shares
- 0-20% in other assets (including convertibles, contingent convertible debt securities and property-related securities).

The Fund may also invest in these assets directly or through other funds. The allocation ranges shown above are on a net basis, that is, 'long' positions (investments that profit from a rise in asset prices) net of 'short' positions (investments held via derivatives that profit from a fall in asset prices). The Fund may invest in China A-Shares and in Chinese bonds denominated in renminbi. A minimum of 60% of the Fund is typically invested in assets denominated in euro, US dollar and sterling.

Other investments: the Fund may invest in other funds and cash or assets that can be turned into cash quickly.

Derivatives usage: for investment purposes and to reduce risk and cost.

Strategy in brief: the Fund employs a highly flexible investment approach. The investment manager has the freedom to allocate capital between different types of assets in response to changes in economic conditions and asset prices. The approach combines in-depth research to work out the 'fair' value of assets over the medium to long term, with analysis of the market's short-term reactions to events, to identify investment opportunities. The Fund seeks to manage risk by investing globally across multiple asset classes, sectors, currencies and countries. Where the investment manager believes opportunities are limited to a few areas, the portfolio may be very concentrated in certain assets or markets.

Benchmark: the Fund is actively managed and has no benchmark. Investors can assess the performance of the Fund by its objective to provide a combination of capital growth and income of 5-10% on average per year over any three-year period.

Intended Retail Investor:

The Fund is for retail, professional and institutional investors who want a combination of income and capital growth from an actively managed fund invested across different types of assets. The return on your Fund is directly related to the value of its underlying assets, which for equities is determined by the market's view on how well each company is performing, and for bonds the credit rating and the markets' view of the debt issuer. Broader economic and political themes can also influence the return. As an investor your capital is at risk. The value of your portfolio, and any income you may receive from it, can go down as well as up. You may get back less than you originally invested.

Any income from the Fund will be rolled up into the value of your investment.

Term: The Fund has no set maturity date but is designed to be held for a minimum of 3 years. However, it is possible for the Directors of the company to terminate the Fund, without the prior consent of the shareholders, where it is deemed to be uneconomic to run or in the best interests of shareholders. Refer to the Prospectus for more information.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product may lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 3 year(s). This product has no maturity date.

We have classified this product as 3 out of 7, which is a medium-low risk class.

Performance scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund over the last 15 years. Markets could develop very differently in the future.

What happens if M&G Luxembourg S.A. is unable to pay out?

The assets of the Fund are held in safekeeping by the Depositary detailed in the prospectus. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). The Depositary is required by Luxembourg law to be member of the Fonds de Garantie des Dépôts Luxembourg (FGDL, the Luxembourg Deposit Guarantee Fund) <https://www.cssf.lu/en/protection-of-depositors-and-investors/>

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Table 1: Costs over time				
Scenarios	If you exit after: 1 year		If you exit after: 3 years*	
Total costs	€245	2.5%	€523	5.2%
