What is this product?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund aims to achieve long-term capital growth through a diversified portfolio of shares in clean technology companies.

In addition to its financial objective, the sub-fund generates a tangible social impact, through the intermediary of the Distribution Coordinator of the SICAV (Funds For Good), whose approach is certified by Forum Ethibel. After deducting its operating costs, Funds For Good pays out either 50% of its net profits or 10% of its turnover (whichever amount is higher) to the social project that it has set up itself and which it manages: "Funds For Good Impact". "Funds for Good Impact" devotes all of its financial resources to the fight against poverty and to job creation by granting interest-free unsecured loans and support to disadvantaged people with a business plan, thus enabling them to launch their activity. More information is available at www.fundsforgood.eu.

The sub-fund invests directly in the shares of so-called clean-tech companies listed on regulated markets.

The notion of clean tech covers all products and services intended to ensure cleaner and more efficient use of the earth's natural resources such as: energy, water, air or raw materials. The sub-fund targets companies operating in sectors of activity such as renewable energies, energy efficiency, water treatment, waste recycling and pollution control, as well as state-of-the-art materials.

On an ancillary basis, the sub-fund may invest in the shares of clean-tech companies listed on regulated markets located in emerging countries.

Environmental, social and governance criteria: The revenue is kept and reinvested by the sub-fund. Moreover, the sub-fund will not invest in companies linked to sectors of activity such as the tobacco, arms and coal industries or in companies linked to, inter alia, environmental scandals, human rights violations

and corruption.

The sub-fund promotes environmental attributes and/or social benefits within the meaning of Article 8 of the Sustainability Regulation. The selection of assets making up the sub-fund's portfolio will comply with Funds For Good's Responsible Investment Policy, which is available in full at www.fundsforgood.eu.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended retail investor

This product is intended for investors seeking income and capital growth with a long term perspective (at least 3 years).

Other information

Depository: Banque de Luxembourg

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the management company or on www.fundsforgood.eu. The prospectus and the periodic reports are prepared for the entire fund and are available in French. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2021 and this share class in 2021.

The currency of the share class is expressed in EUR.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money

because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: equity issuer risk, liquidity risk, political, financial, fiscal instabilities risks, credit risk, other risk factors

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period: 3 years

Example investment: 10,000 EUR

		If you exit after 1 year	If you exit after 3 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,900 EUR	2,920 EUR
	Average return each year	-81.0 %	-33.7 %
Unfavourable	What you might get back after costs	7,380 EUR	3,620 EUR
	Average return each year	-26.2 %	-28.8 %
Moderate	What you might get back after costs	10,390 EUR	11,540 EUR
	Average return each year	3.9 %	4.9 %
Favourable	What you might get back after costs	12,750 EUR	13,740 EUR
	Average return each year	27.5 %	11.2 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the

future.

This type of scenario occurred for an investment between 2012 and 2022, by referring to a benchmark between 2012 and 2021.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FFG is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	420 EUR	766 EUR
Annual cost impact (*)	4.2 %	2.3 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.0% before costs and 4.9% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount. These figures include the maximum distribution fee that the person selling you the product may charge (0.4% of amount invested / 40 EUR). This person will inform you of the actual distribution fee.
