

DECEMBER 2022

PROSPECTUS UBAM

Variable Capital Investment Company Luxembourg

UNION BANCAIRE PRIVÉE

Subscriptions are only valid if they are based on the current prospectus and the Key Investor Information Document (KIID), accompanied by the most recent annual report, as well as the most recent semi-annual report if published after the most recent annual report. No information may be provided by any party on the investment company which is not contained in the prospectus, the KIID or in any other document referred to in the prospectus and which is available to the public.

Shares in UBAM (hereafter "UBAM" or the "SICAV") may not be acquired or held, directly or indirectly, by U.S. Persons as defined below; neither is the transfer of the SICAV's shares to such investors authorised.

For the purposes of this Prospectus (but subject to applicable law, including Rule 902(k) of Regulation S promulgated under the US Securities Act 1933, as amended),

Definition of United States of America and U.S. Person

A) "United States" means:

The United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

B) "U.S. Person" means:

1. any natural person who is a citizen of the United States (including dual citizens and U.S. born);
2. any natural person resident of or in the United States;
3. any partnership or corporation organized or incorporated under the laws of the United States;
4. any estate of which any executor or administrator is a U.S. Person or the income of which is subject to US income tax regardless of source;
5. any trust of which any trustee is a U.S. Person or the income of which is subject to US income tax regardless of source;
6. any agency or branch of a foreign entity located in the United States;
7. any non-discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary for the benefit or account of a U.S. Person;
8. any discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary organized, incorporated, or (if an individual) resident in the United States; and
9. any partnership or corporation if:
 - (i) organized or incorporated under the laws of any foreign jurisdiction; and
 - (ii) formed by a U.S. Person principally for the purpose of investing in securities not registered under the US Securities Act 1933 as amended, unless it is organized or incorporated, and owned, by accredited investors (as defined in Rule 501(a) under the US Securities Act 1933 as amended) who are not natural persons, estates or trusts.
10. any entity organised principally for passive investment such as a pool, investment company or other similar entity; provided that the units of participation in the entity held by US Persons or persons otherwise not qualifying as "qualified eligible persons" (as defined in Rule 4.7 under the US Commodity Exchange Act) represent in the aggregate 10% or more of the beneficial interest in the entity, and that such entity was formed principally for the purpose of facilitating investment by US Persons in a pool with respect to which the operator is exempt from certain requirements of Part 4 under the US Commodity Exchange Act regulations by virtue of its participants being non-US Persons.

C) "U.S. Person" does not include:

1. any discretionary account or similar account (other than an estate or trust) held for the benefit or account of a non-U.S. Person by a dealer or other professional fiduciary organized, incorporated or, if an individual, resident in the United States;
2. any estate of which any professional fiduciary acting as executor or administrator is a U.S. Person if:
 - (i) an executor or administrator of the estate who is not a U.S. Person has sole or shared investment discretion with respect to the assets of the estate; and
 - (ii) the estate is governed by non-U.S. law;

3. any trust of which any professional fiduciary acting as trustee is a U.S. Person if a trustee who is not a U.S. Person has sole or shared investment discretion with respect to the trust assets, and no beneficiary of the trust (and no settlor if the trust is revocable) is a U.S. Person;
4. an employee benefit plan established and administered in accordance with the law of a country other than the United States and customary practices and documentation of such country;
5. any agency or branch of a U.S. Person located outside the United States if:
 - (i) the agency or branch operates for valid business reasons; and
 - (ii) the agency or branch is engaged in the business of insurance or banking and is subject to substantive insurance or banking regulation, respectively, in the jurisdiction where located; or
6. the International Monetary Fund, the International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the United Nations and their agencies, affiliates and pension plans, and any other similar international organizations, their agencies, affiliates and pension plans."

Foreign Account Tax Compliance Act ("FATCA")

Certain payments of U.S. source fixed or determinable annual or periodic income made after 31 December 2013, certain payments attributable to gross proceeds from the sale or other disposition of property that could produce U.S. source interest or dividends made after 31 December 2014, and certain payments (or a portion thereof) by a foreign financial institution made after 31 December 2016, to a foreign financial institution or other foreign entity will be subject to a withholding tax of 30% unless various reporting requirements are satisfied. It is expected that the SICAV and each sub-fund and each non-U.S. entity in which the SICAV invests (each, an "Offshore Entity") will be treated as a "foreign financial institution" for this purpose. As a foreign financial institution, in order to be relieved of this 30% withholding tax, unless it is otherwise deemed-compliant, it is expected that each Offshore Entity will need to enter into an agreement (a "Withholding Agreement") with the U.S. Internal Revenue Service (the "IRS"), by 30 June 2013 requiring each Offshore Entity to, among other requirements: (i) obtain and verify information on all of its interest holders to determine which interest holders are "Specified U.S. Persons" (i.e., U.S. persons for U.S. federal income tax purposes other than tax-exempt entities and certain other persons) and "U.S. Owned Foreign Entities" (i.e., foreign entities with a "substantial United States owner" — meaning greater than 10% ownership by a Specified U.S. Person — or, in the case of an interest holder that is a foreign financial institution, any ownership by a Specified U.S. Person); (ii) annually report information on its interest holders that are non-compliant with FATCA (in the aggregate) Specified U.S. Persons and U.S. Owned Foreign Entities to the IRS; (iii) attempt to obtain a waiver from each U.S. Owned Foreign Entity of any foreign law that would prevent the Offshore Entity from reporting to the IRS any required information obtained with respect to such U.S. Owned Foreign Entity and, if such waiver is not obtained, to mandatorily redeem the U.S. Owned Foreign Entity; and (iv) publish the percentage of its total assets which are U.S. assets for this purpose on a quarterly basis (its "Passthru Payment Percentage"). No assurances can be provided that each Offshore Entity, if required will be able to enter into and comply with a Withholding Agreement and that each Offshore Entity will be exempt from this 30% withholding tax.

Even if the SICAV and each sub-fund enters into a Withholding Agreement, any shareholder of the SICAV or a sub-fund that fails to produce the required information or that is a foreign financial institution that itself, if required, does not enter into a Withholding Agreement with the IRS (a "Non-Compliant Shareholder") will be subject to 30% withholding on all or a portion of any redemption or dividend payments made by the SICAV or applicable sub-fund after 31 December 2016 which may be based on the Passthru Payment Percentage of the SICAV or such sub-fund. In this regard, each shareholder will agree to provide any required information upon request from the SICAV, which request will be made once the IRS has adopted a form of Withholding Agreement. In addition, in certain circumstances, where the SICAV or a sub-fund is unable to obtain a waiver of any foreign law that would prevent it from reporting to the IRS any required information in respect of a Shareholder, the SICAV or applicable sub-fund may be required to mandatorily redeem such Shareholder. Moreover, the SICAV may create a separate class in respect of and/or exercise its right to completely redeem a Non-Compliant shareholder (at any time upon any or no notice). Shareholders should be aware that the term "foreign financial institution" is very broad and generally will include, among others, any shareholder that holds financial assets for the account of others as a substantial portion of its business or is engaged, or holds itself out as being engaged, primarily in the business of investing, reinvesting or trading in securities, partnership interests, commodities or any interests in the

foregoing, and, accordingly, Shareholders may need to enter into a Withholding Agreement with the IRS in order to not be treated as a Non-Compliant Shareholder.

The scope of this withholding tax and the information required to be provided by Shareholders in order to not be inco-treated as Non-Compliant Shareholders is not entirely clear, and it is possible that the disclosure obligation described above could be changed (e.g. by subsequent guidance). Shareholders should consult their own tax advisors regarding the potential implications of this withholding tax.

UBAM is registered as an undertaking for collective investment in accordance with the Law of 17 December 2010 governing undertakings for collective investment, as amended (the "2010 Law"). However, this registration does not require any Luxembourg authorities to approve or disapprove the appropriate nature or accuracy of this prospectus or the portfolio of securities held by the SICAV.

The Board of Directors assumes responsibility for the accuracy of any information contained in this prospectus on its issue date.

Any information or assertion not contained in this prospectus or in the reports which form an integral part hereof, must be considered to be unauthorised and therefore untrustworthy. Neither the distribution of this prospectus, nor the offering, issue or sale of the SICAV's shares guarantee that the information given in this prospectus will be accurate at all times after the date of this prospectus. This prospectus will be updated when necessary, in order to take account of any major changes, particularly in case new sub-funds are added. As such, prospective subscribers are advised to ask the SICAV about any later prospectus that may have been published.

Prospective buyers and subscribers for the SICAV's shares are recommended to personally inquire about the possible legal or tax consequences or about any foreign exchange restrictions or regulations that they may encounter in their country of origin, residence or domicile when subscribing for, buying, holding, redeeming, converting or transferring the SICAV's shares.

INTRODUCTION

UBAM, a variable capital investment company ("SICAV"), is an undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg in accordance with part I of the 2010 Law and the Directive 2009/65/CE, as amended, on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS).

The SICAV's objective is to offer its shareholders the possibility to invest in an investment vehicle focused on the growth of the capital invested in a range of transferable securities.

The SICAV offers investors a choice between several sub-funds (each a "Sub-Fund"), each having a different investment objective. Each Sub-Fund constitutes a separate pool of assets, represented by one or more different share classes. The assets of a given Sub-Fund only cover the liabilities, commitments and obligations concerning this Sub-Fund. When the SICAV carries a commitment that relates to an asset from a given pool or a transaction carried out in relation to an asset from a given pool, this commitment will be assigned to the pool in question.

The SICAV therefore comprises multiple Sub-Funds as follows:

Bond Sub-Funds	Denominated in
1. UBAM - ABSOLUTE RETURN FIXED INCOME	EUR
2. UBAM - ABSOLUTE RETURN LOW VOL FIXED INCOME	EUR
3. UBAM - CORPORATE EURO BOND	EUR

-----	-----------------------------	-----

At any time, the SICAV's Board of Directors may decide, in compliance with the Articles of Association, to issue additional Sub-Funds, whose investment objectives differ from the Sub-Funds already created. Upon creation of new Sub-Funds, the prospectus will be adjusted to provide detailed information on these new Sub-Funds.

At all times, the SICAV's capital will be equal to the aggregate net assets of all the Sub-Funds.

Since the SICAV operates as an "open-ended" investment fund, its shares may be issued, redeemed and converted at a price based on the respective net asset values of such shares. No physical shares are issued.

Shares from the SICAV's various classes may be listed on the Luxembourg stock exchange or with others stock exchange.

The Board of Directors of the SICAV

The Board of Directors is responsible for administering and managing the SICAV as well as well as deciding on the launch of new Sub-Funds/types of shares and implementing/adapting their respective investment policies.

The Management Company

UBP Asset Management (Europe) S.A. (the “Management Company”), with its registered office located at 287-289 route d’Arlon, Luxembourg, has been appointed as the Management Company of the SICAV, as authorised by the 2010 Law. Under the terms of the Management Company Agreement concluded for an indefinite period, the Management Company is in charge of the management, administration and distribution of the SICAV. The Management Company Agreement may be terminated by either of the two parties subject to three months’ prior notice.

UBP Asset Management (Europe) S.A., was incorporated on 17 May 2013 for an indefinite period, as a “société anonyme” (“limited company”) governed by the laws of the Grand Duchy of Luxembourg and is licensed as an authorised management company under the chapter XV of the 2010 Law. Its capital, on the date of this prospectus, amounts to CHF 2,900,000. The Management Company is wholly owned by Union Bancaire Privée, UBP SA, Geneva.

The objective of the Management Company is to manage undertakings for collective investment in compliance with Directive 2009/65/EC, as amended. This management activity includes the management, administration and distribution of undertakings for collective investment. According to the Management Company Agreement and under its sole responsibility the Management Company is authorised to delegate all or parts of the duties in connection with the management, administration and distribution functions to third parties duly authorised to perform such functions.

Pursuant to Article 111bis and 111ter of the 2010 Law as amended, the Management Company has established a remuneration policy in line with its own business strategy, objectives, values and long-term interests of the Management Company, those of the SICAV and those of the SICAV’s shareholders. The policy applies for those categories of staff, including senior management, risk takers, control functions, and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profiles of the Management Company or the SICAV. The policy is consistent with and promotes sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profiles or the SICAV’s Articles of Association. It also includes measures to avoid conflicts of interest.

The Management Company remuneration policy and practices also include an assessment of performance set in multi-year framework appropriate to the holding period recommended to the investors of the SICAV managed in order to ensure that the assessment process is based on the longer-term performance of the SICAV and its investment risks, and, as the case may be, that the actual payment of performance-based components of remuneration is spread over the same period.

The policy foresees a remuneration which is composed of a fix and a variable component, which are adequately balanced whereby the latter is long term oriented. The fixed component represents a sufficiently high proportion of the global remuneration to allow, if appropriate, to pay no variable remuneration component. The variable part of the remuneration, in the form of a non- contractual and purely discretionary payment, is fixed considering the individual performance of the employee on one side and the economic situation of the UBP Group on the other side. The employee’s individual performance is assessed based on quantitative and qualitative criteria. The principle of individual performance assessment is based on an assessment of objectives reached as well as an appreciation of the employee’s long-term value creation. The remuneration policy also encourages performance sustainability and long-term stability and aims to avoid inconsiderate risk-taking.

The up-to-date remuneration policy of the Management company, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, are available at <https://www.ubp.com/fr/nos-bureaux/ubp-asset-management-europe-sa> and a paper copy will be made available free of charge upon request at the Management Company's registered office.

The Management Company's Conducting Officers

The Management Company's Board of Directors has delegated the management of the Management Company's business to its Conducting Officers.

The Conducting Officers must ensure that the various service providers to which the Management Company has delegated certain functions in connection with the SICAV (including management, central administration and distribution functions) fulfil their obligations in accordance with the provisions of the 2010 Law, the SICAV's Articles of Association, the prospectus, and the contractual provisions governing relations between the SICAV and each service provider. The Conducting Officers must ensure that the SICAV complies with its investment restrictions and oversee the implementation of the investment policy for the various Sub-Funds. The Conducting Officers will ensure that an appropriate risk management method and processes are used for the SICAV in accordance with the applicable CSSF Circulars.

This risk management method and processes include sustainability risks.

The Conducting Officers must report to the Management Company's Board of Directors on a regular basis.

INVESTMENT MANAGEMENT

As foreseen by the 2010 Law and under the terms of the Management Company Agreement concluded for indefinite period between the SICAV and UBP Asset Management (Europe) S.A., the Management Company is in charge of the investment management of the SICAV and its Sub-Funds.

In consideration of its investment management services, the Management Company will receive an annual management fee (the "Management Fee") payable quarterly and based on the average net assets of each share class of the various Sub-Funds managed during the relevant quarter in accordance with the maximum rates detailed in the "[AVAILABLE SHARES WITHIN THE SUB-FUNDS](#)" chapter.

At its costs and under its responsibility and supervision, the Management Company may appoint one or more third parties of its choice to fulfil all or part of its duties linked to investment management of the Sub-Funds. On the date of this prospectus, the Management Company has delegated the investment management of the SICAV's Sub-Funds to the following entities (the "Managers"):

Sub-Fund	Management delegated to:
UBAM - EUROPEAN CONVERTIBLE BOND	Union Bancaire Gestion Institutionnelle (France) SAS Paris – France
UBAM - GLOBAL CONVERTIBLE BOND	Union Bancaire Gestion Institutionnelle (France) SAS Paris – France
UBAM - GLOBAL HEALTHCARE CONVERTIBLE BOND	Union Bancaire Gestion Institutionnelle (France) SAS Paris – France
UBAM - GLOBAL RESPONSIBLE CONVERTIBLE BOND	Union Bancaire Gestion Institutionnelle (France) SAS Paris – France
UBAM - GLOBAL TECH CONVERTIBLE BOND	Union Bancaire Gestion Institutionnelle (France) SAS Paris – France
UBAM - ANGEL JAPAN SMALL CAP EQUITY	UBP Investments Co, Ltd, Tokyo
UBAM - BELL GLOBAL SMID CAP EQUITY UBAM - BELL US EQUITY	Bell Asset Management Ltd, Melbourne – Australia

Sub-Fund	Management delegated to:
UBAM - DR. EHRHARDT GERMAN EQUITY	DJE Kapital AG Pullach – Germany
UBAM - SNAM JAPAN EQUITY RESPONSIBLE	Sompo Japan Nipponkoa Asset Management Co, Ltd Tokyo – Japan.
ALL OTHER SUB-FUNDS	Union Bancaire Privée, UBP SA Geneva – Switzerland (using the resources of its London and Zürich branches)

The Management Company has the possibility to give imperative and further instructions to the Managers or to withdraw the management mandate with immediate effect when this is in the interest of investors.

The Management Fee will enable the Management Company to remunerate the Managers in consideration of their services.

Soft commissions

The Investment Managers may enter into soft commission arrangements with brokers under which certain business services are obtained and are paid for by the brokers out of the commissions they receive from transactions of the SICAV. Consistent with obtaining best execution, brokerage commissions on portfolio transactions for the SICAV may be directed by the Investment Managers to broker-dealers in recognition of research services furnished by them as well as for services rendered in the execution of orders by such broker-dealers.

The soft commission arrangements are subject to the following conditions: (i) the Investment Managers will act at all times in the best interest of the SICAV and the Management Company when entering into soft commission arrangements; (ii) the research services provided will be in direct relationship to the activities of the Investment Managers; (iii) brokerage commissions on portfolio transactions for the SICAV will be directed by the Investment Managers to broker-dealers that are entities and not to individuals; and (iv) the Investment Managers will provide reports to the Management Company with respect to soft commission arrangements including the nature of the services it receives.

SUB-INVESTMENT MANAGER

For the Sub-Fund UBAM - DIVERSIFIED INCOME OPPORTUNITIES, the Investment Manager has delegated the investment decision making and trade execution regarding the Sub-Fund's investments in convertibles to Union Bancaire Gestion Institutionnelle (France) SAS Paris – France.

INVESTMENT ADVISER

The Management Company may be assisted by one or more investment advisers – external or members of the UBP group – whose mission is to advise the Management Company or the SICAV on investment opportunities.

On the date of this prospectus, there is only one Investment Adviser:

Sub-Fund	Investment Adviser
UBAM - ANGEL JAPAN SMALL CAP EQUITY	Angel Japan Asset Management Co., Ltd, Tokyo

The Management Fee will enable the Management Company to remunerate the Investment Adviser in consideration of its services.

DEPOSITARY BANK

BNP Paribas S.A., Luxembourg Branch has been appointed Depositary Bank of the SICAV under the terms of a written agreement between BNP Paribas S.A., Luxembourg Branch, the Management Company and the SICAV (the “Depositary”).

BNP Paribas S.A., Luxembourg Branch is a branch of BNP Paribas. BNP Paribas is a licensed bank incorporated in France as a Société Anonyme (public limited company) registered with the Registre du commerce et des sociétés Paris (Trade and Companies’ Register) under number No. 662 042 449, authorised by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and supervised by the Autorité des Marchés Financiers (AMF), with its registered address at 16 Boulevard des Italiens, 75009 Paris, France, acting through its Luxembourg Branch, whose office is at 60, avenue J.F. Kennedy, L-1855 Luxembourg, Grand-Duchy of Luxembourg, registered with the Luxembourg Trade and Companies’ Register under number B23968 and supervised by the Commission de Surveillance du Secteur Financier (the “CSSF”).

The Depositary performs three types of functions, namely (i) the oversight duties (as defined in Art 34(1) of the law of December 17, 2010), (ii) the monitoring of the cash flows of the SICAV (as set out in Art 34(2) of the law of December 17, 2010), (iii) the safekeeping of the SICAV’s assets (as set out in Art 34(3) of the law of December 17, 2010) and such other services as are agreed in the Depositary Bank Agreement.

Under its oversight duties, the Depositary is required to:

- (1) ensure that the sale, issue, repurchase, redemption and cancellation of Shares effected on behalf of the SICAV are carried out in accordance with the law of December 17, 2010 or with the SICAV’s Articles of Incorporation,
- (2) ensure that the value of Shares is calculated in accordance with the law of December 17, 2010 and the SICAV’s Articles of Incorporation,
- (3) carry out the instructions of the SICAV or the Management Company acting on behalf of the SICAV or the Management Company, unless they conflict with the law of December 17, 2010 or the SICAV’s Articles of Incorporation,
- (4) ensure that in transactions involving the SICAV’s assets, the consideration is remitted to the SICAV within the usual time limits;
- (5) ensure that the SICAV’s revenues are allocated in accordance with the law of December 17, 2010 and its Articles of Incorporation.

The overriding objective of the Depositary is to protect the interests of the Shareholders of the SICAV, which always prevail over any commercial interests.

Conflicts of interest

Conflicts of interest may arise if and when the Management Company or the SICAV maintains other business relationships with BNP Paribas S.A., Luxembourg branch or any other group company in parallel with an appointment of BNP Paribas S.A., Luxembourg branch acting as Depositary.

Such other business relationships may cover services in relation to:

- Outsourcing/delegation of middle or back office functions (e.g. trade processing, position keeping, post trade investment compliance monitoring, collateral management, OTC valuation, fund administration inclusive of net asset value calculation, transfer agency, fund dealing services) where BNP Paribas S.A. or its affiliates act as agent of the SICAV or the Management Company, or
- Selection of BNP Paribas S.A., Luxembourg branch or its affiliates as counterparty or ancillary service provider for matters such as foreign exchange execution, securities lending, bridge financing.

The Depositary is required to ensure that any transaction relating to such business relationships between the Depositary and an entity within the same group as the Depositary is conducted at arm’s length and is in the best interests of Shareholders.

In order to address any situations of conflicts of interest, the Depositary has implemented and maintains a management of conflicts of interest policy, aiming namely at:

- Identifying and analysing potential situations of conflicts of interest;
- Recording, managing and monitoring the conflict of interest situations either in:
 - Relying on the permanent measures in place to address conflicts of interest such as segregation of duties, separation of reporting lines, insider lists for staff members;
 - Implementing a case-by-case management to (i) take the appropriate preventive measures such as drawing up a new watch list, implementing a new Chinese wall, (i.e. by separating functionally and hierarchically the performance of its Depositary duties from other activities), making sure that operations are carried out at arm's length and/or informing the concerned Shareholders of the SICAV, or (ii) refuse to carry out the activity giving rise to the conflict of interest;
 - Implementing a deontological policy;
 - Recording of a cartography of conflict of interests permitting to create an inventory of the permanent measures put in place to protect the SICAV's interests; or
 - Setting up internal procedures in relation to, for instance (i) the appointment of service providers which may generate conflicts of interests, (ii) new products/activities of the Depositary in order to assess any situation entailing a conflict of interest.

In the event that such conflicts of interest do arise, the Depositary will undertake to use its reasonable endeavours to resolve any such conflicts of interest fairly (having regard to its respective obligations and duties) and to ensure that the SICAV and the Shareholders are fairly treated.

Delegation of functions

The Depositary may delegate to third parties the safe-keeping of the SICAV's assets subject to the conditions laid down in the applicable laws and regulations and the provisions of the Depositary Agreement. The process of appointing such delegates and their continuing oversight follows the highest quality standards, including the management of any potential conflict of interest that should arise from such an appointment. Such delegates must be subject to effective prudential regulation (including minimum capital requirements, supervision in the jurisdiction concerned and external periodic audit) for the custody of financial instruments. The Depositary's liability shall not be affected by any such delegation.

The Depositary shall exercise care and diligence in choosing and appointing the third-party delegates so as to ensure that each third-party delegate has and maintains the required expertise, competence. The Depositary shall also periodically assess whether the third-party delegates fulfil applicable legal and regulatory requirements and will exercise ongoing supervision over each third-party delegate to ensure that the obligations of the third-party delegates continue to be competently discharged.

A potential risk of conflicts of interest may occur in situations where the delegates may enter into or have a separate commercial and/or business relationship with the Depositary in parallel to the custody delegation relationship.

In order to prevent such potential conflicts of interest from crystalizing, the Depositary has implemented and maintains an internal organisation whereby such separate commercial and / or business relationships have no bearings on the choice of the delegate or the monitoring of the delegates' performance under the delegation agreement.

Miscellaneous

A list of these delegates and sub-delegates for its safekeeping duties is available in the website <https://securities.cib.bnpparibas/app/uploads/sites/3/2021/11/ucitsv-list-of-delegates-sub-delegates-en.pdf>. Such list may be updated from time to time.

Updated information on the Depositary's custody duties, a list of delegations and sub-delegations and conflicts of interest that may arise, may be obtained, free of charge and upon request, from the Depositary.

The SICAV and the Management Company acting on behalf of the SICAV may release the Depositary from its duties with ninety (90) days written notice to the Depositary. Likewise, the Depositary may resign from its duties with ninety (90) days written notice to the SICAV. In that case, a new depositary must be designated to carry out the duties and assume the responsibilities of the Depositary, as defined in the agreement signed to this effect. The replacement of the Depositary shall happen within two months.

The fees in consideration for the Depositary Bank's services, covering both the custody and the monitoring of the assets, are included in the Service Fee as mentioned in the ["FEES AND EXPENSES BORNE BY THE SICAV"](#) chapter.

BNP Paribas S.A., Luxembourg Branch, being part of a group providing clients with a worldwide network covering different time zones, may entrust parts of its operational processes to other BNP Paribas Group entities and/or third parties, whilst keeping ultimate accountability and responsibility in Luxembourg. More pertinently, entities located in France, Belgium, Spain, Portugal, Poland, USA, Canada, Singapore, Jersey, United Kingdom, Luxembourg, Germany, Ireland and India are involved in the support of internal organisation, banking services, central administration and transfer agency service. Further information on BNP Paribas S.A., Luxembourg Branch international operating model may be provided upon request by the Company and/or the Management Company.

ADMINISTRATIVE AGENT, REGISTRAR AND TRANSFER AGENT

As foreseen by the 2010 Law and under the terms of the Management Company Agreement concluded for indefinite period between the SICAV and UBP Asset Management (Europe) S.A., the Management Company is in charge of the central administration of the SICAV.

The fees received by the Management Company in consideration of its central administration services rendered to the SICAV (the "Administration Fee") are included in the Service fee as mentioned in the ["FEES AND EXPENSES BORNE BY THE SICAV"](#) chapter.

The function of central administration agent of the SICAV is delegated to CACEIS Bank Luxembourg ("CACEIS"), under the supervision of the Management Company. CACEIS Bank Luxembourg is a bank incorporated as a société anonyme under the laws of Luxembourg. Its registered office is situated at 5, allée Scheffer, L-2520 Luxembourg. With effect as of 31st December 2016, CACEIS Bank Luxembourg was through a cross-border merger by way of absorption by CACEIS Bank France, a public limited liability company (société anonyme) incorporated under the laws of France with a share capital of 440,000,000 Euros, having its registered office located at 89-91, rue Gabriel Péri, 92120 Montrouge identified under number 692 024 722 RCS Paris, turned into the Luxembourg branch of CACEIS Bank France and was named CACEIS Bank Luxembourg Branch. CACEIS Bank Luxembourg Branch is empowered to delegate, under its full responsibility, all or part of its duties as central administration agent to a third Luxembourg entity, with the prior consent of the Board of Directors. CACEIS has been appointed as the Administrative Agent, Registrar and Transfer Agent under the terms of an agreement concluded for an indefinite period.

As registrar and transfer agent, CACEIS is primarily responsible for the issue, conversion and redemption of shares and maintaining the register of shareholders of the SICAV. As administrative agent, CACEIS is responsible for calculating and publishing the net asset value (NAV) of the shares of each Sub-Fund pursuant to the 2010 Law and the Articles of Association of the SICAV and for performing administrative and accounting services for the SICAV as necessary.

Any external services linked to specific one-off work provided by CACEIS are billed separately to the SICAV.

GENERAL DISTRIBUTOR

Under a general distribution agreement, Union Bancaire Privée, UBP SA, Geneva has been appointed as general distributor (the “General Distributor”) for the SICAV’s shares, in order to:

- organise and oversee the marketing and distribution of the SICAV’s shares, and
- centralise investors’ subscription, redemption or conversion orders for the SICAV’s shares that are submitted directly to Union Bancaire Privée, UBP SA.

This agreement between the Management Company, the SICAV and the General Distributor is entered into for an indefinite period and may be terminated by either contracting party subject to one-month notice.

In consideration for its general distributor services, the General Distributor receives an annual fee (the “General Distributor Fee”) for Type A, A+, U, U+, S, R, K and X shares*, payable quarterly and calculated based on the average net assets of each one of these share Types for the SICAV’s various Sub-Funds during the quarter in question. To date, no fees are envisaged for Type I, I+, F, M, V, Y and Z shares*.

The maximum rates applicable for the Sub-Funds are detailed in the [“AVAILABLE SHARES WITHIN THE SUB-FUNDS”](#) chapter.

It is understood that all investors are entitled to submit their subscription, redemption or conversion orders directly to the Administrative, Registrar and Transfer Agent.

** Please refer to the [“TYPES OF SHARES”](#) chapter.*

MARKETING AGENT

Union Bancaire Privée, UBP SA, Geneva has been appointed as Marketing Agent. Union Bancaire Privée, UBP SA, will promote and market the SICAV, in the European Economic Area, in Switzerland or in a country which is otherwise member of the GAFI/FATF or a GAFI/FATF-Associate Member, to the exclusion, however, of the United States of America, coordinate the marketing activities of the local distributors and the reporting duties in consideration of the distribution activities.

In consideration for its marketing agent services, the Marketing Agent receives an annual fee (the “Marketing Fee”) for Type A, A+, U, U+, R, S, K and X shares*, payable quarterly and calculated based on the average net assets of each one of these share Types for the SICAV’s various Sub-Funds during the quarter in question. To date, no fees are envisaged for Type I, I+, F, M, V, Y and Z shares*.

The maximum rates applicable for the Sub-Funds are detailed in the [“AVAILABLE SHARES WITHIN THE SUB-FUNDS”](#) chapter.

** Please refer to the [“TYPES OF SHARES”](#) chapter.*

TYPES OF SHARES

Within each Sub-Fund, shareholders may be offered various types of shares (“Types”):

- Type A shares
- Type A+ shares with the same characteristics as the A shares, but subject to a lower Management Fee and the same minimum initial subscription amount as I+ shares. The minimum amount can be divided among several classes of each Sub-Fund.
- Type I shares, reserved exclusively for institutional investors who may subscribe on their own behalf or on behalf of third parties, who must also be institutional investors. These shares will be subject to a lower Management Fee and will not have any marketing or general distributor fees.

- Type I+ shares, reserved exclusively for institutional investors who may subscribe on their own behalf or on behalf of third parties, who must also be institutional investors. These shares will be subject to a lower Management Fee and will not have any marketing or general distributor fees. For this Type I+, the minimum **initial** subscription amount is:

Sub-Funds	Minimum initial subscription amount or equivalent in another currency

The minimum amount can be divided among several classes of each Sub-Fund.

At the date of this prospectus, Type I+ shares are only available for the aforementioned Sub-Funds.

- Type U / U+ shares, only available for:
 - investors who need to be pre-approved by the SICAV's Board of Directors and who purchase the Shares indirectly through a financial intermediary (such as a fund platform or wealth management firm) which provides either:
 - (i) portfolio management services; or
 - (ii) independent investment advisory services; or
 - (iii) similar services based on agreements specifically providing for investment in retrocession-free share or unit classes;
 - investors in the United Kingdom, the Netherlands and such other countries as may be decided by the SICAV's Board of Directors from time to time who purchase the Shares directly;
 - other investors having received a specific approval given by the SICAV's Board of Directors.
- Type U+ shares have the same characteristics as the U shares, but subject to a lower Management Fee and the same minimum initial subscription amount as I+ shares. The minimum amount can be divided among several classes of each Sub-Fund.

These U and U+ shares do not entitle to any retrocessions. U / U+ shares are retail distribution review (RDR) compliant.

- Type R shares
- Type F shares, only available for UBAM - BIODIVERSITY RESTORATION, UBAM - POSITIVE IMPACT EMERGING EQUITY, UBAM - POSITIVE IMPACT EQUITY and UBAM - POSITIVE IMPACT GLOBAL EQUITY, which are reserved for selected charitable organisations who have received specific approval given by the SICAV's Board of Directors.
- Type K shares, which are reserved for investors in the United Kingdom, the Netherlands and such other countries as may be decided by the SICAV's Board of Directors and who have received specific approval given by the SICAV's Board of Directors. K shares do not entitle to any retrocessions.
- Type M shares, only available for some Sub-Funds, which are reserved for UBP clients who have signed a Discretionary Portfolio Management with Union Bancaire Privée, UBP SA or with any other member of the UBP Group.
- Type S shares, only available for:
 - investors who purchase the shares through a Spanish distributor which need to be pre-approved by the SICAV's Board of Directors and have signed a specific cooperation agreement with Union Bancaire Privée, UBP SA or any other member of the UBP Group, which provide either:
 - (i) portfolio management services; or
 - (ii) independent investment advisory services; or
 - (iii) similar services based on agreements specifically providing for investment in retrocession-free share or unit classes

These shares do not entitle to any retrocessions

- Type V shares, only available for external (non UBP) banking groups or asset managers which entered into specific corporate restructuring transactions (mergers, acquisitions or joint ventures) with Union Bancaire Privée, UBP SA or any of its subsidiaries / branches who invest on behalf of clients on the basis of discretionary mandates and have received a specific approval given by the SICAV's Board of Directors.
- Type X/X1 shares, which are reserved for distributors who have signed a specific cooperation agreement with Union Bancaire Privée, UBP SA or with any other member of the UBP Group who invest on behalf of their clients.
- Type Y/Y1 shares, which are reserved for institutional investors who have signed a specific cooperation agreement with Union Bancaire Privée, UBP SA or with any other member of the UBP Group.
- Type Z shares, which are reserved for institutional investors who have signed a specific remuneration agreement with Union Bancaire Privée, UBP SA or with any other member of the UBP Group.

For the Sub-Fund UBAM - BIODIVERSITY RESTORATION, sub-Type of A and I share classes are available. These share classes bear a higher management and/or performance fee than the standard A and I classes, and

part of this management fee and/or performance fee is donated to non-governmental organization chosen by the Fund's Board of Directors. These shares will include the letter "N" in their denomination. "N+" share classes are also available with higher management fee and/or performance fee than the "N" share class and the extra management fee and/or performance fee is donated to the chosen non-governmental organization. Considering the donation to non-governmental organization(s), these "N" shares do not entitle to any retrocessions

4 versions of these APCN, APCN+, IPCN, IPCN+ are available, each for a specific non-governmental organization designated by the Fund's Board of Directors.

The distinction between Type A and Type R shares is the different fee levels that apply to these different Types, as set out in the following pages of this prospectus.

Regarding access to Type I, I+, Y and Z shares, institutional investors shall be understood to be:

- Investors within the meaning of Article 174 (2) of the 2010 Law;
- Entities managing shares or large funds such as credit institutions, financial sector professionals, insurance and reinsurance companies, investment and pension funds, holding companies acting on their own behalf or on behalf of clients on the basis of discretionary mandates;
- National, regional or local authorities;
- The various Sub-Funds of the SICAV in accordance with Article 181(8) of the 2010 Law.

It is each investor's responsibility to invest in the appropriate Type of shares according to their definition(s).

For the Sub-Fund UBAM - HYBRID BOND, considering the investment of up to 100% in Contingent Convertible bonds ("CoCos"), the minimum initial subscription amount for all Types of shares is USD 50'000 or equivalent.

There is no minimum subscription for any other Sub-Fund, except for the I+, A+ and U+ Type of shares.

Early bird Shares

Shares with reduced fees may be offered to early investors for some Sub-Funds according to the chapter "[AVAILABLE SHARES WITHIN THE SUB-FUNDS](#)". These shares will include the letter "E" in their denomination. Their availability will be at the discretion of the SICAV's Board of Directors and will not entitle to any retrocessions, unless otherwise exceptionally authorized by the SICAV's Board of Directors. However, and in any event, Type U, Type K and Type S shares will not entitle to any retrocessions.

Shares with performance fees

These shares will include the letter "P" in their denomination. They carry a performance fee as detailed in the "[PERFORMANCE FEE](#)" chapter.

Shares in currencies other than the Sub-Fund's base currency

Shares in currencies other than the base currency of each Sub-Fund may be offered for some Sub-Funds according to the chapter "[AVAILABLE SHARES WITHIN THE SUB-FUNDS](#)". These shares will bear all exchange-related costs concerning the subscription price and/or redemption price respectively received or paid in the Sub-Fund's base currency, costs relating to the calculation of the net asset value and any related costs.

The currency risk for these shares may or may not be hedged.

The hedged shares will include the letter "H" in their denomination and will be covered in a range between 95% and 105% by hedging transactions.

Depending of the concerned Sub-Funds, the objective of the hedging transactions is:

- either to cover the exchange-related risks between the base currency of a Sub-Fund and the share's currency or;

- to cover the exchange-related risks between the currencies of the Sub-Fund's underlyings or the currencies of the related benchmark and the share's currency (hence, some of these Sub-Funds also offer hedged share classes denominated in the base currency of the Sub-Funds). For these hedged shares, due to many currencies to hedge for each share class and the operational constraints, shareholders must consider that the forex hedging may be less accurate than those of where the hedging is between share currency and base currency.

The table below details which hedging method is applied for concerned Sub-Funds:

Sub-Funds	Hedging method
UBAM - 30 GLOBAL LEADERS EQUITY UBAM - 30 EUROPEAN LEADERS EQUITY UBAM - BELL GLOBAL SMID CAP EQUITY UBAM - GLOBAL EQUITY UBAM - GLOBAL FINTECH EQUITY UBAM - SWISS EQUITY *	Hedging transactions aim to cover the exchange-related risks between the currencies of the Sub-Fund's underlyings and the share's currency.
UBAM - GLOBAL AGGREGATE BOND	Hedging transactions aim to cover the exchange-related risks between the currencies of the related benchmark and the share's currency. 100% Bloomberg Barclays Global Aggregate Total Return Index
All others Sub-Funds and shares	Hedging transactions aim to cover the exchange-related risks between the base currency of a Sub-Fund and the share's currency.

* Only the CHF Hedged share class

All the costs and risks resulting from hedging transactions will be borne by the shares denominated in these currencies respectively.

Investors are reminded that the net asset value of shares of a same Sub-Fund denominated in different currencies can evolve differently from each other depending on the fact that they are subject to hedging transactions or not.

Capitalisation or distribution shares

For all the Sub-Funds, each Type may be issued in distribution shares (D shares) or capitalisation shares (C shares).

Distribution shares are denominated and categorised as follows:

- D share classes with annual dividends, for which, as a general rule, the SICAV distributes all net income from investments;
- Dq share classes with quarterly dividends determined at the discretion of the Management Company;
- Dm share classes with monthly dividends determined at the discretion of the Management Company;
- Dm+ share classes with monthly dividends higher than those of Dm share classes determined at the discretion of the Management Company.

The dividends may be paid on income, capital gains and losses and the capital of the Sub-Fund provided that after distribution, the SICAV's net assets exceed the minimum capital required by the 2010 Law.

However, if the amount available for distribution is less than the equivalent of EUR 0.05 per share, no dividend will be declared and the amount will be carried forward to the next financial year.

The Board of Directors of the SICAV reserves the right to determine the Types and classes of shares that will be issued for each Sub-Fund.

The comprehensive list of shares by Sub-Fund is provided in the [“AVAILABLE SHARES WITHIN THE SUB-FUNDS”](#) chapter.

INVESTMENT POLICY AND OBJECTIVES

The Articles of Association empower the SICAV's Board of Directors to determine the investment policy for each Sub-Fund.

The SICAV's main objective is to seek the highest possible return on the invested capital, in accordance with the principle of risk spreading.

The Sub-Fund's base currency is not necessarily identical to the Sub-Fund's investment currencies.

Investors are invited to read this section together with the following chapter [“RISK FACTORS”](#).

SFDR (Sustainable Finance Disclosure Regulation)

SFDR refers to the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector (the "Disclosures Regulation").

Sustainable Finance Taxonomy

The Sustainable Finance Taxonomy refers to the Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the "Taxonomy Regulation").

SFDR classification

The below Sub-Funds are classified as SFDR' "Article 8" or "Article 9". At the date of this prospectus, all other Sub-Funds are classified "Article 6".

Details on the ESG integration process for the above-mentioned Sub-Funds are available on the Investment Policy of each Sub-Fund.

In accordance with Article 6 of SFDR, the Management Company, in consultation with the Investment Managers, has determined that, at this point, except for the above-mentioned Sub-Funds, none of the other Sub-Funds pursue an investment approach that explicitly promotes environmental or social characteristics nor have sustainable investment as their objective. Accordingly, these Sub-Funds' currently do not fulfil the EU criteria for environmentally sustainable economic activities.

Notwithstanding this classification, in managing the investments of the Sub-Funds, the Investment Managers may take account of certain sustainability risks and the potential financial impact of such risks on the return of an investment, at least in line with UBP's Responsible Investment Policy for Article 6 Sub-Funds, while additional considerations apply for Article 8 and 9 Sub-Funds as described in their investment policies, UBP Group has been a signatory of the United Nations Principles for Responsible Investment (UN PRI) since March 2012.

The potential sustainability risks are set out in the chapter "[RISK FACTORS](#)".

Integration of Sustainability Risks

By taking sustainability risks into consideration during their investment decision making process, the intention of the Investment Managers is to manage such sustainability risks in a way that those risks do not have a material impact on the performance of the Sub-Funds. The Investment Managers consider certain sustainability risks in their investment decision process and seek to mitigate those risks by complying with the UBP's Responsible Investment Policy, which excludes controversial weapons and other contentious business activities (such as

tobacco or thermal coal extraction – revenue thresholds apply). This policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

Likely impact on returns

While sustainability factors are considered by the Investment Managers, sustainability risks are currently not likely to have a material impact on the returns of the Sub-Funds considering the integration of the sustainability risks in the investment process and the nature and diversification of the investments.

Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. Even when identified, there can be no guarantee that the Investment Managers' assessment will correctly determine the impact of sustainability risks on the Sub-Funds' investments.

Bond Sub-Funds

Bond Sub-Funds aim to offer investors access to a selection of transferable securities, primarily bonds and other debt securities (including term deposit), while complying with the principle for the diversification of investment risks.

The bond Sub-Funds may use derivative instruments and techniques for hedging or more efficient management, within the limits set out in the investment restrictions. More specifically, these Sub-Funds may buy and sell call or put options on transferable securities or financial instruments, futures on currencies or interest rates, and may take out swaps on currencies, interest rates or all types of financial instruments, provided that such derivatives are traded on a regulated market, operating regularly. Such derivatives may be entered into on an over-the-counter (OTC) basis with first-rate institutions specialised in such transactions. More specifically, these Sub-Funds may buy or sell Credit Default Swaps and call or put options on Credit Default Swaps, as well as Total Return Swaps.

The bond Sub-Funds may invest up to 10% of their net assets in structured credit products such as ABS, CMO, CLO, CDO and Credit Linked Notes with a minimum rating of AA- (S&P or Fitch) or Aa3 (Moody's) with the below exceptions:

Sub-Funds	Structured credit products up to	Minimum rating
UBAM - ABSOLUTE RETURN FIXED INCOME UBAM - CORPORATE EURO BOND UBAM - DIVERSIFIED INCOME OPPORTUNITIES UBAM - STRATEGIC INCOME UBAM - GLOBAL AGGREGATE BOND UBAM - MEDIUM TERM US CORPORATE BOND	20%	B- (S&P or Fitch) or B3 (Moody's)
UBAM - EM RESPONSIBLE LOCAL BOND UBAM - EM RESPONSIBLE SOVEREIGN BOND UBAM - EM DEBT OPPORTUNITIES UBAM - EMERGING MARKETS FRONTIER BOND	20%	BBB (S&P or Fitch) or Baa2 (Moody's)

The Sub-Funds UBAM - EM RESPONSIBLE LOCAL BOND, UBAM - EM RESPONSIBLE SOVEREIGN BOND, UBAM - EMERGING MARKET DEBT OPPORTUNITIES and UBAM - EMERGING MARKETS FRONTIER BOND are also authorized to invest in FX Linked Notes.

The use of structured products involves higher risks than direct investments in transferable securities.

The potential risks inherent in such structured products are set out in the chapter "[RISK FACTORS](#)".

The Sub-Funds listed in the below table are authorised to invest up to the maximum percentage of their net assets listed in said table, in CoCos which, in accordance with regulatory capital requirements, can be converted into equity capital (shares) or face principal write down (in whole or in part). CoCos are Tier 1 and Tier 2 subordinated debt securities issued by financial institutions. Whereas most CoCos are issued as a perpetual

instrument, some are issued with a defined maturity. For both coupon payments are discretionary and may be cancelled at any time for any reason. CoCos are highly complex structures and therefore their valuation can be difficult. Potential risks inherent in such CoCos are set out in the chapter "[RISK FACTORS](#)".

Bond Sub-Funds	CoCos up to

UBAM - MEDIUM TERM US CORPORATE BOND	20%
Other Sub-Funds	CoCos up to
UBAM - MULTIFUNDS FLEXIBLE ALLOCATION (through Funds)	10%
UBAM - SELECT HORIZON	20%

No other Sub-Funds of UBAM will invest in CoCos.

Nevertheless, the below mentioned Sub-Funds will not invest in funds who invest mainly in Contingent Convertible bonds ("CoCos") but could invest in funds who invest on an ancillary basis in CoCos.

Funds of funds Sub-Funds
UBAM - MULTIFUNDS ALLOCATION RESPONSIBLE
UBAM - MULTIFUNDS ALLOCATION RESPONSIBLE INCOME
UBAM - MULTIFUNDS ALTERNATIVE
UBAM - MULTIFUNDS SECULAR TRENDS

The bond Sub-Funds will not invest in equities with the exception of:

Sub-Funds	Equities up to
UBAM - ABSOLUTE RETURN FIXED INCOME	20%
UBAM - CORPORATE GREEN BOND	5%
UBAM - DIVERSIFIED INCOME OPPORTUNITIES	10%
UBAM - STRATEGIC INCOME	10%
UBAM - GLOBAL AGGREGATE BOND	10%
UBAM - HYBRID BOND	10%

Investments in convertible bonds other than CoCos will at no time represent more than 25% of the net assets.

On an ancillary basis, the bond Sub-Funds may invest in money market instruments unless other rules are specified in the investment policy of the Sub-Fund.

Concerning bond Sub-Funds, the limits in force for investments in high-yield products and Emerging countries transferable securities are set as follows (expressed in percentage total net assets of the respective Sub-Funds):

Sub-Funds \ Asset Type	High Yield products	Emerging countries transferable securities
UBAM - ABSOLUTE RETURN FIXED INCOME	80%	60%
UBAM - ABSOLUTE RETURN LOW VOL FIXED INCOME	50%	40%
UBAM - CORPORATE EURO BOND	20%	20%
UBAM - CORPORATE GREEN BOND	20%	20%
UBAM - DIVERSIFIED INCOME OPPORTUNITIES	100% *	50% **
UBAM - EM INVESTMENT GRADE CORPORATE BOND	0%	100% *
UBAM - EM RESPONSIBLE CORPORATE BOND	100%	100% *
UBAM - EM RESPONSIBLE LOCAL BOND	100%	100% **
UBAM - EM RESPONSIBLE SOVEREIGN BOND	100% *	100% * **
UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION	100% *	100% *
UBAM - EMERGING MARKET DEBT OPPORTUNITIES	100% *	100% *
UBAM - EMERGING MARKETS FRONTIER BOND	100%	100% **
UBAM - EURO HIGH YIELD SOLUTION	100% *	0%
UBAM - STRATEGIC INCOME	100%	50%
UBAM - GLOBAL AGGREGATE BOND	40%	35%
UBAM - GLOBAL HIGH YIELD SOLUTION	100% *	0%
UBAM - GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION	100% *	0%
UBAM - HYBRID BOND	100%	30%
UBAM - MEDIUM TERM US CORPORATE BOND	20%	30%
UBAM - US HIGH YIELD SOLUTION	100% *	20%
All other bond Sub-Funds	20%	10%

IRS are not taken into account in these limits as they do not embed credit risk.

* Please refer to the investment policy of the Sub-Fund

** These Sub-Funds will invest in Emerging countries transferable securities, but also in Frontier countries

The High-Yield products also called sub-investment grade, which are rated below investment grade are bond issues offering high yields. This relates to bonds issued by companies being turned around or with low credit ratings, i.e. a high level of debt. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

Bonds from issuers in distress are often defined as those that have been given a speculative long-term rating by credit rating agencies, usually CCC- (S&P or FITCH) or Caa3 (Moody's). In some cases, the recovery of investments in distressed or defaulted debt securities is subject to uncertainty related to, among other things, court orderings and corporate reorganisations. Investment in this kind of securities may lead to capital losses and/or losses that can negatively affect the net asset value of the Sub-Funds.

For the bond Sub-Funds, investments in bonds are authorized in assets with a minimum rating of B- (S&P or FITCH), B3 (Moody's), or an equivalent rating by another rating agency. In case a rating is not available for a security the issuer's rating will be considered instead. If the rating of a security/issuer is downgraded below B-/B3 or equivalent, it will be resold within 6 months from the date at which the rating was lowered. Products/issuers for which a rating is not available will not exceed 15% of each Sub-Fund net assets. Please note that when the high yield exposure is reached via CDS on index, the rating is not available. However, the Manager will ensure

that the calculated average rating is consistent with these rules. Certain Sub-Funds can be subject to stricter rating restrictions as detailed in their respective investment policies.

As an exception to these rules for UBAM - DIVERSIFIED INCOME OPPORTUNITIES:

- 5 % of its net assets can be invested in distress bonds according to the above-mentioned definition.

As an exception to these rules for UBAM - EM RESPONSIBLE SOVEREIGN BOND, UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION, UBAM - EMERGING MARKET DEBT OPPORTUNITIES and UBAM - EMERGING MARKETS FRONTIER BOND:

- at least two thirds of their total assets shall be invested in products with a minimum rating of B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency;
- for the remaining assets these Sub-Funds are authorised to invest in products with a rating below B- (S&P or FITCH) or B3 (Moody's) or an equivalent rating by another rating agency;
- In case a rating is not available for a security the issuer's rating will be considered instead for the application of the above rules.
- However, the general rule regarding non-rated products remains applicable (investments in non-rated products are authorised up to 15% of the total net assets).

As an exception to these rules for UBAM - EM RESPONSIBLE CORPORATE BOND and UBAM - EM RESPONSIBLE LOCAL BOND:

- 15% of the net assets can be invested in bonds with a rating below B- (S&P or FITCH) or B3 (Moody's) or an equivalent rating by another rating agency; and
- In case a rating is not available for a security the issuer's rating will be considered instead for the application of the above rules.
- However, the general rule regarding non-rated products remains applicable (investments in non-rated products are authorised up to 15% of the total net assets).

Bonds may be issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Funds. 144A must be admitted for listing no later than 6 months after their issue.

In some jurisdictions, and under particular circumstances, some securities may have a temporary restricted status which can limit the fund's ability to resell them. As a consequence of such market restrictions, the Sub-Fund may suffer from reduced liquidity. For instance under the United States Securities Act of 1933, rule 144 addresses resale conditions of restricted securities, which include, but are not limited to, the purchaser qualifying as a qualified institutional buyer.

In principle the overall risk for these Sub-Funds is calculated according to the absolute VaR methodology. The VaR limit (99%, 1 month) is set at 20%.

1. UBAM - ABSOLUTE RETURN FIXED INCOME

Sub-Fund denominated in EUR and which invests its net assets primarily in global credit markets without any limitation of geography. This Sub-Fund will invest in:

- Emerging countries up to 60%;
- High Yield up to 80%;
- asset backed securities up to 20%;
- equity, including equity derivatives up to 20%;
- Contingent Convertible bonds up to 20%.

Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus

The contingent convertible bond exposure will aim to increase and diversify the financial subordinated risk where the Investment Manager deems it appropriate.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR). The currency risk is limited to 30% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weightings.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio with a potential small portion in equity, with a high risk profile due to the high volatility linked to the High Yield and Emerging markets. Investors should have experience in volatile products and financial markets, and particularly in High Yield and Emerging markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk calculation: absolute VaR approach
- Leverage calculation methodology: sum of the notionals
- Expected leverage: 300%. Please note that depending on market conditions the leverage level could be higher.

2. UBAM - ABSOLUTE RETURN LOW VOL FIXED INCOME

Sub-Fund denominated in EUR and which invests its net assets primarily in any kind of:

- bonds denominated in any kind of currencies;
- money market instruments denominated in any kind of currencies and;
- fixed income and currency derivatives denominated in any kind of currencies such as CDS, futures, swaps and options.

This Sub-Fund may invest up to:

- 40% of its net assets in transferable securities of Emerging countries;
- 50% of its net assets in high yield products.

Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR).

The currency risk is limited to 30% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

In normal market conditions, it is expected that the annualized volatility will be below 2%. This annualized volatility is a goal that the Investment Manager will strive to achieve under normal market conditions and cannot be guaranteed.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the

performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weightings.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to the high volatility linked to the High Yield and emerging markets. Investors should have experience in volatile products and financial markets, and particularly in High Yield and emerging markets. They should have a minimum investment horizon of 2 years and should be able to accept significant losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

3. UBAM - CORPORATE EURO BOND

Sub-Fund denominated in EUR and which invests its net assets primarily in bonds denominated in this currency issued by companies ("corporate bonds") with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's) and, up to 20% of its net assets in Contingent Convertible bonds with a minimum rating of B- (Standard and Poor's or Fitch) or B3 (Moody's) .

The Sub-Fund is actively managed and aims to outperform the ICE BofAML Euro Large Cap Corporate Index (the Index). This Index is representative of the investment universe and of the risk profile of the Sub-Fund. The Sub-Fund is expected to deliver comparable returns to the Index over time. Even if the Sub-Fund portfolio's securities will mainly correspond to those of the Index, the Investment Manager may invest at its discretion in issuers, sectors and countries not included in the Index and/or deviate materially from the Index composition in term of countries, sectors, issuers, instruments etc... in order to take advantage of specific investment opportunities. This deviation of the constituents can lead to a deviation of the Sub-Fund's performance compared to the Index performance.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund may invest up to 20% of its net assets in transferable securities of Emerging countries.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Funds allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate short-term losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

4. UBAM - CORPORATE GREEN BOND

Sub-Fund actively managed denominated in EUR which invests at least 85% of its net assets in global Green Bonds that contribute to environmental sustainability, or sustainability bonds that contribute to environmental objectives, issued by worldwide corporates, mainly mid and large cap issuers, and with an average expected maturity between 1 and 10 years.

Green Bonds are any type of bond instrument where the proceeds will be exclusively applied to finance or re-finance, in part or in full, new and/or existing eligible Green Projects and which are aligned with the four core components of the Green Bond Principles: use of Proceeds, Process for Project Evaluation and Selection, Management of Proceeds and Reporting. The Green Bond Principles (GBP) are voluntary process guidelines that recommend transparency and disclosure and promote integrity in the development of the Green Bond market by clarifying the approach for issuance of a Green Bond. More information about Green bond's guidelines and principles are available on: <https://www.icmagroup.org/sustainable-finance/the-principles-guidelines-and-handbooks/green-bond-principles-gbp/>

The Sub-Fund may invest up to:

- 100% of its net assets in Investment Grade securities
- 20% of its net assets in High Yield securities
- 20% of its net assets in Emerging countries
- 20% of its net assets in Contingent Convertible bonds with a minimum rating of B- (Standard and Poor's or Fitch) or B3 (Moody's)
- 5 % of its net assets in equity, including equity derivatives.

The Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

The exposure to these markets can be direct or via the use of derivative financial instruments such as but not limited to CDS, futures and options.

The investment universe of this Sub-Fund is based on the Green Bond Principles as formulated by the International Capital Market Association. Furthermore, issuers and underlying projects are screened using a proprietary assessment methodology.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR). The currency risk is limited to 10% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The principal adverse impacts on sustainability factors are considered through the UBP exclusion list as mentioned below. Furthermore, the Sub-Fund excludes companies with severe controversies according to Investment manager's internal analysis.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

ESG investment strategy is based on:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration, which is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance factors (extra-financial analysis), and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research: This review produces a financial view.

ESG and financial views are combined to select the issuers. Issuers with a significantly deteriorating ESG profile and with severe controversies will be excluded according to Investment Manager's internal analysis as described above. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

The Sub-Fund can invest in derivatives. Derivatives instruments do not participate in attaining the sustainable investment objective. The use of derivatives has no material impact on the sustainable investment objective.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. To this end, through the investment process described above, the Investment Manager will select, among others, bonds whose use of proceeds seek to finance projects that contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. The Investment Manager will also seek, where possible, to include bonds compliant with the European green bond standard. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notional*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

5. UBAM - DIVERSIFIED INCOME OPPORTUNITIES

Sub-Fund actively managed denominated in USD and which allocates its investments upon the discretion of the Investment Manager among the following assets up to the below limits:

- 100% of its net asset in High Yield securities
- 100% of its net assets in Investment Grade securities
- 50% of its net assets in Emerging countries, including Frontier countries
- 20% of its net assets in Contingent Convertible Bonds (Cocos)
- 25% of its net assets in Convertible Bonds
- 20% of its net assets in asset backed securities (ABS)

- 10% of its net assets in equity, including equity derivatives
- 5% of its net assets in distressed securities

The exposure to High Yield and Investment Grade can be increased up to 120% through derivatives.

The Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

Frontier countries include, but are not limited to: Angola, Armenia, Azerbaijan, Belarus, Belize, Bolivia, Cameroon, Costa Rica, Cote D'Ivoire, El Salvador, Ethiopia, Gabon, Georgia, Ghana, Guatemala, Honduras, Jamaica, Jordan, Kenya, Mongolia, Mozambique, Namibia, Nigeria, Pakistan, Papua New Guinea, Paraguay, Senegal, Sri Lanka, Suriname, Tajikistan, Tunisia, Uzbekistan, Vietnam and Zambia.

Please refer to the Frontier countries related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

The Sub-Fund may invest in derivatives, such as but not limited to CDS, Interest Rate Swaps, Futures, Forex Forwards and Options for hedging purposes, investment purposes and efficient portfolio management purposes.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD). The currency risk is limited to 20% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via derivatives such as but not limited to Forex Forwards), or by not hedging investments in currencies other than the base currency (USD). The exposure in USD can go up to 110% by shorting others currencies.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

Sustainable characteristics are measured using MSCI ESG Rating. MSCI ESG ratings are designed to measure a company's resilience to long-term, industry material Environmental, Social and Governance (ESG) risks. The Environmental risk analysis will assess for instance the carbon footprint or the waste management policy of an issuer. The Social risk analysis will assess for instance labour standards or client data privacy. The Governance risk analysis will assess for instance the board structure or the risk governance and the risk culture. MSCI ESG Rating uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. MSCI ESG ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.
- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

Investments in derivatives as mentioned above do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio with a high risk profile due to the high volatility linked to the High Yield, Emerging markets and Contingent Convertibles Bonds (Cocos). Investors should have experience in volatile products and financial markets, and particularly in High Yield and Emerging markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk calculation: absolute Var approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 300%. Please note that depending on market conditions the leverage level could be higher.*

6. UBAM - DYNAMIC EURO BOND

Sub-Fund denominated in EUR and which invests its net assets primarily in securities denominated in this currency. The average maturity of the bond portfolio excluding cash can be expected to range between 1 and 2.5 years but will not exceed 3 years at any time. As such, this Sub-Fund cannot be considered as a money market fund.

At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities, primarily investment grade. In particular the Sub-Fund can invest in, but is not limited to:

- investment grade bonds issued by companies with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's),
- interest rate and credit derivatives such as futures, options, swaps and credit default swaps, unlike money market funds.

The Sub-Fund's investments are expected to carry on average a higher risk than a typical money market investment, in particular in terms of credit risk (maturity profile, ratings profile, average spread duration) and due to the before mentioned use of derivative instruments.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the index Euro Short Term Rate (€STR) (the Benchmark) for performance objective. The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 1 year and should be able to accept moderate short-term losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

7. UBAM - DYNAMIC US DOLLAR BOND

Sub-Fund denominated in USD and which invests its net assets primarily in securities denominated in this currency. The average maturity of the bond portfolio excluding cash can be expected to range between 1 and 2.5 years but will not exceed 3 years at any time. As such, this Sub-Fund cannot be considered as a money market fund.

At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities, primarily investment grade. In particular the Sub-Fund can invest in, but is not limited to:

- investment grade bonds issued by companies with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's),
- interest rate and credit derivatives such as futures, options, swaps and credit default swaps, unlike money market funds.

The Sub-Fund's investments are expected to carry on average a higher risk than a typical money market investment, in particular in terms of credit risk (maturity profile, ratings profile, average spread duration) and due to the before mentioned use of derivative instruments.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Funds allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index SOFR Overnight Rate (the Benchmark) for performance objective. The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 1 year and should be able to accept moderate short-term losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notional*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

8. UBAM - EM INVESTMENT GRADE CORPORATE BOND

Sub-Fund denominated in USD and which invests its net assets primarily in fixed or variable-rate bonds whose issue or issuer carries at least one rating of a minimum of BBB- (Fitch or S&P) or Baa3 (Moody's) or a rating considered equivalent by the Investment Manager as a result of its analysis, for the same level of seniority as the issue, issued by:

- companies domiciled in Emerging countries, or;
- companies in any countries but with an underlying instrument directly or indirectly linked to Emerging countries, or;
- companies whose risks are directly or indirectly linked to Emerging countries.

The Sub-Fund will invest at least 80% in the currencies of OECD countries. For investments denominated in a currency other than the USD, the foreign exchange risk will be largely hedged.

On an ancillary basis, the Sub-Fund's net assets may be invested *inter alia* in:

- bonds issued by sovereign issuers from Emerging countries, or;
- bonds issued by issuers not connected to Emerging countries, or;
- bonds issued or guaranteed by OECD member countries or by their local public authorities, or Community, regional or global supranational organisations and institutions;
- up to 20% in Contingent Convertible bonds.

The exposure to these markets can be direct or via the use of derivative financial instruments such as CDS.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund will be able to invest up to 100% of its net assets in transferable securities of Emerging countries. The exposure to Emerging countries can be increased up to 120% through derivatives.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index JPM Corporate EMBI DIVERSIFIED IG RI USD (the Benchmark) for performance objective. The Benchmark is representative of the Sub-Fund's investment universe and of the risk profile of the Sub-Fund although the Investment Manager has significant discretion to deviate from its securities and weighting.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have experience in volatile products and financial markets, and, more specifically, those markets relating to Emerging countries. They should have a minimum investment horizon of 3 years and should be able to accept losses.

- *Risk calculation: commitment approach*

9. UBAM - EM RESPONSIBLE CORPORATE BOND

Sub-Fund denominated in USD and which invests its net assets primarily in fixed or variable-rate bonds whose issuer:

- carries, at the issue or issuer level, at least a rating of minimum of B- (Fitch or S&P) or B3 (Moody's).

As an exception to this rule:

- up to 15% of the net assets can be invested in bonds with a rating below B- (Fitch or S&P) or B3 (Moody's) or an equivalent rating by another rating agency, and
- up to 15% of the net assets can be invested in non-rated bonds.
- is a company domiciled in Emerging countries, or;
- is a company domiciled in any country but with an underlying instrument directly or indirectly linked to Emerging countries, or;
- is a company whose risks are directly or indirectly linked to Emerging countries.

The Sub-Fund's investments currencies will be mainly those of OECD countries. For investments denominated in a currency other than the USD, foreign exchange risks will be largely hedged

On an ancillary basis, the Sub-Fund's net assets may be invested *inter alia* in:

- bonds issued or guaranteed by sovereign issuers from Emerging countries,
- Contingent Convertible bonds up to 20%

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund will be able to invest up to 100% of its net assets in transferable securities of Emerging countries. The exposure to Emerging countries can be increased up to 120% through derivatives.

The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value in order to combine a financial risk-adjusted performance in line or above that of the EM corporate bond market over the investment horizon, with environmental and social characteristics better than that of the EM corporate bond investment universe, as measured by the JP Morgan Corporate EMBI Diversified index. This index is a standard reference representing the EM Corporate Bond Universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to ensure a reduction of the Sub-Fund's weighted average carbon intensity well below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues, as calculated by MSCI ESG Research.

The Sub-Fund also aims to present a higher ESG quality than that of its index. This is measured using the MSCI ESG Research "ESG Quality Score". This indicator measures the ability of underlying holdings to manage key medium to long term risks and opportunities arising from environmental, social, and governance factors. It is based on MSCI ESG Ratings, which calculate each company's exposure to key ESG risks, depending on its industry, its core product or business segments, the locations of its assets or revenues, and other relevant measures such as outsourced production.

The ESG analysis covers at least 90% of the Sub-Fund's investments in bonds. For bonds without an MSCI ESG Research rating, the analysis is conducted by the Investment Manager.

The investment process includes a first phase of investment universe filtering and a second phase of ESG bottom-up research. The first phase consists in selecting issuers with sound ESG quality and avoids controversial business activities as well as companies in breach of international norms (norms-based screening).

Selected issuers have to:

- carry an ESG rating from MSCI ESG Research with a minimum of BB (on a scale ranging from AAA – CCC). This means that issuers with the worst ESG characteristics (carrying an ESG rating of B or CCC) are excluded. (As an exception to this rule, up to 10% of the net assets can be invested in bonds without an MSCI ESG Research rating). In case of an ESG rating downgrade below BB, the Investment Manager will sell the position, in the best interests of the shareholders
- not be in breach of UN Global Compact or other international norms – that is companies that are not assigned a Red Overall Controversy Flag by MSCI ESG Research;
- not be involved in controversial weapons, nuclear weapons or tobacco production.
- have limited exposure to other weapons and other tobacco revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- have limited exposure to coal and unconventional oil and gas extraction as well as to coal-powered electricity to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

This selection process leads to a reduction of the investment universe by at least 20 %.

Once the investable universe has been reduced according to the first phase, the Investment Manager applies the second phase by integrating ESG consideration into its analysis and portfolio construction. ESG considerations are notably integrated into the issuers' qualitative credit assessment, as the Investment Manager believes, alongside rating agencies, that strong ESG credentials can help improve issuers' creditworthiness. To conduct this ESG analysis, the Investment Manager relies on different sources of information and data, including for instance companies' annual and/or sustainability reports, ad-hoc engagement with issuers, credit agencies' ESG review, as well as external ESG data and scoring providers.

In addition to a holistic analysis of issuers' environmental and social practices, attention is put on issuers' greenhouse gas (GHG) emissions and climate strategy, in order to ensure the reduction of the Sub-Fund's weighted average carbon intensity well below that of its investment universe. The Sub-Fund aims also to capture sustainable investment opportunities, by including for instance issuers that can help address such issues as climate change mitigation and adaptation, hence also contribute to a reduction of future GHG emissions through their activities (e.g. renewable energy, green building, ...). Climate scenarios may also be conducted to help assess the possible future path of the portfolio's carbon emissions.

The Sub-Fund's assets may include investments that do not participate in attaining the environmental and social characteristics promoted by the strategy. As minimum safeguards, however, all issuers are screened to exclude any breaches of international norms, as measured by MSCI Red Overall Controversy Flags, including the OECD Guidelines for Multinational Enterprises, the UN Global Compact and the UN Guiding Principles on Business and Human Rights, as well as other ESG norms and principles.

Similarly, the Investment Manager seeks to limit the main potential adverse impacts of its investments primarily through its norms-based screening. In particular, all sustainable investments included in the portfolio have to comply with international norms as described above. Also, in the case of sustainable investments, the Investment Manager takes into account the Do No Significant Harm (DNSH) principle (Article 16 SFDR).

In addition, the Investment Manager seeks to assess other potential adverse impacts, for instance linked to biodiversity. This may, however, be hindered at times by the limited availability of data for certain indicators, given the nature of investments in emerging markets.

Finally, the Sub-Fund may invest in derivatives, primarily via US Futures for duration management purposes. These instruments do not participate in reaching the environmental or social characteristics promoted by the financial product. The use of derivatives also has no material impact on the E and S characteristics.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis based on company data,

engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index JPM Corporate EMBI DIVERSIFIED (the Benchmark) for performance objective. The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to high volatility linked to emerging markets. Investors should have experience in volatile products and financial markets, and, more specifically, those markets relating to Emerging countries. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk calculation: commitment approach

10. UBAM - EM RESPONSIBLE LOCAL BOND

Sub-Fund actively managed denominated in USD and which invests its net assets primarily in fixed or variable-rate bonds denominated in Emerging or Frontier countries local currencies and whose issuer:

- is a sovereign issuer domiciled in Emerging or Frontier countries; or
- is a company domiciled in Emerging or Frontier countries, or;
- is a company domiciled in any country but with an underlying instrument directly or indirectly linked to Emerging or Frontier countries, or;
- is a company whose risks are directly or indirectly linked to Emerging or Frontier countries; or
- is an international or supranational agency or development bank

Emerging countries may include investments in China through Bond Connect up to 20% of the Net Asset Value. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

Frontier countries include, but are not limited to: Angola, Armenia, Azerbaijan, Belarus, Belize, Bolivia, Cameroon, Costa Rica, Cote D'Ivoire, El Salvador, Ethiopia, Gabon, Georgia, Ghana, Guatemala, Honduras, Jamaica, Jordan, Kenya, Mongolia, Mozambique, Namibia, Nigeria, Pakistan, Papua New Guinea, Paraguay, Senegal, Sri Lanka, Suriname, Tajikistan, Tunisia, Uzbekistan, Vietnam and Zambia.

Please refer to the Frontier countries related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

Bonds carry, at the issue or issuer level, at least a credit rating of minimum of B- (Fitch or S&P) or B3 (Moody's) or an equivalent rating by another rating agency.

As an exception to this rule:

- up to 15% of the net assets can be invested in bonds with a rating below B- (Fitch or S&P) or B3 (Moody's) or an equivalent rating by another rating agency, and
- up to 15% of the net assets can be invested in non-rated bonds.

The Sub-Fund may have exposure up to:

- 15% in local currency bonds issued by EM corporate or quasi-sovereign issuers, which have a minimum BB MSCI ESG rating and are not in breach of international norms and principles (that is are not assigned a Red Controversy Flag by MSCI ESG Research).
- 15% allocation per EM country

The Sub-Fund aims to deliver performance by investing in Emerging countries bonds and currencies, while offering a greater Environmental, Social and Governance (ESG) characteristics than its reference index, the JP Morgan ESG GBI-EM Global Diversified Index. The reference index itself carries sounder ESG characteristics than traditional EM local currency bonds, thanks to its construction which takes into account the ESG assessment of sovereign issuers carried out by two ESG data providers: Sustainalytics and RepRisk. It is not, however, directly aligned with the environmental or social characteristics that the Sub-Fund seeks to attain and are described below.

In order to ensure the promotion of environmental and social characteristics, the Sub-Fund has a minimum 20% allocation to bonds denominated in EM or Frontier local currencies which are:

- either sustainability-focused bonds such as, but not limited to, Social, Green, Sustainable or Blue bonds issued by supranational, EM sovereign or EM corporate issuers
- or issued by supranational agencies, international organisations or development banks such as, but not limited to, the World Bank, the IFC or the EBRD which help finance sustainable development in emerging countries.

These investments help finance certain Environmental or Social goals, such as but not limited to projects designed to mitigate climate change, gender equality or the promotion of female education.

The Sub-Fund will promote in particular social characteristics and aims to have a Social score higher than its index. This social score, measured by MSCI, covers for sovereign issuers matters such as human capital, education, gender inequality, health levels, labour freedom, quality of infrastructure...all aspects that are essential for the development of emerging countries. For private issuers, the social score considers matters such as employees well-being, health and safety, supply chain labour standards.

The Sub-Fund also aims to promote good governance. Issuers' Governance credentials are assessed via internal or external research. In terms of governance factors, we consider for instance a sovereign's regulatory system efficacy, government stability and respect for property rights. Such factors include but are not limited to the World Bank's Ease of Doing Business indices and Development Indicators. The Sub-Fund does not endeavour to best each individual governance factors but to present an improved Governance score compared to its index as measured by MSCI ESG Research.

In addition, the Sub-Fund aims to present an overall higher ESG quality than that of its index. This is measured using MSCI ESG Research "ESG Quality Score". This indicator measures the ability of underlying holdings to manage key medium to long term risks and opportunities arising from environmental, social, and governance factors. It calculates each sovereign's exposure to key ESG risks. The analysis takes into account the extent to which a sovereign has developed robust policies and demonstrated a strong track record of performance in managing its specific level of risks or opportunities

The Sub-Fund's investment strategy relies on ESG, credit and macroeconomic assessment in order to combine a financial risk-adjusted performance in line or above that of the EM local sovereign bond market over the investment horizon, with social characteristics better than its reference index. The investment process includes ESG analysis which combines internal and external research conducted by a variety of ESG data providers including, but not limited to, MSCI ESG Research, RepRisk as well as recognised organisations like the World Bank, Transparency International or Freedom House. In particular, the Investment Manager has developed a proprietary ESG sovereign scoring model, which combines historical ESG data and forward-looking sentiment to rank countries in terms of their relative ESG quality.

The model considers over 20 E, S and G indicators, such as a sovereign's human rights record, government stability or its policy response to climate change. For each of our sustainability indicators, the Investment Manager take into consideration the relative position of a country compared to its peers. The Investment Manager pays particular attention to governance factors, as it believes that they have the greatest potential impact on a country's ability to implement robust environmental policies and achieve favourable social

outcomes. The also factors in the trend (momentum) of these indicators, to reward countries with improving ESG credentials. The model-driven score is then adjusted for GDP per capita to reduce the bias inherent in some E, S, G indicators where wealthier countries tend to have higher ESG scores independent of their current efforts to improve their ESG outcome. This model is complemented by internal forward-looking assessment which allows the Investment Manager to reflect more recent changes in policies that may influence ESG quality. The resulting ESG scores are normalized on a scale from 0 to 100, with the worst-performing country receiving a score of 0 and the best-performing country scoring 100. The ESG scores are reviewed quarterly.

For corporate and supranationals, the Sub-Fund relies on external ESG assessment and/or on ESG and credit analysis conducted by the Investment Manager.

ESG analysis covers at least 90% of the Sub-Fund's portfolio.

The investment process includes a first phase of investment universe filtering, based on the Investment Manager's internal ESG model and other ESG constraints, and a second phase which combines ESG integration with financial considerations to lead to portfolio construction.

Sovereign issuers

- Countries which have an ESG score in the top 66% of the Sub-Fund's investment universe are deemed investable through sovereign, supranational or corporate bonds denominated in the country's local currency.
- Countries with an ESG score in the bottom 33% of the Sub-Fund's investment universe are deemed un-investable except through sustainability-focused (e.g. Green, Social, Sustainable) instruments or Supranational/Development Agency bonds denominated in those countries' currencies.

In addition, sovereign issuers are excluded if:

- they are identified as oppressive regimes, as recognised by a Global Freedom Score of 7 or below by Freedom House.
- they are on international sanction lists (such as, but not limited to, those of the EU, UN, OFAC...).
- their MSCI ESG Rating is CCC.

Corporate and Quasi-sovereigns

Corporate and other quasi-sovereign issuers are excluded if:

- their MSCI ESG Rating is B or CCC.
- they bear a Red Controversy Flag by MSCI ESG Research, that is they are identified as in breach of international norms and principles, such as, but not limited to, the UN Global Compact, ILO...
- they are involved in controversial weapons and other contentious business activities as defined in UBP' Responsible Investment policy (e.g. tobacco, coal... revenue thresholds may apply).

If an issuer's ESG rating is downgraded below BB, the Investment Manager has to adjust the portfolio, in the best interest of shareholders.

The ESG selectivity process leads to a reduction of the investment universe of at least 20%. The investment universe is defined as emerging market countries which have tradable sovereign local debt markets accessible to foreign investors. The list is available on www.ubp.com and is revised annually or on an ad-hoc basis in case of a change in FX regime such as for instance the instauration or removal of capital controls.

Once the filtering of the universe is finalised, the choice of financial instruments may also take into account environmental and/or social characteristics, as the Sub-Fund can choose between traditional and sustainability-focused instruments. It can also lead to favour issuers with greater ESG credentials than others.

Finally, the process will consider the Investment Manager's assessment of EM country economic and political developments and global macroeconomic trends. The financial strategy approaches Duration and FX risks included in EM local markets bonds as two separate sources of return. The duration process aims to differentiate which countries are in the overheating phase of their economic cycle and those which are in the cooling phase by over-allocating to the second compared to the first. The FX risk for each country is

analysed using a scorecard of fundamental, technical, governance and event risk factors. The corporate allocation relies on the Investment Manager's analysts bottom up research process in addition to its fundamental view on the currency.

The Sub-Fund includes a mix of investments:

- investments aligned with E/S characteristics - used to attain the environmental or social characteristics promoted by the financial product. These investments may include:
 - sustainable investments that qualify as sustainable investments, such as green or sustainability bonds
 - other E/S characteristics: investments aligned with the environmental or social characteristics that do not qualify as sustainable investments
- other investments which are neither aligned with the E/S characteristics, nor are qualified as sustainable investments.

In the case of sustainable investments, the Investment Manager takes into account the Do No Significant Harm (DNSH) principle (Article 16 SFDR)

While the Sub-Fund seeks to attain certain environmental and social characteristics, it also carries a financial performance objective. For that purpose, some investments may be included that are not aligned with the E/S characteristics promoted by the Sub-Fund's investment policy.

However, to ensure minimum environmental or social safeguards, sovereign and corporate issuers have to respect a series of eligibility criteria as described above (including for instance a Freedom Score, which combines both political rights and civil liberties, above 7 for a sovereign issuer, or, for a corporate issuer, compliance with international norms). In the latter case, severe breaches are identified by MSCI's Red Overall Controversy Flags which signal severe controversies in at least one of the following areas: Environmental, Social, Governance, Human Rights and Labour Rights. Issuers carrying such Red flags are excluded.

Finally, the Sub-Fund may invest in derivatives, such as but not limited to Interest Rate Swaps, Futures, Forex Options for hedging purposes, investment purposes and efficient portfolio management purposes. These instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund's investment policy, but guidelines are set to ensure that they do not negatively impact these characteristics according to the following rules:

- Interest Rates Swaps (IRS) are authorised only in those currencies where the ESG score of the country is in the top 66% of the Investment Manager's ESG scoring model.
- FX forwards, non-deliverable forwards (NDF) and FX Options:
 - are authorised for the purpose of investment (long), hedging, or net short exposure for those currencies where the ESG score of the country is in the top 66% of the Investment Manager's ESG scoring model.
 - are authorised only for hedging or net short exposure for those currencies where the ESG score of the country is in the bottom 33% of the Investment Manager's ESG scoring model.
- Credit Linked Notes (CLN): authorised only when the underlying currency exposure represents a country that has an ESG score that is in the top 66% of the Investment Manager's ESG scoring model.

In addition, in all cases, long market exposures for investment purposes via the derivatives outlined above are not authorised for currencies where the country of issuance has an MSCI ESG score below B or for countries which are deemed un-investable due to financial sanctions or other criteria as detailed above.

The Investment Manager seeks to assess the principal potential adverse impacts of its sovereign sustainable investments, such as social violations, by for instance avoiding oppressive regimes as well as to limit the main potential adverse impact of its corporate sustainable investments primarily through its norms-based screening (e.g. compliance with the OECD Guidelines for Multinational Enterprises, the UN Global Compact...). The Investment Manager may seek to assess other potential adverse impacts. This may be, however, hindered by the limited availability of data for certain indicators, given the nature of investments in emerging markets.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, the allocation to use-of-proceeds bonds, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or RepRisk. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified emerging bond allocation in their portfolio, but with a high risk profile due to high volatility linked to emerging markets. Investors should have experience in volatile products and financial markets, and, more specifically, those markets relating to Emerging countries. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 500%. Please note that depending on market conditions the leverage level could be higher.*

11. UBAM - EM RESPONSIBLE SOVEREIGN BOND

Sub-Fund denominated in USD and which at any time invests a majority of its net assets in fixed or variable-rate bonds in hard currencies such as (but not limited to) EUR or USD, issued by Public Authorities or quasi sovereigns which are:

- domiciled in Emerging or Frontier countries, or;
- domiciled in any country whose underlying is economically linked, directly or indirectly, to an issuer domiciled in an Emerging or Frontier country, or;
- linked to Emerging or Frontier country risks.

The exposure to these markets can be direct or via the use of derivative financial instruments such as but not limited to CDS.

Emerging countries may include investments in China through Bond Connect up to 20% of the Net Asset Value. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

Frontier countries include, but are not limited to: Angola, Armenia, Azerbaijan, Belarus, Belize, Bolivia, Cameroon, Costa Rica, Cote D'Ivoire, El Salvador, Ethiopia, Gabon, Georgia, Ghana, Guatemala, Honduras, Jamaica, Jordan, Kenya, Mongolia, Mozambique, Namibia, Nigeria, Pakistan, Papua New Guinea, Paraguay, Senegal, Sri Lanka, Suriname, Tajikistan, Tunisia, Uzbekistan, Vietnam and Zambia.

Please refer to the Frontier countries related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund will be able to invest up to 100% of its net assets in High Yield products and/or transferable securities of Emerging countries according to the rating's rules in section "[Bond Sub-Funds](#)", and, up to 20% in Contingent Convertible bonds. The exposure to High Yield and Emerging countries can be increased up to 120% through derivatives.

Moreover, the Sub-Fund net assets may be invested in emerging corporate bonds up to 20%.

Overall, up to 20% of the Sub-Fund's investments may be carried out in Emerging countries' currencies.

The Sub-Fund aims to deliver performance by investing in emerging market bonds, while offering a greater Environmental, Social and Governance (ESG) characteristics than its reference index, the JP Morgan EMBI Global Diversified index. The designated index is a standard reference representing the EM sovereign bond universe. It is not aligned with the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund's alignment with the promoted E/S characteristics is attained through the investment process described below.

The Sub-Fund aims notably to promote social outcomes. Therefore it considers for instance a sovereign's human rights record, labour standards, education system, health care, demographics ... Examples of such social indicators include but are not limited to the World Bank's Gender Inequality Index and the World Bank's Life Expectancy at Birth Index. The Sub-Fund does not endeavour to best specific individual social factors but rather to improve ESG outcomes with a holistic view.

The Sub-Fund aims to present an overall higher ESG quality than that of its index. This is measured using MSCI ESG Research "ESG Quality Score". This indicator measures the ability of underlying holdings to manage key medium to long term risks and opportunities arising from environmental, social, and governance factors. It calculates each sovereign's exposure to key ESG risks. The analysis takes into account the extent to which a sovereign has developed robust policies and demonstrated a strong track record of performance in managing its specific level of risks or opportunities

The Sub-Fund's investment strategy relies on ESG, credit and macroeconomic assessment in order to combine a financial risk-adjusted performance in line or above that of the EM sovereign bond market over the investment horizon, with ESG characteristics better than its reference index. The investment process includes ESG analysis which combines internal and external research conducted by a variety of ESG data providers including, but not limited to, MSCI ESG Research, RepRisk as well as recognised organisations like the World Bank, Transparency International or Freedom House. In particular, the Investment Manager has developed a proprietary ESG sovereign scoring model, which combines historical ESG data and forward-looking sentiment to rank countries in terms of their relative ESG quality.

The model considers a large array of ESG factors, such as a sovereign's human rights record, government stability or its policy response to climate change. The Investment Manager pays particular attention to governance factors, as it believes that they have the greatest potential impact on a country's ability to implement robust environmental policies and achieve favourable social outcomes. The model looks to produce an ESG score that does not penalise poorer issuers for their earlier stage of economic development. This model is complemented by internal forward-looking assessment which allows the Investment Manager to reflect more recent changes in policies that may influence ESG quality. The resulting ESG scores are normalized on a scale from 0 to 100, with the worst-performing country receiving a score of 0 and the best-performing country scoring 100. The ESG scores are reviewed quarterly.

For corporate, quasi-sovereign or supranational issuers, the Sub-Fund relies on external ESG assessment and/or on ESG and credit analysis conducted by the Investment Manager.

ESG analysis covers at least 90% of the Sub-Fund's portfolio.

The investment process includes a first phase of investment universe filtering and a second phase of ESG integration in bottom-up research and portfolio construction.

Sovereign issuers

are excluded if:

- they have an ESG score, as calculated by the Investment Manager internal model, of 20 or below. In such case, the country remains excluded for at least six months.
- they are identified as oppressive regimes, as recognised by a Global Freedom Score of 7 or below by Freedom House.
- they are on international sanction lists (such as, but not limited to, those of the EU, UN, OFAC...

Corporate and quasi-sovereigns

- 100% government-owned quasi-sovereign issuers are excluded due to the risk of lack of independent governance, except for Sustainable, Social, Green and SDG bonds

- corporate and other quasi-sovereign issuers are excluded if:
 - their MSCI ESG Rating is B or CCC.
 - they bear a Red Controversy Flag by MSCI ESG Research, that is they are identified as in breach of international norms and principles, such as, but not limited to, the UN Global Compact, ILO...
 - they are involved in controversial weapons and other contentious business activities as defined in UBP's Responsible Investment policy (e.g. tobacco, coal... revenue thresholds may apply).

If a sovereign's internal ESG score is downgraded to 20 or below, or if a corporate or quasi-sovereign issuer's MSCI ESG rating is downgraded below BB, the Investment Manager has to adjust the portfolio, in the best interest of shareholders.

The ESG selectivity process leads to a reduction of the investment universe of at least 20%.

Once the investable universe has been reduced, the Investment Manager integrates ESG consideration into its analysis and portfolio construction. ESG considerations are notably integrated into the issuers' qualitative credit assessment, as the Investment Manager believes, alongside rating agencies, that strong ESG credentials can help improve issuers' creditworthiness. To conduct this ESG analysis, the Investment Manager relies on different sources of information and data, including for instance external ESG data providers, ad-hoc engagement with issuers as well as credit agencies' ESG reviews.

Finally, the investment process includes factors other than ESG, such as issuers' economic structure, fiscal strength, top down macroeconomic assessment and relative value. Still, issuers' ESG credentials can directly impact portfolio construction. It can result for instance in cases where sovereigns with sounder ESG practices are favoured over their peers with similar credit quality but poorer sustainability characteristics.

The choice of financial instruments may also take into account environmental and/or social characteristics, as the Sub-Fund may invest in green or sustainability bonds.

The Sub-Fund includes a mix of investments:

- investments aligned with E/S characteristics - used to attain the environmental or social characteristics promoted by the financial product. These investments may include
 - Sustainable investments that qualify as sustainable investments, such as green or sustainability bonds
 - Other E/S characteristics: investments aligned with the environmental or social characteristics that do not qualify as sustainable investments
- other investments - which are neither aligned with the E/S characteristics, nor are qualified as sustainable investments.

In the case of sustainable investments, the Investment Manager ensures that these comply with the Do No Significant Harm (DNSH) principle (Article 16 SFDR)

While the Sub-Fund seeks to attain certain environmental and social characteristics, it also carries a financial performance objective. For that purpose, some investments may be included that are not aligned with the E/S characteristics promoted by the Sub-Fund's investment policy.

However, to ensure minimum environmental or social safeguards, sovereign and corporate issuers have to respect a series of eligibility criteria as described above (including for instance a Freedom Score, which combines both political rights and civil liberties, above 7 for a sovereign issuer, or, for a corporate issuer, compliance with international norms). In the latter case, severe breaches are identified by MSCI's Red Overall Controversy Flags which signal severe controversies in at least one of the following areas: Environmental, Social, Governance, Human Rights and Labour Rights. Issuers carrying such Red flags are excluded.

Finally, the Sub-Fund may invest in derivatives, such as but not limited to EM Sovereign CDS, EM currency derivative instruments (only if the country satisfies the ESG criteria set by the investment process), US Futures for duration management purposes and, on an ad-hoc basis, in CDS indices for hedging purposes. These instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund's investment policy, but guidelines are set to ensure that they do not negatively impact these characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The Investment Manager seeks to assess the principal potential adverse impacts of its sovereign sustainable investments, such as social violations, by for instance avoiding oppressive regimes as well as to limit the main potential adverse impact of its corporate sustainable investments primarily through its norms-based screening (e.g. compliance with the OECD Guidelines for Multinational Enterprises, the UN Global Compact...). The Investment Manager may seek to assess other potential adverse impacts. This may be, however, hindered by the limited availability of data for certain indicators, given the nature of investments in emerging markets.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or RepRisk. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index JPM EMBI GLOBAL DIVERSIFIED RI USD (the Benchmark) for performance objective. The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to high volatility linked to investments in low rating emerging markets bonds. Investors should have experience in volatile products and financial markets, and more specifically those relating to Emerging countries. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk calculation: commitment approach

12. UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION

Sub-Fund actively managed denominated in USD and which invests its net assets primarily in fixed or variable-rate Investment Grade or High Yield bonds issued by:

- companies domiciled in Emerging countries, or;
- companies in any countries but with an underlying instrument directly or indirectly linked to Emerging countries, or;
- companies whose risks are directly or indirectly linked to Emerging countries.

The Sub-Fund's investments will mainly be in the currencies of OECD countries, but also in Emerging countries' currencies up to 20%. On an ancillary basis, the Sub-Fund's net assets may be invested *inter alia* in:

- bonds issued by issuers not connected to Emerging countries, or;
- bonds denominated in other currencies.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund will be able to invest up to 100% of its net assets in High Yield products and/or transferable securities of Emerging countries and up to 20% in Contingent Convertible bonds. The exposure to High Yield and Emerging countries can be increased up to 120% through derivatives.

The average duration of the portfolio will be between 1 and 4 via direct investment and / or via the use of derivative products.

The exposure to these markets can be direct or via the use of derivative financial instruments such as CDS.

The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value. The ESG approach combines the filtering of the investment universe and the integration of environmental, social and governance considerations.

The ESG analysis relies on external and internal research. In the absence of an MSCI ESG rating, an internal rating may be assigned by the Investment Manager.

The screening of the investment universe aims at excluding issuers with the worst ESG practices, avoiding controversial business activities, and ensuring compliance with international norms (norms-based screening).

Issuers are excluded if:

- their MSCI ESG Rating is CCC
- they bear a Red Controversy Flag by MSCI ESG Research, that is they are identified as in breach of international norms and principles, such as, but not limited to, the UN Global Compact, ILO, the OECD Guidelines for Multinational Enterprises.
- they are involved in controversial weapons, tobacco production, adult entertainment production
- they are involved in other contentious business activities, where revenue thresholds apply, such as coal extraction, coal-powered electricity generation, unconventional oil & gas, weapons, other tobacco and adult entertainment activities

In addition, a maximum of 30% of the Sub-Fund can be invested in issuers with an MSCI ESG rating below BB. If an issuer's ESG rating is downgraded below B, the Investment Manager has to adjust the portfolio, in the best interest of shareholders.

ESG considerations are notably integrated into the issuers' qualitative credit assessment conducted internally, as the Investment Manager believes, alongside rating agencies, that sound ESG credentials can help improve issuers' creditworthiness. To conduct this ESG analysis, the Investment Manager relies on different sources of information and data, including for instance companies' annual and/or sustainability reports, ad-hoc engagement with issuers, credit agencies' ESG review, as well as external ESG data and scoring providers.

ESG analysis, combining both internal and external ESG research, covers at least 90% of the Sub-Fund's portfolio.

In addition to a holistic analysis of issuers' environmental and social practices, attention is put on issuers' carbon emissions and climate strategy, in order to ensure the reduction of the Sub-Fund's weighted average carbon intensity below that of its investment universe, as measured by the JP Morgan Corporate EMBI Diversified index. This index is a standard reference representing the EM Corporate Bond Universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund aims to deliver financial performance, derived notably from the carry offered by short-dated emerging market bonds. For that purpose, some investments may be included that are not aligned with the E/S characteristics promoted by the Sub-Fund's investment policy.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to high volatility linked to emerging markets. Investors should have experience in volatile products and financial markets, and, more specifically, those markets relating to Emerging countries. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk calculation: commitment approach

13. UBAM - EMERGING MARKET DEBT OPPORTUNITIES

Sub-Fund actively managed denominated in USD and which at any time invests a majority of its net assets in fixed or variable-rate bonds from:

- issuers domiciled in Emerging countries, or
- issuers from any country whose underlying is economically linked, directly or indirectly, to an issuer domiciled in an Emerging country, or
- issues linked to "Emerging country" risks.

Emerging countries may include investments in China through Bond Connect up to 20% of the Net Asset Value. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

On an ancillary basis, the Sub-Fund's net assets may be invested in securities from issuers not linked to Emerging countries or in securities denominated in Emerging country currencies.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund will be able to invest:

- up to 100% of its net assets in High Yield products and/or transferable securities of Emerging countries,
- up to 20% in Contingent Convertible bonds.

The exposure to High Yield and Emerging countries can be increased up to 120% through derivatives.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to high volatility linked to emerging markets. Investors should have experience in volatile products and financial markets, and more specifically those relating to Emerging countries. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk Calculation: commitment approach

14. UBAM - EMERGING MARKETS FRONTIER BOND

Sub-Fund actively managed denominated in USD and which at any time invests a majority of its net assets in fixed or variable-rate bonds in hard currencies such as (but not limited to) EUR or USD, issued by Public Authorities or quasi sovereigns which are:

- domiciled in Frontier countries, or;
- domiciled in any country whose underlying is economically linked, directly or indirectly, to an issuer domiciled in a Frontier country, or;
- linked to Frontier countries' risks.

The exposure to these markets can be direct or via the use of derivative financial instruments such as but not limited to CDS.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund will be able to invest up to 100% of its net assets in High Yield products and/or transferable securities of frontier countries according to the rating rules in section "[Bond Sub-Funds](#)", and, up to 20% in Contingent Convertible bonds. The exposure to High Yield and frontier countries can be increased up to 120% through derivatives.

Moreover, the Sub-Fund's net assets may be invested in frontier corporate bonds up to 20%.

Bonds denominated in a hard currency other than USD (e.g. EUR) will be hedged.

Overall, up to 20% of the Sub-Fund's net assets may be carried out in countries' local currencies.

Sub-Fund's investments will only be made on regulated markets which operate regularly and are recognised and open to the public.

Frontier countries include, but are not limited to: Angola, Armenia, Azerbaijan, Belarus, Belize, Bolivia, Cameroon, Costa Rica, Cote D'Ivoire, El Salvador, Ethiopia, Gabon, Georgia, Ghana, Guatemala, Honduras, Jamaica, Jordan, Kenya, Mongolia, Mozambique, Namibia, Nigeria, Pakistan, Papua New Guinea, Paraguay, Senegal, Sri Lanka, Suriname, Tajikistan, Tunisia, Uzbekistan, Vietnam and Zambia.

Please refer to the Frontier countries related risks in the "[RISK FACTORS](#)" chapter of this prospectus

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to high volatility linked to investments in low rating frontier markets bonds. Investors should have experience in volatile products and financial markets, and more specifically those relating to frontier countries. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk Calculation: commitment approach*

15. UBAM - EURO BOND

Sub-Fund denominated in EUR and which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR). The currency risk is limited to 10% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The Sub-Fund's ESG investment strategy is based on three pillars:

- Negative Screening. An Exclusion List is employed, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG integration is implemented on corporate issuers through a two-step process:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the index the ICE BofAML Euro Government Index ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate short-term losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

16. UBAM - EURO CORPORATE IG SOLUTION

The objective of this Sub-Fund is to offer optimized and actively managed investment grade market exposure. To this end the Sub-Fund which is denominated in EUR, invests its net assets primarily in investment grade bonds, money market Instruments, term deposit, and derivatives.

Exposure to fixed income will for a substantial part be synthetic through derivatives, in particular futures for interest rate exposure and CDS for credit exposure, as well as but not limited to, swaps and options denominated in any OECD currencies. Derivative implementation, used to efficiently gain exposure to investment markets, will be at the Investment Manager discretion and can be up to 100% of the Sub-Fund's exposure.

The overall portfolio will have a minimum modified duration of 2 years.

The net assets (excluding those used for the investment in derivatives) can be invested in term deposits with a maturity up to 12 months.

A minimum of 50% of the Sub-Fund's allocation to bonds and money market instruments including deposits will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data provider rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars. The below only applies to bonds. The derivative exposure in the Sub-Fund implemented to gain exposure to the Investment Grade market falls out of the scope of the ESG strategy.

- Exclusions applicable to the Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.
- ESG integration. ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer
- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

- Preference for green bonds. The Sub-Fund has an objective of a minimum 10% allocation to sustainable investments with environmental objectives. This allocation will be via Green Bonds. The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the index the ICE BofAML Euro Large Cap Corporate Index ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund in terms of interest rate duration and spread duration. Although the Sub-Fund's risk profile will be similar to the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who are looking for capital appreciation through a well-diversified investment in investment grade credit. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate short-term losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 400%. Please note that depending on market conditions the leverage level could be higher.*

17. UBAM - EURO HIGH YIELD SOLUTION

Sub-Fund actively managed denominated in EUR which invests its net assets primarily in sovereign and quasi- sovereign debt securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps). The Investment Manager will use several types of CDS among others but not limited to MARKIT iTraxx Xover index (for a minimum of 80% of the net assets) and the MARKIT CDX.NA.HY Index (between -20% and +20% of the net assets).

Further information on MARKIT CDX.NA.HY index and MARKIT iTraxx Xover index, who are rebalanced every 6 months, are available on Markit's website:

<http://www.markit.com/Documentation/Product/iTraxx> for iTraxx indices and
<http://www.markit.com/Documentation/Product/CDX> for CDX indices.

A minimum of 50% of the Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data providers rating, an internal rating may be assigned by the Investment Manager. The derivative exposure in the Sub-Fund implemented to gain exposure to the High Yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics. The below apply to sovereign bonds. The derivative exposure in the Sub-Fund implemented to gain exposure to the High Yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to the Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the Sub-fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.
- ESG integration. ESG integration is implemented on sovereign issuers through a two-step process:
 - External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuers.
 - A qualitative check follows this, where adjustments to the score are possible. Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

- Preference for Green Bonds. The preference for Green Bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to the high volatility linked to the High Yield markets. Investors should have experience in volatile products and financial markets, and particularly in High Yield markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

18. UBAM - STRATEGIC INCOME

Sub-Fund actively managed denominated in USD and which invests its net assets primarily in global credit markets with a credit rating of B+ (S&P or FITCH), B1 (Moody's) or above.

This Sub-Fund is actively managed and as a result its asset allocation and upon the discretion of the Investment Manager can vary within the following limits. The Sub-Fund may invest up to:

- 100% of its nets asset in High Yield securities
- 100% of its nets assets in Investment Grade securities
- 50 % of its net assets in Emerging countries
- 20% of its net assets in Contingent Convertible Bonds (Cocos)
- 20% of its net assets in asset backed securities (ABS)
- 10 % of its net assets in equity, including equity derivatives

The Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus

At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities, including derivatives such as but not limited to futures, options, swaps and credit default swaps.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD). The currency risk is limited to 20% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via

derivatives such as but not limited to Forex Forwards), or by not hedging investments in currencies other than the base currency (USD).

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

Sustainable characteristics are measured using MSCI ESG Rating. MSCI ESG ratings are designed to measure a company's resilience to long-term, industry material Environmental, Social and Governance (ESG) risks. The Environmental risk analysis will assess for instance the carbon footprint or the waste management policy of an issuer. The Social risk analysis will assess for instance labour standards or client data privacy. The Governance risk analysis will assess for instance the board structure or the risk governance and the risk culture. MSCI ESG Rating uses a rules-based methodology to identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers. MSCI ESG ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio with a high risk profile due to the high volatility linked to the High Yield, Emerging markets and Contingent Convertibles Bonds (Cocos). Investors should have experience in volatile products and financial markets, and particularly in High Yield and Emerging markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk calculation: relative VaR approach. The VaR of the Sub-Fund shall be compared with the VaR of 80% ICE BofAML BB Global High Yield Index hedged to USD and 20% BofAML Contingent Capital Index hedged to USD*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 300%. Please note that depending on market conditions the leverage level could be higher.*

19. UBAM - GLOBAL AGGREGATE BOND

Sub-Fund denominated in USD and which invests its net assets in securities denominated in multiple currencies, primarily in USD, EUR, JPY, GBP and CHF. At any time, this Sub-Fund invests a majority of its net assets in international bonds and other debt securities issued by sovereign / quasi sovereign issuers or other companies.

This Sub-Fund will invest primarily in Investment Grade bonds and:

- up to 40% of its net assets in high yield products;
- up to 35% of its net assets in transferable securities of Emerging countries,
- up to 20% of its net assets in Contingent Convertible bonds,
- up to 20% of its net assets in asset backed securities (ABS)
- up to 10% of its net assets in equity, including equity derivatives.

Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD) and also those that are not included in its benchmark, the Bloomberg Barclays Global Aggregate Index. The currency exposure may differ from that of its benchmark, Bloomberg Barclays Global Aggregate Index by up to 30%. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (USD).

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index Bloomberg Barclays Global Aggregate Total Return Index US Dollars ("the Benchmark") for performance objective and for the hedging of those share classes which are not denominated in the Sub-Fund's reference currency (see chapter "[TYPES OF SHARES](#)"). The Sub-Fund's investment objective does not aim to replicate this Benchmark or to define the Sub-Fund's investment universe. Although the Sub-Fund's risk profile will be similar to the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate short-term losses.

- Risk calculation: absolute VaR approach
- Leverage calculation methodology: sum of the notionals
- Expected leverage: 500%. Please note that depending on market conditions the leverage level could be higher.

20. UBAM - GLOBAL HIGH YIELD SOLUTION

Sub-Fund actively managed denominated in USD which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50 % of the Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data providers rating, an internal rating may be assigned by the Investment Manager. The derivative exposure in the Sub-Fund implemented to gain exposure to the High Yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in the sub-fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to the Sub-fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the sub-fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.
- ESG integration. ESG integration is implemented on sovereign issuers through a two-step process:
 - External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuers.
 - A qualitative check follows this, where adjustments to the score are possible. Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for Green bonds. The preference for Green bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis. The investment universe for Green Bonds as targeted by the Sub-Fund is currently limited. The Sub-fund ambitions to increase its allocation to Green Bond to 10% on a best effort basis should the depth of the market increase over time.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

This Sub-Fund may invest up to 100% of its net assets in High Yield products.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to the high volatility linked to the High Yield markets. Investors should have experience in volatile products and financial markets, and particularly in High Yield markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk calculation: absolute VaR approach
- Leverage calculation methodology: sum of the notionals
- Expected leverage: 350%. Please note that depending on market conditions the leverage level could be higher.

21. UBAM - GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION

Sub-Fund actively managed denominated in USD which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

Its interest rate exposure (duration) will be between 2.5 and 5.5 years.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data providers rating, an internal rating may be assigned by the Investment Manager. The derivative exposure in the Sub-Fund implemented to gain exposure to the High Yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in the sub-fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG *strategy*.

- Exclusions applicable to the Sub-Fund according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the sub-fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.
 - ESG integration. ESG integration is implemented on sovereign issuers through a two-step process: External data sources provide informations to an internal model to build a quantitative scoring system for each sovereign issuers.
 - A qualitative check follows this, where adjustments to the score are possible. Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for Green bonds. The preference for Green bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

This Sub-Fund may invest up to 100% of its net assets in High Yield products.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to the high volatility linked to the High Yield markets. Investors should have experience in volatile products and financial markets, and particularly in High Yield markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- Risk calculation: absolute VaR approach
- Leverage calculation methodology: sum of the notionals
- Expected leverage: 400%. Please note that depending on market conditions the leverage level could be higher.

22. UBAM - HYBRID BOND

Sub-Fund denominated in USD which invests its net assets primarily in worldwide hybrid securities

This Sub-Fund will invest in:

- CoCos, i.e. Contingent Convertible bonds with specific loss-absorbing mechanisms like permanent write-down, temporary write-down or conversion into equity up to 100%
- hybrid securities such as financial and non-financial subordinated debt up to 100%
- High Yield up to 100%
- emerging markets up to 30%
- equity, including equity derivatives up to 10%

CoCos will have a minimum rating of B- (or equivalent), and be issued by banks whose parent company has a minimum balance sheet of USD 100 billion and whose parent company is domiciled in a country having a minimum rating of BB- (or equivalent).

The Sub-Fund may invest in financial derivative instruments for hedging and investment purposes. Derivatives may include (but are not limited to)

- Interest rate futures to manage the overall interest rate exposure
- CDS single name or CDS indices to allocate to or to hedge different segments of the credit markets
- Equity derivatives (up to 10%) to allocate (or to hedge) the junior part of the capital structure.

The Emerging Market part may include investment in China through Bond Connect. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The Sub-Fund's exposure to currencies other than the base currency (USD) will be 10% maximum. This exposure will be done either through direct exposure to other currencies than the base currency (USD), or by not hedging a maximum of 10% of investment in other currencies than the base currency (USD).

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors. This process has two key inputs:
 - Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
 - Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.
 ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.
- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index BofAML Contingent Capital Index hedged to USD ("the Benchmark") for risk monitoring. The Sub-Fund's investment objective does not aim to replicate this Benchmark nor to define the Sub-Fund's investment universe. The Sub-Fund's performance is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors and issuers, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified contingent convertibles bonds allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk calculation: relative VaR approach. The VaR of the Sub-Fund shall be compared with the VaR of BofAML Contingent Capital Index hedged to USD*
- *Leverage calculation methodology: sum of the notional*
- *Expected leverage: 400%. Please note that depending on market conditions the leverage level could be higher.*

23. UBAM - MEDIUM TERM US CORPORATE BOND

Sub-Fund denominated in USD and which invests its net assets primarily in bonds denominated in this currency issued by companies ("corporate bonds") with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's) and, up to 20% of its net assets in Contingent Convertible bonds with a minimum rating of B- (Standard and Poor's or Fitch) or B3 (Moody's) .

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The Sub-Fund is actively managed and aims to outperform the ICE BofAML 1-10 Year US Large CAP Corporate Index with an average maturity of circa 5 years (the Index). This Index is representative of the investment universe and of the risk profile of the Sub-Fund. The Sub-Fund is expected to deliver comparable returns to the Index over time. Even if the Sub-Fund portfolio's securities will mainly correspond to those of the Index, the Investment Manager may invest at its discretion in issuers, sectors and countries not included in the Index and/or deviate materially from the Index composition in term of countries, sectors, issuers, instruments etc... in order to take advantage of specific investment opportunities. This deviation of the constituents can lead to a deviation of the Sub-Fund's performance compared to the Index performance.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund may invest up to 30% of its net assets in transferable securities of Emerging countries.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars:

- Sector exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index the ICE BofAML 1-10 Year US Large Cap Corporate Index ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate short-term losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notional*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

24. UBAM - US DOLLAR BOND

Sub-Fund denominated in USD and which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD). The currency risk is limited to 10% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via

derivatives such as but not limited to Forex Forwards), or by not hedging investments in currencies other than the base currency (USD).

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

The Sub-Fund's ESG investment strategy is based on three pillars:

- Negative Screening. An Exclusion List is employed, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG integration is implemented on corporate issuers through a two-step process:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis

- Preference for Green, Social and Sustainability bonds. The preference for Green, Social and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD

The Sub-Fund is actively managed and uses the index the ICE BofAML US Treasury Index ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio. Investors should have a minimum investment horizon of 3 years and should be able to accept moderate short-term losses.

- Risk calculation: absolute VaR approach
- Leverage calculation methodology: sum of the notionals
- Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.

25. UBAM - US HIGH YIELD SOLUTION

Sub-Fund actively managed denominated in USD which invests its net assets primarily in sovereign and quasi- sovereign debt securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps).

The Investment Manager will use several types of CDS among other but not limited to MARKIT CDX.NA.HY index (for a minimum of 80% of the net assets), the MARKIT iTraxx Xover Index (between - 20% and + 20% of the net assets) and the MARKIT CDX.EM Index (between - 20% and + 20% of the net assets).

Further information on MARKIT CDX.NA.HY index, MARKIT iTraxx Xover index and MARKET CDX.EM Index, who are rebalanced every 6 months, are available on Markit's website:

<http://www.markit.com/Documentation/Product/iTraxx> for iTraxx indices and

<http://www.markit.com/Documentation/Product/CDX> for CDX indices.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

A minimum of 50% of the Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data providers rating, an internal rating may be assigned by the Investment Manager. The derivative exposure in the Sub-Fund implemented to gain exposure to the High Yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in the sub-fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to the Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the sub-fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.
- ESG integration. ESG integration is implemented on sovereign issuers through a two-step process:
 - External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuers.
 - A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund's allocation to bonds is covered by the extra-financial analysis.

- Preference for Green bonds. The preference for Green bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

The Sub-Fund can invest in derivatives. Derivative instruments do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who need a well-diversified bond allocation in their portfolio, but with a high risk profile due to the high volatility linked to the High Yield markets. Investors

should have experience in volatile products and financial markets, and particularly in High Yield markets. They should have a minimum investment horizon of 3 years and should be able to accept significant losses.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 200%. Please note that depending on market conditions the leverage level could be higher.*

Convertible bond Sub-Funds

In principle, the overall risk for these Sub-Funds is calculated according to the commitment methodology unless otherwise indicated in the Sub-Fund's investment policy.

26. UBAM - EUROPEAN CONVERTIBLE BOND

Sub-Fund denominated in EUR which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares
- any other types of securities which may be considered as shares under local law (Mandatory Convertibles, Preferred Convertibles, Mandatory Convertibles Preferred Shares, Mandatory Convertibles Preferred Stocks, Mandatory Exchangeable bonds, Convertible Perpetual Preferred Stock etc...)

or similar securities, of rating minimum B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency, or an equivalent internal rating determined by the Investment Manager, of which the underlying and/or issuer is a company which has its registered office in a member country of the OECD or is listed on a European stock exchange, with at least two thirds of its net assets in companies which are domiciled or carry out an important part of their economic activity in European countries.

The Sub-Fund may use futures, swaps (including Credit Default Swaps (CDS)), options and foreign-exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio and/or expose it to equity, interest rate, credit, foreign-exchange and volatility risk.

The Sub-Fund may also have exposure to:

- Shares up to a maximum of 10% (excluding preferred shares) of its net assets. The shares held by the Sub-Fund will only be the result of bond conversions. These shares will be sold by the Investment Manager within a period of maximum 6 months.
- Non-convertible bonds or similar whatever their maturity. High Yield non-convertible bonds or similar are limited to 20% of its net assets.

The equity sensitivity of the Sub-Fund shall not exceed 70%. At single security level, the equity sensitivity refers to the change in the price of the security for 1% change in the underlying equity price. At portfolio level, the average equity sensitivity is computed as the weighted average of each security's equity sensitivity. "

The Sub-Fund will hedge non-denominated Euro currencies and residual direct exposure to currencies other than the base currency (EUR) will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the portfolio manager.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund may invest up to 100% of its net assets in High Yield products and will not invest in Contingent Convertible bonds ("CoCos").

The Sub-Fund promotes environmental (E) and social (S) characteristics while investing in companies with good governance practices, in accordance with Article 8 of the EU Regulation n°2019/2088 for the disclosure of information related to sustainability within the financial services sector (SFDR). It aims to obtain an average Environmental, Social and Governance (ESG) rating which is higher than that of the Refinitiv Europe Hedged

Convertible Bond (EUR) and a lower carbon footprint (as measured by the weighted average carbon intensity). This index is used to measure the ESG characteristics of the Sub-Fund.

Environmental, Social and Governance (ESG) criteria are an integral part of the investment process of the Sub-Fund (security selection, portfolio construction). The sustainability strategy of the Sub-Fund is based on two main components:

- negative screening (exclusion criteria): respect of the UBP's Responsible Investment Policy (available at <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- positive ESG integration (see details below).

A minimum of 80% of the Sub-Fund's net assets is subject to an extra-financial analysis carried out internally or externally.

Internally, the ESG rating methodology of the Sub-Fund is based on the assessment of (1) climate risk, (2) the environment, (3) social and (4) governance issues. For each one of these 4 components, companies are analysed on the most significant sustainable development issues appropriate to their business activity. This assessment is based on a combination of fundamental internal analyses and quantitative data provided by external ESG providers.

The overall ESG quality of the portfolio is measured against that of the Refinitiv Europe Hedged Convertible Bond (EUR) in order to ensure that the Sub-Fund trends towards a higher ESG quality profile and a lower carbon footprint than that of the European convertible bond market index. The ESG quality profile of the fund is measured by the weighted average Industry-Adjusted ESG score of the companies in which the portfolio is invested. The carbon footprint is measured by the weighted average of the fund's carbon intensity.

The Sub-Fund promotes E/S characteristics and does not have a sustainable investment objective.

The Investment Manager takes into consideration the negative impacts of investments on environmental (weighted-average carbon intensity), social and human rights (gender diversity: percentage of women within management, exposure to controversial arms) issues and the respect of international standards (violations of the UN Global Compact).

The Investment Manager takes governance into consideration in its assessment related to sustainability. Thus, the Investment Manager assesses factors such as accounting practices and the quality of the financial data disclosed, the composition of the board of directors, independence of the chairman and the board of directors, the shareholding structure, dispersed ownership of shares, as well as remuneration policies and particularly the integration of extra-financial criteria.

The investment strategy includes three constraints to the achievement of environmental and social objectives promoted by the Sub-Fund:

- Application of negative screening (exclusion criteria): respect of the UBP's Responsible Investment Policy (available at <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- A minimum of 80% of the Sub-Fund's allocation to underlying convertible bonds is subject to an extra-financial analysis carried out internally or externally;
- Looking for an ESG quality profile higher than that of the European convertible bond market index, Refinitiv Europe Hedged Convertible Bond (EUR) and a lower carbon footprint than that of the latter.

Exposure to derivatives is not related to the promotion of environmental and social characteristics of the Sub-Fund. The Sub-Fund may use futures, swaps (including Credit Default Swaps (CDS)), options and foreign-exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio and/or expose it to equity, interest rate, credit, foreign-exchange and volatility risk. We consider the impact of the use of derivatives on the SRI quality of the Sub-Fund to be limited. Calculations of the ESG score/rating of the Sub-Fund are carried out only on bonds within the portfolio.

Although this Sub-Fund is classified Article 8 SFDR, the investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities. (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the Refinitiv Europe Hedged Convertible Bond (EUR) ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities. The Benchmark is not aligned to the environmental and social characteristics promoted by the Sub-Fund.

Standard investor profile: this Sub-Fund is suitable for investors who want to take moderate risks linked to investments in listed shares. In this way, the investor should have experience in financial products, an investment horizon of at least 3 years and be able to accept losses.

- *Risk Calculation: commitment approach*

27. UBAM - GLOBAL CONVERTIBLE BOND

Sub-Fund denominated in EUR which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares
- any other types of securities which may be considered as shares under local law (Mandatory Convertibles, Preferred Convertibles, Mandatory Convertibles Preferred Shares, Mandatory Convertibles Preferred Stocks, Mandatory Exchangeable bonds, Convertible Perpetual Preferred Stock etc...)

or similar securities, of rating minimum B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency, or an equivalent internal rating determined by the Investment Manager, of which the underlying and/or issuer is a worldwide company, including Emerging countries up to a maximum of 50% of the Sub-Fund net assets.

The Sub-Fund may use futures, swaps (including Credit Default Swaps (CDS)), options and foreign-exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio and/or expose it to equity, interest rate, credit, foreign-exchange and volatility risk.

The Sub-Fund may also have exposure to:

- Shares up to a maximum of 10% (excluding preferred shares) of its net assets. The shares held by the Sub-Fund will only be the result of bond conversions. These shares will be sold by the Investment Manager within a period of maximum 6 months.
- Non-convertible bonds or similar whatever their maturity. High Yield non-convertible bonds or similar are limited to 20% of its net assets.

The equity exposure of the Sub-Fund shall not exceed 70% (through investments in eligible assets, as detailed above). In this context, "equity exposure" refers to the aggregate equity sensitivity of the portfolio. At single security (e.g. convertible bond) level, the equity sensitivity refers to the change in the price of the security for 1% change in the underlying equity price. At portfolio level, the average equity sensitivity is computed as the weighted average of each security's equity sensitivity."

The Sub-Fund will hedge non-denominated Euro currencies and residual direct exposure to currencies other than the base currency (EUR) will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the portfolio manager.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund may invest up to 100% of its net assets in High Yield products and will not invest in Contingent Convertible bonds ("CoCos").

The Sub-Fund promotes environmental (E) and social (S) characteristics while investing in companies with good governance practices, in accordance with Article 8 of the EU Regulation n°2019/2088 for the disclosure of information related to sustainability within the financial services sector (SFDR). It aims to obtain an average Environmental, Social and Governance (ESG) rating which is higher than that of the Refinitiv Global Hedged Convertible Bond (EUR) and a lower carbon footprint (as measured by the weighted average carbon intensity). This index is used to measure the ESG characteristics of the Sub-Fund.

Environmental, Social and Governance (ESG) criteria are an integral part of the investment process of the Sub-Fund (security selection, portfolio construction). The sustainability strategy of the Sub-Fund is based on two main components:

- negative screening (exclusion criteria): respect of the UBP's Responsible Investment Policy (available at <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- positive ESG integration (see details below).

A minimum of 80% of the Sub-Fund's net assets is subject to an extra-financial analysis carried out internally or externally.

Internally, the ESG rating methodology of the Sub-Fund is based on the assessment of (1) climate risk, (2) the environment, (3) social and (4) governance issues. For each one of these 4 components, companies are analysed on the most significant sustainable development issues appropriate to their business activity. This assessment is based on a combination of fundamental internal analyses and quantitative data provided by external ESG providers.

The overall ESG quality of the portfolio is measured against that of the Refinitiv Global Hedged Convertible Bond (EUR) in order to ensure that the Sub-Fund trends towards a higher ESG quality profile and a lower carbon footprint than that of the global convertible bond market index. The ESG quality profile of the fund is measured by the weighted average Industry-Adjusted ESG score of the companies in which the portfolio is invested. The carbon footprint is measured by the weighted average of the fund's carbon intensity.

The Sub-Fund promotes E/S characteristics and does not have a sustainable investment objective.

The Investment Manager takes into consideration the negative impacts of investments on environmental (weighted-average carbon intensity), social (gender diversity: percentage of women within management, exposure to controversial arms) issues and the respect of international standards (violations of the UN Global Compact).

The Investment Manager takes governance into consideration in its assessment related to sustainability. Thus, the Investment Manager assesses factors such as accounting practices and the quality of the financial data disclosed, the composition of the board of directors, independence of the chairman and the board of directors, the shareholding structure, dispersed ownership of shares, as well as remuneration policies and particularly the integration of extra-financial criteria.

The investment strategy includes three constraints to the achievement of environmental and social objectives promoted by the Sub-Fund:

- Application of negative screening (exclusion criteria): respect of the UBP's Responsible Investment Policy (available at <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- A minimum of 80% of the Sub-Fund's allocation to underlying convertible bonds is subject to an extra-financial analysis carried out internally or externally;
- Looking for an ESG quality profile higher than that of the global convertible bond market index, Refinitiv Global Hedged Convertible Bond (EUR) and a lower carbon footprint than that of the latter.

Exposure to derivatives is not related to the promotion of environmental and social characteristics of the Sub-Fund. The Sub-Fund may use futures, swaps (including Credit Default Swaps (CDS)), options and foreign- exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio and/or expose it to equity, interest rate, credit, foreign-exchange and volatility risk. We consider the impact of the use of derivatives on the SRI quality of the Sub-Fund to be limited. Calculations of the ESG score/rating of the Sub-Fund are carried out only on bonds within the portfolio.

Although this Sub-Fund is classified Article 8 SFDR, the investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities. (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the Refinitiv Global Hedged Convertible Bond (EUR) ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities. The Benchmark is not aligned to the environmental and social characteristics promoted by the Sub-Fund.

Standard investor profile: this Sub-Fund is suitable for investors who want to take moderate risks linked to investments in listed shares. In this way, the investor should have experience in financial products, an investment horizon of at least 3 years and be able to accept losses.

- *Risk Calculation: commitment approach*

28. UBAM - GLOBAL HEALTHCARE CONVERTIBLE BOND

Sub-Fund actively managed denominated in USD which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares
- any other types of securities which may be considered as shares under local law (Preferred Convertibles, Convertible Perpetual Preferred Stock etc...) but excluding securities with mandatory conversion;

with no rating constraints, of which the underlying is a worldwide company specializing in Healthcare sector.

The Sub-Fund may use foreign-exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio's foreign-exchange risk.

The Sub-Fund may also have exposure to:

- Shares up to a maximum of 10% (excluding preferred shares) of its net assets. The shares held by the Sub-Fund will only be the result of bond conversions. These shares will be sold by the Investment Manager within a period of maximum 6 months.

The Sub-Fund will hedge non-USD denominated currencies and residual direct exposure to currencies other than the base currency (USD) will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the Investment Manager.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund may invest up to 100% of its net assets in High Yield products with no rating constraints and will not invest in securities designated as Contingent Convertible bonds ("CoCos").

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who want to take moderate risks linked to investments in listed shares. In this way, the investor should have experience in financial products, an investment horizon of at least 3 years and be able to accept losses.

- *Risk Calculation: commitment approach*

29. UBAM - GLOBAL RESPONSIBLE CONVERTIBLE BOND

Sub-Fund denominated in EUR which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares
- any other types of securities which may be considered as shares under local law (Mandatory Convertibles, Preferred Convertibles, Mandatory Convertibles Preferred Shares, Mandatory Convertibles Preferred Stocks, Mandatory Exchangeable Bonds, Convertible Perpetual Preferred Stock etc...)

or similar securities, with a rating of minimum B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency, or an equivalent internal rating determined by the Investment Manager, of which the underlying and/or issuer is a worldwide company, including Emerging countries up to a maximum of 50% of the Sub-Fund net assets.

The Sub-Fund aims to take advantage of the specific risk/return profile of convertible bonds within a sustainable framework through a fundamental, bottom-up investment process and a global allocation across major markets (US, Europe and Asia primarily).

In the context of this Sub-Fund, the "sustainable framework" is defined by the two sustainability objectives pursued by the Sub-Fund:

- to maintain a higher average ESG score than the Refinitiv Global Hedged Convertible Bond (EUR) ("the Index") at all times, as measured by the average Industry-Adjusted Score computed by MSCI ESG Research. This index is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.
- to maintain lower average carbon intensity than the Index at all times, as measured by MSCI ESG Research. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

To reach these objectives, the integration of ESG considerations is done at 3 levels:

- ESG exclusion criteria (negative screening), based on binding exclusion and/or restriction criteria related to environmental, social and governance. For the purpose of indication, for this Sub-Fund, exclusion criteria cover areas such as nuclear or other controversial weapons; shale gas or shale oil production; tobacco; international norms as measured by MSCI Red Overall Controversy Flags; coal-based electricity; nuclear resources; etc (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>);
- ESG inclusion approach (positive screening), based on internal qualitative ESG assessment of issuers and underlying equities; Portfolio holdings' ESG criteria are reviewed on a monthly basis;
- Portfolio construction. Portfolio holdings' ESG values are reviewed on a monthly basis.

The investment process combines six steps: steps 1 and 2 are about the financial analysis (screening on credit and liquidity criteria, convertible bond analysis) while steps 3 and 4 are specific to the extra-financial analysis (ESG exclusions, Sustainable analysis). Steps 3 and 4 aim to isolate companies that stand out by their commitment to sustainable development as per the four pillars mentioned below. The two final steps are about the portfolio construction (step 5) and the ongoing risk monitoring (step 6).

The integration of ESG considerations is therefor done at three levels:

- (a) through a negative screening based on strict ESG exclusion criteria (step 3)
- (b) through an internal, qualitative sustainable analysis of the companies of our investment universe (step 4)
- (c) through the portfolio construction (step 5) as detailed below:

(a, step 3) In order to exclude companies concerned by our defined ESG exclusion criteria, we primarily make use of the extra-financial analysis and inputs as provided by MSCI ESG Research. The application

of our ESG exclusion criteria is done on securities of the initial investment universe that have not been screened out during steps 1 and 2 of our process (financial analysis).

(b, step 4) Our internal, qualitative sustainability analysis is performed on each security of our initial investment universe that has not been excluded during the first 3 steps of the process. It is based on the evaluation of 4 pillars: I) climate risk (mainly focuses on GHG emissions (level and trend), regulatory risk exposure and quality of data disclosure) II) environmental strategy (mainly focuses on resources management and corporates' environmental footprint) III) social capital (mainly focuses on companies' ability to generate trust and loyalty towards its workforce, customers and society) and IV) governance (mainly focuses on the quality of accounting and financial reporting practices, board's structure, transparency and shareholders' protection). Each of these pillars is assessed according to defined sustainability metrics, which are either sector-specific (for pillars II. Environmental strategy and III. Social capital) or common regardless of the company's industry (for pillars I. Climate risk and IV. Governance). In order to evaluate each of these sustainability metrics, we notably make use of the extra-financial information as communicated and/or reported by the company itself as well as from third party ESG research providers. For each company under review, the assessment of these 4 pillars (equally weighted) leads to the attribution of an internal "sustainability score".

(c, step 5) With respect to the portfolio construction, the combination of our financial and extra-financial analysis allows us to select companies combining strong financial value and higher sustainable practices. Our allocation is conviction-driven, with larger weight allocated to companies offering both sound financials and higher extra-financial standards, according to our analysis.

The application of our defined ESG exclusion criteria, combined with our sustainability assessment of companies, will lead to an exclusion rate of at minimum 20% from the eligible investment universe post our financial analysis (post steps 1 & 2). At all times, a minimum of 90% of the Sub-Fund's net assets is invested in companies rated by MSCI ESG Score, and that comply with the Sub-Fund's ESG exclusion criteria.

The Investment Manager recognizes that sustainability risks as described in the "[RISK FACTORS](#)" chapter of this prospectus may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research. These data which could be difficult to obtain and/or incomplete, estimated, out of data or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

The Sub-Fund may use futures, swaps (including Credit Default Swaps (CDS)), options and foreign-exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio. The Sub-Fund may also use those instruments under exceptional and temporary circumstances to expose itself to equity, interest rate, credit, foreign-exchange and volatility risk. The use of derivatives on single names could only be done on companies eligible according to the ESG strategy above.

The Sub-Fund may also have exposure to:

- Shares up to a maximum of 10% (excluding preferred shares) of its net assets. The shares held by the Sub-Fund will only be the result of bond conversions. These shares will be sold by the Investment Manager within a period of maximum 6 months.
- Non-convertible bonds or similar whatever their maturity. High Yield non-convertible bonds or similar are limited to 20% of its net assets.

The equity exposure of the Sub-Fund shall not exceed 70% (through investments in eligible assets, as detailed above). In this context, "equity exposure" refers to the aggregate equity sensitivity of the portfolio. At single security (e.g. convertible bond) level, the equity sensitivity refers to the change in the price of the security for 1% change in the underlying equity price. At portfolio level, the average equity sensitivity is computed as the weighted average of each security's equity sensitivity."

The Sub-Fund will hedge non-EUR denominated currencies and residual direct exposure to currencies other than the base currency (EUR) will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the Investment Manager.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund may invest up to 100% of its net assets in High Yield products and will not invest in securities designated as Contingent Convertible bonds ("CoCos").

The Investment Manager is committed to include among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, the Investment Manager uses the qualitative analysis described above, which is based on four pillars including climate risk, to select investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle." At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, it is expected that such percentage will increase. The prospectus will then be updated to reflect the new applicable percentage.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the Refinitiv Global Hedged Convertible Bond (EUR) ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors who want to take measurable risks linked to investments in listed shares. In this way, the investor should have experience in financial products, an investment horizon of at least 3 years and be able to accept losses.

- *Risk Calculation: commitment approach*

30. UBAM - GLOBAL TECH CONVERTIBLE BOND

Sub-Fund actively managed denominated in USD which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares
- any other types of securities which may be considered as shares under local law (Preferred Convertibles, Convertible Perpetual Preferred Stock etc...) but excluding securities with mandatory conversion;

with no rating constraints, of which the underlying is a worldwide company specializing in Information Technology sector.

The Sub-Fund may use foreign-exchange forward contracts on regulated, organized and/or OTC markets in order to hedge the portfolio's foreign-exchange risk.

The Sub-Fund may also have exposure to:

- Shares up to a maximum of 10% (excluding preferred shares) of its net assets. The shares held by the Sub-Fund will only be the result of bond conversions. These shares will be sold by the Investment Manager within a period of maximum 6 months.

The Sub-Fund will hedge non-USD denominated currencies and residual direct exposure to currencies other than the base currency (USD) will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the Investment Manager.

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund may invest up to 100% of its net assets in High Yield products with no rating constraints and will not invest in securities designated as Contingent Convertible bonds ("CoCos").

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities. (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors who want to take moderate risks linked to investments in listed shares. In this way, the investor should have experience in financial products, an investment horizon of at least 3 years and be able to accept losses.

- *Risk Calculation: commitment approach*

Equity Sub-Funds

Equity Sub-Funds may invest in transferable securities from Emerging countries, while complying with the investment policies and restrictions as set out hereafter.

In principle, the overall risk for these Sub-Funds is calculated according to the commitment methodology unless otherwise provided in the Sub-Fund's investment policy.

31. UBAM - 30 EUROPEAN LEADERS EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies in the European Union, in the United Kingdom, in the European Economic Area and/or in Switzerland.

This Sub-Fund is selecting companies which are expected to provide sustainably high levels of cash flow return on investment (CFROI®) that are higher than the Cost of Capital (CoC) and which grow their asset base while maintaining this spread. (Source: CFROI® Credit Suisse HOLT). The Sub-Fund will be mainly constituted as a high-quality, large market capitalization equity portfolio invested in around 30 European leading companies ("leading" implies e.g. having a leadership position due to the market share, innovation capabilities, brand recognition or superior management talents) combining superior returns and growth opportunities characteristics over the next 3-5 years.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the MSCI Europe. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Selected stock issuers should:

- not be in breach of UN Global Compact or embroiled in severe controversies ("Fail" and "Non-Compliant" status under both MSCI ESG Manager and Sustainalytics UN GC compliance). In case a portfolio holding is "downgraded" as failing UN Global Compact, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interest of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;

- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have limited exposure to thermal coal and unconventional oil and gas extraction revenues, to conventional oil & gas revenues as well as to power generation revenues from coal, oil & gas and nuclear sources to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>).

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled

The ESG analysis covers 100% of the Sub-Fund's portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "RISK FACTORS" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norm-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider

a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

32. UBAM - 30 GLOBAL LEADERS EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies worldwide (including Emerging countries).

This Sub-Fund is selecting stocks world-wide, primarily companies which are expected to provide growth and leading (i.e. sustainably high quality) levels of cash flow return on investment (CFROI®) that are higher than the Cost of Capital (CoC) and which grow their asset base while maintaining this spread. (Source: CFROI® Credit Suisse HOLT). The investment strategy is focused on the sustainability of such return and growth profiles, and hence shall be long-term oriented with little need for turnover. Consequently, the Sub-Fund will be mainly constituted as a high-quality, large market capitalization equity portfolio invested in around 30 global leading companies ("leading" implies e.g. having a leadership position due to the market share, innovation capabilities, brand recognition or superior management talents) combining superior returns and growth opportunities characteristics over the next 3-5 years.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

The Sub-Fund applies a minimum 20% reduction rate, at all times, on its investment universe resulting from the application of ESG exclusion criteria. This reduction rate is calculated based on the number of issuers that are covered by MSCI ESG Research. The Sub-Fund also aims to perform better than its benchmark, the MSCI AC World Net Return on two ESG indicators. First by promoting a lower carbon footprint paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark. Second by promoting better corporate sustainability than its benchmark by excluding companies in breach of the UN Global Compact (UNGC) based on both MSCI ESG Research and Sustainalytics status. The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

Selected stock issuers should:

- not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is "downgraded" as failing one of these global norms, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not have an MSCI ESG Rating of B or CCC;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>);
- have limited exposure to coal and unconventional oil and gas extraction as well as to coal-powered electricity to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>);

and, with respect to the aim of limiting the Sub-Fund's carbon footprint:

- have limited exposure to conventional oil & gas extraction or other associated revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);

- have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have no exposure to thermal coal extraction
- have no exposure to revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norm-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled

The ESG analysis covers 100% of the Sub-Fund's portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norm-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Regulation (EU) 2020/852. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. As soon as said information becomes available, the prospectus will be updated to inform on the proportion.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- Risk calculation: commitment approach

33. UBAM - ANGEL JAPAN SMALL CAP EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Japan.

The Sub-Fund's management objective is to maximise capital gains over the medium term. To achieve this objective, the Sub-Fund will adopt an active and selective policy to pick the stocks of Japanese companies.

The strategy is growth-oriented. Superior results are best achieved by considering smaller companies with strong management, innovative business models, and niche products as they have sound growth opportunities regardless of the economic environment. Those targeted companies are often well positioned to overtake larger, outdated companies held back by old-fashioned trading practices and customs. Targeting smaller companies might therefore play a vital role in the future and sustainable growth of the Japanese economy. The Investment Manager also believes that supporting smaller Japanese companies through equity investment provides investors with access to these excellent growth opportunities and stock market returns.

The ESG investment strategy is based on three pillars:

- Business activities exclusion, provided that data are available, covering harmful activities (such as controversial and conventional weapons, coal, unconventional Oil & Gas, tobacco, adult entertainment) as well as breaches of the UN Global Compact in line with the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>) – revenue thresholds may apply.
- ESG integration. ESG integration is implemented to select stocks. Stock selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of stocks ESG risks and opportunities relying on internal and external research. This review produces an ESG assessment.
- Independent and forward-looking review of the financial risks and opportunities relying on internal research. This review produces a financial view.
- Preference for stocks with reduced carbon footprint as well as good governance characteristics as assessed by internal research, which relies on active dialogue with companies' management as well as other sources of information. The preference for such stocks should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

While the Sub-Fund seeks to promote a lower weighted average carbon intensity than the MSCI Japan Small Cap Index, the relevant data might not be available for all the stocks in which the Sub-fund invests.

The minimum market capitalisation of selected companies will be JPY 10 billion.

Although this Sub-Fund is classified Article 8 SFDR, the investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities. (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in JPY.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

The Sub-Fund's name only refers to the name of Angel Japan Asset Management Co., Ltd insofar as it is the Sub-Fund's Investment Adviser. Angel Japan Asset Management Co., Ltd is neither the Sub-Fund's co-

promoter nor its distributor. Angel Japan Asset Management Co.Ltd is headquartered at 1-8-1, Marunouchi, Chiyoda-ku, Tokyo is paid by the Management Company as agreed upon by these two parties.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

34. UBAM - BELL GLOBAL SMID CAP EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies worldwide.

This Sub-Fund may invest in large, medium and small capitalisation. The minimum market capitalisation of any security in the portfolio at the time of its acquisition will be USD \$1 billion or equivalent in another currency.

The Sub-Fund's investments will aim to privilege companies from the Communication Services, Consumer Discretionary, Consumer Staples, Health Care, Industrials, Information Technology and Materials.

This Sub-Fund is selecting stocks world-wide, primarily companies that represent the Manager's philosophy of Quality at a Reasonable Price to build a high quality portfolio, without paying an excessive valuation premium. The Manager defines Quality as companies with an optimal mix of six key factors: high quality management, consistent profitability, strong franchises, financial strength, favourable business drivers and strong environmental, social & governance (ESG) characteristics. A key metric used to demonstrate a Quality company is return on equity (ROE), which will help identify companies with a superior franchise and that are consistently creating shareholder value. Common characteristics of a high Quality company include: having a leading market share, high level of innovation and opportunities for growth, strong brand recognition, disciplined capital allocation, a management team with a strong track record, low levels of financial gearing and strong ESG traits. The investment strategy is focused on companies primarily in the small and mid-cap segment of the market and will be relatively concentrated with an investment horizon of 3-5 years.

The ESG approach is embedded in the investment process of the Sub-Fund as the Manager believes that integrating ESG factors will deliver superior long term returns to investors. ESG considerations can be important drivers or risks associated with an investment and its ability to maintain or improve the Quality of their business and ultimately their returns. The Manager believes that as a steward of investors' capital, active ownership and engagement is paramount to the success of investments and is in the best interests of investors. The Sub-Fund is managed so that the ESG quality score, as measured by MSCI ESG Research, will remain superior to that of the reference index MSCI World SMID Cap Index, at all times. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental characteristics promoted by the Sub-Fund.

The MSCI ESG quality score measures the ability of underlying holdings to manage key medium to long term risks and opportunities arising from environmental, social, and governance factors. It is based on MSCI ESG scores. While the three underlying scores (Environmental, Social, Governance) are absolute scores, the ESG quality score is awarded relative to industry/regional peers and thus cannot be easily deducted from the three underlying scores. If MSCI ESG research is incomplete or unavailable for a company, the Investment Manager will do its own proprietary analysis based on the company's ESG reporting, and other sources like sell-side research or Bloomberg statistics.

The Sub-Fund also promotes environmental characteristics through a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy. The Sub-Fund will have limited exposure to coal and unconventional oil and gas extraction as well as to coal or fossil fuel-powered electricity to limit the Sub-Fund's carbon footprint. The Sub-Fund will maintain its weighted average carbon intensity at least 25% below that of its reference index MSCI World SMID Cap Index. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO2 equivalent per million of USD revenues.

Selected stock issuers have to:

- not be in breach of international norms and principles (such as, but not limited to, the UN Global Compact), as identified by a Red Overall Controversy Flag, according to MSCI ESG Research
- not be involved in controversial weapons, coal production or tobacco production.
- have limited exposure to uranium extraction, nuclear weapons, adult entertainment and other tobacco revenues (revenue thresholds apply).

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related considerations influence the proprietary financial models and the valuations of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement and collaborative engagements with companies, as well as proxy voting according to the Voting Rights Policy (<https://www.ubp.com/en/investment-expertise/responsible-investment>), the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers at least 90% of the Sub-Fund's portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about Responsible Investment policy is available on <http://www.ubp.com/en/investment-expertise/responsible-investment>.

The Investment Manager is allowed to invest without limits in currencies other than the Sub-Fund's base currency (USD). The Investment Manager does not intend to hedge currency exposure in this Sub-Fund.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

More information about SFDR is available in the SFDR Schedule.

The Sub-Fund's name only refers to the name of Bell Asset Management Ltd, Ltd insofar as it is the Sub-Fund's Investment Manager. Bell Asset Management Ltd is neither the Sub-Fund's co-promoter nor its distributor. Bell Asset Management is headquartered at Level 20, 101 Collins Street Melbourne Australia 3000 is paid by the Management Company as agreed upon by these two parties.

The net asset value is expressed in USD

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of 3 to 5 years in order to overcome potentially unfavourable market trends.

- Risk calculation: commitment approach.

35. UBAM - BELL US EQUITY

This Sub-Fund targets long term capital appreciation, investing its net assets primarily in growth-oriented equities and other similar transferable securities.

At least 80% of its net assets will be invested in US companies, with market capitalization greater than USD 1 billion.

Up to 20% of its net assets may be invested in non-US companies carrying a substantial part of their commercial activity in the US, with a minimum market capitalization of USD 5 billion.

The Sub-Fund seeks to invest in high-quality companies with sustainable competitive advantages, high rates of return on invested capital and long-term secular growth trends that should help the businesses weather short-term cyclical fluctuations resulting from broader macroeconomic influences. The Sub-Fund focuses on long-term growth, with an emphasis on the sustainability and quality of that growth rather than shorter-term or cyclical events. The stock selection is determined by rigorous bottom-up fundamental analysis performed by the experienced investment manager team.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Sub-Fund is actively managed and Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. Therefore, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- Risk calculation: commitment approach

36. UBAM - BIODIVERSITY RESTORATION

This Sub-Fund invests its net assets in shares of worldwide companies (including Emerging countries) and, on an ancillary basis, up to 20% of its net assets in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments.

This Sub-Fund invests primarily in biodiversity "fixers" (companies which through their revenues are reducing biodiversity loss) and value-chain champion companies (companies which are not necessarily traditional impact companies but have huge supply chains (i.e. supply goods globally) and are taking this responsibility seriously (i.e. verify via key indicators that biodiversity goals are the main focus). Bilateral engagement is a critical element of the investment process. It consists in a long-term collaborative effort by the Investment Manager with the listed companies, involving investigation and guidance both ways, while promoting best practice as a key responsibility.

Biodiversity, the variety of life on earth, is an essential part of natural capital and it is directly or indirectly linked to other forms of capital in our economic system. It is widely estimated that more than 50% of global GDP generated each year is moderately or highly dependent on nature.

This high dependence of the global economy on nature is the main reason why biodiversity loss and ecosystem collapse are ranked as one of the major threats humanity will face in the coming years. The risks to portfolios are multiple, as are the opportunities for companies which actively incorporate natural capital considerations into their decision-making.

- Physical risk – degradation of natural services has direct cost impacts for businesses e.g. desertification of agricultural land
- Transition risk – industries left behind with assets rendered obsolete by changes in regulation/demand e.g. fossil fuels

- Litigation risk – do we ultimately face potential liability for ignoring our role in biodiversity loss?

Biodiversity and climate change are interlinked, and the focus placed on carbon emissions reduction over the last 10 years is beginning to turn to Biodiversity loss. We are accustomed to “carbon neutral”, we must now address “nature positive”.

In the context of the above investment policy, the following definitions are useful:

- Biodiversity “fixers” are companies whose technology helps to reduce the environmental impact of a given industry. For example, an industrial process using closed loop water systems or permitting a significant reduction in industrial waste.
- The loss of biodiversity is reduced when any decrease in biodiversity within a species, an ecosystem, a given geographic area, or the Earth as a whole, is avoided.
- Value-chain champion companies are typically large companies that supply goods to the globe at scale and rely on natural inputs that are extracted or cultivated at large scale. The value chain companies represent a significant part of our global economies and the champions are those we can identify as following best practice in the sourcing, distribution and disposal at end of life of their products.
- Traditional impact companies offer products and / or services that deliver positive social and environmental impact.

Companies involved in weapons (including controversial weapons and nuclear weapons), thermal coal extraction, unconventional oil & gas extraction, gambling and adult entertainment and tobacco production are excluded, as well as, with revenue thresholds applied, those involved in tobacco distribution, conventional oil and gas extraction, electricity utilities. Furthermore, the Sub-Fund excludes all companies in breach of the UN Global Compact.

The investment strategy relies on external ESG ratings, as well as internal analysis. At least 90% of this Sub-Fund’s investments are ESG analysed. For investments without an external ESG analysis, an in-house equivalent assessment is conducted by the Investment Manager.

The selection process systematically excludes at least 10% of the investment universe based on a combination of ESG profile and sector/behaviour exclusions. 100% of the investee companies are positive contributors to the Sub-Fund’s biodiversity objectives.

The construction of the investment universe is driven by positive inclusion, rather than exclusion. The Investment Manager builds a universe through adherence to the IMAP system and positive ESG credentials. The universe is composed of the stocks in the MSCI AC WORLD Net Return USD Index (“the Benchmark”). The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. The Investment Manager manage the Sub-Fund actively and has significant discretion to deviate from the Benchmark’s constituents in respect to countries, sectors, issuers and instruments, especially in view of the fact that the benchmark is a standard reference used to frame the Sub-Fund’s universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Investment Manager performs a negative screening based on the exclusion list and ESG profile to filter the investment universe. Biodiversity contribution and ESG credentials are fully integrated into the decision making process regarding the purchase, sale and position-sizing of underlying holdings. The ‘IMAP’ score in combination with ESG and financial analysis will determine the size of the positions in the portfolio.

The intensity of the biodiversity contribution (IMAP) is measured through the Investment Manager’s proprietary scoring system, with a minimum scoring requirement of 12/20 for inclusion in the Sub-Fund. This system has external oversight through the Impact Advisory Board. The stock will then be subject to financial analysis and portfolio construction constraints.

The Impact Advisory Board is composed of independent, external sustainability experts and attended by a representative of the Investment Manager. The Impact Advisory Board meets twice per year and its specific responsibilities are to provide a level of scrutiny for the IMAP scores of the Sub-Fund (the outcome of the IMAP process) and to provide strategic guidance on sustainability issues. As an Advisory Board, the Impact Advisory Board has no decision power of portfolio composition and the ultimate accountability regarding scoring and portfolio composition remains with the Investment Manager, although the Impact Advisory Board can recommend that Investment Manager alter scores and engage with companies on specific issues. Minutes of each Impact Advisory Board meeting are published on the UBP website.

The principal adverse impacts on sustainability factors is considered through the exclusion list as mentioned above. When measuring biodiversity contribution, the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Governance element is monitored by the Investment Manager's through its own research, its engagement with portfolio companies on ESG issues and the analysis of governance related controversies or change in external ESG ratings.

This Sub-Fund has no restriction on the percentage invested in Small and Mid-Capitalization. Nevertheless, the minimum market capitalization will be EUR 150'000'000 or equivalent.

This Sub-Fund will be relatively concentrated (45-55 names) with low turn-over.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation and the primary objective of this Sub-Fund is to invest behind solution providers to the Biodiversity crisis and incrementally move towards a nature positive portfolio. Climate mitigation and adaption have strong links with Biodiversity health and SDGs 12 and 13 are addressed both directly and indirectly through the investments in the Sub-Fund. The contribution of these investments to climate mitigation and/or climate adaptation, and their adherence to the EU's "Do No Significant Harm" principle are identified through ESG profiling via internal assessment and 3rd party data providers, the UBP IMAP impact assessment and systematic bilateral engagement. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this principle remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as said information becomes available, the prospectus will be updated to reflect the applicable percentage.

More information about the Investment Manager's Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

This Sub-Fund does not make use of derivatives except for share class hedging. Share class derivatives have no material impact on the E and S characteristics.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

37. UBAM - DR. EHRHARDT GERMAN EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Germany.

The net asset value is expressed in EUR.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The Sub-Fund is actively managed and uses the index DAX 30 Performance PI EUR (the Benchmark) for performance objective. The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

The Sub-Fund's name only refers to the name of Dr. Jens Ehrhardt insofar as DJE Kapital AG, 9, Georg-Kalb Strasse, D-82049 Pullach, Germany is the Sub-Fund's Manager. DJE Kapital AG is neither the Sub-Fund's co-promoters nor its distributors. DJE Kapital AG is paid by the Management Company as agreed upon by these two parties.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

38. UBAM - EUROPE MARKET NEUTRAL

This Sub-Fund actively managed has two sub-strategies: one is picking stocks on the European stock market and the second one is hedging the equity exposure linked to the first strategy. The second strategy is calibrated to neutralize completely (if no active bet is implemented, i.e. neutral stance) the ex-ante equity exposure of the first strategy, which translates into an equity market neutral exposure at the Sub-Fund level.

This Sub-Fund invests its net assets:

- Primarily in equities issued by companies having their registered office in the European Union, the United Kingdom, Switzerland and/or in the European Economic Area and, on an ancillary basis, up to 25%, in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments. The stock selection is determined by quantitatively selecting, among a selection of European equity portfolios, the best contributors in terms of both performance and tracking error
- In a discretionary proprietary overlay strategy intended to provide to investors a better risk adjusted return with lower volatility and reduced drawdown. This strategy will be implemented using derivative instruments comprising, among others, options and futures essentially on European equities indices, or related volatility equities indices. This hedging strategy aims to cover the market risk of the European equity market exposure by dynamically adjusting the short exposure.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in EUR.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: absolute VaR approach*
- *Leverage calculation methodology: sum of the notionals*
- *Expected leverage: 300%. Please note that depending on market conditions the leverage level could be higher.*

39. UBAM - EUROPE RESPONSIBLE SMALL CAP EQUITY

This Sub-Fund invests at least 75% of its net assets in equities issued by companies having their registered office in the European Union, in the United Kingdom and/or in the European Economic Area (excluding Liechtenstein) and, up to 25%, in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments..

This Sub-Fund is primarily selecting stocks of companies which constitute the bottom third in terms of the market capitalisation of all publicly listed equity in the above-mentioned area. The minimum market capitalisation will be EUR 100'000'000.

The Sub-Fund generally seeks to invest in sustainable quality growth business models: strongly financed, well managed, competitively advantaged companies with high or improving returns and exposure to growing end markets. Within this remit, there is a focus on companies that are exposed to positive internal

(corporate strategy, management initiatives etc) and external (end market exposure) dynamics and hence there is a preference for companies which are exposed to enduring secular growth trends which should be well placed to weather shorter term cyclical fluctuations resulting from the broader macroeconomic environment. The Investment Manager will generally seek to pursue and engage with companies that demonstrate a willingness to implement strong ESG standards and promote an ambitious sustainability strategy as the Investment Manager believes this will enable them to be in a better position to reduce their carbon intensity, to solidify their competitive positioning and to achieve profitable growth on a sustainable basis.

In order to enhance the liquidity, the Sub-Fund will also invest on:

- In medium and larger capitalised companies,
- In liquid assets including cash, cash equivalents, bonds and other debt securities or money market instruments and short term bank deposits;

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the MSCI Europe Small Cap Index. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

Companies directly involved in the production of controversial and illegal weapons, unconventional oil & gas extraction and tobacco production are excluded; as well as, with revenue thresholds applied, those directly involved in tobacco distribution, gambling and adult entertainment, thermal coal extraction, conventional oil and gas extraction, electricity utilities conventional and nuclear weapons. Furthermore, the Sub-Fund excludes all companies in breach of the UN Global Compact.

ESG criteria are an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the suitability screen of the stock selection process. The portfolio construction will consider ESG criteria as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when constructing and monitoring the portfolio. Through direct engagement with companies, and proxy voting according to its Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the portfolio. For companies not covered by external ESG research providers, the analysis is conducted by the Investment Manager.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about the Investment Manager's Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in EUR.

The Sub-Fund is actively managed and uses the index the MSCI Europe Small Cap Net Return Index ("the Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. Although the Sub-Fund's securities will primarily correspond to those of the Benchmark, the Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- Risk calculation: commitment approach

40. UBAM - GLOBAL EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies worldwide, including Emerging countries.

This Sub-Fund seeks to invest primarily into stocks with exposure to growth opportunities. Investment concept is stock selection driven and focuses on companies with above market average revenue growth or improving growth rates as well as companies providing consistently economic value-add, i.e. sustainably earning their cost of capital. The investment process relies on fundamental analysis of the growth profile as well as the cash flow generation capacity of existing assets and future investments of companies. Discounting of these forecasted cash flows reveals over- and undervaluation of investment opportunities.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) (Source: CFROI® Credit Suisse HOLT) of a company.

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the MSCI AC World Net Return. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund promotes a lower carbon footprint, paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

Selected stock issuers should:

- not be in breach of UN Global Compact or embroiled in severe controversies ("Fail" and "Non-Compliant" status under both MSCI ESG Manager and Sustainalytics UN GC compliance). In case a portfolio holding is "downgraded" as failing UN Global Compact, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;

- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have limited exposure to thermal coal and unconventional oil and gas extraction revenues, to conventional oil & gas revenues as well as to power generation revenues from coal, oil & gas and nuclear sources to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>).

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to its Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the Sub-Fund's portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about the Investment Manager's Responsible Investment Policy is available on <https://www.ubp.com/en/investmentexpertise/responsible-investment>.

More information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Sub-Fund is actively managed and Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider

a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

41. UBAM - GLOBAL FINTECH EQUITY

This Sub-Fund invests its net assets primarily in worldwide equities and other similar transferable securities of companies specializing in financial technology (Fintech). In addition thereto, on an ancillary basis, it may invest in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by technology companies worldwide (including Emerging countries).

This Sub-Fund is selecting financial technology or financial technology-related stocks world-wide, primarily companies which offering innovative financial products / services and companies offering Fintech technology/infrastructure, including services, software and hardware as a significant part of their business.

The investment strategy is focused on companies with strong and sustainable future growth, as well as high/stable or rising levels of Cash flow return on investment (CFROI®). (Source: CFROI® Credit Suisse HOLT).

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the MSCI AC World Net Return. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

Selected stock issuers should:

- not be in breach of UN Global Compact or embroiled in severe controversies ("Fail" and "Non-Compliant" status under both MSCI ESG Manager and Sustainalytics UN GC compliance). In case a portfolio holding is "downgraded" as failing UN Global Compact, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have limited exposure to thermal coal and unconventional oil and gas extraction revenues, to conventional oil & gas revenues as well as to power generation revenues from coal, oil & gas and nuclear sources to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>).

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to its Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the Sub-Fund's portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

More information about the Investment Manager's Responsible Investment Policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment> And more information about SFDR is available in the [SFDR Schedule](#). The net asset value is expressed in USD.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". 42. UBAM - POSITIVE IMPACT EMERGING EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office or (iv) listed on qualified exchanges of Regulated Markets or (v) primarily operate or (vi) have a majority of their income, profits, assets, production activities or other commercial interests, in Emerging countries as defined on page 4 of this prospectus. *These countries include, but are not limited to the following: Mexico, Hong Kong, Singapore, Turkey, Poland, the Czech Republic, Hungary, Israel, South Africa, Chile, Slovakia, Greece, Brazil, the Philippines, Argentina, Thailand, South Korea, Colombia, Taiwan, Indonesia, India, China, Romania, Saudi Arabia, Ukraine, Malaysia, Croatia and Russia.*

For China, the Sub-Fund may invest up to 25% of its net assets in China A-Shares through the Shanghai-Hong Kong Stock Connect (the "Stock Connect"). Please refer to the Shanghai-Hong Kong Stock Connect definition and related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

This Sub-Fund addresses the UN's Sustainable Development Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies with a focus on Emerging Markets Equities). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity. Companies which are directly involved in the production of conventional, nuclear and controversial weapons are excluded, as well as companies which are directly involved in tobacco production, gambling, adult

entertainment, thermal coal extraction and unconventional oil & gas extraction. In addition, there are exclusions, with revenue thresholds applied, for those companies directly involved in Tobacco distribution, Conventional oil and gas extraction and Electricity utilities generating power from nuclear, oil and gas or coal. Furthermore, the Sub-Fund excludes all companies in breach of the UN Global compact.

The investment strategy relies on external ESG scores, as well as internal analysis. At least 90% of this Sub-Fund's investments are ESG analysed. For investments without an external ESG analysis, an in-house equivalent assessment is conducted by the Investment Manager.

The selection process systematically excludes at least 20% of the investment universe based on a combination of ESG scores and sector/behaviour exclusions. 100% of the investee companies are positive contributors to one or more environmental / social objectives.

The construction of the universe is driven by positive inclusion, rather than exclusion. That is to say, through the 6 thematic lenses, the Investment Manager builds a universe through adherence to the IMAP system and positive ESG credentials. The universe is composed of the stocks in the MSCI Emerging Markets USD Index (the "Benchmark"). The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. The Investment Manager manages the Sub-Fund actively and has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, especially in view of the fact that the benchmark is a standard reference used to frame the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Investment Manager performs a negative screening, based on the exclusion list and ESG profile to filter the investment universe. Impact and ESG credentials are fully integrated into decision making regarding the purchase, sale and position-sizing of underlying holdings. The 'IMAP' score in combination with ESG and financial analysis will determine the size of the positions in the portfolio.

The intensity of impact (IMAP) is measured through the Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in the Sub-Fund. This system has external oversight through the Impact Advisory Board.

The Impact Advisory Board is composed of independent, external sustainability experts and attended by a representative of the Investment Manager. The Impact Advisory Board meets twice per year and its specific responsibilities are to provide a level of scrutiny for the IMAP scores of the Sub-Fund (the outcome of the IMAP process) and to provide strategic guidance on sustainability issues. As an Advisory Board, the Impact Advisory Board has no decision power of portfolio composition and the ultimate accountability regarding IMAP scoring and portfolio composition remains with the Investment Manager, although the Impact Advisory Board can recommend that Investment Manager alter IMAP scores and engage with companies on specific issues. Minutes of each Impact Advisory Board meeting are published on the UBP website.

The principal adverse impacts on sustainability factors is considered through the exclusion list as mentioned above which comprises activity-based exclusions but also behaviour elements. When measuring impact intensity, the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Governance element is monitored by the Investment Manager through its own research, its engagement with portfolio companies on ESG issues and the analysis of governance-related controversies or change in external ESG ratings.

This Sub-Fund does not make use of derivatives, except for share class hedging. Share class derivatives have no material impact on the E and S characteristics.

The investment process of this Sub-Fund draws from the collaboration of the Investment Manager (Union Bancaire Privée, UBP SA) with Cambridge Institute for Sustainability Leadership. Cambridge Institute for Sustainability Leadership is not involved in the stock selection of this Sub-Fund. UBP's Impact Investment Committee and the afore mentioned bi-annual independent Impact Advisory Board support the Investment Manager. The monthly Impact Investment Committee is an internal Investment Manager committee which conducts a monthly review of ESG status and issues.

This Sub-Fund has no reference benchmark designated for the purpose of attaining its sustainable objective

This Sub-Fund has no restriction on the percentage invested in Small and Mid-Capitalization.

This Sub-Fund will be relatively concentrated (typically under 50 names) with low turn-over.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. To this end, through the investment process described above, the Investment Manager will select, among others, investments that conform with one of its six investments themes, namely “Climate Stability”, which relates to SDG 7 “Affordable and Clean Energy” and SDG 13 “Climate Action”. Investments in the 2 other environmentally focussed investment themes are also relevant: Sustainable Communities (SDG 11 and 12) and Healthy Ecosystems (SDG 14 and 15). The contribution of these investments to climate mitigation and/or climate adaptation, and their adherence to the EU’s “Do No Significant Harm” principle are identified through ESG profiling via internal assessment and 3rd party data providers, the UBP IMAP impact assessment and systematic bilateral engagement. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about Responsible Investment policy is available on [https://www.ubp.com/en/investment-expertise/responsible-investment-and](https://www.ubp.com/en/investment-expertise/responsible-investment-and-more) more information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

43. UBAM - POSITIVE IMPACT EQUITY

This Sub-Fund invests at least 70% of its net assets, in shares of companies having their registered office in the European Union, in the United Kingdom, in the European Economic Area and/or Switzerland and, on an ancillary basis, up to 20% of its net assets in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments.

This Sub-Fund is permitted to invest up to 15% in emerging markets.

This Sub-Fund addresses the UN’s Sustainable Developments Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity. Companies which are directly involved in the production of conventional, nuclear and controversial weapons are excluded, as well as companies which are directly involved in tobacco production, gambling, adult entertainment, thermal coal extraction and unconventional oil & gas extraction. In addition, there are exclusions, with revenue thresholds applied, for those companies directly involved in Tobacco distribution, Conventional oil and gas extraction and Electricity utilities generating power from nuclear, oil and gas or coal. Furthermore, the Sub-Fund excludes all companies in breach of the UN Global compact.

The investment strategy relies on external ESG scores, as well as internal analysis. At least 90% of this Sub-Fund’s investments are ESG analysed. For investments without an external ESG analysis, an in-house equivalent assessment is conducted by the Investment Manager.

The selection process systematically excludes at least 20% of the investment universe based on a combination of ESG scores and sector/behaviour exclusions. 100% of the investee companies are positive contributors to one or more environmental / social objectives.

The construction of the universe is driven by positive inclusion, rather than exclusion. That is to say, through the 6 thematic lenses, the Investment Manager builds a universe through adherence to the IMAP system and positive ESG credentials. The universe is composed of the stocks in the MSCI Europe Equity Net Return Index (the “Benchmark”) in addition to candidates selected outside this Benchmark due to their positive impact, ESG and financial criteria. The Benchmark is representative of the investment universe and of the risk profile of the Sub-Fund. The Investment Manager manage the Sub-Fund actively and has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, especially in view of the fact that the benchmark is a standard reference used to frame the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Investment Manager performs a negative screening, based on the exclusion list and ESG profile to filter the investment universe. Impact and ESG credentials are fully integrated into decision making regarding the purchase, sale and position-sizing of underlying holdings. The ‘IMAP’ score in combination with ESG and financial analysis will determine the size of the positions in the portfolio.

The intensity of impact (IMAP) is measured through the Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in the Sub-Fund. This system has external oversight through the Impact Advisory Board.

The Impact Advisory Board is composed of independent, external sustainability experts and attended by a representative of the Investment Manager. The Impact Advisory Board meets twice per year and its specific responsibilities are to provide a level of scrutiny for the IMAP scores of the Sub-Fund (the outcome of the IMAP process) and to provide strategic guidance on sustainability issues. As an Advisory Board, the Impact Advisory Board has no decision power of portfolio composition and the ultimate accountability regarding IMAP scoring and portfolio composition remains with the Investment Manager, although the Impact Advisory Board can recommend that Investment Manager alter IMAP scores and engage with companies on specific issues. Minutes of each Impact Advisory Board meeting are published on the UBP website .

The principal adverse impacts on sustainability factors is considered through the exclusion list as mentioned above which comprises activity-based exclusions but also behaviour elements. When measuring impact intensity, the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Governance element is monitored by the Investment Manager through its own research, its engagement with portfolio companies on ESG issues and the analysis of governance-related controversies or change in external ESG ratings.

This Sub-Fund does not make use of derivatives, except for share class hedging. Share class derivatives have no material impact on the E and S characteristics.

The investment process of this Sub-Fund draws from the collaboration of the Investment Manager (Union Bancaire Privée, UBP SA) with Cambridge Institute for Sustainability Leadership. Cambridge Institute for Sustainability Leadership is not involved in the stock selection of this Sub-Fund. UBP's Impact Investment Committee and the afore mentioned bi-annual independent Impact Advisory Board support the Investment Manager. The monthly Impact Investment Committee is an internal Investment Manager committee which conducts a monthly review of ESG status and issues

This Sub-Fund has no reference benchmark designated for the purpose of attaining its sustainable objective.

This Sub-Fund has no restriction on the percentage invested in Small and Mid-Capitalization. Nevertheless, the minimum market capitalization will be EUR 200'000'000 or equivalent.

This Sub-Fund will be relatively concentrated (typically containing 35-45 names) with low turn-over.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. To this end, through the investment process described above, the Investment Manager will select, among others, investments that conform with one of its six investments themes, namely “Climate Stability”, which relates to SDG 7 “Affordable and Clean Energy” and SDG 13 “Climate Action”. Investments in the 2 other environmentally focussed investment themes are also relevant: Sustainable Communities (SDG 11 and 12) and Healthy Ecosystems (SDG 14 and 15). The contribution

of these investments to climate mitigation and/or climate adaptation, and their adherence to the EU's "Do No Significant Harm" principle are identified through ESG profiling via internal assessment and 3rd party data providers, the UBP IMAP impact assessment and systematic bilateral engagement. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage .

45. UBAM - SNAM JAPAN EQUITY RESPONSIBLE

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Japan.

In the context of this Sub-Fund, the “sustainable framework” is defined by the two sustainability objectives pursued by the Sub-Fund:

- to maintain an average portfolio's ESG score, based on the Investment Manager's analyses of companies ESG profiles using a proprietary scoring methodology, above the median ESG Score.
- For the companies in the field of oil & gas extraction and electricity generation, to evaluate the strategies deployed by said companies to transition to a lower-carbon economy.

To reach these objectives, the integration of ESG considerations is done at 3 levels:

- ESG exclusion criteria (negative screening), based on binding exclusion and/or restriction criteria related to environmental, social and governance using the Investment Manager internal rating methodology.
- In addition, for the purpose of indication, for this Sub-Fund, exclusion criteria cover areas such as nuclear or other controversial weapons; shale gas or shale oil production; tobacco; international norms; coal-based electricity; nuclear resources; etc, (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>;
- Last, ESG inclusion approach (positive screening), based on the Investment Manager's internal analyses:
 - First step, the Investment Manager's applies ESG exclusion criteria, combined with its sustainability assessment of companies. This will lead to an exclusion rate of at least 20% from the eligible investment universe defined as the best 300 Japanese listed stocks ranked according to the above mentioned ESG proprietary methodology among the 1000 most liquid Japanese listed stocks. The ESG analysis covers all of the Sub-Fund's investments. Stocks with no ESG Score cannot be part of the Sub-Fund's assets.

To accommodate for differing ESG concerns and thus priorities across sectors, the Investment Manager has mapped the 33 TOPIX® sub-sectors to 4 sectors: Manufacturing, Consumer / Services, Finance and Public / Infrastructure. Then within each of these sectors, those evaluation segments that are deemed more material are given a greater weighting to the E, S and G scores. Having determined an E, S and G score for each company by sector, the Investment Manager then calculates a unique total ESG score for each company out of the 300 companies retained.

- Second step, the Investment Manager's applies an ESG approach which is further embedded in the valuation and investment process of the Sub-Fund and the selection of stocks include ESG criteria when assessing stocks' fair value and normalized profitability. ESG considerations can be an important driver for returns and risks associated with an investment.

The Investment Manager recognizes that sustainability risks as described in the "[RISK FACTORS](#)" chapter of this prospectus may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research. These data which could be difficult to obtain and/or incomplete, estimated, out of data or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

More information about the Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

The Sub-Fund does not make use of derivatives, except for share class hedging. Share classes derivatives have no material impact on the E and S characteristics.

More information about SFDR is available in the SFDR Schedule.

This Sub-Fund will be relatively concentrated (typically containing 25-60 names) with low turn-over.

The net asset value is expressed in JPY.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Sub-Fund is actively managed and Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Although this Sub-Fund is classified Article 8 SFDR its underlying investments do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The Sub-Fund's name only refers to the name of SOMPO JAPAN NIPPONKOA ASSET MANAGEMENT CO.LTD (hereinafter "SNAM") insofar as it is the Sub-Fund's Investment Manager. SNAM is neither the Sub-Fund's co-promoter nor its distributor. SNAM is headquartered at Kyoritsu Nihonbashi bldg. 2-16, Nihonbashi 2-chome, Chuo-ku Tokyo 103-0027, Japan. SNAM is paid by the Management Company as agreed upon by these two parties.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

46. UBAM - SWISS EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Switzerland.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company. (Source: CFROI® Credit Suisse HOLT).

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the Swiss Performance Index (SPI). This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO2 per million of USD revenues.

Selected stock issuers should:

- not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is "downgraded" as failing one of these global norms, the investment manager will have

three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;

- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);

and with respect to the aim of limiting the Sub-Fund's carbon footprint:

- have limited exposure to conventional oil & gas extraction or other associated revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have no exposure to thermal coal extraction
- have no exposure to revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norm-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment> and more information about SFDR is available in the SFDR Schedule.

The net asset value is expressed in CHF.

A performance fee is used for some share classes (the "Benchmark") according to the chapter "[PERFORMANCE FEE](#)". The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Sub-Fund is actively managed and Investment Manager has significant discretion to deviate from its securities and weighting and Sub-Fund's investments will deviate materially from the Benchmark.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

47. UBAM - SWISS SMALL AND MID CAP EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Switzerland.

This Sub-Fund is selecting stocks, primarily companies with market capitalisation between CHF 100'000'000 and CHF 10'000'000'000.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company. (Source: CFROI® Credit Suisse HOLT).

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the Swiss Performance Index Extra (SPI Extra). This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Selected stock issuers should:

- not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is "downgraded" as failing one of these global norms, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);

and, with respect to the aim of limiting the Sub-Fund's carbon footprint:

- have limited exposure to conventional oil & gas extraction or other associated revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have no exposure to thermal coal extraction
- have no exposure to revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norm-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

48. UBAM - SWISS VALUE CREATORS

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial

activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Switzerland. The Sub-Fund invests in a concentrated portfolio of large, mid and small cap companies with sustainably high levels of value creation (levels of Cash Flow Returns on Investments (CFROI®) higher than the Cost of Capital (CoC)). (Source: CFROI® Credit Suisse HOLT).

The minimum market capitalisation of any security in the portfolio will be CHF 100'000'000.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

The primary sustainable objective for which the subfund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the Swiss Performance Index (SPI). This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Selected stock issuers should:

- not be in breach of UN Global Compact or embroiled in severe controversies ("Fail" and "Non-Compliant" status under both MSCI ESG Manager and Sustainalytics UN GC compliance). In case a portfolio holding is "downgraded" as failing UN Global Compact, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have limited exposure to thermal coal and unconventional oil and gas extraction revenues, to conventional oil & gas revenues as well as to power generation revenues from coal, oil & gas and nuclear sources to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>).

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening described above. These

are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

49. UBAM - TECH GLOBAL LEADERS EQUITY

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities of companies specializing in technology or technology-related industries. In addition thereto, on an ancillary basis, it may invest in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by technology companies worldwide (including Emerging countries).

This Sub-Fund is selecting technology or technology-related stocks world-wide, primarily companies which are expected to provide growth and leading (i.e. sustainably high quality) levels of cash flow return on investment (CFROI®) that are higher than the Cost of Capital (CoC) and which grow their asset base while maintaining this spread. (Source: CFROI® Credit Suisse HOLT). The investment strategy is focused on the sustainability of such return and growth profiles, and hence shall be long-term oriented with little need for turnover. Consequently, the Sub-Fund will be constituted as a high-quality, large market capitalization equity portfolio invested in global leading technology companies ("leading" implies e.g. having a leadership position due to market share, innovation capabilities, brand recognition or superior management talents) combining superior returns and growth opportunities characteristics over the next 3-5 years.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

The primary sustainable objective for which the Sub-Fund will be able to measure the positive impact is the lower carbon intensity versus its benchmark, the MSCI AC World Net Return. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO2 per million of USD revenues.

Selected stock issuers should:

- not be in breach of UN Global Compact or embroiled in severe controversies ("Fail" and "Non-Compliant" status under both MSCI ESG Manager and Sustainalytics UN GC compliance). In case a portfolio holding is "downgraded" as failing UN Global Compact, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>);
- have limited exposure to thermal coal and unconventional oil and gas extraction revenues, to conventional oil & gas revenues as well as to power generation revenues from coal, oil & gas and nuclear sources to limit the Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/funds>).

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to its Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of the Sub-Fund's portfolio. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

The Sub-Fund does not actively invest in derivatives, except for share class hedging. Derivatives used for share class hedging have no material impact on the E and S characteristics.

The Investment Manager recognises that sustainability risks as described in the "[RISK FACTORS](#)" chapter may have an impact on the performance of the Sub-Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on ESG analysis which combines internal and external research conducted by a variety of ESG data providers including but not limited to, MSCI ESG Research, ISS or Sustainalytics. These data which could be difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate can lead to no guarantee that the Investment Manager's assessment will correctly determine the impact of sustainability risks on the Sub-Fund's investments.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening described above. These are also taken into account via the Sub-Fund's objective of having a weighted average carbon intensity lower than that of the investment universe.

The Investment Manager is committed to include, among others, investments in sustainable activities as defined by the Taxonomy Regulation. In particular, through its ESG analysis, based on company data, engagement and the use, if necessary, of external data providers, the Investment Manager will seek to select to a limited extent investments which significantly contribute to climate mitigation and/or climate adaptation, while complying with the EU's "Do No Significant Harm" principle. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about the Investment Manager's Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment> and more information about SFDR is available in the SFDR Schedule..

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index MSCI AC WORLD NR USD (the Benchmark) for performance objective. The Benchmark is not representative of the Sub-Fund's risk profile and the performance of the Sub-Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to investments on stock markets in order to maximise their returns. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- Risk calculation: commitment approach

Fund of funds Sub-Funds

In principle, the overall risk for these Sub-Funds is calculated according to the commitment methodology unless otherwise provided in the Sub-Fund's investment policy.

50. UBAM - MULTIFUNDS ALLOCATION RESPONSIBLE

The principal objective of this Sub-Fund actively managed is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component in order to provide investors with regular return, stability of the value while respecting the principle of diversifying investment risks. Sustainable investing is an investment approach that considers environmental, social and governance (ESG) factors in portfolio selection and management in order to generate long-term competitive financial returns and positive societal impact. Sustainable investing encompasses methods such as, but not limited to, (1) Negative/exclusionary screening, (2) Positive/best-in-class screening, (3) Norms-based screening, (4) Integration of ESG factors, (5) Sustainability themed investing, (6) Impact/community investing, and/or (7) Shareholder engagement/voting.

Sustainable considerations are part of the fund selection and the Investment Manager's overall investment process. Funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainable research relies on the Investment Manager's proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management firms managing those funds. Results are confronted with third party ESG ratings. All intentionality indicators provided in regulatory filing such as the prospectus will be assessed during the qualitative due diligence as well as other requirements at company and fund levels. Based on relevant information provided by the third party fund managers and on our proprietary due diligence process, which covers the assessment of funds' Sustainability, its intentionality and materiality, integration of Sustainability considerations is done at 3 levels:

Level 1: Exclusion criteria (negative screening)

The exclusion of controversial activities/sectors is determined by the Investment Manager's Responsible Investment policy which is regularly adapted to reflect the changing market environment. More information about said Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

Level 2: Inclusion approach (positive screening)

The Investment Manager's investment process is based on qualitative assessment of all underlying funds. The Sub-Fund aims to responsibly capture sustainable opportunities by favoring strategies classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

Level 3: Portfolio construction

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

The Investment Manager actively engages with all funds in order to promote responsible investing and invite them to converge toward industry's highest standard in sustainable investing.

As a fund of funds structure, this Sub-Fund will invest its net assets mainly in:

- regulated UCITS and;

- other regulated open-ended investment funds having an investment policy and risk exposure similar to a UCITS and being submitted to an equivalent regulatory supervision;

which have as investment objective to invest in bonds and other debt securities and in equities with the following restrictions:

Type of securities	Minimum% of net assets	Maximum% of net assets
Bonds and other debt securities (including but not limited to Government, Corporate IG, Corporate HY, Emerging markets bond)	30%	70%
Global Equities and other similar transferable securities (including but not limited to US, Europe, Japan and emerging markets equities)	30%	70%

Through its selection process, this Sub-Fund is committed to investing primarily in funds compliant with Regulation (EU) 2019/2088 Article 8, which promote environmental and/or social characteristics, or Article 9, which have sustainable investments as their objectives.

In addition, the Investment Manager will ensure, among others, to select funds that are committed to hold sustainable investments compliant with the Taxonomy Regulation and that have a significant contribution to climate mitigation or to climate adaptation. These selected funds comply with the EU's "Do No Significant Harm" principle applicable to sustainable investments. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about SFDR is available in the SFDR Schedule.

This Sub-Fund will not invest in funds which invest mainly in Contingent Convertible bonds ("CoCos") but could invest in Cocos, through funds which invest on an ancillary basis in CoCos.

On an ancillary basis the Sub-Fund may also invest in liquid assets up to 20% as well as derivative instruments for hedging purposes.

The Sub-Fund invests primarily in its base currency, but other currencies may also be used. The currency risk associated may or may not be hedged at the Investment Manager discretion

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investor who considers investment funds as a convenient way of participating in capital markets developments and looking for an allocation between bonds and global equity in their portfolio. Investors should have a minimum investment horizon of 3 to 5 years and should be able to take measurable risk and be able to accept losses

- *Risk calculation: commitment approach*

51. UBAM - MULTIFUNDS ALLOCATION RESPONSIBLE INCOME

The principal objective of this Sub-Fund actively managed is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component in order to provide investors with regular return, stability of the value while respecting the principle of diversifying investment risks. Sustainable investing is an investment approach that considers environmental, social and governance (ESG) factors in portfolio selection and management in order to generate long-term competitive financial returns and positive societal impact. Sustainable investing encompasses methods such as, but not limited to, (1) Negative/exclusionary screening, (2) Positive/best-in-class screening, (3) Norms-based screening, (4) Integration of ESG factors, (5) Sustainability themed investing, (6) Impact/community investing, and/or (7) Shareholder engagement/voting.

Sustainable considerations are part of the fund selection and the Investment Manager overall investment process. Funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainable research relies on the Investment Manager's proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management

firms managing those funds. Results are confronted with third party ESG ratings. All intentionality indicators provided in regulatory filing such as the prospectus will be assessed during the qualitative due diligence as well as other requirements at company and fund levels. Based on relevant information provided by the third party fund managers and on our proprietary due diligence process, which covers the assessment of funds' Sustainability, its intentionality and materiality, integration of Sustainability considerations is done at 3 levels:

Level 1: Exclusion criteria (negative screening)

The exclusion of controversial activities/sectors is determined by the Investment Manager's Responsible Investment policy which is regularly adapted to reflect the changing market environment. More information about said Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>.

Level 2: Inclusion approach (positive screening)

The Investment Manager's investment process is based on qualitative assessment of all underlying funds. The Sub-Fund aims to responsibly capture sustainable opportunities by favoring strategies classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

Level 3: Portfolio construction

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

The Investment Manager actively engages with all funds in order to promote responsible investing and invite them to converge toward industry's highest standard in sustainable investing.

As a fund of funds structure, this Sub-Fund will invest its net assets mainly in:

- regulated UCITS and;
- other regulated open-ended investment funds having an investment policy and risk exposure similar to a UCITS and being submitted to an equivalent regulatory supervision;

which have as investment objective to invest in bonds and other debt securities and in equities with the following restrictions:

Type of securities	Minimum% of net assets	Maximum% of net assets
Bonds and other debt securities (including but not limited to Government, Corporate IG, Corporate HY, Emerging markets bond)	50%	90%
Global Equities and other similar transferable securities (including but not limited to US, Europe, Japan and emerging markets equities)	10%	50%

Through its selection process, this Sub-Fund is committed to investing primarily in funds compliant with Regulation (EU) 2019/2088 Article 8, which promote environmental and/or social characteristics, or Article 9, which have sustainable investments as their objectives.

In addition, the Investment Manager will ensure, among others, to select funds that are committed to hold sustainable investments compliant with the Taxonomy Regulation and that have a significant contribution to climate mitigation or to climate adaptation. These selected funds comply with the EU's "Do No Significant Harm" principle applicable to sustainable investments. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about SFDR is available in the SFDR Schedule.

This Sub-Fund will not invest in funds which invest mainly in Contingent Convertible bonds ("CoCos") but could invest in Cocos, through funds which invest on an ancillary basis in CoCos.

On an ancillary basis the Sub-Fund may also invest in liquid assets up to 20% as well as derivative instruments for hedging purposes.

The Sub-Fund invests primarily in its base currency, but other currencies may also be used. The currency risk associated may or may not be hedged at the Investment Manager discretion

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investor who considers investment funds as a convenient way of participating in capital markets developments and looking for an income orientated allocation between bonds and global equity in their portfolio. Investors should have a minimum investment horizon of 3 to 5 years and should be able to take measurable risk and be able to accept losses.

- *Risk calculation: commitment approach*

52. UBAM - MULTIFUNDS ALTERNATIVE

The objective of this Sub-Fund actively managed is to achieve a focused portfolio of alternative investments pursuing varying strategies comprising, amongst others, Equity long short, Equity market neutral, Fixed income arbitrage, global macro, CTA (trend followers). The Sub-Fund will provide a diversified source of return and undertake a careful manager selection in order to decrease the risk described in normal market conditions.

As a fund of funds structure, this Sub-Fund will invest its net assets mainly in:

- regulated UCITS and;
- other regulated open-ended investment funds having an investment policy and risk exposure similar to a UCITS and being submitted to an equivalent regulatory supervision;
- eligible closed ended UCIs which are listed or dealt on a regulated market.

which have as investment objective to invest essentially in alternative strategies.

This Sub-Fund will not invest in funds which invest mainly in Contingent Convertible bonds ("CoCos") but could invest in Cocos, through funds which invest on an ancillary basis in CoCos."

On an ancillary basis the Sub-Fund may also invest in liquid assets up to 20%. The Sub-Fund may invest in derivative instruments for hedging purposes, investment purposes and efficient portfolio management purposes.

Investors should be aware that underlying funds investing in alternative investments funds can from time to time be highly volatile, especially in market circumstances where the liquidity is particularly poor. Underlying funds may have a high degree of flexibility with regard to the strategies, investment instruments, and techniques they use.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risks linked to alternatives investments in order to maximize their returns. In this way, investors should have experience in volatile and complex products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavourable market trends.

- *Risk calculation: commitment approach*

53. UBAM - MULTIFUNDS FLEXIBLE ALLOCATION

The objective of this Sub-Fund actively managed is to capture investment opportunities by investing its assets in a diversified portfolio of equities, balanced or bonds funds with no restrictions about region, country (including emerging markets) or sector.

As a fund of funds structure, this Sub-Fund will invest its net assets mainly in:

- regulated UCITS and;
- other regulated open-ended investment funds having an investment policy and risk exposure similar to a UCITS and being submitted to an equivalent regulatory supervision.

On an ancillary basis the Sub-Fund may also invest in money market instruments, as well as investment grade

government bonds up to 40%.

The Sub-Fund can be exposed in Contingent Convertible bonds (“CoCos”) through funds up to 10%.

The Sub-Fund invests primarily in its base currency, but other currencies may also be used. The currency risk associated may or may not be hedged at the Investment Manager’s discretion.

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investor who considers investment funds as a convenient way of participating in capital markets developments and looking for a balanced allocation between equity and/or bond in their portfolio. Investors should have a minimum investment horizon of 3 to 5 years and should be able to take measurable risk and be able to accept losses.

- Risk calculation: commitment approach

54. UBAM - MULTIFUNDS SECULAR TRENDS

The principal objective of this Sub-Fund is to responsibly capture investment opportunities in thematic investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component. Sustainable investing is an investment approach that considers environmental, social and governance (ESG) factors in portfolio selection and management in order to generate long-term competitive financial returns and positive societal impact. Sustainable investing encompasses methods such as, but not limited to (1) Negative/exclusionary screening, (2) Positive/best-in-class screening, (3) Norms-based screening, (4) Integration of ESG factors, (5) Sustainability themed investing, (6) Impact/community investing, and/or (7) Shareholder engagement/voting.

Sustainable considerations are part of the fund selection and the Investment Manager’s overall investment process. Funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainable research relies on the Investment Manager’s proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management firms managing those funds. Results are confronted with third party ESG ratings. All intentionality indicators provided in regulatory filing such as the prospectus will be assessed during the qualitative due diligence as well as other requirements at company and fund levels. Based on relevant information provided by the third party fund managers and on our proprietary due diligence process, which covers the assessment of funds’ Sustainability, its intentionality and materiality integration of Sustainability considerations is done at 3 levels:

Level 1: Exclusion criteria (negative screening)

The exclusion of controversial activities/sectors is determined by the Investment Manager’s Responsible Investment policy which is regularly adapted to reflect the changing market environment. More information about said Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

Level 2: Inclusion approach (positive screening)

The Investment Manager’s investment process is based on qualitative assessment of all underlying funds. The Sub-Fund aims to responsibly capture sustainable opportunities by favoring strategies classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

Level 3: Portfolio construction

At least two third of the Sub-Fund’s exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

The Investment Manager actively engages with all funds in order to promote responsible investing and invite them to converge toward industry’s highest standard in sustainable investing.

As a fund of funds structure, this Sub-Fund will invest its net assets mainly in equity via:

- regulated UCITS and;
- other regulated open-ended investment funds having an investment policy and risk exposure similar to a UCITS and being submitted to an equivalent regulatory supervision;

with no restrictions about region, country (including emerging markets), industry sector or capitalisation.

This Sub-Fund aims to invest in a range of themes having the potential to have a material effect on the world and financial landscapes with long-term and lasting effects (secular trends). These trends can be related to climate change, demographics, consumption patterns and disruptive innovation (technology or business model whose application significantly affects the way a market or industry functions), although this list is not intended to be exhaustive.

Through its selection process, this Sub-Fund is committed to investing primarily in funds compliant with Regulation (EU) 2019/2088 Article 8, which promote environmental and/or social characteristics, or Article 9, which have sustainable investments as their objectives.

In addition, the Investment Manager will ensure, among others, to select funds that are committed to hold sustainable investments compliant with the Taxonomy Regulation and that have a significant contribution to climate mitigation or to climate adaptation. These selected funds comply with the EU's "Do No Significant Harm" principle applicable to sustainable investments. At the date of this prospectus, the information necessary to determine the exact proportion of investments complying with this Regulation remains very limited. Therefore, the minimum proportion of investments aligned to the Taxonomy Regulation is currently set at 0%. As soon as more data become available, the prospectus will be updated to reflect the applicable percentage.

More information about SFDR is available in the SFDR Schedule.

This Sub-Fund will not invest in funds which invest mainly in Contingent Convertible bonds ("CoCos") but could invest in Cocos, through funds which invest on an ancillary basis in CoCos.

On an ancillary basis the Sub-Fund may also invest in liquid assets up to 20% as well as derivative instruments for hedging purposes.

The Sub-Fund invests primarily in its base currency, but other currencies may also be used. The currency risk associated may or may not be hedged at the Investment Manager's discretion

The net asset value is expressed in USD.

The Sub-Fund is actively managed and uses the index MSCI AC World Net Return (the Benchmark) for performance objective. Although the Fund's risk profile will be similar to this Benchmark, the portfolio's investments are expected to deviate materially from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, in order to take advantage of specific investment opportunities.

Standard investor profile: this Sub-Fund is suitable for investors willing to take hither risk linked to investments on stock markets in order to maximize their return. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of at least 5 years in order to overcome potentially unfavorable market trends.

- *Risk calculation: commitment approach*

Asset Allocation Sub-Funds

In principle, the overall risk for these Sub-Funds is calculated according to the commitment methodology unless otherwise provided in the Sub-Fund's investment policy.

55. UBAM - SELECT HORIZON

The objective of this Sub-Fund actively managed is to capture investment opportunities by investing in a large diversified asset allocation with a long-term investment horizon. This Sub-Fund will invest its net assets in any kind of bonds, including convertibles bonds, contingent convertibles bond ("CoCos") up to 20% of the net assets, and any kind of equities without any geographic constraints and may invest up to 100% of its net asset value in emerging markets. These exposures must be direct or (without any limit) through regulated UCITS and other regulated open-ended investment funds having an investment policy and risk exposure similar to a UCITS and being submitted to an equivalent regulatory supervision;

Depending on the portfolio manager's decision, the exposure in bonds (either government and/or corporate bonds which may have fixed or floating rates of interest and which may be Investment Grade or High Yield bonds (all ratings) without any limitation) can be between 0 and 100% and the exposure in equities can be between 0 and 100%.

The Sub-Fund invests in a range of currencies. The currency risk associated may or may not be hedged at the Investment Manager's discretion

CoCos and High Yield Products are both described in more detail under Section "[Bond Sub-Funds](#)" and their risks are disclosed in chapter "[RISK FACTORS](#)".

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities (Article 7 of EU Taxonomy Regulation).

The net asset value is expressed in USD.

Standard investor profile: this Sub-Fund is suitable for investors willing to take higher risk linked to investments on bonds and stock markets in order to maximize their return. In this way, investors should have experience in volatile products and should be able to accept significant losses. Investors should consider a long-term investment horizon of 3 to 5 years in order to overcome potentially unfavorable market trends.

- Risk calculation: commitment approach

Sub-Funds performance

The historical performances of the various Sub-Funds, presented on a chart showing the last five or ten financial years, are included in the KIIDs for each class of share.

COMMON PROVISIONS

All the transferable securities must primarily be admitted to official listing on a stock exchange or traded on a regulated market, operating regularly, recognised and open to the public (the "Regulated Market") in a country in Eastern or Western Europe, Asia, Africa, North or South America, Australia or Oceania (an "Eligible Market").

Subject to the restrictions set out hereafter, the SICAV may carry out transactions on options linked to transferable securities.

Since the portfolio of any Sub-Fund within the SICAV is subject to market fluctuations and the risks inherent in any investment, the price of shares may vary accordingly and the SICAV cannot guarantee that it will be able to achieve its objectives.

In general, the SICAV's investments must comply with the following rules.

I. a) The SICAV may invest in:

- (i) Transferable securities and money market instruments listed or traded on an Eligible Market;
- (ii) Newly issued transferable securities and money market instruments, provided that the conditions of issue include a commitment to submit a request for admission to official listing on an Eligible Market and that such admission is obtained within one year of the issue at the latest;
- (iii) Shares in UCITS and/or other UCIs, whether or not located in an EU member state, provided that:
 - Such other UCIs are accredited in accordance with the legislation of an EU member state or in accordance with the laws of United Kingdom, Canada, Hong Kong, Japan, Switzerland or the United States of America;
 - The level of protection guaranteed for shareholders in such other UCIs is equivalent to that provided for shareholders in a UCITS and, more specifically, the rules governing the division of assets, borrowings, loans, short selling transferable securities and money market instruments are equivalent to the requirements of Directive 2009/65/EC, as amended;

- The activities of such other UCIs are subject to semi-annual and annual reports making it possible to assess the assets, liabilities, profits and transactions for the period in question;
 - Except for fund of funds Sub-Funds and Asset Allocation Sub-Funds, the proportion of assets of UCITS or such other UCIs that are to be acquired, which, in accordance with their incorporation documents, may be invested fully in shares of other UCITS or other UCIs must not exceed 10%.
- (iv) Deposits with a credit institution that are repayable on demand or may be withdrawn and have a maturity of less than or equal to 12 months, provided that the credit institution's registered office is located in a country that is a member of the Organisation for Economic Cooperation and Development ("OECD") and the Financial Action Task Force on Money Laundering ("FATF");
- (v) Financial derivatives, including similar instruments resulting in a cash payment, which are traded on an Eligible Market, and/or derivative financial instruments traded over-the-counter ("over-the-counter derivative instruments"), provided that:
- The underlying consists of instruments governed by this Section I. a), on financial indexes, interest rates, exchange rates, currencies or other assets, in which the SICAV may invest in accordance with its investment objectives;
 - The risks that the underlying assets are exposed to in connection with investments in derivative financial instruments must not exceed the investment limits set in Restrictions III below, it being understood that if the SICAV invests in derivative financial instruments based on an index, such investments may not necessarily be combined with the limits set under Restriction III hereafter. When a transferable security on money market instruments includes a derivative instrument, this instrument must be taken into account when assessing the provisions of this restriction;
 - The counterparties for transactions on over-the-counter derivative instruments are institutions subject to prudential supervision and included in the categories accredited by the Luxembourg supervisory authority;
 - The over-the-counter derivative instruments are valued on a reliable, verifiable and daily basis and may, on the SICAV's initiative, be sold, liquidated or closed by a symmetrical transaction, at any time and at their fair value;
- (vi) Money market instruments other than those traded on an Eligible Market, provided that the issue or issuer for such instruments is covered by regulations aimed at protecting investors and savings and that such instruments are:
- Issued or guaranteed by a central, regional or local government body, by a central bank from a European Union ("EU") Member State, by the European Central Bank, by the European Union or by the European Investment Bank, by a third-party state or, in the case of a federal state, by one of the members comprising the federation, or by an international public body that one or more EU member states are part of, or
 - Issued by a company whose securities are traded on an Eligible Market, or
 - Issued or guaranteed by a credit institution headquartered in an OECD and FATF member country.

b) In addition, the SICAV may invest in transferable securities and money market instruments other than those set out in Point a) for up to 10% of the net assets of each Sub-Fund;

The SICAV may not acquire precious metals or certificates representing them, real estate, goods, and commercial contracts.

II. Each Sub-Fund may hold, on an ancillary basis, liquid assets such as bank deposits at sight up to 20% of the net assets of the Sub-Fund. The above mentioned 20% limit shall only be temporarily breached for a period of time strictly necessary when, because of exceptionally unfavourable market conditions, circumstances so require and where such breach is justified having regard to the interests of the investors of the relevant Sub-Fund.

III. Each Sub-Fund may invest in bank deposits (other than bank deposits at sight) such as but not limited to time deposits.

- IV. a) (i) The SICAV may not invest more than 10% of each Sub-Fund's net assets in transferable securities and money market instruments issued by the same entity.
- (ii) Each Sub-Fund may not invest more than 20% of its net assets in deposits placed with the same entity. The Sub-Fund's counterparty risk for a transaction on over-the-counter derivative instruments may not exceed 10% of its net assets when the counterparty is one of the credit institutions indicated in Point I. a) iv) or 5% of its net assets in other cases.

- b) The total value of transferable securities and money market instruments held in issuers in which a Sub-Fund invests more than 5% of its net assets may not exceed 40% of the value of this Sub-Fund's net assets. This limit does not apply to deposits with financial institutions subject to prudential supervision and transactions on over-the-counter derivative instruments with such institutions.

Notwithstanding the individual limits set in paragraph a), the SICAV may not combine the following in a Sub-Fund:

- Investments in transferable securities or money market instruments issued by only one entity,
- Deposits with only one entity, and/or
- Risks resulting from transactions on over-the-counter derivative instruments with only one entity,

that represent more than 20% of its net assets.

- c) The 10% cap indicated in paragraph a) (i) is raised to a maximum of 35% if the transferable securities or money market instruments are issued or guaranteed by an EU member state, by its regional public authorities, or by an Eligible State or by international public bodies that one or more EU member states are part of;
- d) The 10% cap indicated in paragraph a) (i) is raised to 25% for certain bonds when they are issued by a credit institution headquartered in an EU member state and that is legally subject to special supervision by public authorities aimed at protecting bondholders. More specifically, sums from the issue of such bonds must be invested in assets that sufficiently cover, for the entire period during which the bonds are valid, the resulting commitments and that are allocated in priority to capital repayments and payments of accrued interest in the event of the issuer defaulting.

If the SICAV invests more than 5% of a Sub-Fund's net assets in such bonds issued by a given issuer, the total value of such investments may not exceed 80% of the value of this Sub-Fund's net assets.

- e) The transferable securities and money market instruments referred to in paragraphs c) and d) are not taken into account when applying the 40% cap indicated in paragraph b).

The limits set out in paragraphs a), b), c) and d) cannot be combined; as such, investments in transferable securities or money market instruments issued by a given entity, in deposits or in derivative instruments with this entity may not exceed a combined total of 35% of the net assets of each Sub-Fund within the SICAV.

Companies that are grouped together for accounting consolidation, as per Directive 83/349/EEC or in accordance with recognised international accounting rules, are considered to represent only one entity when calculating the limits set out in this Section III.

A given Sub-Fund may invest a combined total of up to 20% of its net assets in transferable securities and money market instruments from a given group.

However, the SICAV is authorised, in line with the principle of risk distribution, to invest up to 100% of each Sub-Fund's net assets in different issues of transferable securities or money market instruments issued or guaranteed by an EU member state, by its regional public authorities, by an OECD member state or by international public bodies that one or more EU member states are part of. In this case, each Sub-Fund must hold securities from at least six different issues, although the securities from a given issue may not exceed 30% of the total amount.

- V. a) Without prejudice to the limits set out in Section V. hereafter, the limits indicated in Section III. here-above are raised to a maximum of 20% for investments in equities and/or bonds issued by a given entity when a Sub-Fund's investment policy aims to reproduce the makeup of specific equities or bond index.
- b) The limit indicated in paragraph a) is 35% when justified by exceptional market conditions, particularly on regulated markets on which certain transferable securities or money market instruments are largely dominant. Investing up to this limit is only permitted for a single issuer.

VI. For all of its Sub-Funds, the SICAV may not acquire shares combined with voting rights enabling it to exercise a significant influence over the management of an issuer.

Moreover, the SICAV may acquire no more than:

- 10% of the non-voting shares of a given issuer;
- 10% of bonds of a given issuer;
- 10% of money market instruments of a given issuer.

The limits indicated in the second and third points above may be exceeded at the time of the acquisition if, at this time, the gross amount of the bonds or money market instruments or the net amount of the securities issued, cannot be calculated.

The provisions of this Section V. do not apply for transferable securities and money market instruments issued or guaranteed by an EU member state or its regional public authorities or by any other Eligible State, or issued by public international bodies which one or more EU member states are part of.

In addition, these provisions do not apply for equities held by the SICAV in the capital of a company from a non-EU state investing its assets primarily in securities from issuers from this state when, under this country's legislation, such an interest represents the only possibility for the SICAV to invest in securities from issuers from this state, provided that the company from the non-EU state complies with the limits set out under Sections III, V. and VI. a), b), c) and d) in terms of its investment policy.

If the limits provided for under Sections III and VI are exceeded, Section IX applies *mutatis mutandis*.

VII. a) The SICAV will not invest more than 10% of the net assets of each one of its Sub-Funds in other UCITS and/or other UCIs, unless otherwise provided for in the investment policy of the Sub-Fund concerned. Based on this last assumption, the following limits apply:

- Each Sub-Fund may acquire shares in UCITS and/or other UCIs as indicated above, provided that no more than 20% of the Sub-Fund's net assets are invested in the shares of a given UCITS or other UCI.
- For the application of the abovementioned investment cap, each sub-fund in a UCITS or UCI with multiple sub-funds must be considered as a separate issue, provided that such sub-funds are governed by the principle for the separation of assets and obligations in relation to third parties.
- Investments in shares in UCIs other than UCITS may not exceed a combined total of 30% of a Sub-Fund's net assets.

b) When the SICAV has acquired shares in UCITS and/or other UCIs, the underlying assets held by such UCITS or other UCIs are not combined with a view to the limits set out in Section III. above.

c) When a Sub-Fund invests in shares of UCITS and/or other UCIs managed directly or indirectly by the SICAV or by a company with which it is affiliated through common management or control or by a direct or indirect stakeholding of more than 10% of the capital or voting rights, no subscription or redemption fees may be charged to the SICAV for investments in such UCITS or other UCIs.

For a Sub-Fund's investments in a UCITS or other UCI affiliated to the SICAV as presented above, there will not be any duplication of management fees for the Sub-Fund and the UCITS or other UCIs concerned. The maximum aggregate management fees levied will be either the maximum management fees of the concerned Sub-Funds which are mentioned in the chapter "[AVAILABLE SHARES WITHIN THE SUB-FUNDS](#)" (if the investment is in no management fee share class of the target fund) or 1.25% (which is the maximum management fee of the share classes of the target fund).

In its annual report, the SICAV will indicate the maximum level of management fees borne by the Sub-Fund concerned and by the UCITS or other UCIs in which this Sub-Fund has invested over the period in question.

- d) The SICAV may not acquire more than 25% of the shares of a given UCITS and/or other UCI. This limit may be exceeded at the time of the acquisition if, at this time, the net amount of the shares issued cannot be calculated. For UCITS or other UCIs with multiple sub-funds, this limit applies for all of the shares issued by the UCITS / UCI concerned, all sub-funds combined.
- e) In accordance with article 181(8) of the 2010 Law, a Sub-Fund of the SICAV may subscribe, acquire and/or hold shares of other sub-funds ("Target sub-funds") of the SICAV without the latter being subject to the requirements under the law of August 10th, 1915 concerning business firms, as amended, as regards a company's subscription, acquisition, and/or ownership of its own shares. In that event:
- The Target sub-fund shall not be authorized to invest, itself, in the Sub-Fund that subscribed to its securities;
 - The share of assets that the Target sub-fund to be acquired may invest overall in shares of other Sub-Funds of the SICAV shall not exceed 10%;
 - Voting rights that may be linked to the shares concerned of the Target sub-fund will be suspended while they are held by another Sub-Fund of the SICAV and this, without prejudice to appropriate treatment with respect to accounting and financial statements;
 - In any event, while the shares of the Target sub-fund are held by the SICAV, their value will not be taken into account for the calculation of the net assets of the SICAV in order to verify the minimum threshold of net assets imposed by the 2010 Law;
 - The management/subscription or redemption fees for the Sub-Fund of the SICAV that invested in the Target sub-fund and this Target sub-fund will not be split.

VIII. The SICAV will ensure that the overall risk linked to derivative instruments does not exceed the total net value of each Sub-Fund's portfolio.

The risks are calculated factoring in the current value of the underlying assets, the counterparty risk, the likely change in the markets and the time available to close out the positions. This also applies to the following sections.

In accordance with its investment policy and the limits, the SICAV may invest in financial derivatives, provided that, on the whole, the risks to which the underlying assets are exposed do not exceed the investment limits set in Section III. When a Sub-Fund invests in financial derivatives based on an index, such investments are not necessarily combined for the limits set in Section III.

When a transferable security or money market instrument includes a derivative, this derivative must be factored in when applying the provisions set out in this section.

- a) **For equity Sub-Funds, convertible bond Sub-Funds, fund of funds Sub-Funds**, some Emerging Market Bond Sub-Funds (UBAM - EM INVESTMENT GRADE CORPORATE BOND, UBAM - EM SUSTAINABLE CORPORATE BOND, UBAM - EM RESPONSIBLE SOVEREIGN BOND, UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION, UBAM - EMERGING MARKET DEBT OPPORTUNITIES, UBAM - EMERGING MARKETS FRONTIER BOND) and UBAM - SELECT HORIZON, the overall risk is calculated on the basis of the commitment methodology. As an exception, the overall risk for UBAM - EUROPE MARKET NEUTRAL is calculated according to the absolute VaR methodology as stated in its investment policy.
- b) **For other bond Sub-Funds and other Sub-Funds**, the overall risk is calculated according to the absolute VaR methodology. As an exception, for the Sub-Funds UBAM - STRATEGIC INCOME and UBAM - HYBRID BOND, the overall risk is calculated according to the relative VaR approach. For the Sub-Funds using the absolute VaR methodology, the VaR limit (99%, 1 month) is set at 20%. For the Sub-Funds using the relative VaR methodology, the VaR limit is set at two times that of the Reference Index. For the Sub-Funds for which the overall risk is calculated according to the VaR methodology, the level of

leverage is defined pursuant to the applicable ESMA guidelines and CSSF Circular 11/512 as the sum of the notional of the derivatives used by the respective Sub-Fund. According to these definitions, leverage may result in high level as some derivatives, that can be used for hedging purposes including but not limited to forex and/or duration hedging, are included in the calculation. These definition does not make a distinction as to the intended use of a derivative being either hedging or investment purposes. The table below reflects the expected leverage level for these Sub-Funds. It should be noted that depending on market conditions, these below limits may occasionally be exceeded.

Sub-Funds using absolute VaR methodology		Expected Leverage Level
<u>Bond Sub-Funds</u>		
UBAM - ABSOLUTE RETURN FIXED INCOME		300%
UBAM - ABSOLUTE RETURN LOW VOL FIXED INCOME		200%
UBAM - CORPORATE EURO BOND		200%

UBAM - STRATEGIC INCOME	80% ICE BofAML BB Global High Yield Index hedged to USD and 20% BofAML Contingent Capital Index hedged to USD	300%
UBAM - HYBRID BOND	BofAML Contingent Capital Index hedged to USD	400%

- IX. a) The SICAV may borrow up to 10% of each Sub-Fund's net assets, provided that this concerns temporary borrowings; however, currencies obtained under back-to-back loans are not considered to represent borrowings;
- b) The SICAV may not grant loans or stand as guarantor for third parties. This rule does not obstruct the acquisition of transferable securities and money market instruments or other financial instruments as provided for under Section I. a) (iii), (v) and (vi), that are not fully paid-up;
- c) The SICAV may not short sell transferable securities and money market instruments or other financial instruments mentioned in Section I. a) (iii), and (vi).
- X. The SICAV is not necessarily required to comply with the limits set out in the present chapter "[COMMON PROVISIONS](#)" when exercising subscription rights relating to transferable securities or money market instruments that are part of its assets.

While ensuring compliance with the principle for the distribution of risks, newly accredited Sub-Funds may disregard Sections III., IV. and VI. a), b), c) and d) for a period of six months following the date of their accreditation.

- a) If any of the limits indicated in Section a) are exceeded against the SICAV's wishes or further to the exercising of subscription rights, the SICAV must strive in priority to bring this situation back to normal through its sales transactions, while taking shareholders' interests into consideration.
- b) If an issuer is a legal entity with multiple sub-funds in which the assets of a sub-fund exclusively cover the rights of investors in relation to this sub-fund and those of creditors whose claims have arisen when this sub-fund was set up, operating or liquidated, each sub-fund is to be considered as a separate issuer for the application of the rules governing the distribution of risks as presented in Sections III., IV. and VI.

XI. Each Sub-Fund of the SICAV is eligible to become a master Sub-Fund as defined by Section 9 of the 2010 Law if:

- its shareholders include at least one feeder UCITS;
- it is not a feeder Sub-Fund;
- it does not hold securities of a feeder UCITS.

XII. As described in Section 9 of the 2010 Law, each Sub-Fund of the SICAV is eligible, subject to the approval of the CSSF, to become a feeder Sub-Fund by investing at least 85% of its assets in securities of other master UCITS, notwithstanding articles 2, 41, 43, 46 and 48 of the 2010 Law.

This feeder Sub-Fund may invest up to 15% of its assets in one or more of the following:

- liquid assets, on an additional basis, in accordance with article 41(2) par.2 of the 2010 Law;
- derivative financial instruments, which may be used only for hedging in accordance with article 41(1) Pt g and in article 42(2) and (3);
- real or personal property essential to the direct exercise of its business.

Pursuant to article 82 of the 2010 Law, if a Sub-Fund of the SICAV becomes a feeder Sub-Fund, the latter's investors will receive a preliminary notice and all information relevant to the implementation methods as required by the regulations in force.

FINANCIAL DERIVATIVES - TECHNIQUES AND INSTRUMENTS

A. General provisions

Unless otherwise indicated for a given Sub-Fund, the SICAV may, within each Sub-Fund, use techniques and instruments covering transferable securities and money market instruments for investment purposes or effective portfolio management and/or with a view to protecting its assets and commitments.

When such operations concern the use of derivative instruments, the conditions and limits set previously in the "[COMMON PROVISIONS](#)" chapter must be complied with.

Under no circumstances should the use of transactions concerning derivative instruments or other financial instruments and techniques lead to a Sub-Fund deviating from the investment objectives set out in the investment policy concerned.

B. Structured products

For effective management or hedging, the SICAV may invest in structured products for each Sub-Fund. The range of structured products notably includes credit-related bonds, equity-indexed bonds, performance-linked bonds, index-indexed bonds and other bonds whose value changes depending on underlying instruments, which are admitted under Section I of the 2010 Law and European Commission Directive 2007/16/EC concerning the conditions for the application of Council Directive 85/611/EEC of 20 December 1985 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS), as regards the clarification of certain definitions, and guidelines from the

Committee of European Securities Regulators concerning assets that are eligible for UCITS from March 2007 (CESR/07-044, "Committee of European Securities Regulators guidelines from March 2007"). The co-contractor involved in such transactions must be a first-rate financial institution specialised in this type of transactions. Structured products represent synthetic products. Such products may also incorporate derivative instruments and/or other investment techniques. As such, it is necessary to factor in not only the risks inherent in the transferable securities, but also the risks inherent in the derivative instruments and other investment techniques. In general, investors are exposed to the basic underlying instruments or market risks. Depending on their make-up, they may be more volatile and therefore entail more risks than direct investments, while also involving a risk of losing yields or even losing all of the capital invested due to changes in market prices or the basic underlying instruments. The structured products in which the SICAV invests for each Sub-Fund will be suitably factored in to the SICAV's financial risk management method.

C. Credit-linked notes

In connection with the management of a Sub-Fund's assets, the SICAV may acquire credit-linked notes (hereafter CLN), it being understood that:

- (i) Such CLNs are issued or guaranteed by a first-rate financial institution specialised in this type of transactions;
- (ii) Such CLNs are listed on an official stock exchange or traded on a sufficiently liquid Regulated Market;
- (iii) The investment restrictions concerning the diversification of risks for each issuer and mentioned in Restriction III above apply for the issuer of the CLNs and the various underlying benchmark entities;
- (iv) The acquisition of CLNs and more specifically the underlying credit risk are in line with the investment objectives of the Sub-Fund concerned;
- (v) The SICAV may only acquire CLNs if such an investment is deemed to be made in the best interests of shareholders and such CLNs can be reasonably expected to offer a higher yield
- (vi) CLNs which are not listed on an official stock market or traded on a Regulated Market shall not represent more than 10% of the net assets of the concerned Sub-Fund.

D. Credit Default Swaps

For hedging purposes and within the framework of effective management of the portfolio, the SICAV is authorised to use Credit Default Swaps (CDS). These CDS contracts may be entered into only on the basis of standard documents (such as ISDA contracts), and only with first-rate financial institutions specialising in this type of transaction. A Credit Default Swap (CDS) is an over-the-counter (OTC) credit derivative that enables investors to gain/hedge exposure to/from the credit risk of an issuer. An investor can:

- Buy credit risk by selling credit protection on a CDS
- Sell credit risk by buying credit protection on a CDS

The CDS market offers a wide range of fixed income instruments on which investors can buy or sell credit risk, such as:

- Sovereign debt
- Investment grade credit
- High yield credit

CDS exposure can be taken on a single issuer or on a pool of issuers in the case of CDS indices.

The potential risks inherent in Credit Default Swaps (CDS) are set out in the chapter "[RISK FACTORS](#)".

E. SFTs and TRS

Securities Financing Transaction: (i) a repurchase transaction; (ii) securities lending and securities borrowing; (iii) a margin lending transaction as defined under the SFTR

SFT Agent: any person involved in SFTs as agent, broker, collateral agent or service provider and that is paid fees, commissions, costs or expenses out of the SICAV's assets or any SICAV's assets

SFTR: Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012

TRS: total return swap, i.e., a derivative contract as defined in point (7) of Article 2 of Regulation (EU) No 648/2012 in which one counterparty transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to another counterparty.

The counterparties to the SFTs and TRS will be selected on the basis of specific criteria taking into account notably their legal status, country of origin and minimum credit rating. The SICAV will therefore only enter into SFTs and TRS with such counterparties that are subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law and approved by the board of directors of the Management Company, and who are based on a regulated market of a European Union Member State or on a stock exchange of a Member State of the OECD.

The Investment Manager maintains a list of authorised over-the-counter derivative counterparties. Derivative transactions can only be undertaken with approved derivative counterparties which have their registered office in a developed country and these undergo ongoing internal credit assessment to ensure an acceptable level of credit worthiness. Internal credit assessments incorporate detailed credit analysis and utilise external information, such as credit rating agency ratings.

Before an institution can serve as a counterparty for any type of instrument or technique, the Investment Manager must assess and approve it, including its credit quality (using both ratings and internal analysis), its compliance with regulatory requirements and its fitness for the particular instrument or technique in question. These institutions will have an Investment Grade rating minimum BBB- (S&P or Fitch) or Baa3 (Moody's).

The SICAV will collateralize its SFTs and TRS pursuant to the provisions set forth hereunder in chapter [“MANAGEMENT OF COLLATERAL FOR OTC FINANCIAL DERIVATIVE TRANSACTIONS AND EFFICIENT PORTFOLIO MANAGEMENT TECHNIQUES”](#).

The risks linked to the use of SFTs and TRS as well as risks linked to collateral management, such as, market risks, control and supervision, liquidity risks, counterparty risks, and other risks are further described hereunder in chapter [“RISK FACTORS”](#).

Assets subject to SFTs and TRS will be safekept by the Depositary.

The SICAV will make use of the following SFTs:

- Repurchase agreements that consist of forward transactions at the maturity of which the SICAV (seller) has the obligation to repurchase the assets sold and the counterparty (buyer) the obligation to return the assets purchased under the transactions and reverse repurchase agreements that consist of forward transactions at the maturity of which the counterparty (seller) has the obligation to repurchase the asset sold and the SICAV (buyer) the obligations to return the assets purchased under the transactions (Repos and Reverse Repos)
- Total Return Swap (TRS) which is a derivative contract in which one counterparty transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to another counterparty.

The SICAV is not authorised to enter into any other securities financing transaction as defined in the SFTR or other financial derivative instruments with similar characteristics. Should the SICAV decide to enter into this type of operations in the future, the prospectus would be updated in accordance with the relevant regulations and CSSF Circulars in force.

EFFICIENT PORTFOLIO MANAGEMENT - TECHNIQUES AND INSTRUMENTS

A. General provisions

The SICAV may use Financial Derivatives - Techniques and Instruments mentioned in the previous chapter. In addition, the SICAV may employ other techniques and instruments relating to transferable securities and money market instruments subject to the conditions set out in the CSSF Circular 08/356 as amended from time to time, and CSSF Circular 14/592.

Techniques and instruments which relate to transferable securities or money market instruments and which are used for the purpose of efficient portfolio management, including financial derivatives instruments which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- (i) they are economically appropriate in that they are realised in a cost-effective way;
- (ii) they are entered into for one or more of the following specific aims:
 - reduction of risk;
 - reduction of cost;
 - generation of additional capital or income for the SICAV with a level of risk which is consistent with the risk profile of the SICAV and its relevant Sub-Funds and the risk diversification rules applicable to them;
- (iii) their risks are adequately captured by the risk management process of the SICAV; and
- (iv) they cannot result in a change to the Sub-Fund's declared investment objective or add significant supplementary risks in comparison to the general risk policy as described in the prospectus and relevant KIIDs.
- (v) The security that has been lent out can be recalled at any time, or the SICAV will terminate any securities lending agreement into which it has entered.

The maximum proportion of assets under management of each Sub-Fund that can be subject to "Repos", "Reverse Repos" or TRS is 20%.

The current expected proportion of assets under management of each Sub-Fund that will be subject to "Repos", "Reverse Repos" or TRS is 0%.

The assets that may be subject to "Repos" or "Reverse Repos" are limited to:

- short term bank certificates or money market instruments such as defined in Directive 2007/16/EC of 19 March 2007 implementing Council Directive 85/611/EEC on the coordination of laws, regulations and administrative provisions relating to certain UCITS as regards the clarification of certain definitions;
- bonds issued or guaranteed by a Member State of the OECD or by their local public authorities; or by supranational institutions and undertakings with EU, regional or world-wide scope;
- bonds issued by non-governmental issuers offering an adequate liquidity;
- shares quoted or negotiated on a regulated market of a European Union Member State or on a stock exchange of a Member State of the OECD.

Credit, interest rate and/or equity may be subject to TRS.

Some UBAM Sub-Funds will use Repo agreements ("Repos") for efficient portfolio management reasons. In particular, Repos may be used in exceptional circumstances such as the management of cash and settlement, to profit from market opportunities or to purchase other securities. It is not planned to enter into reverse Repos.

Some UBAM Sub-Funds are likely to make use of Total Return Swaps (TRS) for efficient portfolio management reasons. TRS are agreements between a sub-fund and a counterparty to exchange, in the future, on a pre-determined date, the risk-free rate against the performance of an asset or index, typically a benchmark. A TRS can be used to gain or hedge exposure to a segment of the market without having to transact a large number of securities. For example, when buying a TRS on a fixed-income benchmark, the sub-fund can effectively gain diversified exposure to that benchmark, with one single transaction, as opposed to purchasing all securities or a representative basket of securities of that benchmark. Secondly, if the sub-fund seeks to hedge existing portfolio exposures, it can sell a TRS on a fixed-income benchmark to offset the economic risks of the portfolio holdings without having to sell them.

All revenue generated by "Repos" or "Reverse Repos", as well as the full performance of TRS will be kept by the SICAV.

All fees in relation to "Repos" and "Reverse Repos", as well as TRS, are covered by the Service Fee which means that no fees related to such transactions will impact the fees paid by the concerned Sub-Fund.

When authorised, the SICAV will lend securities within a standardised lending system organised by a recognised securities clearing house or leading financial institution subject to prudential surveillance rules that CSSF considers to be equivalent to those prescribed by European Community law. As part of such transactions, the SICAV will receive, for the Sub-Fund concerned, a guarantee in the form prescribed by the CSSF Circular 08/356. For each securities loan transaction entered into, the SICAV must receive a guarantee valued at least at 90% of the overall valuation value (including interest, dividends and other rights, if any) of the securities loaned, for the entire duration of the loan. This guarantee must consist of:

- (i) liquidities;

- (ii) bonds issued or guaranteed by OECD member countries or by their local public authorities, or Community, regional or global supranational organisations and institutions;
- (iii) shares or units issued by money-market-type UCIs that calculate a daily net asset value and are classified AAA or equivalent;
- (iv) shares or units issued by UCITS that invest in bonds/shares mentioned in points v. and vi. below,
- (v) bonds issued or guaranteed by first class issuers that offer adequate liquidity, or
- (vi) shares that are listed or traded on a regulated market of a Member State of the European Union or on a stock exchange of a member country of the OECD provided that these shares are included in a main index.

The volume of any such securities lending will be maintained at an appropriate level so that the SICAV can at all times meet its share redemption commitments to its shareholders and not compromise its ability to manage the shares of any Sub-Fund in accordance with its investment policy.

The sharing of return generated by securities lending will be detailed in an update of this prospectus, once securities lending is authorised.

B. Specific provisions

When authorised, upon entering into a reverse repurchase agreement the SICAV shall ensure that it is able at any time to recall the full amount of cash or to terminate the reverse repurchase agreement on either an accrued basis or a mark-to-market basis. When the cash is callable at any time on a mark-to-market basis, the mark-to-market value of the reverse repurchase agreement shall be used for the calculation of the net asset value of the Sub-Funds.

When authorised, upon entering into a repurchase agreement the SICAV shall ensure that it is able at any time to recall any securities subject to the repurchase agreement or to terminate the repurchase agreement into which it has entered.

Fixed-term repurchase and reverse repurchase agreements that do not exceed seven days shall be considered as arrangements on terms that allow the assets to be recalled at any time by the SICAV.

When entering into authorised efficient portfolio management transactions the SICAV shall take into account these operations when developing their liquidity risk management process in order to ensure they are able to comply at any time with their redemption obligations.

C. Risk and potential Conflicts of Interest associated with efficient portfolio management – techniques and instruments

There are certain risks involved in over the counter financial derivative instruments and efficient portfolio management techniques. These risks include counterparty risk and potential conflicts of interests, which may impact the performance of the SICAV. In addition, these risks may expose investors to an increased risk of loss.

The Management Company has put in place an adequate conflict of interests policy in order to adequately manage the above mentioned risks.

MANAGEMENT OF COLLATERAL FOR OTC FINANCIAL DERIVATIVE TRANSACTIONS AND EFFICIENT PORTFOLIO MANAGEMENT TECHNIQUES

A. General provisions

The risk exposures to a counterparty arising from OTC financial derivative transactions and efficient portfolio management techniques should be combined when calculating the counterparty risk limits of Article 43 of the 2010 Law.

All assets received by the SICAV in the context of efficient portfolio management techniques should be considered as collateral for the purpose of these guidelines and should comply with the criteria laid down in the below paragraph.

Where the SICAV enters into OTC financial derivative transactions and efficient portfolio management techniques, all collateral used to reduce counterparty risk exposure should comply with the following criteria at all times:

- (i) Liquidity – any collateral received other than cash should be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation. Collateral received should also comply with the provisions of Article 48 of the 2010 Law.
- (ii) Valuation – collateral received should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place. Daily margin valuation will be applied.
- (iii) Issuer credit quality – collateral received should be of high quality.
- (iv) Correlation – the collateral received by the SICAV should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- (v) Collateral diversification (asset concentration) – collateral should be sufficiently diversified in terms of country, markets and issuers. The criterion of sufficient diversification with respect to issuer concentration is considered to be respected if the SICAV receives from a counterparty of efficient portfolio management and over-the-counter financial derivative transactions a basket of collateral with a maximum exposure to a given issuer of 20% of its net asset value. When the SICAV is exposed to different counterparties, the different baskets of collateral should be aggregated to calculate the 20% limit of exposure to a single issuer.
- (vi) Collateral received should be capable of being fully enforced by the SICAV at any time without reference to or approval from the counterparty.
- (vii) Non-cash collateral received should not be sold, re-invested or pledged.
- (viii) Cash collateral received should only be:
 - a. placed on deposit with entities prescribed in Article 41 (1) f) of the 2010 Law;
 - b. invested in high-quality government bonds;
 - c. used for the purpose of reverse repo transactions provided the transactions are with credit institutions subject to prudential supervision and the SICAV is able to recall at any time the full amount of cash on accrued basis;
 - d. invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral.

The SICAV may incur a loss in reinvesting the cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made with cash collateral received. A decline in the value of such investment of the cash collateral would reduce the amount of collateral available to be returned by the SICAV to the counterparty at the conclusion of the transaction. The SICAV would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the SICAV.

B. Collateral policy

The guarantee received by the SICAV shall predominantly consist of:

- (i) liquidities;
- (ii) bonds issued or guaranteed by OECD member countries or by their local public authorities, or Community, regional or global supranational organisations and institutions;
- (iii) bonds issued or guaranteed by first class issuers that offer adequate liquidity, or
- (iv) shares that are listed or traded on a regulated market of a Member State of the European Union or on a stock exchange of a member country of the OECD provided that these shares are included in a main index.

All assets, including liquidities received by the SICAV as guarantee (collateral) are safe-kept by the Depositary.

C. Haircut policy

The haircut policy applied by the Management Company is as follows:

OTC transactions

Eligible collateral	Valuation percentage
Liquidities	100%

Efficient portfolio management techniques

Eligible collateral	Valuation percentage
Liquidities	100%
Bonds with remaining maturity not exceeding 1 year, issued or guaranteed by OECD member countries or by their local public authorities, or Community, regional or global supranational organisations and institutions	95% for equity loans 98% for fixed income loans
Bonds with remaining maturity 1 year to 5 years, issued or guaranteed by OECD member countries or by their local public authorities, or Community, regional or global supranational organisations and institutions	92% for equity loans 95% for fixed income loans
Bonds with remaining maturity not exceeding 1 year, issued or guaranteed by first class issuers that offer adequate liquidity	95%
Bonds with remaining maturity 1 year to 5 years, issued or guaranteed by first class issuers that offer adequate liquidity	92%
Shares that are listed or traded on a regulated market of a Member State of the European Union or on a stock exchange of a member country of the OECD provided that these shares are included in a main index	95%

The Management Company reserves the right to vary this policy at any time.

RISK MANAGEMENT METHOD

The Management Company's Conducting Officers will seek to ensure that the appointed Managers use a risk management method that makes it possible at any time to control and measure the risk associated with the positions and their contribution to the portfolio's general risk profile and that enables an accurate and independent valuation of over-the-counter derivative instruments. The risk management method used will depend on the specific investment policy for each Sub-Fund.

RISK FACTORS

The markets in certain countries indicated in the investment policies of Sub-Funds may not fulfil the criteria for regulated markets as per Article 41(1) of the 2010 Law. Investments in such markets will be considered to be investments not admitted to official listing on a securities exchange or not traded on a regulated market that operates regularly and is recognised and open to the public. As such, they may not exceed 10% of the net assets in accordance with Point 1 of the common provisions covering all current and future Sub-Funds as presented here-before.

Investments in Russia through the Russian Trading System (RTS) and Moscow Interbank Currency Exchange (MICEX), or other non-regulated Markets, are exposed to an increased risk with regard to the ownership and custody of transferable securities.

There are significant risks inherent in investments in Russia (and in the CIS), such as delays in settling transactions and the risk of loss resulting from securities registration and custodian systems, the lack of provisions concerning corporate governance or general rules or regulations for the protection of investors or the difficulties associated with obtaining precise market values for many Russian (and CIS) securities, partly because of the limited amount of information available to the public. There is also the risk that the governments of Russia and of the member States of the CIS or other executive or legislative bodies may decide not to continue to support the economic

reform programs initiated since the dissolution of the Soviet Union. Furthermore, the proof of legal title will be held in the form of a written record and the SICAV could lose the registration and ownership of its securities following fraud, negligence or even an omission.

Investors should be aware that, due to the political and economic situations in Emerging countries, investments in China present greater risk and is intended only for investors who are able to bear and assume this increased risk. In principle, sub-funds investing in China can only be offered to investors who wish to make a long-term investment. Investment in the aforementioned Sub-Funds may be subject, among other risks, to political risks, capital repatriation restrictions, counterparty risks, and volatility and/or illiquidity risks in the Chinese market.

The risks related to emerging market are magnified in frontier market countries. Frontier market countries generally have smaller economies and even less developed capital markets or legal, regulatory and political systems than traditional emerging markets. Frontier market economies are less correlated to global economic fluctuations than developed economies and have low trading volumes and the potential for extreme price volatility and illiquidity. The government of a frontier market country may exercise substantial influence over many aspects of the private sector, including by restricting foreign investment, which could have a significant effect on economic conditions in the country and the prices and yields of securities in a Sub-Fund's portfolio.

Prospective investors are informed that investing in the SICAV's shares involves a relatively high risk: the leverage effect of investments in warrants on transferable securities and the volatility of prices for warrants on transferable securities increase the risk involved in investing in the SICAV's shares to a higher level than for traditional equities-based funds.

Investors are reminded that investing in High Yield products involves an increase in the risk since, in addition to the risks common to all investments in fixed-income products, such High Yield products are subject to additional fluctuations linked to the credit rating of issuers and the additional yield demanded by the market in return. This required additional yield is not stable over time but fluctuates with the global economic cycle. As such, the net asset value of Sub-Funds investing in High Yield products may be more volatile than that of traditional fixed-income sub-funds.

Bonds from issuers in distress are often defined as those that have been given a speculative long-term rating by credit rating agencies, usually CCC- (S&P or FITCH) or Caa3 (Moody's) or below. In some cases, the recovery of investments in distressed or defaulted debt securities is subject to uncertainty related to, among other things, court orderings and corporate reorganisations. Investment in this kind of securities may lead to capital losses and/or losses that can negatively affect the net asset value of the Sub-Funds.

The risks linked to Emerging countries are political (e.g. unstable and volatile political situation and environment), economic (e.g. high rate of inflation, risks linked to investments in recently privatised companies and depreciation of currencies, lack of development on the financial markets), legal (legal insecurity and general difficulties getting rights recognised), and tax-related (in certain states, tax expenses may be very high and there is no guarantee of a standard and consistent interpretation of the laws; local authorities often have a discretionary power to create new taxes, sometimes effective retroactively).

There are also risks of losses due to a lack of suitable systems for the transfer, valuation, clearing, accounting recognition and the registration procedure for transferable securities, the custodianship of transferable securities and the liquidation of transactions, risks that are not as common on most markets in Western Europe, North America (USA and Canada) or other developed markets.

Since certain bond and derivative markets represent over-the-counter markets, the liquidity of securities may be affected by liquidity or systemic crises. This results in increased volatility and illiquidity for investments.

Structured products represent synthetic products. Such products may also incorporate derivative instruments and/or other investment techniques and instruments. As such, it is necessary to factor in not only the risks inherent to the transferable securities, but also the risks inherent to the derivative instruments and other investment techniques and instruments. In general, investors are exposed to the basic underlying instruments or market risks, as well as the issuer risk for the structured product and the underlying risk. Depending on their make-up, they may be more volatile and therefore entail more risks than direct investments, while also involving a risk of losing yields or even losing all of the capital invested due to changes in market prices or the basic underlying instruments.

For the Sub-Funds that incorporate ESG approach, the integration of ESG considerations into the investment process can lead to deviations compared to the investment universe (e.g. at a sector and/or country level). Investment Manager may use external ESG data, on which they have no control, to support their analysis. Judgmental ESG or impact analysis conducted by Investment Manager can create biases.

Risks linked to the use of derivative instruments and other specific investment techniques and financial instruments including efficient portfolio management techniques

Careful use of derivative instruments, such as but not limited to options, futures, swaps, CDS, etc., as well as of other specific investment techniques and financial instruments, may well represent a source of advantages, but also involves different risks than those linked to traditional forms of investment that, in certain cases, may even be greater. The following sections present a general description of the risk factors and key aspects concerning the use of derivative instruments as well as other specific investment techniques and financial instruments, which investors must take into consideration before any investment in a Sub-Fund.

Market risks: in general, these risks are linked to all forms of investment; as such, the change in the value of a specific financial instrument may in certain cases go against a Sub-Fund's interests.

Control and supervision: derivative instruments as well as other specific investment techniques and financial instruments represent special products that require different investments techniques and risk analyses than equities and bonds. Using a financial derivative instrument presupposes not only knowledge of the underlying instrument, but also knowledge of the derivative instrument itself, while changes in the value of the latter may not be able to be monitored under all possible market conditions. More specifically, the use and complexity of such products require suitable control mechanisms to be maintained for the supervision of transactions entered into, and the risks incurred by Sub-Funds in relation to such products and changes in the stock price, interest rate and exchange rate concerned must be able to be determined.

Liquidity risks: there are liquidity risks when a specific security is difficult to buy or sell. If there is a high volume of transactions or if markets are partially illiquid (notably in the event of many instruments traded on an individual basis), it may prove to be impossible to carry out a transaction or unwind a position at a beneficial stock price under certain circumstances.

Counterparty risks: with derivative instruments traded over the counter, the counterparty for a transaction may not be able to honour its commitments and/or contracts may be cancelled, for instance in the event of bankruptcy, subsequent illegality or changes to the legal prescriptions concerning taxation or the presentation of accounts compared with those in force when entering into the contract linked to over-the-counter derivative instruments.

Other risks: the other risks inherent to the use of derivative instruments as well as other specific investment techniques and financial instruments include the risk of a differing valuation of financial products, resulting from the application of different accredited valuation methods and the lack of any absolute correlation (model risks) between the derivative products and the underlying transferable securities, interest rates, exchange rates and indexes. Many derivative instruments, and particularly over-the-counter derivative instruments, are complex and often valued subjectively. Inaccurate valuations may result in higher cash payments to the counterparty or impairments in value for a Sub-Fund. The derivative instruments do not always fully or even to a great extent reflect changes in the transferable securities, interest rates, exchange rates or indexes which they are supposed to be aligned with. As such, the use of derivative instruments as well as other specific investment techniques and financial instruments by a Sub-Fund does not necessarily represent an effective means of achieving a Sub-Fund's investment objective and may even prove to be counter-productive.

Repurchase and reverse repurchase agreement risk: The risks associated with repurchase and reverse repurchase transactions arise if the counterparty to the transaction defaults and the Sub-Fund experiences losses or delays in recovering its investments. Although repurchase transactions are fully collateralized, the compartment could incur a loss if the value of the securities sold has increased in value relative to the value of the margin held by the compartment. In a reverse repurchase transaction, the compartment could incur a loss if the value of the purchased securities has decreased in value relative to the value of the margin held by the compartment.

Risks linked to investments in Credit Default Swaps (CDS)

When selling protection on a CDS, an investor will face many of the same risks as when investing in the corresponding underlying security, namely:

- A spread risk, i.e. a credit spread widening and thus a capital loss on the back of a credit deterioration
- A default risk
- A liquidity risk

In addition, the CDS investor will face additional risks compared to an investor in the corresponding underlying security, namely:

- A counterparty risk when the CDS instruments used are not cleared through a clearing house. Note that this risk can be mitigated by counterparty risk analysis, diversification and daily margin calls
- A credit event risk, i.e. a restructuring event which might "trigger" the CDS and therefore be equivalent to a default, although there is no equivalent event of default on the underlying issuer

On the other hand, unlike an investor in the corresponding underlying security, when selling protection on a CDS, an investor only faces marginal currency risk and marginal to no interest rate risk. It further does not face any early repayment risk (issuer's call optionality).

When buying protection on a CDS to hedge a risk on a corresponding underlying security, the investor faces additional risk, namely:

- A basis risk, i.e. the risk that the CDS might evolve differently than the underlying security, for instance because the maturity or the seniority of the CDS cannot be precisely matched with the underlying security or in the case of indices because the composition is different for CDS vs. traditional indices or because the two markets might evolve differently for a certain period of time due to differing investors' flows in each market.
- Incomplete protection: the investor in the underlying security might be exposed to a quasi-default or write-down risk in case of a restructuring and the CDS could fail to be "triggered" because the restructuring does not qualify as a "CDS credit event". In this case the CDS would not offer the expected compensation for the loss on the underlying security.

Risks linked to investments in mortgage-related or asset-backed bonds

Some Sub-Funds, and more specifically the bond Sub-Funds, may invest in mortgage-related derivative products and structured securities, and more specifically mortgage-related and asset-backed securities. Mortgage pass-through securities represent interests in "deposits" of mortgages which the capital and interest payments made each month by individual borrowers on the mortgage loans underlying the securities pass through. The early or late repayment of the principal in an underlying mortgage in relation to the repayment schedule for pass-through securities held by Sub-Funds may reduce the rate of profitability when Sub-Funds reinvest this principal.

Furthermore, as well as for bond securities that are repayable early in general, if Sub-Funds acquire premium securities, any repayment would reduce the value of the security in relation to the premium paid. If interest rates rise or fall, the value of a mortgage-related security generally decreases or increases, but to a lesser extent than for other securities without any early repayment clause.

Payment of the principal and interest on certain mortgage pass-through securities (but not the market value of the securities themselves) may be guaranteed by the American Federal Government or by American Federal Government agencies or organisations (for which guarantees are based solely on the American Federal Government's discretionary power to buy back commitments for such agencies or organisations). Certain mortgage pass-through securities issued by non-governmental institutions may be combined with different forms of guarantees or insurance, while others may only be backed with the underlying mortgage collateral.

The Sub-Funds concerned may also invest in first-rate "CMO" bonds, which represent structured products guaranteed by different sources of mortgage pass-through securities. As with a bond, in most cases the holder of a CMO receives the principal paid back early and the interest on a monthly basis.

The collateral for CMOs may be based directly on residential or commercial mortgages, although it is more generally based on portfolios of residential mortgage pass-through securities guaranteed by the American Federal Government or its agencies or organisations. CMOs are structured in several tranches of securities,

each tranche with its own forecast average term and/or its own fixed maturity. Monthly payments of the principal, including early repayments, are assigned to the various tranches depending on the legal conditions associated with each instrument, and changes in the early repayment rates or calculation assumptions may have major consequences on the forecast average term and the value of a given tranche.

The Sub-Funds concerned may invest in stripped mortgage-backed securities, on which the repayment of the principal ("principal-only") or interest ("interest-only") is structurally deferred. Such securities are characterised by greater volatility than other types of mortgage-backed securities. Stripped mortgage-backed securities bought at a significant premium or discount are generally extremely sensitive not only to variations in the interest rates commonly applied, but also the speed with which the principal is repaid (including early repayments) on the underlying mortgage debts, and when the speed with which the principal is repaid is higher or lower than the expected rate on a lasting basis, the yield to maturity on such securities may fall sharply. In addition, stripped mortgage-backed securities may be less liquid than other differently structured securities and are characterised by greater volatility in the event of any unfavourable change in interest rates.

In addition to the abovementioned securities, the Manager concerned anticipates the issuing of new types of mortgage-backed securities by the federal government, governmental or para-governmental entities and private borrowers. As new types of mortgage-backed securities are developed and offered to investors, the Manager will consider investing in such securities provided that they are traded on an organised market.

Transferable asset-backed securities represent an equity interest in or are guaranteed by and repayable on the financial flows generated by specific debts, in most cases a source of similar debt facilities, such as motor loans, credit card debt, loans guaranteed by a real estate asset, construction loans or bank bonds.

The abovementioned Sub-Funds may also invest in collateralised loan obligations ("CLO") for which the underlying portfolio is made up of loans.

Risks linked to investments in convertible bonds

Certain Sub-Funds may invest in convertible bonds that experience market changes and hazards, as they are particularly influenced by the price of the underlying share, the general level of interest rates, the issuer's credit risk, the currency level (whether the issuing currency or that of the underlying share), and the volatility of the conversion option. The significance of those risks may vary over time.

UBAM - EUROPEAN CONVERTIBLE BOND, UBAM - GLOBAL CONVERTIBLE BOND, UBAM - GLOBAL HEALTHCARE CONVERTIBLE BOND, UBAM - GLOBAL RESPONSIBLE CONVERTIBLE BOND and UBAM - GLOBAL TECH CONVERTIBLE BOND, which mainly invest in convertible bonds that experience market changes and hazards, as they are particularly influenced by:

- the price of the underlying share, - *Equity risk*;
- the general level of interest rates - *Interest-rate risk*;
- the level of the issuer's credit risk - *Credit risk*;
- the level of foreign currencies, be it that of the issuing currency or that of the underlying share's currency - *Exchange rate risk*;
- volatility of the conversion option - *Volatility risk*.

Principal risks linked to investments in Contingent Convertible bonds ("CoCos")

Loss of principal investment: CoCos are being issued for regulatory capital adequacy purposes with the intention and purpose of being eligible as either Additional Tier 1 or Tier 2 capital. Such eligibility depends upon a number of conditions, which, in particular, require the securities and the proceeds of their issue to be available to absorb any losses of their issuers. The loss absorption is provided for by triggering principal equity conversion or principal write down (in whole or in part), if the issuer's capital ratio falls below a pre-specified threshold level. There is also a possibility of principal equity conversion or principal write down (in whole or in part) upon the regulatory intervention, which can happen even if the capital ratio is still above the pre-specified threshold.

As a consequence of such a reduction to the outstanding principal, holders of securities may lose all or some of their investment.

By contrast with convertible bonds, in the case of Contingent Convertible bonds an exchange into shares is, as a rule, mandatory, if triggered.

Trigger risk: in the event that (i) the issuer falls below pre-determined capital ratio threshold levels or (ii) at the request of a financial regulator with supervisory authority causing CoCos to convert into equity or to be permanently written down. In the first case, the trigger event calculations may also be affected by changes in applicable accounting rules, the accounting policies of the issuer or its group and the application of these policies. In the event of a security being converted to equity, investors may suffer a loss depending on the conversion rate. Were the securities to be written down, the principal may be fully lost with no payment to be recovered. Some CoCos may be written back up to par over time, but the issuer may be under no obligation to fully do so. Following a trigger event, losses may not reflect the waterfall of subordination and in some circumstances CoCo bond holders may suffer losses prior to investors in the same financial institution holding equity or bonds ranking pari passu or junior to the CoCo instruments. Independent from the trigger risk, a financial regulator with supervisory authority may at any time deem the issuer to have reached a point of non-viability, meaning that public intervention would be needed to keep the issuer out of bankruptcy, causing losses across the capital structure for equity and bondholders alike. Under these circumstances CoCo bondholders would suffer losses in line with the subordination of the CoCo host instrument.

Coupon cancellation: CoCos issued in Additional Tier 1 format give the issuer an option to cancel any payment of interest any time at its sole discretion. In addition, the issuer may be required by the regulator to cancel the coming interest payments. Coupon cancellation will also be a subject of issuer breaching a certain capital ratio threshold.

Any cancellation of interest represents a forgone coupon payment and will not be reimbursed, in case issuer decides to resume interest payments at the later stage.

Extension risk: as there may be no incentive, in the form of a coupon step-up, for the issuer to redeem the securities issued, this would cause the securities' duration to lengthen and to expose investors to higher interest rate risk.

Capital structure inversion risk: contrary to classic capital hierarchy, CoCo investors may suffer a loss of capital when equity holders do not. In certain scenarios, holders of CoCos will suffer losses ahead of equity holders, e.g., when a high trigger principal write-down CoCo is activated. This cuts against the normal order of capital structure hierarchy where equity holders are expected to suffer the first loss. This is less likely with a low trigger CoCo when equity holders will already have suffered loss. Moreover, high trigger Tier 2 CoCos may suffer losses not at the point of gone concern but conceivably in advance of lower trigger AT1s and equity.

Unknown risk: The structure of the investments in CoCos is innovative and has not been fully tested as of today.

CoCos tend to have higher price volatility and greater liquidity risk than other securities which do not expose investors to the aforementioned risks.

Principal risks linked to investments in preferred shares

Subordination risk: Issuer's obligations under preferred shares are subordinated in the right of payment to all senior obligations. In the event of bankruptcy, insolvency or liquidation of the issuer the preferred shares holders rank behind the senior and subordinated debt in terms of principal repayment from the liquidation proceeds.

Risk related to distribution payments: Preferred shares give the issuer an option to cancel any payment of interest any time. In some cases, Interest/ dividend on preferred securities is payable only if declared by the board of directors of the issuer or by a duly authorized committee of the board. In addition, the issuer will pay no dividends/ interest, if its payment would cause it to fail to comply with any applicable law or regulation. Finally, the regulator can, upon its discretion, limit the ability of the issuer to pay distributions on its preferred shares.

Distributions can be halted for very long or even indefinite periods without invoking a default. Any cancellation of distributions represents a forgone payment and will usually not be reimbursed, in case issuer decides to resume the payments at the later stage.

The level of these various risks varies greatly over time. Furthermore the general level of the markets has a significant influence on all these parameters.

Definition and risks linked to the use of Shanghai-Hong Kong Stock Connect

Definition of the Shanghai-Hong Kong Stock Connect

Some Sub-Funds may invest and have direct access to certain eligible China A-Shares via the Stock Connect. The Stock Connect is a securities trading and clearing linked program developed by Hong Kong Exchange and Clearing Limited ("HKEx"), Shanghai Stock Exchange ("SSE") and China Securities Depository and Clearing Corporation Limited ("ChinaClear"), with an aim to achieve mutual stock market access between Mainland China and Hong Kong.

The Stock Connect comprises a Northbound Trading Link (for investment in China A-Shares) by which investors, through their Hong Kong brokers and a securities trading service company to be established by the Stock Exchange of Hong Kong Limited ("SEHK"), may be able to place orders to trade eligible shares listed on SSE by routing orders to SSE.

Under the Stock Connect, overseas investors (including the Sub-Funds) may be allowed, subject to rules and regulations issued/amended from time to time, to trade certain China A-Shares listed on the SSE (the "SSE Securities") through the Northbound Trading Link. The SSE Securities include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index and all the SSE-listed China A-Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on SEHK, except (i) those SSE-listed shares which are not traded in RMB and (ii) those SSE-listed shares which are included in the "risk alert board". The list of eligible securities may be changed subject to the review and approval by the relevant People's Republic of China ("PRC") regulators from time to time.

Further information about the Stock Connect is available online at the website: http://www.hkex.com.hk/eng/market/sec_tradinfra/chinaconnect/chinaconnect.htm

Risk linked to the use of Shanghai-Hong Kong Stock Connect

Quota limitations risk: The Stock Connect is subject to quota limitations on investment, which may restrict the Sub-Fund's ability to invest in China A-Shares through the Stock Connect on a timely basis and the Sub-Fund may not be able to effectively pursue its investment policy.

Suspension risk: Both SEHK and SSE reserve the right to suspend trading if necessary to ensure an orderly and fair market and managing risks prudently which would affect the Sub-Fund's ability to access the Mainland China market via Stock Connect.

Differences in trading day: The Stock Connect operates on days when both the Mainland China and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the Mainland China market but Hong Kong investors (such as the Sub-Funds) cannot carry out any China A-Shares trading. The Sub-Funds may be subject to a risk of price fluctuations in China A-Shares during the time when the Stock Connect is not trading as a result.

Clearing, settlement and custody risks: The Hong Kong Securities Clearing Company Limited, a wholly-owned subsidiary of HKEx (the "HKSCC") and ChinaClear establish the clearing links and each is a participant of each other to facilitate clearing and settlement of cross-boundary trades. As the national central counterparty of the Mainland China's securities market, ChinaClear operates a comprehensive network of clearing, settlement and stock holding infrastructure. ChinaClear has established a risk management framework and measures that are approved and supervised by the China Securities Regulatory Commission (CSRC). The chances of a ChinaClear default are considered to be remote.

Should the remote event of a ChinaClear default occur and ChinaClear be declared as a defaulter, HKSCC will in good faith, seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In that event, the Sub-Fund may suffer delay in the recovery process or may not be able to fully recover its losses from ChinaClear.

The China A-Shares traded through the Stock Connect are issued in scriptless form, so investors such as the Sub-Fund will not hold any physical China A-Shares. Hong Kong and overseas investors, such as the Sub-Fund, who have acquired SSE Securities through Northbound Trading should maintain the SSE Securities with their brokers' or custodians' stock accounts with the Central Clearing and Settlement System operated by HKSCC

for the clearing of securities listed or traded on SEHK. Further information on the custody set-up relating to the Stock Connect is available upon request at the registered office of the SICAV.

Nominee arrangements in holding China A-Shares: HKSCC is the “nominee holder” of the SSE securities acquired by overseas investors (including the Sub-Fund) through the Stock Connect. The CSRC Stock Connect rules expressly provide that investors such as the Sub-Fund enjoy the rights and benefits of the SSE securities acquired through the Stock Connect in accordance with applicable laws. However, the courts in Mainland China may consider that any nominee or custodian as registered holder of SSE securities would have full ownership thereof, and that even if the concept of beneficial owner is recognized under Mainland China law those SSE securities would form part of the pool of assets of such entity available for distribution to creditors of such entities and/or that a beneficial owner may have no rights whatsoever in respect thereof. Consequently, the Sub-Fund and the Depositary Bank cannot ensure that the Sub-Fund’s ownership of these securities or title thereto is assured in all circumstances.

Under the rules of the Central Clearing and Settlement System operated by HKSCC for the clearing of securities listed or traded on SEHK, HKSCC as nominee holder shall have no obligation to take any legal action or court proceeding to enforce any rights on behalf of the investors in respect of the SSE securities in Mainland China or elsewhere. Therefore, although the Sub-Fund’s ownership may be ultimately recognised, the Sub-Fund may suffer difficulties or delays in enforcing its rights to China A-Shares.

To the extent that HKSCC is deemed to be performing safekeeping functions with respect to assets held through it, it should be noted that the Depositary Bank and the Sub-Fund will have no legal relationship with HKSCC and no direct legal recourse against HKSCC in the event that a Sub-Fund suffers losses resulting from the performance or insolvency of HKSCC.

Investor compensation: Investments through Northbound Trading under the Stock Connect will not be covered by Hong Kong’s Investor Compensation Fund. Hong Kong’s Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong.

Since default matters in Northbound Trading via the Stock Connect do not involve products listed or traded in SEHK or Hong Kong Futures Exchange Limited, they will not be covered by the Investor Compensation Fund. On the other hand, since the Sub-Fund is carrying out Northbound Trading through securities brokers in Hong Kong but not Mainland China brokers, they are not protected by the China Securities Investor Protection Fund in Mainland China.

Operational risk: The Stock Connect provides a new channel for investors from Hong Kong and overseas, such as the Sub-Fund, to access the Mainland China stock market directly.

The Stock Connect is premised on the functioning of the operational systems of the relevant market participants. Market participants are able to participate in this program subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house.

It should be appreciated that the securities regimes and legal systems of the two markets differ significantly and in order for the trial program to operate, market participants may need to address issues arising from the differences on an on-going basis.

Furthermore, the “connectivity” in the Stock Connect program requires routing of orders across the border. This requires the development of new information technology systems on the part of the SEHK and exchange participants (i.e. a new order routing system (“China Stock Connect System”) to be set up by SEHK to which exchange participants need to connect). There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading in both markets through the program could be disrupted. The Sub-Fund’s ability to access the China A-Share market (and hence to pursue its investment strategy) will be adversely affected.

Trading costs: In addition to paying trading fees and stamp duties in connection with China A-Share trading, the Sub-Fund may be subject to new portfolio fees, dividend tax and tax concerned with income arising from stock transfers which are yet to be determined by the relevant authorities.

Regulatory risk: The CSRC Stock Connect rules are departmental regulations having legal effect in the PRC. However, the application of such rules is untested and there is no assurance that Mainland China courts will recognize such rules, e.g. in liquidation proceedings of Mainland China companies.

The Stock Connect is novel in nature and is subject to regulations promulgated by regulatory authorities and implementation rules made by the stock exchanges in Mainland China and Hong Kong. Furthermore, new regulations may be promulgated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under the Stock Connect.

The regulations are untested so far and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change. There can be no assurance that the Stock Connect will not be abolished. The Sub-Fund may be affected as a result of such changes.

Stock Connect Tax Risks: Pursuant to Caishui [2014] No. 81 ("**Notice 81**"), foreign investors investing in China A-Shares listed on the Shanghai Stock Exchange through the Stock Connect would be temporarily exempted from China corporate income tax and business tax on the gains on disposal of such China A-Shares. Dividends would be subject to Mainland China corporate income tax on a withholding basis at 10%, unless reduced under a double tax treaty with China upon application to and obtaining approval from the competent China tax authority.

It is noted that Notice 81 states that the corporate income tax exemption effective from 17 November 2014 is temporary. As such, as and when the PRC authorities announce the expiry date of the exemption, the Sub-Fund may in future need to make provision to reflect taxes payable, which may have a substantial negative impact on the net asset value of the Sub-Fund.

Definition and risks linked to the use of Bond Connect

Definition of Bond Connect

Bond Connect (northbound trading of Bond Connect) is an initiative launched in July 2017 for China Interbank Bond Market ("CIBM") access between Hong Kong and China established by China Foreign Exchange Trade System & National Interbank Funding Centre ("CFETS"), China Central Depository & Clearing Co., Ltd, Shanghai Clearing House, and Hong Kong Exchanges and Clearing Limited and Central Moneymarkets Unit. Bond Connect is governed by rules and regulations as promulgated by the Chinese authorities. Under the Northbound Trading Link, eligible foreign investors are required to appoint the CFETS or other institutions recognised by the People's Bank of China ("PBOC") as registration agents to apply for registration with the PBOC.

Pursuant to the prevailing regulations in China, an offshore custody agent recognised by the Hong Kong Monetary Authority (currently, the Central Moneymarkets Unit) shall open omnibus nominee accounts with the onshore custody agent recognised by the PBOC (currently, the China Securities Depository & Clearing Co., Ltd and Interbank Clearing Company Limited). All bonds traded by eligible foreign investors will be registered in the name of Central Moneymarkets Unit, which will hold such bonds as a nominee owner.

Risk linked to the use of Bond Connect

Tax risk: There is no specific written guidance by the mainland China tax authorities on the treatment of income tax and other tax categories payable in respect of trading in the CIBM by eligible foreign institutional investors via the Bond Connect.

It is possible that the relevant tax authorities may, in the future, clarify the tax position and impose an income tax or withholding tax on realised gains on PRC fixed income securities traded on Bond Connect and RQFII.

In light of the above, the Sub-Fund may withhold certain amounts in anticipation of China withholding tax on the Sub-Funds' capital gains for a specified period of time or indefinitely.

The Board of Directors are of the opinion that a reserve may be warranted and may establish such a reserve in respect of the relevant Funds ("Reserve"). This Reserve is intended to cover potential indirect or direct PRC tax liabilities which may arise from realised gains relating to indirect or direct investments on PRC fixed income securities traded on Bond Connect.

Upon the clarification by the China tax authorities of the tax liability to the advantage of the Sub-Fund, all or part of the Reserve may be rebated to and retained by the Sub-Fund. In the event that the China tax authorities' clarification results in a disadvantageous outcome for the Sub-Fund, there is no guarantee that the Reserve or

withheld amounts (the "withheld amounts") will be enough to cover such indirect or direct China tax liabilities. If the withheld amounts or Reserve is insufficient to satisfy the indirect or direct China tax liabilities, the Sub-Fund may be required to make additional payment to satisfy such tax liabilities.

Investors should note that as and when the China tax authorities provide clarity on the position, treatment and implications of taxation such implications may have a retrospective effect such that the Net Asset Value of the relevant Funds may be lower or higher than what was calculated at the relevant time. In addition, before published guidance is issued and is well established in the administrative practice of the China tax authorities, the practices with respect to investments may differ from, or be applied in a manner inconsistent with the practices with respect to the analogous investments described herein or any new guidance that may be issued. In this regard, investors who had redeemed their Shares in a Fund prior to any credit made into that Fund as a result of China tax authorities' clarification on the tax position shall not have any right or claim to any amount so credited.

In the event a Fund is terminated or ceases to exist before the China tax authorities provide clarity, the Reserve may either be retained by or transferred to the Investment Manager on behalf of the Fund. In this situation, the investors will not have any claim on such amount.

CIBM Risk: Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the CIBM may result in prices of certain debt securities traded on such market fluctuating significantly. The Sub-Fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the Fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

To the extent that the Sub-Fund transacts in the CIBM, the Sub-Fund may also be exposed to risks associated with settlement procedures and default of counterparties. The counterparty which has entered into a transaction with the Fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value.

For investments via the Bond Connect, the relevant filings, registration with PBOC and account opening have to be carried out via an onshore settlement agent, offshore custody agent, registration agent or other third parties (as the case may be). As such, the Fund is subject to the risks of default or errors on the part of such third parties.

Investing in the CIBM via Bond Connect is also subject to regulatory risks. The relevant rules and regulations on these regimes are subject to change which may have potential retrospective effect. In the event that the relevant Chinese authorities suspend account opening or trading on the CIBM, the Sub-Fund's ability to invest in the CIBM will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective will be negatively affected."

Sustainability Risk

Sustainability risks are environmental, social or governance events or conditions which, if they occur, have or may potentially have significant negative impacts on the assets, financial and earning situation or reputation of a Sub-Fund. Examples of such risks may include, but are not limited to, climate change, biodiversity, supply chain management, product liability or business ethics.

Furthermore, additional risks may result from the inherent limits of ESG approaches, as there is a lack of standardization in the rules governing ESG criteria and the reporting of ESG indicators by sovereign or corporate entities. There is no guarantee that Sub-Funds which integrate ESG into their investment process will take into consideration all the relevant indicators or that such indicators are all comparable. Furthermore, the Sub-Funds may rely on external ESG research providers for their ESG data. Such data may be incomplete, inaccurate or unavailable and differ from other sources of data. The use of different data sources or providers may ultimately have an impact on the investment universe or on the Sub-Funds' portfolio and performance.

BENCHMARKS / INDICES

All benchmarks and indices mentioned in the present prospectus fulfil the criteria stated in Article 9 of the Grand-Ducal Regulation of February 8, 2008, namely:

- (i) they are sufficiently diversified, in that the following criteria are fulfilled:

- a. the index is composed in such a way that price movements or trading activities regarding one component do not unduly influence the performance of the whole index;
 - b. where the index is composed of assets referred to in Article 41 (1) of the amended law of 20 December 2002, its composition is at least diversified in accordance with Article 44 of that law;
 - c. where the index is composed of assets other than those referred to in Article 41 (1) of the amended law of 20 December 2002, it is diversified in a way which is equivalent to that provided for in Article 44 of that law;
- (ii) they represent an adequate benchmark for the market to which they refer, in that the following criteria are fulfilled:
- a. the index measures the performance of a representative group of underlyings in a relevant and appropriate way;
 - b. the index is revised or rebalanced periodically to ensure that it continues to reflect the markets to which it refers following criteria which are publicly available;
 - c. the underlyings are sufficiently liquid, which allows users to replicate the index, if necessary;
- (iii) they are published in an appropriate manner, in that the following criteria are fulfilled:
- a. their publication process relies on sound procedures to collect prices and to calculate and to subsequently publish the index value, including pricing procedures for components where a market price is not available;
 - b. material information on matters such as index calculation, rebalancing methodologies, index changes or any operational difficulties in providing timely or accurate information is provided on a wide and timely basis.

Where the composition of assets which are used as underlyings by financial derivatives in accordance with Article 41 (1) of the amended law of 20 December 2002 does not fulfil the criteria set out in paragraph (1) of this Article, those financial derivatives shall, where they comply with the criteria set out in Article 8 (1) of this regulation, be regarded as financial derivatives on a combination of the assets referred to in (i), (ii) and (iii) of Article 8 (1) a) of the grand ducal regulation of February 8, 2008.

Under the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the “Benchmarks Regulation”), benchmark administrator shall apply for registration by January 1, 2020. Upon such registration, the benchmark administrator and/or the benchmark will appear on the register of register of administrators and benchmarks maintained by ESMA (the “Register”). Such list is available on <https://registers.esma.europa.eu/publication/>.

Benchmark administrators not located in the EU whose indices are used by the Fund benefit from the transitional arrangements afforded under the Benchmark Regulation and accordingly may not appear on the Register.

As at the date of this prospectus, the following indices or registered tradable Credit Default Swaps are used:

The Management Company maintains a written plan setting out the actions that will be taken in the event that a benchmark materially changes or ceases to be provided in accordance with article 28 of the Benchmark Regulation. The content of such plan can be provided free of charge upon request at the registered office of the Management Company.

The Sub-Fund's investment objective does not aim to replicate the benchmarks nor are the benchmarks intended to define the Sub-Fund's investment universe. Benchmarks may not be representative of the Sub-Fund's risk profile.

The SICAV's Board of Directors may replace the benchmark if it undergoes substantial modifications or ceases to be published. Should that happen, a notice will be sent to the shareholders and the Prospectus will be updated. When used, the benchmark will be specified in the investment policy of the concerned Sub-Fund or in the ["PERFORMANCE FEE"](#) chapter.

NET ASSET VALUE

The net asset value as well as the issue and redemption price per share for each share class of the SICAV's various Sub-Funds is determined in the base currency of each class on a valuation day (the "Valuation Day") which is defined as follows:

- for UBAM - MULTIFUNDS ALTERNATIVE: each Friday which is a full bank business day in Luxembourg (weekly net asset value). If the Friday is not a full bank business day in Luxembourg, the Valuation Day will be set on the next full bank business day in Luxembourg;
- for all other Sub-Funds each full bank business day in Luxembourg (daily net asset value).

"Business Day" refers to full bank business days in Luxembourg, with the exception of days or half-day:

- when the main stock exchanges hosting the Sub-Fund's investments or the main markets used by the Sub-Fund Investment Manager are closed and the Investment Manager is not able to place investment/disinvestment orders according to the subscription or redemption request received.

There will only be net asset values dated on the days which are considered as 'Business Day' according to the definition above.

STANDARD RULE

The net asset value as well as the issue and redemption price per share for each share class of the SICAV's various Sub-Funds is determined based on the closing prices from the Business Day preceding the Valuation Day.

The date of the net asset value thus determined is the one of the Business Day preceding the Valuation Day;

EXCEPTIONS

For Fund of Funds Sub-Funds with daily net asset value, the Valuation Day is determined 2 Business Days following the net asset value date. The net asset value calculated is based on the underlying funds' prices dated as of the date of the relevant Sub-Fund's net asset value.

In case an underlying fund's price is not available as of the relevant Sub-Fund's net asset value date, the last preceding net asset value available will be taken into consideration as basis for the calculation.

The date of the net asset value thus determined is the one dated from 2 Business Days preceding the Valuation Day.

For UBAM - SNAM JAPAN EQUITY RESPONSIBLE, the net asset value is determined based on the closing prices of the Valuation Day.

The date of the net asset value thus determined is the one of the Valuation Day.

For some Sub-Funds whose net asset value is not daily, the SICAV may at its discretion determine an estimated net asset value on days that are not Valuation Days. This estimated net asset value cannot be used for subscription, redemption or conversion and will be provided solely for information. In this way, for UBAM - MULTIFUNDS ALTERNATIVE, a net asset value will be calculated based on prices of the last Business Day of the month in the various markets concerned, which cannot be used for subscription, redemption or conversion and will be provided solely for information.

The net asset value is calculated by dividing the value of net assets for each class from each Type in the SICAV's various Sub-Funds by the total number of shares outstanding on this date in the class concerned, rounding off the amount obtained to the nearest whole hundredth for each share in the currency for the class concerned. The SICAV's Board of Directors reserves the right to have the net asset value of certain Sub-Funds calculated to three decimal places, rounding off to the nearest whole thousandth for each share in the currency for the class concerned. The value of the net assets of each Sub-Fund within the SICAV is equal to the difference between the assets and liabilities due for this Sub-Fund, factoring in, as relevant, the breakdown of this Sub-Fund's net assets between the Types and classes in accordance with Article 23 of the Articles of Association. To determine the net assets, income and expenses are recorded on a daily basis. The valuation of assets of the different Sub-Funds is determined as follows:

- 1) The value of cash at hand or in deposits, bills and notes payable on sight and accounts receivable, accrued expenses, dividends and interest announced or accrued but not yet received, is based on the nominal value of such assets, unless it is unlikely that this value may be received; in this last case, the value is determined by deducting a certain amount as deemed appropriate by the SICAV in order to reflect the actual value of such assets.
- 2) Transferable securities that are traded or listed on a stock exchange are valued based on closing prices on the full bank business day preceding the Valuation Day, unless such prices are not representative.
- 3) Transferable securities traded on another regulated market are valued based on the latest available prices the Day preceding the Valuation Day, unless such prices are not representative.
- 4) If any transferable securities held in the portfolio on the Valuation Day are not traded on a regulated market or, if for securities traded on another regulated market, the price determined in accordance with subparagraph (2) is not representative of the actual value of such transferable securities, they are valued based on the likely realisable value, which must be estimated with caution and good faith.
- 5) Derivative financial instruments listed on a stock exchange or traded on a regulated market will be valued at their closing price on the Business Day preceding the Valuation Day on the stock exchanges or regulated markets in this way.
- 6) The value of any derivative financial instruments that are not listed on a stock exchange or traded on another regulated market will be determined each day on a reliable basis and verified by a competent professional appointed by the Company in line with market practices.
- 7) Shares in underlying open-ended investment funds will be valued based on the net asset value available on the Business Day preceding the Valuation Day, provided said net asset value is dated on prior to the Valuation Day, after deducting any fees applicable.
- 8) The value of money market instruments that are not listed on a stock exchange or traded on another regulated market will be based on the nominal value plus any capitalised interest or based on the amortisation of costs.
- 9) Regarding the valuation of money market instruments and other debt securities with a residual duration of less than 12 months, the valuation rate is gradually aligned with the buy-back rate based on the net purchase

price and taking into account the returns generated. The valuation thus calculated may differ from the actual market price. In case of significant variations in market conditions, the basis for evaluating the different investments is adjusted based on the new market returns.

- 10) If, further to specific circumstances, a valuation based on the rules set out above becomes unworkable or inaccurate, other generally accepted and verifiable valuation criteria are applied in order to obtain a fair valuation.

Furthermore, with reference to point 9 above, the SICAV's Board of Directors reserves the right, particularly for the bond Sub-Funds, to use the same stock price as that used by the indexes against which the performances of such Sub-Funds are benchmarked according to the annual report, when these are taken at a specific time.

Any assets not expressed in the currency of the Sub-Fund that they belong to are converted into this Sub-Fund's currency at the exchange rate in force on the Business Day concerned or at the exchange rate provided for under the forward agreements.

Swing Pricing Mechanism

Sub-Fund may suffer a reduction in value of the net asset value per share due to transaction costs incurred in the purchase and sale of their underlying investments and/or the spread between the buying and selling prices of such investments when underlying investments trades are undertaken by the Investment Manager to accommodate subscriptions, redemptions and/or conversions.

In order to counter this and to protect Shareholders' interests, the Management Company adopted a Swing Pricing Mechanism.

The Swing Pricing Mechanism means that in certain circumstances, the Management Company will make adjustments in the calculation of the net asset values per Share. The net asset value per share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively. The extent of the adjustments will be set by the Management Company to reflect the above mentioned transactions costs and/or spread when these are deemed to be significant. The maximum adjustment will not exceed 2% of the original net asset value per share.

The Swing Pricing Mechanism may be applied across all bond Sub-Funds with the exception of UBAM - DYNAMIC EURO BOND, , UBAM - DYNAMIC US DOLLAR BOND, UBAM - EURO BOND, UBAM - EURO CORPORATE IG SOLUTION, UBAM - EURO HIGH YIELD SOLUTION, UBAM - GLOBAL HIGH YIELD SOLUTION, UBAM - GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION, UBAM - US DOLLAR BOND and UBAM - US HIGH YIELD SOLUTION and will be applied in an equitable manner to all shareholders of a same Sub-Fund on the same net asset value date.

No Swing Pricing Mechanism will be applied for Convertible bond Sub-Funds, Equity Sub-Funds, Asset Allocation Sub-Funds, Fund of funds Sub-Funds and Other Sub-Funds.

The net asset value per share of each class of each Type within the various Sub-Funds, and their issue, redemption and conversion prices may be obtained each full bank business in Luxembourg from the SICAV's registered office.

ISSUE OF SHARES

For each class of each Type of the different Sub-Funds, the SICAV's Board of Directors is authorised to issue shares at any time and without any limitations (cf. chapter "[INTRODUCTION](#)").

The Board of Directors has decided to launch the following new Sub-Funds according to the below mentioned conditions:

	1 st subscription price	Initial subscription period	Payment of 1 st subscription price	Date of 1 st NAV
UBAM - STRATEGIC INCOME	USD/EUR/CHF/GBP/SGD 100 SEK/HKD 1'000	TBC	TBC	TBC

At the end of the initial subscription period, the shares are issued at a price corresponding to the net asset value per share of the share Type of the relevant Sub-Fund. This price may be increased by a front-end load representing up to 3% of the net value payable to intermediaries involved in the subscription process for all Types of shares.

BOND Sub-Funds	Subscription notice	Cut-off	NAV Date	Valuation Day (J)*	Subscription settlement (max.)

* Based on the closing prices as of the NAV Date

If accepted, the applications are processed at the net asset value per share calculated on the Valuation Day. For Sub-Funds issuing different classes of shares, applications must indicate the share class concerned.

The subscription price for shares is applied in the currency in which the net asset value is calculated for the assets of the relevant class. Any bank charges connected with the payment of subscriptions are borne by the SICAV.

For the Sub-Fund UBAM - HYBRID BOND, considering the investment of up to 100% in Contingent Convertible bonds, the minimum initial subscription amount for all Types of shares is USD 50'000 or equivalent.

There is no minimum subscription for any other Sub-Fund, except for A+, I+ and U+ Type of shares.

Under the conditions defined by the Board of Directors and subject to the provisions of the law, the subscription price may be paid by a contribution in kind. Such contribution in kind shall be subject to an audit report to the extent required by Luxembourg law. In principle, the costs linked to such contribution in kind shall be borne by the concerned investors.

A subscription by a private investor (a natural person) will not be considered valid and will only be processed after receipt of the request and subscription price by the administrative agent.

No share certificates are issued.

The SICAV reserves the right to reject any subscription application or accept only some of them. In addition, the Board of Directors reserves the right to interrupt the issue and sale of shares at any time and without any prior notice.

No shares are issued if the net asset value calculation is suspended by the SICAV. Each shareholder who makes a subscription application is advised of that suspension, and any subscription requests that are pending may be withdrawn further to written notification received by the SICAV before the suspension revocation.

Unless applications have been withdrawn, they will be taken into consideration on the first Valuation Day following the end of the suspension.

Subscription applications in a currency other than a Sub-Fund's base currency (list of currencies to be approved by the SICAV's Board of Directors) will only be accepted if the Depositary Bank clears the funds.

The Depositary Bank will carry out the foreign exchange transactions on behalf on the Sub-Fund, at the investor's risks and expenses.

Subscription applications made in countries in which the SICAV is authorised to carry on public retailing activities can be submitted by local paying agents and distributors acting in their own name but on behalf of end investors. Said local paying agents and distributors will be listed in the SICAV's list of shareholders in lieu of the end investors. Local paying agents have the right to charge fees to investors for handling subscriptions to, redemptions of and the conversion of the SICAV's shares.

Anti-money Laundering Provisions, Counter-Terrorist Financing Provisions and Beneficial Owner Register

Pursuant to international rules and Luxembourg laws and regulations (comprising, but not limited to, the amended law of 12 November 2004 on the fight against money laundering and terrorist financing (the "2004 Law"), the amended Grand-ducal Regulation of 1 February 2010, CSSF Regulation N° 12-02 of 14 December 2012 (the "CSSF Regulation 12-02") and CSSF Circulars 13/556, 17/650, 18/684 and 20/744), professional obligations have been outlined to prevent the use of UCIs for money laundering and financing of terrorism purposes. As a result of such provisions, the registrar agent of a Luxembourg UCI must ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. Accordingly, the Fund, the Management Company or the Administrative Agent or any duly appointed agent will require subscribers to provide a certified copy of their passport, identity card or driving licence and for subscribers who are corporate or legal entities, an extract from the registrar of companies or articles of incorporation or other official documentation. In any case, the Fund, the Management Company or the Administrative Agent or any duly appointed agent will require, at any time, additional documentation relating to an application for Shares. In addition, the Fund, the Management Company or the Administrative Agent or any duly appointed agent will require any other information that the Fund, the Management Company or the Administrative Agent or any duly appointed agent may require in order to comply with their legal and regulatory obligations. Such information shall be collected for compliance reasons only and shall not be disclosed to unauthorised persons.

In case of delay, failure or refusal by an Investor to provide the documents required, the application for subscription (or, if applicable, for redemption) will not be accepted. Neither the Fund, the Management Company, the Administrative Agent nor any duly appointed agent have any liability for delays or failure to process deals as a result of the Investor providing no or incomplete documentation.

Investors will be requested to provide additional or updated identification documents from time to time pursuant to ongoing client due diligence requirements under relevant laws and regulations.

The Management Company, the Administrative Agent or any duly appointed agent, under the ultimate responsibility of the Board of Directors, shall ensure that due diligence measures on the Fund's investments are applied on a risk-based approach in accordance with Luxembourg applicable laws and regulations.

In case of a subscription through an intermediary / nominee acting on behalf of his customer, enhanced customer due diligence measures for this intermediary / nominee will be applied in accordance with the 2004 Law and CSSF Regulation 12-02.

Additionally, pursuant to the above mentioned international and Luxembourg laws and regulations, the Management Company ensures that controls at the level of the delegates are performed over investments made or planned by the Fund consisting in an investment screening against sanctions and PEP lists. Those controls are performed taking into account a risk-based approach relying on an investments risk classification and a country risk assessment (corruption, international sanctions, countries with strategic AML/CTF deficiencies identified by EU/FATF, etc...).

The Board of Directors, or any delegate thereof, may provide the Luxembourg beneficial owner register (the "RBO") created pursuant to the Law of 13 January 2019 establishing a register of beneficial owners with relevant information about any Shareholder or, as applicable, beneficial owner(s) thereof, qualifying as beneficial owner of the Fund within the meaning of Article 1(7) of the Luxembourg law of 12 November 2004 on the fight against money laundering and terrorist financing, as amended. To the extent required by and subject to the conditions

of Luxembourg anti-money laundering laws and regulations, such information shall be made available to the general public through access to the RBO. By executing a subscription agreement with respect to the Fund, each Shareholder acknowledges that failure by a Shareholder, or, as applicable, beneficial owner(s) thereof, to provide the Board of Directors, or any delegate thereof, with any relevant information and supporting documentation necessary for the Board of Directors to comply with its obligation to provide same information and documentation to the RBO is subject to criminal fines in Luxembourg.

Ban on LATE TRADING and MARKET TIMING

Late Trading is defined as accepting an application for subscription, conversion, or redemption of shares after the time limit (as set out above) on the Valuation Day in question and the performance of such requests based on the net asset value which applies on such a day. *Late Trading* is strictly prohibited.

Market Timing is an arbitrage transaction by means of which an investor systematically subscribes to and buys back or converts the SICAV shares in a short period of time, exploiting the time differences and/or imperfections or deficiencies in the system used to determine the net asset value of the Sub-Fund concerned. *Market Timing* practices can disrupt the management of investment portfolios and damage the performance of the Sub-Fund concerned.

In order to prevent such practices, shares will be issued at an unknown price and neither the SICAV nor the SICAV's share sales agents will accept orders received after the applicable time limits.

The SICAV reserves the right to refuse subscription orders, conversion orders, or buy-back orders for a Sub-Fund made by any person suspected of carrying out *Market Timing*.

REDEMPTION OF SHARES

Shareholders wishing to redeem all or part of their shares may submit a written request to the SICAV at any time. The request must indicate the number of shares to be redeemed, the Sub-Fund / share class concerned, the name they are registered under, as well as details of the party to which the redemption price is to be paid.

* Based on the closing prices as of the NAV Date

Payments are made by transfers to shareholders' accounts or by cheque sent to the address they have indicated, with the risks and costs to be borne by shareholders. Any bank charges linked to the payment of redemptions are borne by the SICAV.

The Redemption price for the SICAV's shares may be higher or lower than the purchase price paid by the shareholder, depending on fluctuations in the SICAV's net asset value per share.

Under the conditions defined by the Board of Directors, with the express consent of the concerned investors and subject to the provisions of the law, the redemption price may be paid in kind. Such redemption in kind shall be subject to an audit report to the extent required by Luxembourg law. In principle, the costs linked to such redemption in kind shall be borne by the concerned investors.

Redemption rights are suspended for any period during which the calculation of the net asset value per share is suspended. All shareholders submitting redemption applications are notified of this suspension and any redemption applications pending in this way may be withdrawn further to written notification received by the SICAV before the suspension revocation.

In the absence of such notice, the shares in question are redeemed on the first Valuation Day following the end of the suspension.

The shares that are redeemed are cancelled.

The redemption price for shares is applied in the currency in which the net asset value is calculated for the class in question.

If all of the redemption applications concerning a Sub-Fund for a given Valuation Day represent 10% or more of this Sub-Fund's net assets, the SICAV's Board of Directors reserves the right to only settle redemption applications once, without any undue delay, the corresponding asset elements have been sold. If such a measure proves to be necessary, all redemption applications submitted on the same date will be treated equally.

Redemption applications in a currency other than a Sub-Fund's base currency (list of currencies to be approved by the SICAV's Board of Directors) will only be accepted if the Depositary Bank clears the funds.

The Depositary Bank will carry out the foreign exchange transactions on behalf of the Sub-Fund, with the risks and costs borne by the investors.

In addition, the SICAV's Board of Directors may at any time redeem the shares held by investors that are not entitled to subscribe or hold shares in breach of an exclusion measure set out in the Articles of Association which notably applies to investors from the United States of America and non-institutional investors investing in shares reserved for institutional investors.

CONVERSION OF SHARES

All shareholders may request the conversion of their shares into shares from another Sub-Fund. Similarly, those holding shares from a given class will be entitled to convert them into shares from another class, both within a given Sub-Fund and switching from one Sub-Fund to another, as permitted in this prospectus.

Shareholders wishing to make such a conversion may submit a written request to the SICAV indicating the same information as for redemptions and, as relevant, the class of shares that they would like to receive. They must indicate the address where the payment of any balance resulting from the conversion is to be sent. This conversion request must reach the SICAV or the transfer agent, complying with the subscription and redemption procedures of the Sub-Fund whose rules are most restrictive, for the net asset value applicable to be that from the first common net asset value date for the two Sub-Funds concerned.

The notice periods for the conversion of shares are identical to those applied for the subscription and redemption of shares.

The number of shares allocated in the new share class will be determined based on the following formula:

$$A = \frac{B \times C \times D}{E}$$

Where:

- A: represents the number of shares to be assigned to the new share class (as relevant, capitalisation or distribution shares; shares in the Sub-Fund's base currency or another currency)
- B: represents the number of shares to be converted in the initial share class (as relevant, capitalisation or distribution shares; shares in the Sub-Fund's base currency or another currency)
- C: represents the net asset value, on the Valuation Day applicable, for shares to be converted in the initial class (as relevant, capitalisation or distribution shares; shares in the Sub-Fund's base currency or another currency)
- D: represents the exchange rate applicable on the day of the transaction between the currencies for the two share classes
- E: represents the net asset value on the Valuation Day applicable for shares to be assigned in the new Sub-Fund (as relevant, distribution or capitalisation shares; shares in the Sub-Fund's base currency or another currency).

No shares may be converted if the net asset value calculation is suspended for any of the Sub-Funds concerned.

PERFORMANCE FEE

For the shares which include the letter "P" in their name, the Management Company may receive a performance fee as described below.

The fee will correspond to a percentage of the Sub-Fund's higher net return, respectively for each class in relation to a benchmark index or a fixed return rate. If this difference is negative or equal to zero, the Sub-Fund will not pay any performance fee.

The performance fee is payable on a yearly basis in arrears at the end of each 12-month period (financial year) and is equivalent to a percentage of the NAV performance, when it is higher than the benchmark NAV and a minimum return rate or benchmark index ("High Water Mark"). The performance fee is calculated based on the net asset value after deducting any expenses and the management fee (but not the performance fee) and is adjusted in order to take subscriptions and redemptions into consideration. For the Sub-Funds subject to swing price, the calculation is based on the unswung NAV. For Sub-Funds which were launched in the course of the financial year, the performance fee can only be crystallised at the end of the financial year, but not before at least 12 months after the launch.

The High Water Mark must be reset every 5 years.

In order to predict the performance fee that will need to be paid at the end of the year, for each net asset value calculation, if the Sub-Fund's net return, respectively for each class, since the last performance fee was paid, outperforms the benchmark index or minimum return rate, the Sub-Fund records provisions each valuation day.

During the financial year, if the Sub-Fund's net return, respectively for each class, is lower than that of the benchmark index or the minimum return rate, the Sub-Fund writes back a provision equivalent to the total amount of performance fees each time the net asset value concerned is calculated. If these provisions are reduced to zero, no performance fee will be charged.

The performance fee calculation is reset to zero each year. In any case, for a performance fee to be paid, the NAV (since the initial date on which the performance fee was applied to the Sub-Fund) must have reached a new historical maximum value after deducting the performance fee paid and at the same time must have exceeded the benchmark index or minimum return rate p.a. (hurdle). If the relative change between the old and new maximum historical NAV is less than the higher performance achieved, the performance fee may only be received based on the relative change between the old and new maximum historical value for the NAV. If the performance fee is charged, the new maximum historical value for the NAV, less the performance fee paid, will represent the new starting point for determining the hurdle.

If investors ask for their shares to be redeemed before the end of the financial year, the total outstanding performance fees corresponding to such shares will be paid to the Management Company at the end of the year.

Below are some concrete examples on the performance fee calculation:

Year	End of period NAV before performance fee	High Water Mark include minimum return rate or benchmark index	Outperformance against High Water Mark include minimum return rate or benchmark index	Performance fee	Performance fee percentage	Performance fee per share	End of period NAV after performance fee
1	105.00	103.50	+1.50 (+1.45%)	Yes	20%	0.30	104.70
2	106.20	106.70	-0.50 (-0.47%)	No	20%	0.00	106.20
3	107.00	108.30	-1.30 (-1.20%)	No	20%	0.00	107.00
4	114.25	110.35	+3.90 (+3.58%)	Yes	20%	0.78	113.47
5	114.25	114.25	0.00 (0.00%)	No	20%	0.00	114.25

Year 1: The NAV performance against the High Water Mark include minimum return rate or benchmark index is positive (+ 1.45%) and generates a performance fee equal to 0.30 (20% of the outperformance).

Year 2: The NAV performance against the High Water Mark include minimum return rate or benchmark index is negative (- 0.47%). No performance fee is generated.

Year 3: The NAV performance against the High Water Mark include minimum return rate or benchmark index is negative (- 1.20%). No performance fee is generated.

Year 4: The NAV performance against the High Water Mark include minimum return rate or benchmark index is positive (+ 3.58%) and generates a performance fee equal to 0.78 % (20% of the outperformance).

Year 5: The NAV performance against the High Water Mark include minimum return rate or benchmark index is flat (0.00%). No performance fee is generated

The above examples are for illustration only and will not correspond to the effective performance fee.

When calculating the performance fee, the term "return" is defined as the percentage positive change in the net asset value per share – as calculated on each valuation date – over the reference period for the performance fee.

The period for the first performance fee calculation will start at the end of the initial subscription period and run through to the end of the first financial year for the relevant Sub-Fund. Thereafter, the calculation periods will correspond to the fund's accounting year.

The below mentioned Benchmark indices do not define the Sub-Funds investment universe and may not be representative of the Sub-Funds' risk profile.

* Only applicable for share classes having a letter "P" in their denomination

** For these Sub-Funds, instead of Euro Short Term Rate (€STR), the benchmark for the hedged non-EUR Share classes will be:

USD Share class	SOFR Overnight Rate Index	+ 2% for UBAM - Absolute Return Fixed Income + 1% for UBAM - Absolute Return Low Vol Fixed Income
GBP Share class	SONIA Overnight Rate Index	
CHF Share class	SARON Overnight Rate Index	
SEK Share class	Swedish Krona Overnight Deposit Offered Rate	

***For this Sub-Fund, instead of SOFR Overnight Rate Index, the benchmark for the hedged non-USD Share classes will be:

EUR Share class	Euro Short Term Rate (€STR)	+ 3%
GBP Share class	SONIA Overnight Rate Index	
CHF Share class	SARON Overnight Rate Index	
SEK Share class	Swedish Krona Overnight Deposit Offered Rate	

No performance fee or management fee is charged for Type Z shares.

TAXATION

SICAV taxation

Under current legislation, the SICAV is not subject to any income tax in Luxembourg. Similarly, dividends paid by the SICAV are not subject to any Luxembourg withholding taxes at the SICAV level. However, the SICAV is subject to an annual tax ("taxe d'abonnement") representing 0.05% of the SICAV's net asset value for Type A, A+, U, U+, R, S, K and X. This tax is payable quarterly based on the SICAV's net assets, calculated at the end of the quarter concerned by the tax.

Type I, I+, F, M, V, Y and Z shares may benefit from a discounted subscription duty ("taxe d'abonnement") representing 0.01% of the value of their dedicated net assets.

No duties or taxes are payable in Luxembourg further to the issuing of the SICAV's shares.

In line with current practices and legal provisions, no tax is payable on capital gains recorded on the SICAV's assets. The SICAV is not expected to be subject to any tax on capital gains as a result of the investment of its

assets in other countries.

The SICAV's income through dividends and interest from sources outside of Luxembourg may be subject to withholding taxes, with variable rates, that are not normally recoverable.

Taxation for Shareholders

Under current legislation, shareholders are not subject to any tax in Luxembourg on capital gains, income, wealth or inheritance, or any withholding taxes (subject to the following paragraph), with the exception of shareholders domiciled, residing or owning a stable base in Luxembourg and certain former residents of Luxembourg owning more than 10% of the SICAV's capital.

Investors should consult their professional advisors on the possible tax or other consequences of buying, holding, transferring or selling the Sub-Fund's Shares under the laws of their countries of citizenship, residence or domicile.

Common Reporting Standard (CRS)

The Organisation for Economic Co-operation and Development ("**OECD**") has developed a common reporting standard ("**CRS**") to achieve a comprehensive and multilateral automatic exchange of information (AEOI) on a global basis. On 9 December 2014, Council Directive 2014/107/EU amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (the "**Euro-CRS Directive**") was adopted in order to implement the CRS among the Member States. The Euro-CRS Directive was implemented into Luxembourg law by the law of 18 December 2015 on automatic exchange of information regarding financial accounts in tax-related matters and implementing Council Directive 2014/107/EU of 9 December 2014 (the "**CRS Law**"). The CRS Law requires Luxembourg financial institutions to identify financial asset holders and establish if they are fiscally resident in an EU Member State other than Luxembourg or in a country specified in a Grand-Ducal Regulation. Accordingly, the SICAV may require its Shareholders to provide information in relation to the identity and fiscal residence of financial account holders (including certain entities and their controlling persons) in order to ascertain their CRS status and report information regarding a Shareholder and his/her/its account to the Luxembourg tax authorities, if such account is deemed a CRS reportable account under the CRS Law. The Luxembourg tax authorities will therefore transfer this information to the competent foreign authorities on a yearly basis. Under the CRS Law, the first exchange of information will be applied by 30 September 2017 for information related to the calendar year 2016. Under the Euro-CRS Directive, the first AEOI must be applied by 30 September 2017 to the local tax authorities of the Member States for the data relating to the calendar year 2016.

By investing in the SICAV, the Shareholder acknowledges that (i) the SICAV is responsible for the treatment of the personal data provided for in the CRS Law; (ii) the personal data will inter alia be used for the purposes of the CRS Law; (iii) the personal data may be communicated to the Luxembourg tax authorities; (iv) responding to CRS-related questions is mandatory; and (v) the Shareholders have a right of access to and rectification of the data communicated to the Luxembourg tax authorities. In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("**Multilateral Agreement**") to exchange information automatically under the CRS. The Multilateral Agreement aims to implement the CRS among non-Member States; it requires agreements on a country-by-country basis. The investors undertake to inform the SICAV (or any third party appointed by it) within thirty (30) days and provide an updated self-certification form where any change in circumstances occurs, which causes any of the information contained in the self-certification form to be incorrect.

Investors should consult their professional advisers on the individual impact of the CRS.

Data protection

Investors are informed that the SICAV, as data controller (the "**Data Controller**"), collects, stores and processes by electronic or other means personal data (i.e. any information relating to an identified or identifiable natural person, hereafter, (the "**Personal Data**")) supplied by the Investors at the time of their subscription and at any other time during the contractual relationship, in accordance with data protection law applicable in Luxembourg (including, but not limited to, the amended law of 2 August 2002 on the protection of persons with regard to the processing of personal data (the "**2002 Law**") and, when applicable, the Regulation (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (the "**General Data Protection Regulation**", together

with the Law of 2002, the "**Data Protection Law**") for the purpose of fulfilling the services required by the Investors and/or for complying with legal and regulatory obligations as described below.

Personal Data processed includes amongst others (i) the name, address, telephone number, business contact information, employment and job history, financial and credit history information, current and historic investments, investment preferences and invested amount of the Investor as well as (ii) the same information concerning the Investor's representative(s) (including, without limitation, legal representatives), employees, directors, officers, trustees, settlors, authorised signatories, shareholders, unitholders, nominees and/or ultimate beneficial owner(s) (as applicable) (the "**Data Subjects**") and any other Personal Data that is necessary to the SICAV and/or the Entities (as defined below) for the purposes described thereafter. Personal Data will be collected directly from the Investor or the other Data Subjects and may also be collected through publicly accessible sources, social media, subscription services or other third party data sources.

In particular, Personal Data may be processed for the purpose of carrying out the services provided by the SICAV or the Entities (as defined below) such as, for the purposes of account and distribution, administration, processing subscriptions or drawdown of commitments, assessing the Investor's qualification as eligible or well-informed Investor, maintaining the register of Shareholders, handling communications to the Investors as well as to provide services relating from any agreement entered into between the SICAV and a service provider in relation to the SICAV's investments (the "**Investment Services**"). Personal Data may also be processed by the Data Controller and the Entities in order to comply with their legal or regulatory obligations including, but not limited to, legal or regulatory obligations under applicable SICAV and company law (such as due diligence relating to Investors and monitoring of transactions to comply with anti-money laundering and counter-terrorist financing law, tax law and similar laws and regulations in Luxembourg or at EU level).

The SICAV may collect, use, store, retain, transfer and/or otherwise process Personal Data: (i) on the basis of Investors' consent and/or; (ii) as a result of the subscription of the Investor where necessary to perform the Investment Services or to take steps at the request of the Investor such subscription, including the holding of shares of the SICAV in general and/or; (iii) where necessary to comply with a legal or regulatory obligation of the SICAV and/or; (iv) in particular where the Subscription Agreement is not entered into directly by the Investor as natural persons, Personal Data may be processed where necessary for the purposes of the legitimate interests pursued by the SICAV or by the Entities (as defined below), which mainly consist in the provision of the Investment Services to the Investors, or compliance with foreign laws and regulations and/or any order of a foreign court, government, regulatory or tax authority, including when providing such Investment Services to any beneficial owner and any person holding a direct or indirect interest in the Investor.

In accordance with Data Protection Law, Personal Data may be disclosed to and / or processed by the AIFM, the Depositary, the Administrative Agent, the Domiciliary Agent, the Initiator, the Auditor of the SICAV, accountants, (foreign) court, governmental or regulatory bodies including tax authorities lenders, investment managers, investment advisers, paying agents and subscription and redemption agents, distributors as well as permanent representatives in places of registration, other service providers of the SICAV (including its information technology providers), any lender to the SICAV or related entities (including without limitation their respective general partner or management company/investment manager and service providers) in or through which the SICAV intend to invest, and any of the foregoing respective agents, delegates, affiliates, subcontractors and/or their successors and assigns (together hereafter, and solely for the purposes above mentioned, the "**Entities**"). The Entities may act as data processors on behalf of the Data Controller or, in certain circumstances, as data controller, in particular for compliance with their legal obligations in accordance with applicable laws and regulations (such as anti-money laundering identification) and/or order of competent jurisdiction. The Investors acknowledge that the Entities may be located outside of the European Economic Area ("**EEA**") in countries which do not ensure an adequate level of protection according to the European Commission and where data protection and/or professional secrecy laws might not exist or be of a lower standard than in the EEA.

The Data Controller undertakes not to transfer the Personal Data to any third parties other than the Entities, except as disclosed in the documentation provided to the Investors or if required or permitted by applicable laws and regulations or court order and in compliance with Data Protection Laws.

By subscribing or purchasing shares of the SICAV, investors acknowledge and accept to the processing of their information and the disclosure of Personal Data they provide to the Entities referred to above (including companies situated in countries outside of the EEA which may not have the same data protection laws as in Luxembourg) for the purposes described above. The transfer of data to the aforementioned Entities may transit

via and/or be processed in countries which may not have data protection requirements deemed equivalent to those prevailing in the EEA.

The SICAV undertakes not to transfer the Personal Data to any third parties other than the Entities acting as data processors, except as disclosed herein or if required by applicable laws regulations or court order. This may include disclosure to third parties such as governmental or regulatory bodies including tax authorities, auditors or accountants as well as legal and financial advisers who may process the Personal Data for carrying out their services and complying with legal and regulatory obligations as described above. This transfer and disclosure of Personal Data may take place to countries which do not have equivalent data protection laws to those of the EEA, or that are not subject to an adequacy decision of the European Commission, including the Data Protection Law and the Luxembourg law of 5 April 1993 on the financial sector which provides for a professional secrecy obligation (including but not limited to, Switzerland). The Data Controller may only transfer the Personal Data for the purposes of providing the Investment Services to the Data Subjects or for compliance with applicable laws and regulations, as described herein.

The SICAV may transfer the Personal Data to the Entities (i) on the basis of an adequacy decision of the European Commission with respect to the protection of personal data and/or on the basis of the EU-U.S. Privacy Shield framework or, (ii) on the basis of appropriate safeguards listed by and subject to the provisions of Article 46 of the General Data Protection Regulation (when applicable), such as standard contractual clauses, binding corporate rules, an approved code of conduct, or an approved certification mechanism or, (iii) on the basis of the Investor's explicit consent or, (iv) where necessary for the performance of the Investment Services or for the implementation of pre-contractual measures taken at the Investor's request or, (v) where necessary for the Entities to perform the Investment Services or other services rendered in connection with the Investment Services or, (vi) where necessary for important reasons of public interest or, (vii) where necessary for the establishment, exercise or defence of legal claims or, (viii) where the transfer is made from a register, which is legally intended to provide information to the public or, (ix) subject to the provisions of Article 49.1 of the General Data Protection Regulation (when applicable), where the transfer is necessary for the purposes of compelling legitimate interests pursued by the SICAV, which are not overridden by the interests or rights and freedoms of Data Subjects. Further details as to the legal basis of a transfer may be obtained by contacting UBP Asset Management (Europe) S.A., 287-289, route d'Arlon, L-1150 Luxembourg, Grand Duchy of Luxembourg, to the attention of the conducting officer in charge of compliance.

Where the processing of Personal Data or transfer of Personal Data outside of the EEA takes place on the basis of the consent of the Data Subjects, the Data Subjects are entitled to withdraw their consent at any time without prejudice to the lawfulness of the processing and/or data transfers carried out before the withdrawal of such consent and the Data Controller will accordingly cease such processing or transfers. However, the Data Subjects acknowledge that, notwithstanding any withdrawal of their consent, the Data Controller may still continue to process and/or transfer Personal Data outside the EEA if permitted by Data Protection Law or if required by applicable laws and regulations. Any change to, or withdrawal of, the Data Subjects' consent must be communicated in writing to the SICAV to the attention of UBP Asset Management (Europe) S.A., 287-289, route d'Arlon, L-1150 Luxembourg, Grand Duchy of Luxembourg.

Each Investor further acknowledges and accepts that the SICAV will report any relevant information in relation to investments in the SICAV to the Luxembourg tax authorities which will exchange this information on an automatic basis with the competent authorities in the United States or other permitted jurisdictions as agreed in the FATCA Law, the CRS Law or similar laws and regulations in Luxembourg or at EU level.

Failure to provide relevant Personal Data requested in the course of their relationship with the SICAV may need to be reported by the SICAV to the relevant Luxembourg authorities to the extent required by applicable law and may prevent the SICAV from maintaining the relationship with the Investor.

Insofar as the Personal Data provided by Investors include Personal Data of their representatives and/or authorised signatories and/or shareholders and/or ultimate beneficial owners, the Investors confirm having informed them of the present section and of their rights as described below, and having secured their consent to the processing of their Personal Data as above described and, in particular, to the disclosure of their Personal Data to, and the processing of their Personal Data by, the various parties referred to above including in countries outside the European Union which may not offer a similar level of protection as that under applicable Data Protection Law in Luxembourg (including but not limited to Singapore and Hong-Kong. The Data Controller may assume, where applicable, that Data Subjects have, where necessary, given such consent and have been informed of the processing and transfer of their Personal Data and of their rights as described under this section.

Personal Data is held until the Investor ceases to hold shares in the SICAV, plus a period of 10 years thereafter where necessary to comply with applicable laws and regulations or to establish, exercise or defend actual or potential legal claims, subject to the applicable statutes of limitation, unless a longer period is required by applicable laws and regulations. In any case, Personal Data will not be held for longer than necessary with regard to the performance of the Investment Services, subject always to applicable legal minimum retention periods.

Each Data Subject may request (i) access to, rectification, or deletion of, any incorrect Personal Data concerning him, (ii) a restriction of processing of Personal Data concerning him and, (iii) to receive Personal Data concerning him in a structured, commonly used and machine readable format or to transmit those Personal Data to another controller in accordance with Data Protection Law and (iv) to obtain a copy of or access to the appropriate or suitable safeguards which have been implemented for transferring the Personal Data outside of the EEA, in the manner and subject to the limitations prescribed in accordance with the Data Protection Law. In particular, Data Subjects may at any time object, on request and free of charge, to the processing of its Personal Data for direct marketing purposes or for other legitimate interests. Each Investor should address such requests to the SICAV to the attention of UBP Asset Management (Europe) S.A., 287-289, route d'Arlon, L-1150 Luxembourg, Grand Duchy of Luxembourg to the attention of the conducting officer in charge of compliance. For any additional information related to the processing of their Personal Data, Data Subjects can contact the Data Protection Officer of the Data Controller via post mail at UBP Asset Management (Europe) S.A., 287-289, route d'Arlon, L-1150 Luxembourg, Grand Duchy of Luxembourg or via email at LuxUBPAM@ubp.ch.

FEES AND EXPENSES BORNE BY THE SICAV

The SICAV bears all its operating expenses (notably including fees for the various parties involved, including the directors and managers provided for in this prospectus and certain expenses for directors, the Depositary Bank and its correspondents, the Listing Agent, the Registrar and Transfer Agent, the Administrative Agent, the Auditor, legal and tax advisers, costs for printing and distributing annual and semi-annual reports and this Prospectus, the KIID, publishing and marketing costs, costs related to establishing a rating for the various Sub-Funds), banking costs linked to share redemptions, brokerage fees, taxes to be paid by the SICAV, as well as the costs for registering the SICAV and maintaining this registration with all the government authorities, and the listing of the SICAV's shares on the stock exchange.

Fees and expenses relating to the SICAV's incorporation, the preparation and publication of this prospectus and the admission of the SICAV's shares to the Luxembourg stock exchange are borne by the SICAV and amortised over the first five financial years.

Fees and expenses that are not attributable to a specific share class are allocated to the various classes, prorated based on their respective net assets. Fees and expenses are first booked against the investment income recorded by the class or classes concerned. Fees and expenses attributable to a specific class are booked directly against this class.

All the assets concerning a specific Sub-Fund are only liable for the liabilities and obligations relating to this Sub-Fund.

A service fee based on the SICAV's average net assets, payable monthly and representing up to 0.365% per annum, with a minimum of EUR 35'000 per year will be paid to the Management Company. This service fee includes but is not limited to the fees for the Administrative, Registrar and Transfer Agent as well as the Depositary Bank. The Depositary Bank fee covers both the fees for (i) custody and (ii) monitoring of the assets. In addition to the service fee, a fix fee up to EUR 15 per subscription / redemption transaction is charged.

Transaction fees will also be charged separately.

The SICAV

The SICAV was incorporated as a variable capital investment company on 6 December 1990 for an indefinite period under the name of UBAM (Union Bancaire Asset Management).

Its Articles of Association were filed with the Luxembourg District Court Registry and published in the Luxembourg official gazette (Mémorial, Recueil des Sociétés et Associations, hereafter the "Official Gazette") on 7 January 1991. As decided at the Extraordinary General Meeting on 22 February 1991, the SICAV's name was changed to UBAM. This decision was published in the Official Gazette on 10 May 1991. The Articles of Association were further amended by notarial deeds dated 5 March 1996, 5 December 1998, 2 June 1999, 28 February 2000, 22 February 2002, 30 October 2003, 27 April 2004, 28 December 2005, 29 June 2007, 15 October 2009, 19 December 2011 and 16 December 2013 published in Section C of the Official Gazette on 2 April 1996, 5 December 1998, 14 August 1999, 15 June 2000, 13 April 2002, 10 November 2003, 3 June 2004, 16 February 2006, 16 July 2007, 3 December 2009, 6 February 2012, 3 March 2014. The Articles of Association were again amended by notarial deed on 28th August 2017 and published in the Recueil Electronique des Sociétés et Associations ("RESA") n° 2017_208 on 5th September 2017. The Articles of Association were last amended by notarial deed on 4th February 2020 and published in the RESA n° 2020_034 on 13th February 2020.

The SICAV is registered in the Luxembourg trade and company register under number B 35 412.

Shares

Subject to the following provisions, the SICAV's shares are freely transferable. The shares do not include any preferential or pre-emptive rights and each share is entitled to one vote, irrespective of its class or net asset value, at general shareholders' meetings. The shares are issued without any indication of their value and must be fully paid-up. The number of shares issued by the SICAV is not limited.

Any registered shares may be issued in fractions (three decimals, with the last rounded down to the nearest decimal). Such fractions of shares will represent a portion of the net assets and will proportionately entitle holders to any dividends paid out by the SICAV, as well as any income from the SICAV's liquidation. Fractions of shares are not entitled to voting rights. In principle, distribution shareholders will receive an annual dividend. The amount to be awarded to each Type will be determined by the Board of Directors.

With the exception of any distribution shares that are issued, the SICAV's capital gains and other income are reinvested for each one of the Sub-Funds and in principle no dividends are paid out to the shareholders. However, the SICAV's Board of Directors may submit a proposal to the General Meeting for the payment of a dividend in cash or the allocation of free shares of each class for which only capitalisation shares are issued.

The amount available for distribution is determined within the limits of Article 26 of the SICAV's Articles of Association and payouts may be made independently from any realised or unrealised capital gains or losses.

The Board of Directors may decide to pay out an interim dividend.

Each Sub-Fund's shares may be issued on a registered or bearer basis. No physical shares are issued. Bearer shares may always be converted to registered shares, and vice versa. The costs of such a change will be borne by the holder of the shares in question.

Temporary suspension of net asset value calculation

The SICAV's Board of Directors may suspend the determination of the net asset value of shares, the issuing and redemption of shares, as well as the conversion from these shares and into these shares from one or more Sub-Funds, in the following cases:

- a) for any period during which one of the main stock exchanges on which a significant portion of the SICAV's investments attributable to a given Sub-Fund are listed, is closed outside of a holiday period, or during which transactions on such a stock exchange are restricted or suspended;
- b) in the event of any situation that constitutes an emergency and, as a result of which, the SICAV may be unable to access its assets attributable to a given Sub-Fund under normal conditions or value them correctly;

- c) during any breakdown of the communication network normally used to determine the price or value of investments for a given Sub-Fund or the current price of stocks on a stock exchange;
- d) for any period during which the SICAV is unable to repatriate funds with a view to making payments further to the redemption of shares, or during which a transfer of funds involved in realisations, acquisitions of investments or payments due further to the redemption of such shares, cannot be carried out at what the directors consider to be a normal exchange rate;
- e) if for any reason whatsoever the price of one or more investments held by a Sub-Fund cannot be reasonably, quickly and correctly determined; or
- f) in the eventuality that the Company or a Sub-Fund is liquidated, from the date of the advance formal notice of the meeting of shareholders at which a resolution is put forward to liquidate the Company or the Sub-Fund.
- g) when the master UCITS of a feeder Sub-Fund temporarily suspends the repurchase, redemption or subscription of its shares, whether on its own initiative or at the request of its competent authorities.

Such a suspension will be published in the "Luxemburger Wort" as well as in any other newspaper as determined by the Board of Directors, and will be notified to any shareholders requesting the redemption or conversion of shares by the SICAV when they submit a definitive request in writing.

Such a suspension concerning a given share class will not have any effect on the net asset value calculation, issue, redemption or conversion of shares from other share classes.

General Meetings

The SICAV's Annual General Shareholders' Meeting is held each year at the SICAV's registered office in Luxembourg, at 10 am on the third Wednesday of April (if this day is not a legal or full bank business day in Luxembourg, the following full business day).

Notice of any general meeting is sent out to all registered shareholders at the address indicated in the shareholder register, at least eight days before the general meeting. This notice indicates the time and place of the general meeting and the conditions for admission, the agenda and the quorum and majority requirements under Luxembourg law. In addition, if there are any bearer shares, notices are published in the "RESA" (Registre Electronique des Sociétés et Associations) and the "Luxemburger Wort".

The requirements concerning the convening of meetings, participation, quorum for presence and voting at any general meeting are those set under Articles 67, 67-1 and 70 of the Grand-Duchy of Luxembourg Law of 10 August 1915, as amended.

Resolutions adopted at a general meeting are binding on all of the SICAV's shareholders, independently from the class of shares they hold. However, if the decisions to be taken only concern the specific rights of shareholders from a given share class, they must be taken by a meeting representing the shareholders from the share class in question. The requirements concerning the holding of such meetings are the same as those indicated in the previous paragraph.

Management report and annual and semi-annual financial statements

The reports for shareholders concerning the previous financial year, verified by the Auditor, are available from the SICAV's registered office. In addition, unaudited semi-annual reports are also available from the registered office to the holders of registered shares. The SICAV's financial year runs from 1 January to 31 December each year.

The SICAV's accounts will be expressed in EUR. The accounts for share classes that are expressed in different currencies will be converted into EUR and combined in order to draw up the SICAV's accounts. The audited annual report and accounts for each Sub-Fund in respect of each financial year shall be prepared in accordance with LuxGAAP.

Liquidation

A. Liquidation of the SICAV

If the SICAV is liquidated, the procedure will be based on the conditions stipulated by the 2010 Law.

The SICAV may be dissolved:

- 1) as decided by the General Shareholders' Meeting, ruling under the same conditions as for amendments to the Articles of Association.
- 2) if the SICAV's share capital is less than two thirds of the minimum capital, the directors must submit the issue of the SICAV's dissolution to the General Meeting deliberating without any presence conditions and ruling based on a simple majority of the shares represented at the Meeting.
- 3) if the SICAV's share capital is lower than one quarter of the minimum capital, the dissolution may be decided on by shareholders owning one quarter of the shares represented at the Meeting.

The Meeting must be convened in such a way that it can be held within 40 days of the date on which the net assets were found to be lower than two thirds or one quarter of the minimum capital respectively.

In the event of liquidation, all shares entitle holders to an equal prorated amount of income from the liquidation relating to the Sub-Fund of assets that the share is part of. If the liquidation is closed, any outstanding amount of the liquidation income that has not been distributed before such closure will be deposited with the Caisse de Consignations in Luxembourg, where it will be kept available to beneficiaries until the end of the period of limitation.

The decisions of the General Meeting or the court declaring the SICAV's liquidation will be published in the "RESA", "Luxemburger Wort" and where applicable, in the countries where the SICAV's shares are distributed, in accordance with applicable national rules.

B. Pure and simple liquidation of one of the SICAV's Sub-Funds

The SICAV's Board of Directors may decide on the pure and simple liquidation of a Sub-Fund in the following cases:

- if the net assets of the Sub-Fund concerned represent less than EUR 10 million (or equivalent value in another currency);
- if the economic and/or political environment was to change;
- for any economic and financial reasons for which the SICAV's Board of Directors considers that it is in the general best interests of shareholders to liquidate the Sub-Fund.

The liquidation decision must be published in accordance with the corresponding disclosure rules. More specifically, it must give details on the grounds and conditions of the liquidation process.

Unless decided otherwise by the Board of Directors, the SICAV may, pending the execution of the liquidation decision, continue to redeem shares from the Sub-Fund which is to be liquidated. For such redemptions, the SICAV must base itself on the net asset value that is determined in order to factor in liquidation costs, although without deducting a redemption fee or any other withholding charge. Capitalised start-up costs are to be depreciated in full as soon as the liquidation decision has been taken.

Assets that have not been distributed to beneficiaries on the closing date for the liquidation of the Sub-Fund or Sub-Funds must be deposited with the Caisse de Consignations, where they will be kept available to beneficiaries until the end of the period of limitation.

The annual report for the financial year during which the liquidation decision has been taken must expressly report on this decision and provide details on the level of progress made with liquidation operations.

C. Closure of a Sub-Fund through a transfer to another Sub-Fund

Under the same circumstances as set out under Point B above, the Board of Directors may decide to close a Sub-Fund through a transfer to another Sub-Fund within the SICAV. The Board of Directors may also decide on such a merger if it is in the best interests of all the shareholders in the Sub-Fund concerned. This decision will be published as set out in the previous paragraph, and the publication will also contain information relating to the merging Sub-Fund. This publication will take place one month before the effective date of the merger in order to allow shareholders to request the redemption of their shares, at no cost, before the merger with another Sub-Fund becomes effective.

All shareholders who have not requested the redemption of their shares by the end of a one-month period will be bound by the merger decision.

D. Closure of a Sub-Fund through a merger with another undertaking for collective investment

Similarly, under the same circumstances as set out above, the Board of Directors may decide to close a Sub-Fund by merging it with another undertaking for collective investment governed by Part I of the 2010 Law or another European UCITS subject to Directive 2009/65/EC as amended. The Board of Directors may also decide on such a merger if it is in the best interests of all the shareholders in the Sub-Fund concerned. This decision will be published as set out above, and the publication will also contain information relating to the undertaking for collective investment concerned.

This publication will take place one month before the effective date of the merger in order to allow shareholders to request the redemption of their shares, at no cost, before the merger with the other undertaking for collective investment becomes effective. In the event of a merger with another undertaking for collective investment such as a mutual fund, only the shareholders from the Sub-Fund concerned who expressly agree to the merger will be bound by it.

The decision to liquidate or merge a Sub-Fund under the circumstances and based on the conditions set out in the previous paragraphs may also be taken at a meeting of shareholders from the Sub-Fund to be liquidated or merged, during which no quorum will be required and the decision to liquidate or merge must be approved by shareholders owning at least 50% of the shares represented at the meeting.

The merger of a Sub-Fund with another foreign undertaking for collective investment subject to the Directive 2009/65/EC, as amended, is only possible with the agreement of the shareholders by a simple majority.

Important information

Investors should note that any shareholder may exercise his rights fully as an investor directly against the SICAV, including the right to attend shareholders' meetings, only if the investor is listed itself, by name, in the SICAV register of shareholders. If a shareholder investing in the SICAV through an intermediary investing in its name but on behalf of the shareholder, certain shareholder rights may not necessarily be exercised by the investor directly. Shareholders are recommended to inquire about their rights

Documents available

Copies of the following documents may be consulted during office hours each bank business day in Luxembourg at the SICAV's registered office at 287-289 route d'Arlon, Luxembourg:

- (a) The SICAV's Articles of Association;
- (b) The SICAV's complete prospectus and KIID;
- (c) The Management Company Agreement between UBP Asset Management (Europe) S.A. and the SICAV;
- (d) The Investment Management Agreements between the SICAV, UBP Asset Management (Europe) S.A. and the Managers;
- (e) The Depositary Bank Agreement between UBP Asset Management (Europe) S.A., BNP Paribas S.A., Luxembourg branch and the SICAV;
- (f) The Administrative Agent, Registrar and Transfer Agent Agreement between UBP Asset Management (Europe) S.A., CACEIS Bank Luxembourg Branch and the SICAV;
- (g) The Paying Agent Agreement between UBP Asset Management (Europe) S.A., CACEIS Bank Luxembourg Branch and the SICAV;
- (h) The General Distribution Agreement between UBP Asset Management (Europe) S.A., Union Bancaire Privée, UBP SA and the SICAV;
- (i) The annual and semi-annual reports.

Copies of the documents indicated in subparagraphs (a) (b) and (i) may be obtained from the SICAV's registered office each bank business day in Luxembourg.

AVAILABLE SHARES WITHIN THE SUB-FUNDS

The tables below list the classes of shares available by Sub-Fund together with the maximum rates applicable to:

- Management Fee (please refer to "[INVESTMENT MANAGEMENT](#)" chapter);
- Marketing Fee (please refer to "[MARKETING AGENT](#)" chapter);
- General Distributor Fee (please refer to "[GENERAL DISTRIBUTOR](#)" chapter);
- Performance Fee (please refer to "[PERFORMANCE FEE](#)" chapter).

Please also refer to "[ADMINISTRATIVE AGENT, REGISTRAR AND TRANSFER AGENT](#)" and "[DEPOSITARY BANK](#)" chapters in connection with the applicable Administration Fee and Depositary Fee.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - ABSOLUTE RETURN FIXED INCOME
Legal entity identifier: O00000869_00000102

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes social characteristics by supporting the ten principles of the United Nations Global Compact through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

This Sub-Fund promotes environmental characteristics by supporting transparent policies of corporate bond issuers towards a net-zero emission path.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used to assess the environmental characteristic is the percentage of corporate bond issuers in this Sub-Fund with a net-zero emission plan.

The sustainability indicator used to assess social characteristic is breach to United Nations Global Compact (UNGC).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

* 1. GHG emissions (Scope 1, 2, and 3 where available)

* 2. Carbon footprint

* 3. GHG intensity of investee companies

Waste:

* 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund denominated in EUR and which invests its net assets primarily in global credit markets without any limitation of geography. This Sub-Fund will invest in:

- Emerging countries up to 60%;
- High Yield up to 80%;
- asset backed securities up to 20%;
- equity, including equity derivatives up to 20%;
- Contingent Convertible bonds up to 20%.

Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the RISK FACTORS chapter of the Sub-Fund's prospectus

The contingent convertible bond exposure will aim to increase and diversify the financial subordinated risk where the Investment Manager deems it appropriate.

This Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR). The currency risk is limited to 30% of the net assets of the Sub-Fund. This Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance
practices include
sound management
structures, employee
relations,
remuneration of staff
and tax compliance.

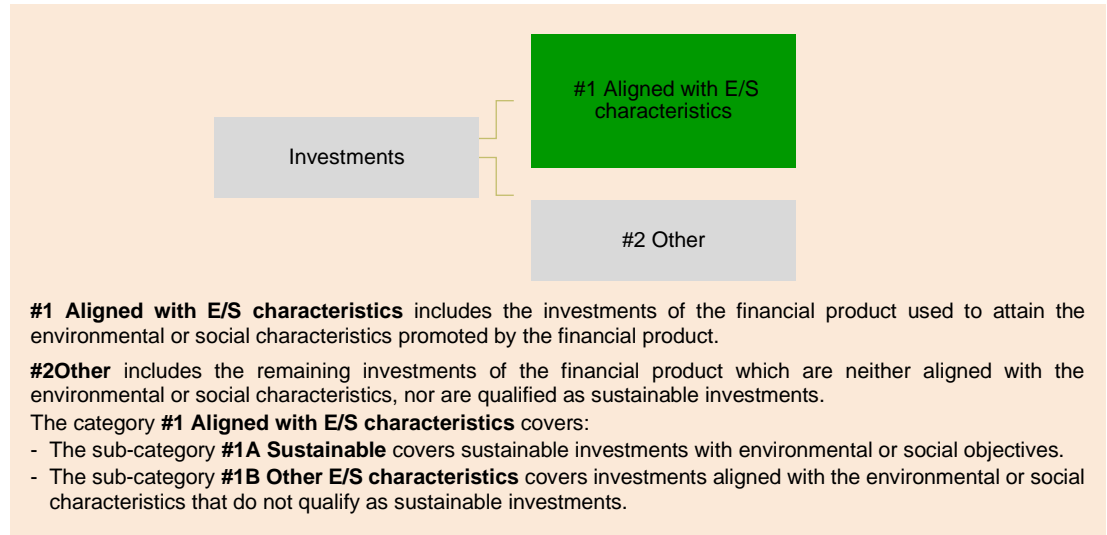

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments?

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

N/A

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

N/A

- ***How does the designated index differ from a relevant broad market index?***

N/A

- ***Where can the methodology used for the calculation of the designated index be found?***

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

What investment strategy does this financial product follow?

This Sub-Fund denominated in EUR and which invests its net assets primarily in any kind of:

- bonds denominated in any kind of currencies;
- money market instruments denominated in any kind of currencies and;
- fixed income and currency derivatives denominated in any kind of currencies such as CDS, futures, swaps and options.

This Sub-Fund may invest up to:

- 40% of its net assets in transferable securities of Emerging countries;
- 50% of its net assets in high yield products.

Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the RISK FACTORS chapter of the Sub-Fund's prospectus

This Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR).

The currency risk is limited to 30% of the net assets of this Sub-Fund. This Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

In normal market conditions, it is expected that the annualized volatility will be below 2%. This annualized volatility is a goal that the Investment Manager will strive to achieve under normal market conditions and cannot be guaranteed.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

- * 1. GHG emissions (Scope 1, 2, and 3 where available)
- * 2. Carbon footprint
- * 3. GHG intensity of investee companies

Waste:

- * 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund denominated in EUR and which invests its net assets primarily in bonds denominated in this currency issued by companies ("corporate bonds") with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's) and, up to 20% of its net assets in Contingent Convertible bonds with a minimum rating of B- (Standard and Poor's or Fitch) or B3 (Moody's) .

This Sub-Fund is actively managed and aims to outperform the ICE BofAML Euro Large Cap Corporate Index (the Index). This Index is representative of the investment universe and of the risk profile of the Sub-Fund. This Sub-Fund is expected to deliver comparable returns to the Index over time. Even if the Sub-Fund portfolio's securities will mainly correspond to those of the Index, the Investment Manager may invest at its discretion in issuers, sectors and countries not included in the Index and/or deviate materially from the Index composition in term of countries, sectors, issuers, instruments etc... in order to take advantage of specific investment opportunities. This deviation of the constituents can lead to a deviation of this Sub-Fund's performance compared to the Index performance.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund may invest up to 20% of its net assets in transferable securities of Emerging countries.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.ubp.com/en/investment-expertise/responsible-investment>.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - CORPORATE GREEN BOND
Legal entity identifier: O00000869_000000149

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ ☒ ☒ Yes

☐ ☐ ☐ No

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 85%**
- ☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

The dominant sustainable investment objective of this Sub-Fund is climate change mitigation. This does not prevent this Sub-Fund from allocating to investments with other environmental objectives as set out in article 9 of Regulation (EU) 2020/852.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

This Sub-Fund uses CO2 emissions avoided in Mio tons per year at the bond level as a sustainability indicator provided the information is disclosed by the issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

To ensure that sustainable investments this Sub-Fund intends to make not cause significant harm, this Sub-Fund will i) at the security level: invest in Green Bonds (green bonds and sustainability bonds with environmental objectives) where the proceeds is targeted to environmental purposes as defined in the prospectus and ii) at the issuer level: assess whether companies do no significant harm through an internal methodology which covers principal adverse impact indicators, controversies and the ESG opinion of the Investment Manager on those companies.

With Green Bonds, issuers commit to financing sustainable projects that foster a net-zero emissions economy and protect the environment.

This Sub-Fund adheres to the Green Bond Principles (GBP) that set guidelines for green bond issuers. Details of the GBP can be found here: <https://www.icmagroup.org/sustainable-finance/the-principles-guidelines-and-handbooks/green-bond-principles-gbp/>

↳ **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This Sub-Fund intends to make investment in sustainable investments. Those investments will be made in green bonds or sustainability bonds with environmental objectives ("Green Bonds") from corporates.

The Green Bond issuers are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some indicators for adverse impacts on sustainability factors are taken into account via the exclusion of companies in breach of international norms, including the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 10), or the exclusion of companies involved in controversial weapons (PAI 14).

The other mandatory indicators not assessed via exclusion are assessed at the issuer level relying on external data providers.

↳ **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the Investment Manager Responsible Investment Committee's, Watch list and Exclusion list.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

* 1. GHG emissions (Scope 1, 2, and 3 where available)

* 2. Carbon footprint

* 3. GHG intensity of investee companies

Waste:

* 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the Sub-Fund's portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

* 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises

* 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the Investment Manager's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund actively managed denominated in EUR which invests at least 85% of its net assets in global Green Bonds that contribute to environmental sustainability, or sustainability bonds that contribute to environmental objectives, issued by worldwide corporates, mainly mid and large cap issuers, and with an average expected maturity between 1 and 10 years.

Green Bonds are any type of bond instrument where the proceeds will be exclusively applied to finance or re-finance, in part or in full, new and/or existing eligible Green Projects and which are aligned with the four core components of the Green Bond Principles : use of Proceeds, Process for Project Evaluation and Selection, Management of Proceeds and Reporting. The Green Bond Principles (GBP) are voluntary process guidelines that recommend transparency and disclosure and promote integrity in the development of the Green Bond market by clarifying the approach for issuance of a Green Bond. More information about Green bond's guidelines and principles are available on: <https://www.icmagroup.org/sustainable-finance/the-principles-guidelines-and-handbooks/green-bond-principles-gbp/>

This Sub-fund may invest up to:

- 100% of its net assets in Investment Grade securities
- 20 % of its net assets in High Yield securities
- 20% of its net assets in Emerging countries
- 20% of its net assets in Contingent Convertible bonds with a minimum rating of B- (Standard and Poor's or Fitch) or B3 (Moody's)
- 5% of its net assets in equity, including equity derivatives.

The Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus.

The exposure to these markets can be direct or via the use of derivative financial instruments such as but not limited to CDS, futures and options.

The investment universe of this Sub-Fund is based on the Green Bond Principles as formulated by the International Capital Market Association. Furthermore, issuers and underlying projects are screened using a proprietary assessment methodology.

This Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR). The currency risk is limited to 10% of the net assets of the Sub-Fund. This Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers with an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards the attainment of the sustainable objective:

1/ Exclusions applicable to the Sub-Fund according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Investment in green or sustainability bonds with an environmental objectives ("Green Bonds"). With Green Bonds, issuers commit to financing sustainable projects that foster a net-zero emissions economy and protect the environment. A minimum 85% of the Sub-Fund will be in Green Bonds.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, we take into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

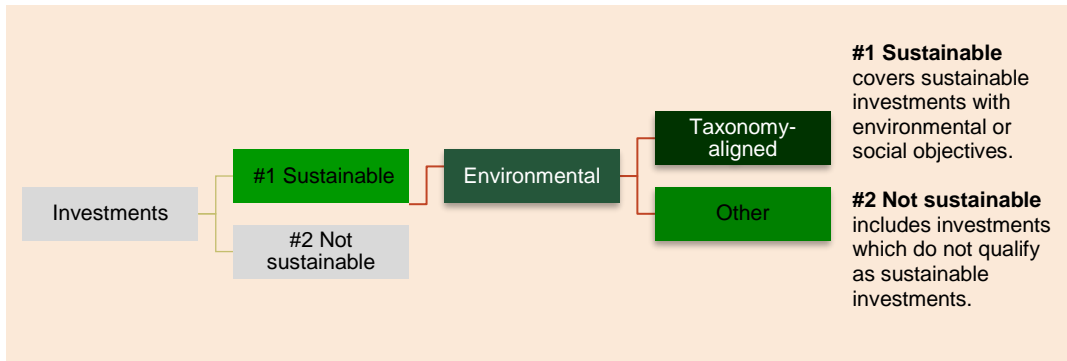

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

The planned asset allocation of this Sub-Fund is 85% in environmentally sustainable investments, with a mix of Taxonomy-aligned investments (1% commitment) and other environmentally sustainable investments. "Investments included in "Not sustainable" will be cash, equivalents and derivatives for liquidity management and share class hedging.

● How does the use of derivatives attain the sustainable investment objective?

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

This Sub-Fund commits to have Taxonomy-aligned investments. However, given the current absence of a EU Green Bond Standard, the current commitment is 1%. This commitment is expected to increase over time as Green Bonds aligned with such Standard become available.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 85% sustainable investments with an environmental objective at all times. This will be split between the two following buckets: taxonomy-aligned investments and other environmentally sustainable investments in proportions that may vary over time, depending on investments opportunities (see previous question).

What is the minimum share of sustainable investments with a social objective?

N/A

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in "Not sustainable" can also be cash, cash equivalents and derivatives for liquidity management and share class hedging.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

N/A

● **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

N/A

● **How does the designated index differ from a relevant broad market index?**

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.ubp.com/en/investment-expertise/responsible-investment>.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - DIVERSIFIED INCOME OPPORTUNITIES
Legal entity identifier: O00000869_000000153

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

For corporate issuers

This Sub-Fund promotes social characteristics by supporting the ten principles of the United Nations Global Compact through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

For sovereign issuers

For sovereign bonds the sustainability of a country's economic performance is assessed given its natural resource endowment, management and supplementation and its resilience to climate change and other natural hazards.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

The environmental and social characteristics promoted by this Sub-Fund only apply to the allocation in bonds and equities of this Sub-Fund, ABS and derivatives instruments are out of scope.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

For sovereign issuers

For sovereign bond issuers, the sustainability indicators used to assess social and environmental characteristics are based on internal environmental and social scores built using data from external providers. The external providers incorporate data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

For corporates issuers

The sustainability indicator used to assess social characteristic is the percentage of companies in breach of United Nations Global Compact (UNGC).

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

For sovereign bonds in the portfolio, the following PAIs will be considered by this Sub-Fund:

Sovereign PAI 16: investee countries subject to social violations as identified by an external data provider.

Climate and other environment-related indicators.

Green gas emissions:

- Corporate PAI 3: GHG intensity of investee companies. In particular, the Sub-Fund excludes companies involved in coal-intensive mining and electricity generation as well as in unconventional oil & gas (revenue thresholds apply). In addition, direct or collaborative engagement may be conducted to promote transparency and disclosure of carbon emissions as well as the adoption of more ambitious climate strategies, including science-based emission reduction targets.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- Corporate PAI 10: Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises. This Sub-Fund does not invest in corporate bond issuers that are embroiled in controversies as detailed below.
- Corporate PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Investments in investee companies involved in the manufacture or selling of controversial weapons are prohibited.

What investment strategy does this financial product follow?

This Sub-Fund actively invests a majority of its net assets in bonds and other debt securities. The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value in order to achieve an attractive level of income while mitigating the risk of short-term negative returns. The Sub-Fund allocates actively to the following sectors, up to:

- 100% of its net assets in High Yield securities
- 100% of its net assets in Investment Grade securities
- 50% of its net assets in Emerging countries, including Frontier countries.
- 20% of its net assets in Contingent Convertible Bonds (Cocos)
- 25% of its net assets in Convertible Bonds
- 20% of its net assets in asset backed securities (ABS)
- 10% of its net assets in equity, including equity derivatives
- 5% of its net assets in distressed securities

The Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund invests primarily in Fixed Income instruments with sound ESG practices.

The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value. The ESG approach combines the filtering of the investment universe and the integration of environmental, social and governance considerations.

ESG aspects are considered when assessing a credit, as the Investment Manager believes, alongside rating agencies, that sound ESG credentials can help improve issuers' creditworthiness. To conduct this ESG analysis, the Investment Manager relies on different sources of information and data, including for instance companies' annual and/or sustainability reports, ad-hoc engagement with issuers, credit agencies' ESG review, as well as external ESG data and scoring providers.

This Sub-Fund aims to deliver financial performance, derived notably from the carry offered by fixed income instruments. For that purpose, some investments may be included that are not aligned with the E/S characteristics promoted by the Sub-Fund's investment policy.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The investment process includes a first phase of investment universe filtering and a second phase of ESG integration in bottom-up research and portfolio construction. The first step is investment filtering.

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain sustainable characteristics as measured by MSCI ESG research. Sustainable characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI rating, an internal rating may be assigned by the Investment Manager.

All sovereign and corporate bonds and equities with an MSCI ESG rating of CCC are excluded.

Sovereign issuers are excluded if:

- they are identified as oppressive regimes, as recognised by a Global Freedom Score of 7 or below by Freedom House.
- they are on international sanction lists such as, but not limited to, those of the EU, UN & OFAC.

Corporate and Quasi-sovereign companies are excluded if:

- they bear a Red Controversy Flag by MSCI ESG Research, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by UBP's Responsible Investment Committee.
- Harmful activity exclusion according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

The second step is ESG integration, which is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view.

ESG and financial views are combined to select the issuers. At least 70% of the Sub-Fund's allocation is covered by the extra-financial analysis.

Investments in derivatives as mentioned above do not participate in reaching the environmental or social characteristics promoted by the Sub-Fund. The use of derivatives has no material impact on the E and S characteristics.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

- ***What is the policy to assess good governance practices of the investee companies?***

This Sub-Fund invests primarily in corporate and sovereign bonds. Assessing corporate governance is viewed as essential and is fully integrated in the Investment Manager's ESG and credit analysis, as it can have a significant impact on a company's ability and willingness to pay back its debt. It is based on internal research, which relies on company reports, information provided by other sources such as external ESG data providers, brokers or credit rating agencies.

The analysis covers matters such as, but not limited to, ownership structure, Board independence, Board diversity, compliance and anti-corruption policies, whistleblower provisions, potential controversies around matters of bribery or accounting practices. Through this analysis, the Investment Manager will seek to select companies with good governance practices, while avoiding companies with the worst practices, ESG-rated CCC, as well as companies involved in controversies.

The above only applies to bonds and equities in this Sub-Fund, derivatives and asset-backed securities are out of scope. ABS are typically backed by pools of receivables such as consumer credit or real-estate loans that do not lend themselves to ESG research.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

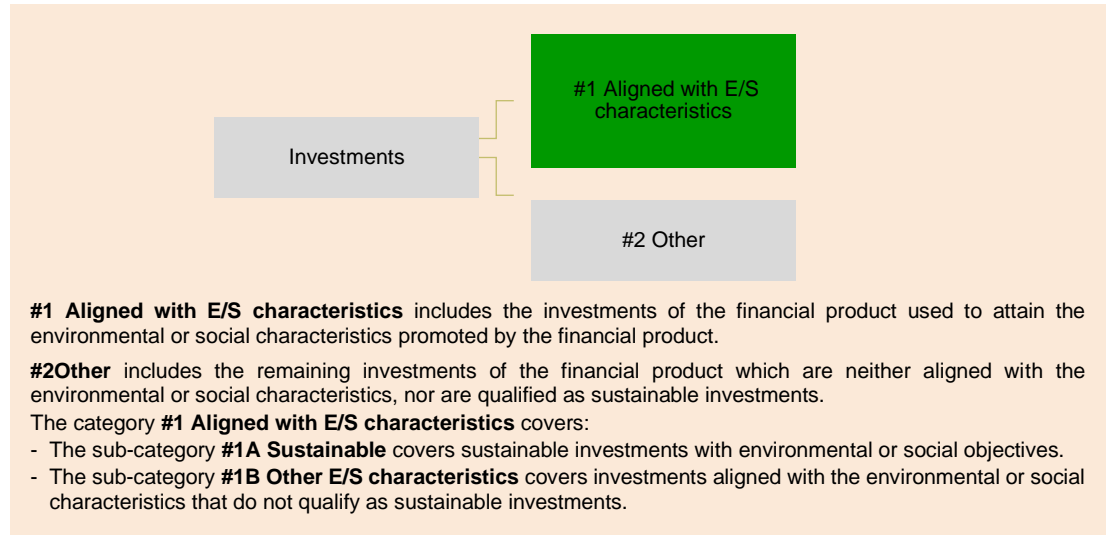

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of net assets aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be:

- Corporate issuers (for bonds and equities) not covered by ESG analysis . In that case, these investments include safeguards to the extent that the bindings elements described in above also apply to them.
- Asset Backed Securities (ABS)
- cash, cash equivalents, derivatives for liquidity management and efficient portfolio management..Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - DYNAMIC EURO BOND

Legal entity identifier: O00000869_00000002

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ ☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes social characteristics by supporting the ten principles of the United Nations Global Compact through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

This Sub-Fund promotes environmental characteristics by supporting transparent policies of corporate bond issuers towards a net-zero emission path.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicator used to assess the environmental characteristic is the percentage of corporate bond issuers in this Sub-Fund with a net-zero emission plan.

The sustainability indicator used to assess social characteristic is breach to United Nations Global Compact (UNGC).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

- * 1. GHG emissions (Scope 1, 2, and 3 where available)
- * 2. Carbon footprint
- * 3. GHG intensity of investee companies

Waste:

- * 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund denominated in EUR and which invests its net assets primarily in securities denominated in this currency. The average maturity of the bond portfolio excluding cash can be expected to range between 1 and 2.5 years but will not exceed 3 years at any time. As such, this Sub-Fund cannot be considered as a money market fund.

At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities, primarily investment grade. In particular this Sub-Fund can invest in, but is not limited to:

- investment grade bonds issued by companies with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's),
- interest rate and credit derivatives such as futures, options, swaps and credit default swaps, unlike money market funds.

This Sub-Fund's investments are expected to carry on average a higher risk than a typical money market investment, in particular in terms of credit risk (maturity profile, ratings profile, average spread duration) and due to the before mentioned use of derivative instruments.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

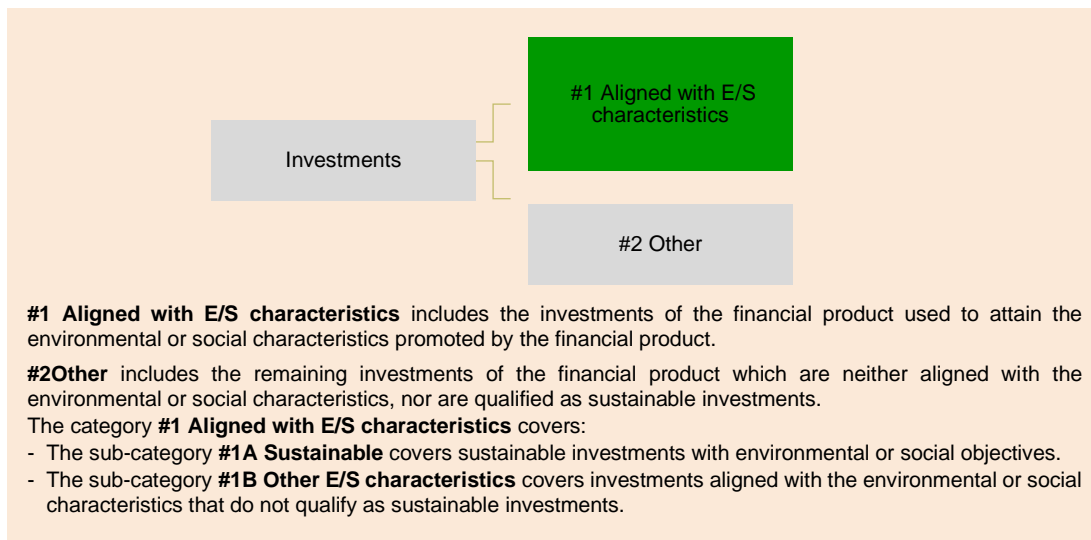

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EM RESPONSIBLE CORPORATE BOND
Legal entity identifier: O00000869_00000113

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund aims to have better environmental and social characteristics than the Emerging Market (EM) corporate bond universe, as measured by the JP Morgan Corporate EMBI Diversified index. This index is a standard reference representing the EM Corporate Bond Universe but is not aligned with the environmental and/or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

To measure the attainment of each of the environmental and social characteristics promoted by this Sub-Fund, the Investment Manager considers the Sub-Fund's performance against its reference index on the following indicators:

- the overall ESG quality score
- the weighted average carbon intensity
- the share of companies in breach of UN Global Compact and other international norms, as measured by MSCI red overall controversy flag

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Sub-Fund invests part of its assets in sustainable investments whose objectives may include

1) environmental objectives such as, but not limited to, climate mitigation, water and waste management, sustainable agriculture...

and/or

2) social objectives such as, but not limited to, nutrition, small and medium-size enterprise financing/microfinance, sanitation...

Such sustainable investments include investments in bonds issued by corporate who have a share of their revenues in activities contributing to environmental or social objectives (for instance renewable energy, green buildings...) as well as green/social or other types of sustainability bonds, provided that these issuers do no significant harm and are companies of good governance, as described further below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and overall ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed to check that they do not cause severe adverse impact, provided that data is available and sufficient to make an informative decision.

Some PAI considerations are taken into account at the overall fund level through for instance the exclusion of companies in breach of international norms, including the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 10), or the exclusion of companies involved in controversial weapons (PAI 14).

For others, the criteria depend on the PAI considered. As an example, a company having activities identified as negatively affecting biodiversity-sensitive areas (PAI 7) would not be included as part of the "sustainable investment" allocation.

The Investment Manager relies on well recognised external data providers for PAI information.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

All issuers are screened to exclude any breaches of international norms, as measured by MSCI Red Overall Controversy Flags, including the OECD Guidelines for Multinational Enterprises, the UN Global Compact and the UN Guiding Principles on Business and Human Rights, as well as other ESG norms and principles.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager seeks to limit the following potential adverse impacts of its investments:

- PAI 3: GHG intensity of investee companies. This is done by limiting exposure to high emitters, with the objective of maintaining the weighted average carbon intensity of the portfolio well below that of the reference index. In particular, this Sub-Fund excludes companies involved in coal-intensive mining and electricity generation as well as in unconventional oil & gas (revenue thresholds apply). In addition, direct or collaborative engagement may be conducted to promote transparency and disclosure of carbon emissions as well as the adoption of more ambitious climate strategies, including science-based emission reduction targets.
- PAI 10: Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises. This is done by excluding companies identified as in breach of international norms
- PAI 14: Exposure to controversial weapons. This is done by excluding companies that develop, manufacture or sell controversial weapons, such as chemical and biological weapons, cluster munitions, landmines, incendiary weapons using white phosphorus, blinding laser weapons and depleted uranium weapons

What investment strategy does this financial product follow?

This Sub-Fund invests primarily in corporate bonds, denominated in hard currencies and issued by emerging market corporate issuers with sound ESG practices.

The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value in order to combine a financial risk-adjusted performance in line or above that of the EM corporate bond market over the investment horizon, with environmental and social characteristics better than that of the EM corporate bond investment universe.

The investment process includes a first phase of investment universe filtering and a second phase of ESG bottom-up research. The first phase consists in selecting issuers with sound ESG quality and avoids controversial business activities as well as companies in breach of international norms (norms-based screening). Once the investable universe has been reduced according to the first phase, the second phase consists in integrating ESG consideration into its analysis and portfolio construction. ESG considerations are notably integrated into the issuers' qualitative credit assessment, as the Investment Manager believes, alongside rating agencies, that strong ESG credentials can help improve issuers' creditworthiness. To conduct this ESG analysis, the Investment Manager relies on different sources of information and data,

including for instance companies' annual and/or sustainability reports, ad-hoc engagement with issuers, credit agencies' ESG review, as well as external ESG data and scoring providers.

In addition to a holistic analysis of issuers' environmental and social practices, attention is put on issuers' greenhouse gas (GHG) emissions and climate strategy, in order to ensure the reduction of the Sub-Fund's weighted average carbon intensity well below that of its investment universe. This Sub-Fund aims also to capture sustainable investment opportunities, by including for instance issuers that can help address such issues as climate change mitigation and adaptation, hence also contribute to a reduction of future GHG emissions through their activities (e.g. renewable energy, green building, ...).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

To attain each of the environmental or social characteristics promoted by this Sub-Fund, the selected issuers have to:

- carry an ESG rating from MSCI ESG Research with a minimum of BB (on a scale ranging from AAA – CCC). This means that issuers with the worst ESG characteristics (carrying an ESG rating of B or CCC) are excluded.
- not be in breach of UN Global Compact or other international norms – that is companies that are not assigned a Red Overall Controversy Flag by MSCI ESG Research;
- not be involved in controversial weapons, nuclear weapons or tobacco production.
- have limited exposure to other weapons and other tobacco revenues (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>)
- have limited exposure to coal and unconventional oil and gas extraction as well as to coal-powered electricity to limit this Sub-Fund's carbon footprint (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

Moreover, the ESG analysis should cover at least 90% of the Sub-Fund's investments in bonds. For bonds without an MSCI ESG Research rating, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

The ESG selectivity process leads to a reduction of the investment universe of at least 20%.

● ***What is the policy to assess good governance practices of the investee companies?***

This Sub-Fund is primarily invested in emerging market corporate/quasi-sovereign bonds. Assessing Governance is thus essential and is fully integrated in the Investment Manager's ESG and credit analysis, as it can have a significant impact on a company's ability and willingness to pay back its debt. It is based on internal research, which relies on company reports, information provided by other sources such as external ESG data providers, brokers or credit rating agencies... Governance matters are also included in the ESG questionnaire developed by the Investment Manager and which forms the basis for direct engagement. The analysis covers matters such as, but not limited to, ownership structure, Board independence, Board diversity, compliance and anti-corruption policies, whistleblower provisions, potential controversies around matters of bribery or accounting practices... Through this analysis, the Investment Manager will seek to select companies with good governance practices, while avoiding companies with the worst practices, ESG-rated CCC or B, as well as companies involved in controversies.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

At least 70% of net assets of this Sub-Fund are aligned with the environmental and social characteristics promoted by the strategy, including at least 5% invested in a mix of environmentally and/or socially sustainable investments, depending on investment opportunities.

Other investments may include investments that do not participate in attaining the environmental and social characteristics promoted by the strategy, for diversification purposes. As minimum safeguards, however, all issuers are screened to exclude breaches of international norms. Other investments also include cash for liquidity and risk management purposes as well as derivatives, as described in the prospectus. Such derivatives may be used for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%..

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 5% sustainable investments at all times. This minimum share of 5% will be split between the following three buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 5% and, jointly and in aggregate, hold a minimum of 5% in sustainable investments at all times.

Investments in environmentally sustainable investments may include investments in corporates of good governance, which do no harm and contribute positively to the fight against climate change (e.g. renewable energy, green building...), but which are not subject to EU requirement for reporting on their potential taxonomy alignment. It may also include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation, as well as investments in green/sustainability bonds not issued under the EU Green Bond standard

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 5% sustainable investments at all times. This minimum share of 5% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 5% and, jointly and in aggregate, hold a minimum of 5% in sustainable investments at all times.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other investments may include:

- a limited portion of bonds issued by issuers not covered by internal or external ESG analysis.
- cash for liquidity and risk management purposes. While there are no minimum environmental or social safeguards on cash holdings, these are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.
- derivatives for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

NO

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EM RESPONSIBLE LOCAL BOND
Legal entity identifier: O00000869_000000145

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund aims to deliver performance by investing in bonds issued primarily by emerging market (EM) sovereign and supranational issuers denominated in local currencies, while offering a greater overall Environmental, Social and Governance (ESG) quality than the EM sovereign local bond universe, as measured by the JP Morgan ESG GBI-EM Global Diversified Index. The analysis takes into account the extent to which a sovereign has developed robust ESG policies and demonstrated a strong track record of performance in managing its specific level of ESG risks or opportunities.

The reference index is not aligned with the E and S characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The overall ESG quality is measured using MSCI ESG Research “ESG Quality Score”. This indicator measures the ability of underlying holdings to manage key medium to long term risks and opportunities arising from environmental, social, and governance factors. It calculates each sovereign’s exposure to key ESG risks. The analysis takes into account the extent to which a sovereign has developed robust policies and demonstrated a strong track record of performance in managing its specific level of risks or opportunities.

The Investment Manager also uses the following PAI to measure the promotion of the Social characteristics:

- Number of Investee Countries subject to Social Violations

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Sub-Fund aims to invest in green, social and sustainability bonds of issuers whose activities contribute to the environment or the society, such as but not limited to:

on the environmental side:

- climate change mitigation and adaptation
- the sustainable use and protection of water and marine resources
- pollution prevention and control
- the protection and restoration of biodiversity and ecosystems.

on the social side:

- human capital
- education
- health levels

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether the issuers of these bonds do no harm through internally-designed methodologies which cover principal adverse impact, controversies and overall ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Issuers having a share of their revenues contributing to a sustainable environmental or social objective, or issuing green/social/sustainability types of bonds, are assessed to check that they do not cause severe adverse impact, provided that data is available and sufficient to make an informative decision.

Some PAI considerations are taken into account at the overall fund level through for instance the exclusion of sovereigns subject to social violations which include but not limited to those in breach of international treaties and conventions, United Nations principles and, where applicable, national law (PAI 16) or the exclusion of corporate issuers involved in controversial weapons (PAI 14).

The Investment Managers also considers other specific criteria depending on the PAI, for example a corporate issuer that affects biodiversity would not be considered as a sustainable investment. The Investment Manager relies on well recognised external data providers for PAI information.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

The Investment Manager's supranational/corporate sustainable investments go through a norms-based screening (e.g. compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights) as well as excluding issuers with breaches as identified by MSCI's Red Overall Controversy Flags which signal very severe controversies in at least one of the following areas: Environmental, Social, Governance, Human Rights and Labour Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager seeks to assess the principal potential adverse impacts of its sovereign and supranational sustainable investments, such as social violations, by for instance avoiding oppressive regimes, as defined as having a Freedom House score below 7, as well as to limit the main potential adverse impact of its corporate sustainable investments primarily through its norms-based screening (e.g. compliance with the OECD Guidelines for Multinational Enterprises, the UN Global Compact...). The Investment Manager may seek to assess other potential adverse impacts. This may be, however, hindered by the limited availability of data for certain indicators, given the nature of investments in emerging markets.

The Investment Manager considers the following PAIs:

- Sovereign PAI 16 (Table I): investee countries subject to social violations which are highlighted by an external data provider. This is also considered through the exclusion of countries that score below 20 in the Investment Manager's ESG model.
- Corporate PAI 10 (Table 1): Compliance with UN Global Compact and OCED Guidelines for Multinational Enterprises: issuers in breach of international norms as assessed by MSCI ESG Research (red controversy flag) are excluded
- Corporate PAI: 14 (Table 1): Companies exposed to controversial weapons. are excluded

What investment strategy does this financial product follow?

This Sub-Fund investment strategy relies on ESG, credit and macroeconomic assessment in order to combine a financial risk-adjusted performance in line or above that of the EM sovereign bond market over the investment horizon, with ESG characteristics better than its reference index. The investment process includes ESG analysis which combines internal and external research conducted by a variety of ESG data providers including, but not limited to, MSCI ESG Research, RepRisk as well as recognised organisations like the World Bank, Transparency International or Freedom House. In particular, the Investment Manager has developed a proprietary ESG sovereign scoring model, which combines historical ESG data and forward-looking sentiment to rank countries in terms of their relative ESG quality.

The model considers a large array of ESG factors, such as a sovereign's human rights record, government stability or its policy response to climate change. The Investment Manager pays particular attention to governance factors, as the Investment Manager believes that they have the greatest potential impact on a country's ability to implement robust environmental policies and achieve favourable social outcomes. The model looks to produce an ESG score that does not penalise poorer issuers for their earlier stage of economic development. This model is complemented by internal forward-looking assessment which allows us to reflect more recent changes in policies that may influence ESG quality. The resulting ESG scores are normalized on a scale from 0 to 100, with the worst-performing country receiving a score of 0 and the best-performing country scoring 100. The ESG scores are reviewed quarterly.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The investment process includes a first phase of investment universe filtering and a second phase of ESG integration in bottom-up research and portfolio construction.

In order to ensure the promotion of environmental and social characteristics, this Sub-Fund has a minimum 20% allocation to bonds denominated in EM or Frontier local currencies which are:

- either sustainability-focused bonds such as, but not limited to, Social, Green, Sustainable or Blue bonds issued by supranational, EM sovereign or EM corporate issuers
- or issued by supranational agencies, international organisations or development banks such as, but not limited to, the World Bank, the IFC or the EBRD which help finance sustainable development in emerging countries.

These investments help finance certain Environmental or Social goals, such as but not limited to projects designed to mitigate climate change, gender equality or the promotion of female education.

This Sub-Fund will promote in particular social characteristics and aims to have a Social score higher than its index. This social score, measured by MSCI, covers for sovereign issuers matters such as human capital, education, gender inequality, health levels, labour freedom, quality of infrastructure...all aspects that are essential for the development of emerging countries. For Corporate issuers, the social score considers matters such as employees well-being, health and safety, supply chain labour standards.

Sovereign issuers are excluded if:

- o they have an ESG score, as calculated by the Investment Managers's internal model which puts them in the bottom 33% of countries in the investment universe.

Currencies in this category can only be invested via labelled bonds (social, green, sustainability,...) or supranationals

- o they are identified as oppressive regimes, as recognised by a Global Freedom Score of 7 or below by Freedom House.
- o they are on international sanction lists such as, but not limited to, those of the EU, UN, OFAC...

Corporate and other quasi-sovereign issuers are excluded if:

- (i) their MSCI ESG Rating is B or CCC.
- (ii) they bear a Red Controversy Flag by MSCI ESG Research, that is they are identified as in breach of international norms and principles, such as, but not limited to, the UN Global Compact, ILO...
- (iii) they are involved in controversial weapons and other contentious business activities as defined in UBP' Responsible Investment policy (e.g. tobacco, coal... revenue thresholds may apply).

If a corporate or quasi-sovereign issuer's MSCI ESG rating is downgraded below BB, the Investment Manager has to adjust the portfolio, in the best interest of shareholders.

In addition ESG analysis covers at least 90% of the Sub-Fund's portfolio

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

The ESG selectivity process leads to a reduction of the investment universe of at least 20%.

● ***What is the policy to assess good governance practices of the investee companies?***

For the small share of emerging market corporate/quasi-sovereign bond investments, the Investment Manager's assessment of governance is fully integrated in the Investment Manager's ESG and credit analysis. It is based on internal research, which relies on company reports, information provided by other sources such as external ESG data providers, brokers or credit rating agencies... Governance matters are also included in the ESG questionnaire developed by the Investment Manager and which may form the basis for direct engagement. The analysis covers matters such as, but not limited to, ownership structure, Board independence, Board diversity, compliance and anti-corruption policies, whistleblower provisions, potential controversies around matters of bribery or accounting practices... Through this analysis, the Investment Manager will seek to select companies with good governance practices, while avoiding companies with the worst practices, ESG-rated CCC or B, as well as companies involved in controversies (red-flagged by MSCI ESG Research).

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund will invest at least 70% of its assets in bonds from sovereign or, to a lesser extent, corporate and quasi-sovereign issuers that are aligned with the environmental or social characteristics of this Sub-Fund, including at least 5% invested in a mix of environmentally and/or socially sustainable investments, depending on investment opportunities.

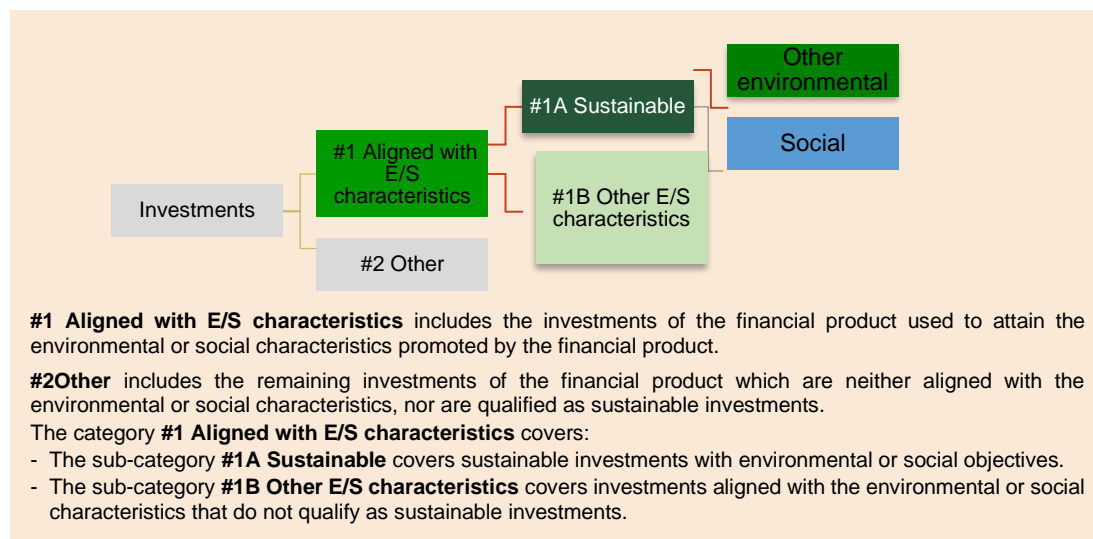

While this Sub-Fund seeks to attain certain environmental and social characteristics, it also carries a financial performance objective. For that purpose, this Sub-Fund may invest a small proportion of its assets in bonds issued by issuers not aligned with the E and S characteristics promoted, for diversification purposes. However, to ensure minimum environmental or social safeguards, all sovereign and corporate issuers have to respect a series of eligibility criteria as described above.

Other investments may also include exposure to sovereign issuers via currency derivative instruments or via a Credit Default Swaps, which are only allowed if the country satisfies the ESG criteria set above.

Finally, other investments also include cash for liquidity and risk management purposes as well as derivatives, as described in the prospectus. Such derivatives may be used for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 5% sustainable investments at all times. This minimum share of 5% will be split between the two following buckets: other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 5% and, jointly and in aggregate, hold a minimum of 5% in sustainable investments at all times. These investments may include investments in sovereign, supranational, corporate green and sustainability linked bonds not issued under the EU green standard. These may include investments in issuers of good governance, which do no harm and contribute positively to the fight against climate change (e.g. renewable energy, green building...), but which are not subject to EU requirement for reporting on their potential taxonomy alignment. It may also include investments in issuers of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation.

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 5% sustainable investments at all times. This will be split between the two following buckets: other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 5% and, jointly and in aggregate, hold a minimum of 5% in sustainable investments at all times.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other investments may include:

- a small proportion of bonds issued by issuers not covered by ESG analysis.
- cash for liquidity and risk management purposes. While there are no minimum environmental or social safeguards on cash holdings, these are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.
- interest rate and FX derivatives

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EM RESPONSIBLE SOVEREIGN BOND
Legal entity identifier: O00000869_000000112

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund aims to deliver performance by investing in bonds issued primarily by emerging market (EM) sovereign issuers while offering a greater overall Environmental, Social and Governance (ESG) quality than the EM sovereign bond universe, as measured by the JP Morgan EMBI Global Diversified Index. The analysis takes into account the extent to which a sovereign has developed robust ESG policies and demonstrated a strong track record of performance in managing its specific level of ESG risks or opportunities.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The overall ESG quality is measured using MSCI ESG Research “ESG Quality Score”. This indicator measures the ability of underlying holdings to manage key medium to long term risks and opportunities arising from environmental, social, and governance factors. It calculates each sovereign’s exposure to key ESG risks.

The Investment Manager also use the following PAI to measure the E and S attainment:

- Number of Investee Countries subject to Social Violations

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Sub-Fund aims to invest in green, social and sustainability bonds of issuers whose activities contribute to the environment or the society, such as but not limited to:

on the environmental side:

- climate change mitigation and adptation
- the sustainable use and protection of water and marine resources
- pollution prevention and control
- the protection and restoration of biodiversity and ecosystems.

on the social side:

- human capital
- education
- health levels

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether the issuers of these bonds do no harm through internally-designed methodologies which cover principal adverse impact, controversies, misalignment with SDGs and overall ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

To ensure minimum environmental or social safeguards, sovereign and corporate issuers have to respect a series of eligibility criteria as described above (including for instance a Freedom Score, which combines both political rights and civil liberties, above 7 for a sovereign issuer, or, for a corporate issuer, compliance with international norms). In the latter case, severe breaches are identified by MSCI’s Red Overall Controversy Flags which signal severe controversies in at least one of the following areas: Environmental, Social, Governance, Human Rights and Labour Rights. Issuers carrying such Red flags are excluded.

Some PAI considerations are taken into account at the overall Sub-Fund level through for instance the exclusion of sovereigns subject to social violations as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI 16). And the Investment Managers also considers others set specific criteria depending on the PAI, for example a corporate issuer that affects biodiversity would not be considered as a sustainable investment.

The investment manager relies on well recognised external data providers for PAI information.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

The Investment Manager's corporate sustainable investments go through a norms-based screening (e.g. compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights) as well as excluding issuers with breaches as identified by MSCI's Red Overall Controversy Flags which signal very severe controversies in at least one of the following areas: Environmental, Social, Governance, Human Rights and Labour Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager considers the following PAIs:

- Sovereign PAI 16 (Table I): investee countries subject to social violations which are highlighted by an external data provider. This is also considered through the exclusion of countries that score below 20 in the Investment Manager's ESG model.
- Corporate PAI 10: corporate issuers in breach of international norms, such as the UN Global Compact and the OECD Guidelines for Multinational Enterprises are excluded
- Corporate PAI 14: Corporate issuers involved in controversial weapons are excluded

What investment strategy does this financial product follow?

This Sub-Fund investment strategy relies on ESG, credit and macroeconomic assessment in order to combine a financial risk-adjusted performance in line or above that of the EM sovereign bond market over the investment horizon, with ESG characteristics better than its reference index. The investment process includes ESG analysis which combines internal and external research conducted by a variety of ESG data providers including, but not limited to, MSCI ESG Research, RepRisk as well as recognised organisations like the World Bank, Transparency International or Freedom House. In particular, the Investment Manager has developed a proprietary ESG sovereign scoring model, which combines historical ESG data and forward-looking sentiment to rank countries in terms of their relative ESG quality.

The model considers a large array of ESG factors, such as a sovereign's human rights record, government stability or its policy response to climate change. The Investment Manager pay particular attention to governance factors, as the Investment Manager believes that they have the greatest potential impact on a country's ability to implement robust environmental policies and achieve favourable social outcomes. The model looks to produce an ESG score that does not penalise poorer issuers for their earlier stage of economic development. This model is complemented by internal forward-looking assessment which allows the Investment Manager to reflect more recent changes in policies that may influence ESG quality. The resulting ESG scores are normalized on a scale from 0 to 100, with the worst-performing country receiving a score of 0 and the best-performing country scoring 100. The ESG scores are reviewed quarterly.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The investment process includes a first phase of investment universe filtering and a second phase of ESG integration in bottom-up research and portfolio construction.

Sovereign issuers are excluded if:

- o they have an ESG score, as calculated by the Investment Managers's internal model, of 20 or below. In such case, the country remains excluded for at least six months.
- o they are identified as oppressive regimes, as recognised by a Global Freedom Score of 7 or below by Freedom House.

Corporate and Quasi-sovereigns

- 100% government-owned quasi-sovereign issuers are excluded due to the risk of lack of independent governance
- corporate and other quasi-sovereign issuers are excluded if:
 - their MSCI ESG Rating is B or CCC
 - they bear a Red Controversy Flag by MSCI ESG Research, that is they are identified as in breach of international norms and principles, such as, but not limited to, the UN Global Compact, ILO...
- o they are involved in controversial weapons and other contentious business activities as defined in UBP' Responsible Investment policy (e.g. tobacco, coal... revenue thresholds may apply).

If a sovereign's internal ESG score is downgraded to 20 or below, or if a corporate or quasi-sovereign issuer's MSCI ESG rating is downgraded below BB, the investment Manager has to adjust the portfolio, in the best interest of shareholders.

In addition ESG analysis covers at least 90% of the Sub-Fund's portfolio.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

The ESG selectivity process leads to a reduction of the investment universe of at least 20%.

Good governance
practices include
sound management
structures, employee
relations,
remuneration of staff
and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

For the small share of emerging market corporate/quasi-sovereign bond investments, the Investment Manager's assessment of governance is fully integrated in the Investment Manager's ESG and credit analysis. It is based on internal research, which relies on company reports, information provided by other sources such as external ESG data providers, brokers or credit rating agencies... Governance matters are also included in the ESG questionnaire developed by the Investment Manager and which may form the basis for direct engagement. The analysis covers matters such as, but not limited to, ownership structure, Board independence, Board diversity, compliance and anti-corruption policies, whistleblower provisions, potential controversies around matters of bribery or accounting practices... Through this analysis, the Investment Manager will seek to select companies with good governance practices, while avoiding companies with the worst practices, ESG-rated CCC or B, as well as companies involved in controversies (red-flagged by MSCI ESG Research).

Asset allocation
describes the share
of investments in
specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund will invest at least 70% of its assets in bonds from sovereign or, to a lesser extent, corporate and quasi-sovereign issuers that are aligned with the environmental or social characteristics of this Sub-Fund, including at least 5% invested in a mix of environmentally and/or socially sustainable investments, depending on investment opportunities.

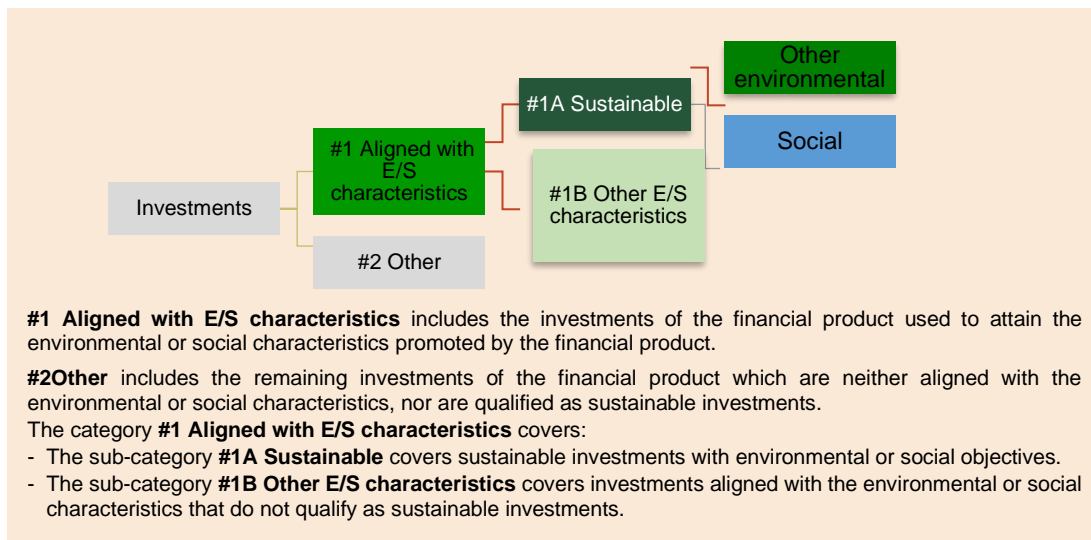

While this Sub-Fund seeks to attain certain environmental and social characteristics, it also carries a financial performance objective. For that purpose, this Sub-Fund may invest a small proportion of its assets in bonds issued by issuers not aligned with the E and S characteristics promoted, for diversification purposes. However, to ensure minimum environmental or social safeguards, all sovereign and corporate issuers have to respect a series of eligibility criteria as described above.

Other investments may also include exposure to sovereign issuers via currency derivative instruments or via a Credit Default Swaps, which are only allowed if the country satisfies the ESG criteria set above.

Finally, other investments also include cash for liquidity and risk management purposes as well as derivatives, as described in the prospectus. Such derivatives may be used for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 5% sustainable investments at all times. This minimum share of 5% will be split between the two following buckets: other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 5% and, jointly and in aggregate, hold a minimum of 5% in sustainable investments at all times. Sustainable Investments with an environmental objective that are not aligned to the EU Taxonomy may include investments in corporates of good governance, which do no harm and contribute positively to the fight against climate change (e.g. renewable energy, green building...), but which are not subject to EU requirement for reporting on their potential taxonomy alignment. It may also include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation. Finally, they may also include green or sustainability bonds not issued under the EU Green Bonds Standards.

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 5% sustainable investments at all times. This minimum share of 5% will be split between the two following buckets: other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 5% and, jointly and in aggregate, hold a minimum of 5% in sustainable investments at all times

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other investments may include:

- a small proportion of bonds issued by issuers not covered by ESG analysis.
- cash for liquidity and risk management purposes. While there are no minimum environmental or social safeguards on cash holdings, these are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.
- derivatives for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION
Legal entity identifier: O00000869_00000084

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund aims to have better environmental and social characteristics than the Emerging Market (EM) corporate bond universe, as measured by the JP Morgan Corporate EMBI Diversified index. This index is a standard reference representing the EM Corporate Bond Universe but is not aligned with the environmental and/or social characteristics promoted by this Sub-Fund.

These characteristics include better ESG practices, a lower carbon intensity and a greater respect of international norms such as the UN Global compact.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

To measure the attainment of each of the environmental and social characteristics promoted by this Sub-Fund, we consider the Sub-Fund's performance against its reference index on the following indicators:

- the overall ESG quality score
- the investee companies' weighted average carbon intensity

- the share of companies in breach of UN Global Compact and other international norms, as measured by MSCI red overall controversy flag

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ How have the indicators for adverse impacts on sustainability factors been taken into account?

N/A

↳ How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager seeks to limit the following potential adverse impacts of its investments:

- PAI 3: GHG intensity of investee companies. This is done by limiting exposure to high emitters, with the objective of maintaining the weighted average carbon intensity of the portfolio below that of the reference index. In particular, this Sub-Fund excludes companies involved in coal-intensive mining and electricity generation as well as in unconventional oil & gas (revenue thresholds apply). In addition, direct or collaborative engagement may be conducted to promote transparency and disclosure of carbon emissions as well as the adoption of more ambitious climate strategies, including science-based emission reduction targets.

- PAI 10: Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises. This is done by excluding companies identified as in breach of international norms

- PAI 14: Exposure to controversial weapons. This is done by excluding companies that develop, manufacture or sell controversial weapons, such as chemical and biological weapons, cluster munitions, landmines, incendiary weapons using white phosphorus, blinding laser weapons and depleted uranium weapons

What investment strategy does this financial product follow?

This Sub-Fund invests primarily in short duration bonds, denominated in hard currencies and issued by emerging market corporate issuers with sound ESG practices.

The investment strategy relies on credit and macroeconomic assessment, ESG analysis as well as on relative value. The ESG approach combines the filtering of the investment universe and the integration of environmental, social and governance considerations.

ESG considerations are notably integrated into the issuers' qualitative credit assessment conducted internally, as the Investment Manager believes, alongside rating agencies, that sound ESG credentials can help improve issuers' creditworthiness. To conduct this ESG analysis, the Investment Manager relies on different sources of information and data, including for instance companies' annual and/or sustainability reports, ad-hoc engagement with issuers, credit agencies' ESG review, as well as external ESG data and scoring providers.

This Sub-Fund aims to deliver financial performance, derived notably from the carry offered by short-dated emerging market bonds. For that purpose, some investments may be included that are not aligned with the E/S characteristics promoted by the Sub-Fund's investment policy.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

Issuers are excluded if:

- their MSCI ESG Rating is CCC
- they bear a Red Controversy Flag by MSCI ESG Research, that is they are identified as in breach of international norms and principles, such as, but not limited to, the UN Global Compact, ILO, the OECD Guidelines for Multinational Enterprises.
- they are involved in controversial weapons, tobacco production, adult entertainment production
- they are involved in other contentious business activities, where revenue thresholds apply, such as coal extraction, coal-powered electricity generation, unconventional oil & gas, weapons, other tobacco and adult entertainment activities

In addition, a maximum of 30% of the Sub-Fund can be invested in issuers with an MSCI ESG rating below BB.

ESG analysis, combining both internal and external ESG research, covers at least 90% of the Sub-Fund's portfolio.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

This Sub-Fund is primarily invested in emerging market corporate/quasi-sovereign bonds. Assessing Governance is thus essential and is fully integrated in the Investment Manager's ESG and credit analysis, as it can have a significant impact on a company's ability and willingness to pay back its debt. It is based on internal research, which relies on company reports, information provided by other sources such as external ESG data providers, brokers or credit rating agencies... Governance matters are also included in the ESG questionnaire developed by the Investment Manager and which forms the basis for direct engagement. The analysis covers matters such as, but not limited to, ownership structure, Board independence, Board diversity, compliance and anti-corruption policies, whistleblower provisions, potential controversies around matters of bribery or accounting practices... Through this analysis, the Investment Manager will seek to select companies with good governance practices, while avoiding companies with the worst practices, ESG-rated CCC, as well as companies involved in controversies.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund invests at least 60% of its assets in bonds from corporate/quasi-sovereign or, to a lesser extent, sovereign issuers, that are aligned with the environmental and social characteristics promoted by the strategy.

Other investments may include investments that do not participate in attaining the environmental and social characteristics promoted by the strategy, for diversification purposes. As minimum safeguards, however, all issuers are screened to exclude any breaches of international norms. Other investments also include cash for liquidity and risk management purposes as well as derivatives, as described in the prospectus. Such derivatives may be used for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk, or adding EM credit market exposure... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other investments may include:

- bonds issued by issuers not covered by ESG analysis.
- cash for liquidity and risk management purposes. While there are no minimum environmental or social safeguards on cash holdings, these are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.
- derivatives for different purposes such as, but not limited to, duration management, currency hedging, hedging of country risk... While there are no minimum environmental or social safeguards on these instruments, they are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

NO

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EURO BOND
Legal entity identifier: O00000869_00000043

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective**: %
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective**: %

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as described in below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider indicators applicable only to investments in sovereigns.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

This Sub-Fund denominated in EUR and which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities.

This Sub-Fund is allowed to invest without limits in currencies other than its base currency (EUR). The currency risk is limited to 10% of the net assets of the Sub-Fund. This Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (EUR) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (EUR).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics:

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- ☐ External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- ☐ A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for Green and Sustainability bonds with environmental objectives. The preference for Green and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

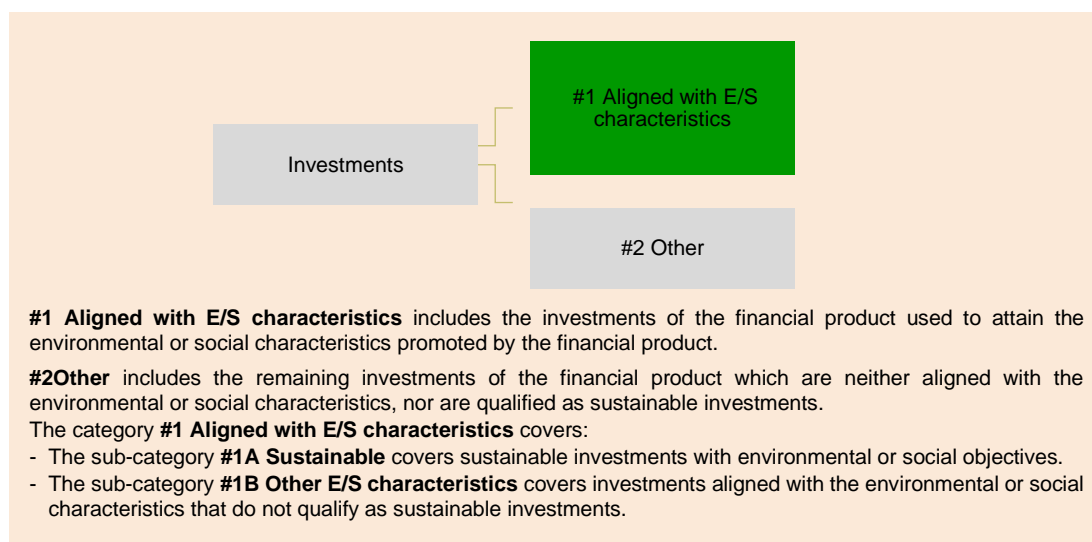

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product***

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What is the minimum share of investments in transitional and enabling activities?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EURO CORPORATE IG SOLUTION
Legal entity identifier: O00000869_000000116

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☒ ☐ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably investment grade CDS indices, are out of scope as described below. Thus, the environmental and social characteristics promoted encompass the interest rate exposure of this Sub-Fund but not the investment-grade credit allocation of this Sub-Fund which is built via CDS indices.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as described in below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in the Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

This Sub-Fund intends to invest a minimum of 10% of its investment in green bonds or sustainability bonds with environmental objectives ("Green Bonds"). Green bonds enable capital-raising and investment for new and existing projects with environmental benefits.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure that sustainable investments this Sub-Fund partially intends to make not cause significant harm, this Sub-Fund will i) at the security level: invest in Green Bonds (green bonds and sustainability bonds with environmental objectives) where the proceeds is targeted to environmental purposes as defined in the prospectus and ii) at the issuer level: assess whether companies do no significant harm through an internal methodology which covers principal adverse impact indicators, controversies and the ESG opinion of the Investment Manager on those companies.

This Sub-Fund will invest in green bonds from sovereigns, supranationals or agencies.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

This Sub-Fund intends to partially make investment in sustainable investments with a minimum of 10%. Those investments will be made in green bonds or sustainability bonds with environmental objectives ("Green Bonds") from sovereign, supranational and agency issuers.

Those Green Bond issuers are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

This Sub-Fund will consider the principal adverse impact for sovereign issuers:

* Environment: GHG intensity

* Social: Investee countries subject to violations

The indicators will be taken into account to the extent that this Sub-Fund will exclude countries with severe ESG deficiencies as described in below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

↳ How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details

N/A. This Sub-Fund sustainable investments will be in sovereign, supranational or agency bonds.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider those PAIS only to investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the investment-grade market is not incorporated in the consideration of principal adverse impact on sustainability factors.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

The objective of this Sub-Fund is to offer optimized and actively managed investment grade market exposure. To this end this Sub-Fund which is denominated in EUR, invests its net assets primarily in investment grade bonds, money market Instruments, term deposit, and derivatives.

Exposure to fixed income will for a substantial part be synthetic through derivatives, in particular futures for interest rate exposure and CDS for credit exposure, as well as but not limited to, swaps and options denominated in any OECD currencies. Derivative implementation, used to efficiently gain exposure to investment markets, will be at the Investment Manager discretion and can be up to 100% of the Sub-Fund's exposure.

The overall portfolio will have a minimum modified duration of 2 years.

The net assets (excluding those used for the investment in derivatives) can be invested in term deposits with a maturity up to 12 months.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds and money market instruments including deposits will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed market issuers and equal or superior to BB for emerging market issuers. In the absence of an MSCI or equivalent data provider rating, an internal rating may be assigned by the Investment Manager. The derivative exposure implemented by this Sub-Fund to gain exposure to the Investment Grade market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars. The below only applies to bonds. The derivative exposure in the Sub-Fund implemented to gain exposure to the Investment Grade market falls out of the scope of the ESG strategy.:

- Exclusions applicable to the Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from the Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence.
- ESG integration. ESG integration is implemented on sovereign issuers through a two-step process:
 - External data sources provide informations to an internal model to build a quantitative scoring system for each sovereign issuer
 - A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe.

Preference for green bonds. This Sub-Fund has an objective of a minimum 10% allocation to sustainable investments with environmental objectives. This allocation will be via green bonds.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

The above only applies to the allocation to bonds in this Sub-Fund.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

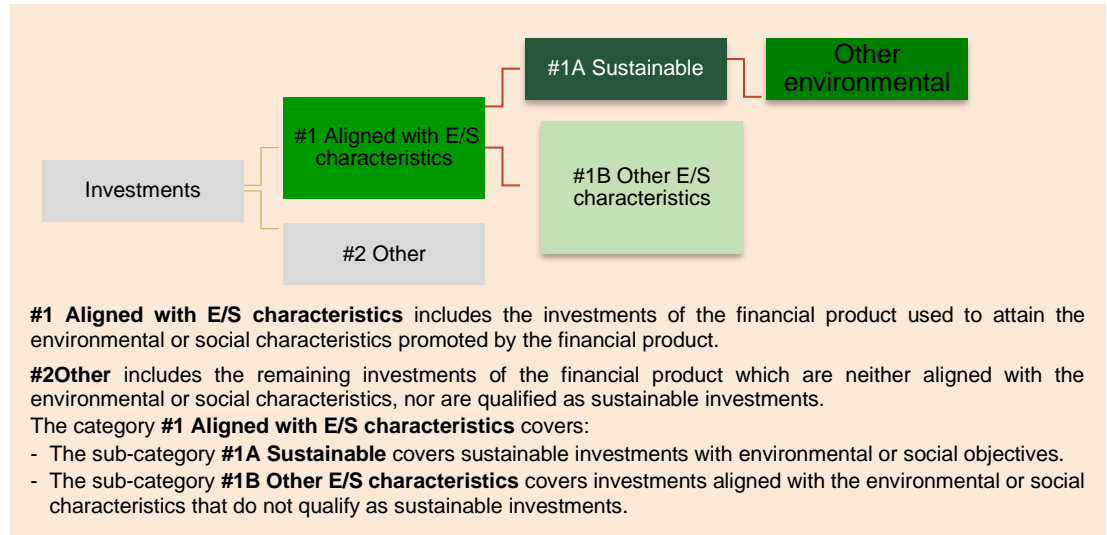

What is the asset allocation planned for this financial product

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics and a minimum of 10% in sustainable investments with an environmental objective.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

0%. This Sub-Fund will invest in EU green bonds - that will be Taxonomy aligned - when EU green bonds are actually issued and available for this Sub-Fund.

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Derivatives will be implemented in this Sub-Fund to gain access to the investment-grade market. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also be bonds. In that case, the bond investments include safeguards to the extent that the binding elements described above also apply to them.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EURO HIGH YIELD SOLUTION
Legal entity identifier: O00000869_000000106

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably high-yield CDS indices, are out of scope as described below. Thus, the environmental and social characteristics promoted encompass the interest rate exposure of this Sub-Fund but not the high-yield credit allocation of this Sub-Fund which is built via CDS indices.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as mentioned below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider those PAIS only to investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market is not incorporated in the consideration of principal adverse impact on sustainability factors.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

This Sub-Fund actively managed denominated in EUR which invests its net assets primarily in sovereign and quasi- sovereign debt securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps). The Investment Manager will use several types of CDS among others but not limited to MARKIT iTraxx Xover index (for a minimum of 80% of the net assets) and the MARKIT CDX.NA.HY Index (between -20% and +20% of the net assets).

Further information on MARKIT CDX.NA.HY index and MARKIT iTraxx Xover index, who are rebalanced every 6 months, are available on Markit's website:

<http://www.markit.com/Documentation/Product/iTraxx> for iTraxx indices and

<http://www.markit.com/Documentation/Product/CDX> for CDX indices.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for emerging market issuers. In the absence of a rating from MSCI or equivalent data providers, an internal rating may be assigned by the Investment Manager. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from

this Sub-Fund, as well as investments in FATF “high-risk countries”, while any investment in FATF “jurisdictions under increased monitoring” are subject to due diligence and approval.

- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for green bonds and sustainability bonds with environmental objectives ("Green Bonds"). The preference for Green Bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

The above only applies to the allocation to bonds in this Sub-Fund.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

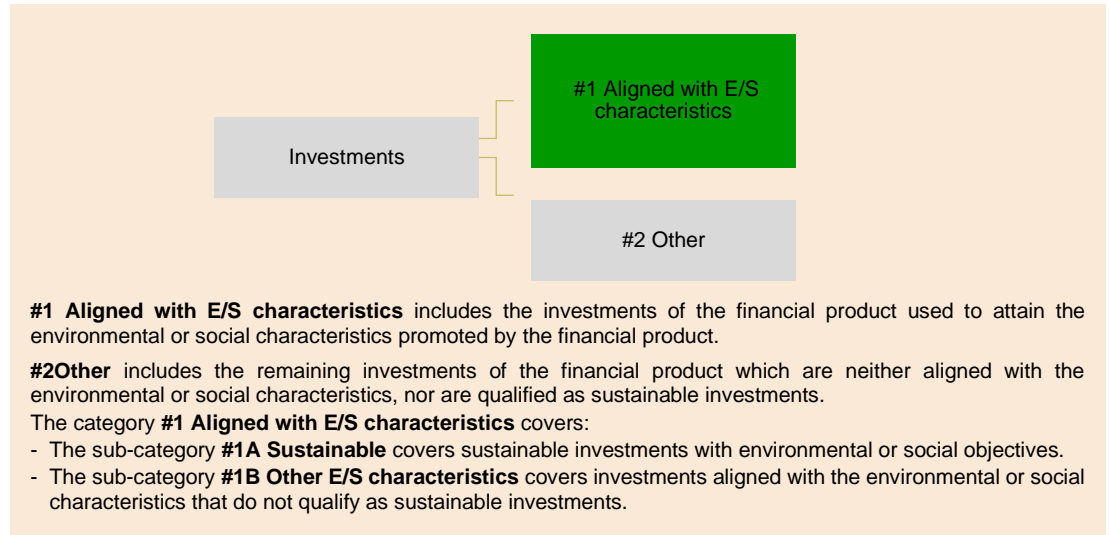

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

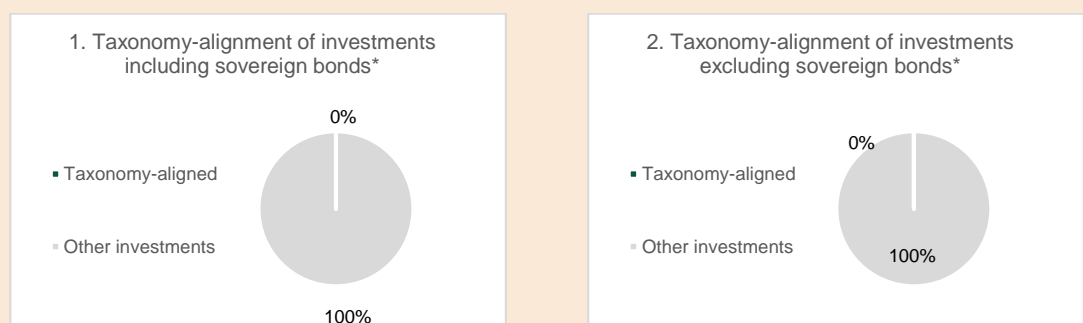

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - STRATEGIC INCOME
Legal entity identifier: O00000869_00000150

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes social characteristics by supporting the ten principles of the United Nations Global Compact through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

This Sub-Fund promotes environmental characteristics by supporting transparent policies of corporate bond issuers towards a net-zero emission path.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used to assess the environmental characteristic is the percentage of corporate bond issuers in this Sub-Fund with a net-zero emission plan.

The sustainability indicator used to assess social characteristic is breach to United Nations Global Compact (UNGC).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

* 1. GHG emissions (Scope 1, 2, and 3 where available)

* 2. Carbon footprint

* 3. GHG intensity of investee companies

Waste:

* 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund actively managed denominated in USD and which invests its net assets primarily in global credit markets with a credit rating of B+ (S&P or FITCH), B1 (Moody's) or above.

This Sub-Fund is actively managed and as a result its asset allocation and upon the discretion of the Investment Manager can vary within the following limits. This Sub-Fund may invest up to:

- 100% of its net assets in High Yield securities
- 100% of its net assets in Investment Grade securities
- 50 % of its net assets in Emerging countries
- 20% of its net assets in Contingent Convertible Bonds (Cocos)
- 20% of its net assets in asset backed securities (ABS)
- 10% of its net assets in equity, including equity derivatives

The Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the RISK FACTORS chapter of the Sub-Fund's prospectus

At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities, including derivatives such as but not limited to futures, options, swaps and credit default swaps.

The Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD). The currency risk is limited to 20% of the net assets of the Sub-Fund. The Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via derivatives such as but not limited to Forex Forwards), or by not hedging investments in currencies other than the base currency (USD).

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of this Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Investments

#1 Aligned with E/S characteristics

#2 Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

N/A

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

N/A

- **How does the designated index differ from a relevant broad market index?**

N/A

- **Where can the methodology used for the calculation of the designated index be found?**

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL AGGREGATE BOND
Legal entity identifier: O00000869_00000044

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes social characteristics by supporting the ten principles of the United Nations Global Compact through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

This Sub-Fund promotes environmental characteristics by supporting transparent policies of corporate bond issuers towards a net-zero emission path.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used to assess the environmental characteristic is the percentage of corporate bond issuers in this Sub-Fund with a net-zero emission plan.

The sustainability indicator used to assess social characteristic is breach to United Nations Global Compact (UNGC).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

- * 1. GHG emissions (Scope 1, 2, and 3 where available)
- * 2. Carbon footprint
- * 3. GHG intensity of investee companies

Waste:

- * 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund denominated in USD and which invests its net assets in securities denominated in multiple currencies, primarily in USD, EUR, JPY, GBP and CHF. At any time, this Sub-Fund invests a majority of its net assets in international bonds and other debt securities issued by sovereign / quasi sovereign issuers or other companies.

This Sub-Fund will invest primarily in Investment Grade bonds and:

- up to 40% of its net assets in high yield products;
- up to 35% of its net assets in transferable securities of Emerging countries,
- up to 20% of its net assets in Contingent Convertible bonds,
- up to 20% of its net assets in asset backed securities (ABS)
- up to 10% of its net assets in equity, including equity derivatives.

Emerging countries part may include investments in China through Bond Connect up to the Emerging countries limit above. Please refer to the related risks in the "[RISK FACTORS](#)" chapter of this prospectus

This Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD) and also those that are not included in its benchmark, the Bloomberg Barclays Global Aggregate Index. The currency exposure may differ from that of its benchmark, Bloomberg Barclays Global Aggregate Index by up to 30%. This Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (USD).

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

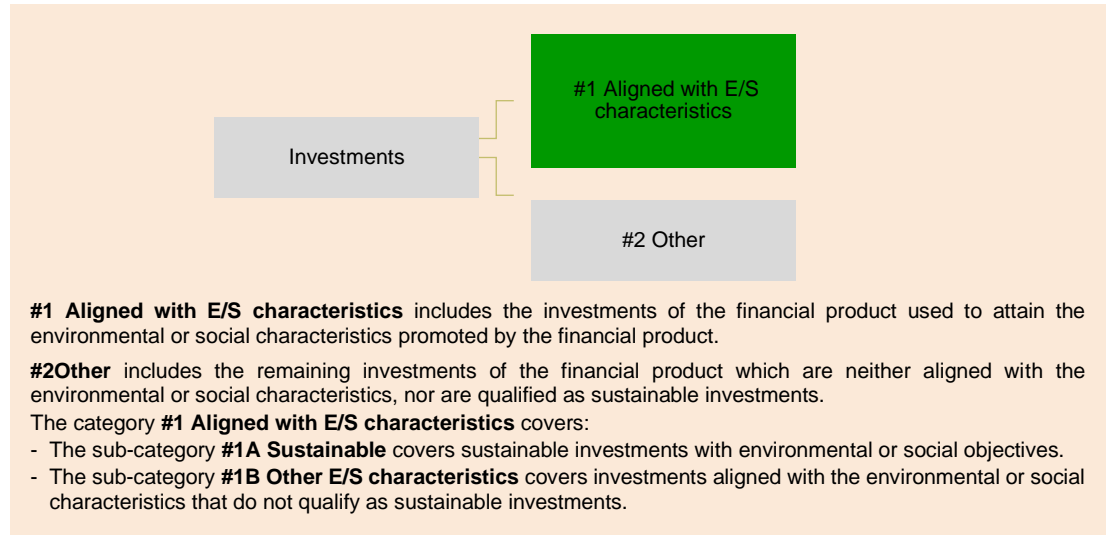

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL HIGH YIELD SOLUTION
Legal entity identifier: O00000869_000000078

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably high-yield CDS indices, are out of scope as described below. Thus, the environmental and social characteristics promoted encompass the interest rate exposure of this Sub-Fund but not the high-yield credit allocation of this Sub-Fund which is built via CDS indices.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider those PAIS only to investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market is not incorporated in the consideration of principal adverse impact on sustainability factors.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

This Sub-Fund actively managed denominated in USD which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for emerging market issuers. In the absence of a rating from MSCI or equivalent data providers, an internal rating may be assigned by the Investment Manager. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for green bonds and sustainability bonds with environmental objectives ("Green Bonds"). The preference for Green Bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis. The investment universe for Green Bonds as targeted by this Sub-Fund is currently limited. This Sub-Fund ambitions to increase its allocation to Green Bonds to 10% on a best effort basis should the depth of the market increase over time.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

The above only applies to the allocation to bonds in this Sub-Fund.

Good governance
practices include
sound management
structures, employee
relations,
remuneration of staff
and tax compliance.

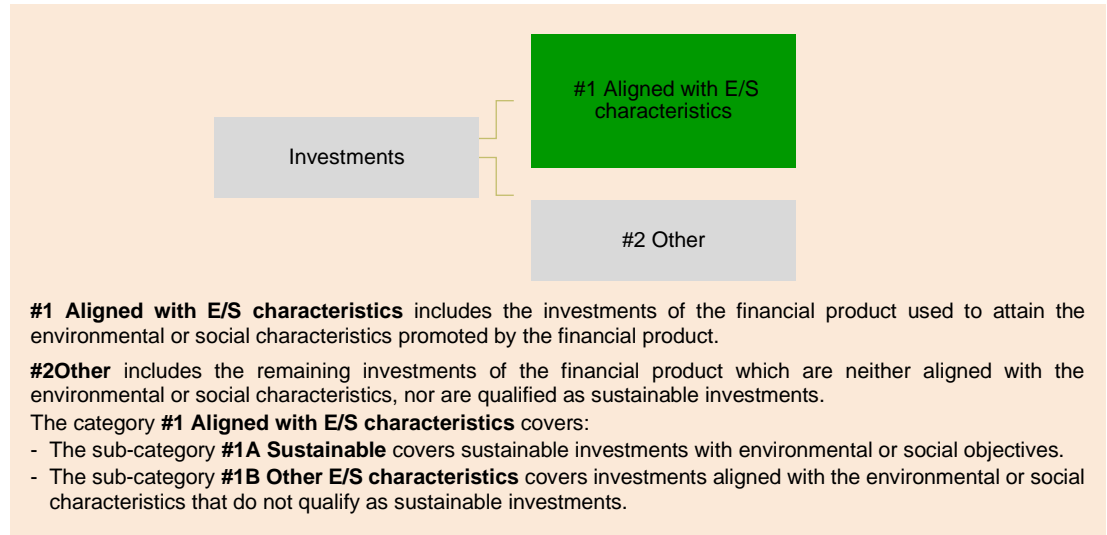

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL HIGH YIELD SOLUTION EXTENDED DURATION
Legal entity identifier: O00000869_000000136

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☐ ☒ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably high-yield CDS indices, are out of scope as described in below. Thus, the environmental and social characteristics promoted encompass the interest rate exposure of this Sub-Fund but not the high-yield credit allocation of this Sub-Fund which is built via CDS indices.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider those PAIS only to investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market is not incorporated in the consideration of principal adverse impact on sustainability factors.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

This Sub-Fund actively managed denominated in USD which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps) within the framework of effective management of the portfolio.

Its interest rate exposure (duration) will be between 2.5 and 5.5 years.

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for emerging market issuers. In the absence of a rating from MSCI or equivalent data providers, an internal rating may be assigned by the Investment Manager. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.

- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for green bonds and sustainability bonds with environmental objectives ("Green Bonds"). The preference for Green Bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

The above only applies to the allocation to bonds in this Sub-Fund.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

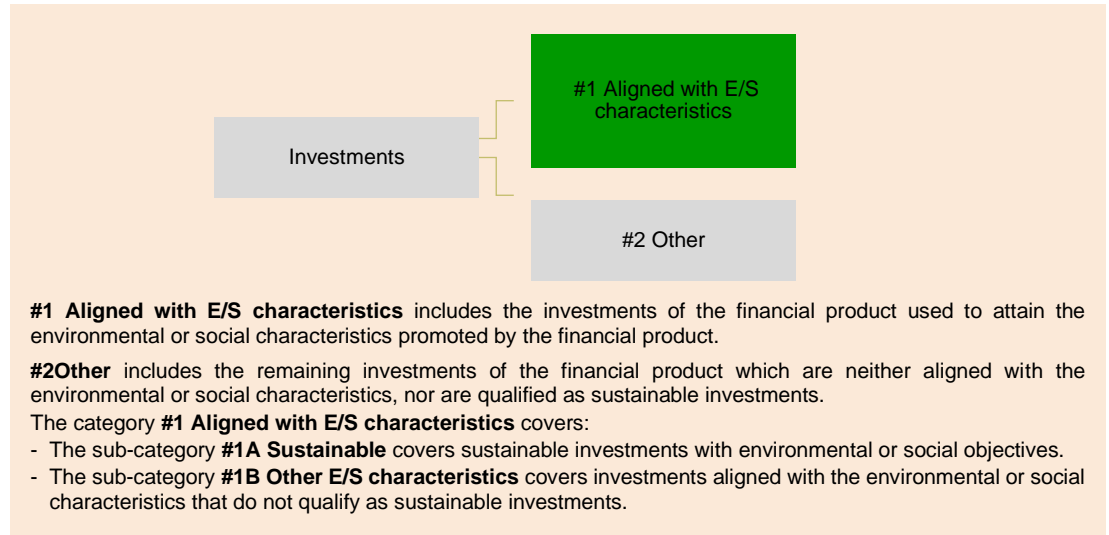

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Derivatives will be implemented in this Sub-Fund to gain access to the high-yield market. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - HYBRID BOND
Legal entity identifier: O00000869_00000121

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes social characteristics by supporting the ten principles of the United Nations Global Compact through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

This Sub-Fund promotes environmental characteristics by supporting transparent policies of corporate bond issuers towards a net-zero emission path.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used to assess the environmental characteristic is the percentage of corporate bond issuers in this Sub-Fund with a net-zero emission plan.

The sustainability indicator used to assess social characteristic is breach to United Nations Global Compact (UNGC).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ How have the indicators for adverse impacts on sustainability factors been taken into account?

N/A

↳ How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

* 1. GHG emissions (Scope 1, 2, and 3 where available)

* 2. Carbon footprint

* 3. GHG intensity of investee companies

Waste:

* 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund denominated in USD which invests its net assets primarily in worldwide hybrid securities.

This Sub-Fund will invest in:

- CoCos, i.e. Contingent Convertible bonds with specific loss-absorbing mechanisms like permanent write-down, temporary write-down or conversion into equity up to 100%
- hybrid securities such as financial and non-financial subordinated debt up to 100%
- High Yield up to 100%
- emerging markets up to 30%
- equity, including equity derivatives up to 10%

CoCos will have a minimum rating of B- (or equivalent), and be issued by banks whose parent company has a minimum balance sheet of USD 100 billion and whose parent company is domiciled in a country having a minimum rating of BB- (or equivalent).

This Sub-Fund may invest in financial derivative instruments for hedging and investment purposes. Derivatives may include (but are not limited to)

- Interest rate futures to manage the overall interest rate exposure
- CDS single name or CDS indices to allocate to or to hedge different segments of the credit markets
- Equity derivatives (up to 10%) to allocate (or to hedge) the junior part of the capital structure.

The Emerging Market part may include investment in China through Bond Connect. Please refer to the related risks in the RISK FACTORS chapter of the Sub-Fund's prospectus

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of this Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

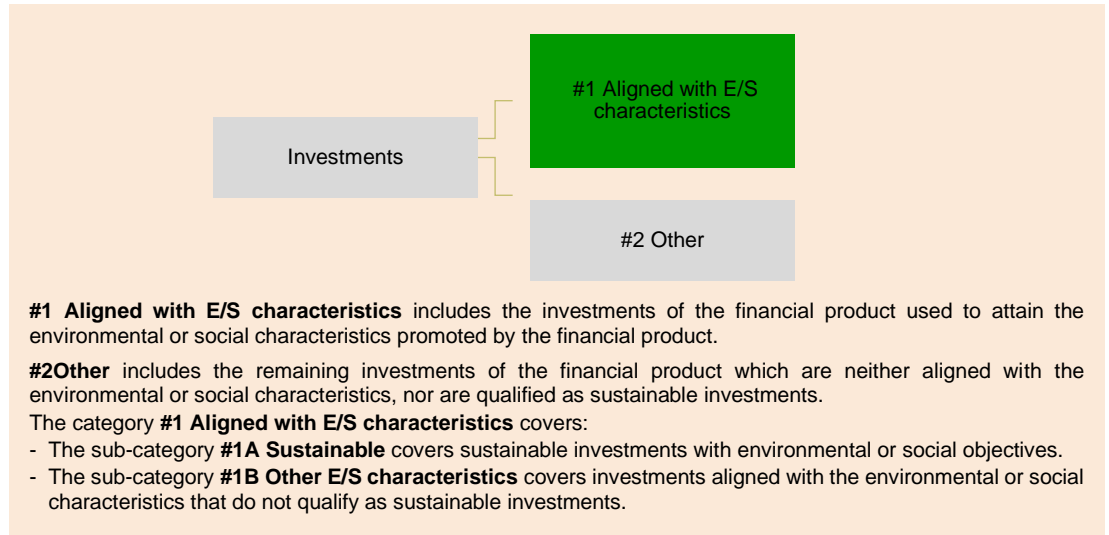

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund:

Climate and other environment-related indicators.

Green gas emissions

- * 1. GHG emissions (Scope 1, 2, and 3 where available)
- * 2. Carbon footprint
- * 3. GHG intensity of investee companies

Waste:

- * 9. Hazardous waste and radioactive waste rate

This Sub-Fund considers the above climate and other environment-related PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics.

Social and employee, respect for human rights, anti-corruption and anti-bribery matters.

Social and employee matters:

- * 10. Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises: Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
- * 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Share of investments in investee companies involved in the manufacture or selling of controversial weapons

This Sub-Fund will not invest in corporate bond issuers that are embroiled in controversies, such as not adhering to international norms and principles including the UN Global Compact (UNGC), the OECD Guidelines for Multinational Enterprises or International Labour Organization (ILO) conventions as monitored by the UBP's Responsible Investment Committee.

What investment strategy does this financial product follow?

This Sub-Fund denominated in USD and which invests its net assets primarily in bonds denominated in this currency issued by companies ("corporate bonds") with a minimum rating of BBB- (Standard and Poor's or Fitch) or Baa3 (Moody's) and, up to 20% of its net assets in Contingent Convertible bonds with a minimum rating of B- (Standard and Poor's or Fitch) or B3 (Moody's) .

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

This Sub-Fund is actively managed and aims to outperform the ICE BofAML 1-10 Year US Large CAP Corporate Index with an average maturity of circa 5 years (the Index). This Index is representative of the investment universe and of the risk profile of the Sub-Fund. This Sub-Fund is expected to deliver comparable returns to the Index over time. Even if the Sub-Fund portfolio's securities will mainly correspond to those of the Index, the Investment Manager may invest at its discretion in issuers, sectors and countries not included in the Index and/or deviate materially from the Index composition in term of countries, sectors, issuers, instruments etc... in order to take advantage of specific investment opportunities. This deviation of the constituents can lead to a deviation of the Sub-Fund's performance compared to the Index performance.

As an exception to the general rule applicable to bond Sub-Funds, this Sub-Fund may invest up to 30% of its net assets in transferable securities of Emerging countries.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of the Sub-Fund's allocation to bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers.

E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the Investment Manager.

The ESG investment strategy is based on three pillars that are binding elements in the investment strategy with regards to the promotion of E/S characteristics:

1/ Exclusions applicable to Article 8 strategies according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

2/ ESG integration. ESG integration is implemented to select issuers. The issuer selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of the ESG risks and opportunities for an issuer relying on internal and external research. This review produces an ESG view.
- Independent and forward-looking review of the financial risks and opportunities for an issuer relying on internal and external research. This review produces a financial view. ESG and financial views are combined to select the issuers.

At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

3/ Preference for Green and Sustainability bonds with environmental objectives. The preference for Green, and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.

The assessment by this Sub-Fund will be based on materiality within each sector. For instance, for the banking sector, the material governance characteristic is risk management. For the automotive sector, the material governance characteristics is the compliance policy. In addition, the Investment Manager takes into account the MSCI governance score regarding board, pay, ownership/control and accounting practices where available.

Good governance
practices include
sound management
structures, employee
relations,
remuneration of staff
and tax compliance.

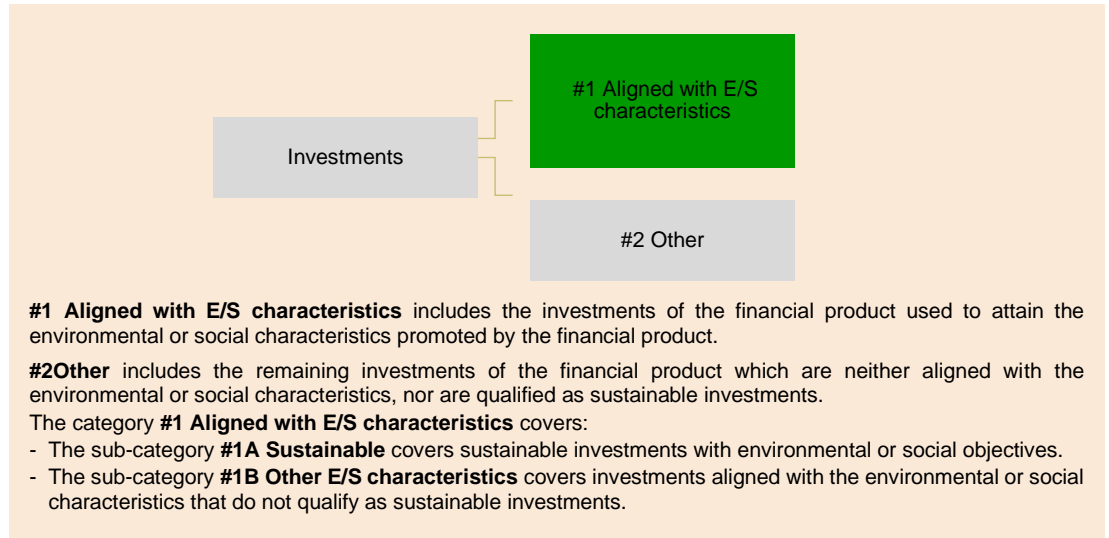

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included in #2 Other will be cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. Those instruments do not participate in attaining the environmental or social characteristics promoted by this Sub-Fund.

Investments included in #2 Other can also include bonds. In that case, the bond investments include safeguards to the extent that the bindings elements described above also apply to them.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - US DOLLAR BOND
Legal entity identifier: O00000869_00000042

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as described in below) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider indicators applicable only to investments in sovereigns.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

This Sub-Fund denominated in USD and which invests its net assets primarily in securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities.

This Sub-Fund is allowed to invest without limits in currencies other than its base currency (USD). The currency risk is limited to 10% of the net assets of the Sub-Fund. This Sub-Fund's currency exposure can either come from direct exposures to currencies other than the base currency (USD) (including via derivatives such as but not limited to FX Forwards), or by not hedging investments in currencies other than the base currency (USD).

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for non-developed market issuers. In the absence of a rating from MSCI, an internal rating may be assigned by the investment Manager.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics:

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- ☐ External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- ☐ A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for Green and Sustainability bonds with environmental objectives. The preference for Green and Sustainability bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

● ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

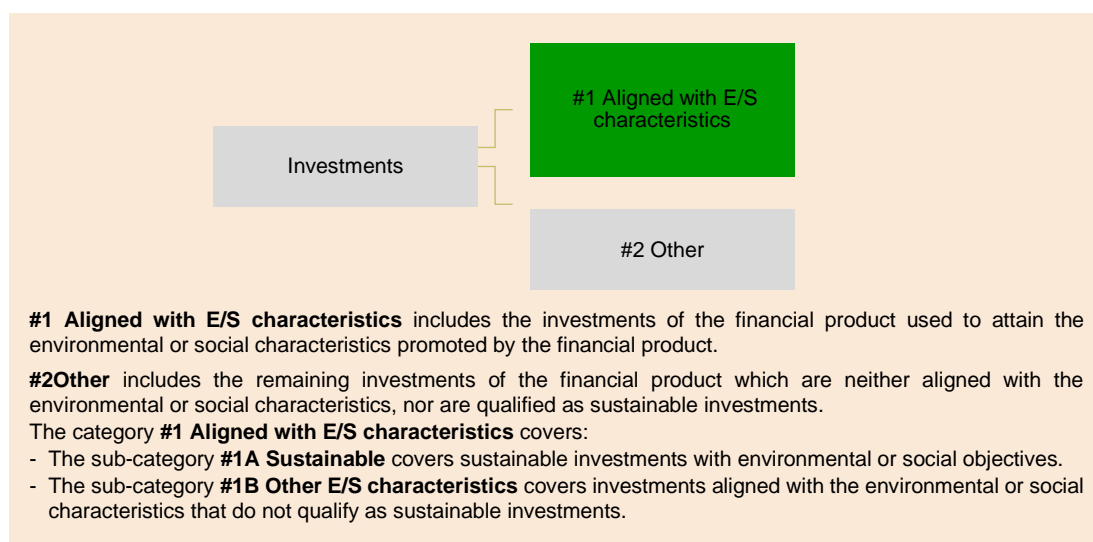

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product***

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - US HIGH YIELD SOLUTION
Legal entity identifier: O00000869_000000107

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by this Sub-Fund only apply to the sovereign bond allocation of this Sub-Fund. The derivatives instruments, and notably high-yield CDS indices, are out of scope as described below. Thus, the environmental and social characteristics promoted encompass the interest rate exposure of this Sub-Fund but not the high-yield credit allocation of this Sub-Fund which is built via CDS indices.

In terms of the social characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its efficacy meeting the basic needs of its population and reducing poverty, management of social and equity issues and investment in human capital and productivity.

In terms of the environmental characteristics, this Sub-Fund promotes via investments in sovereign bonds the sustainability of a country's economic performance given its natural resource endowment, management and supplementation and its risk or resilience to climate change and other natural hazards.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope as below mentioned) are based on internal environment and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics will disclose the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be considered by this Sub-Fund. This Sub-Fund will consider those PAIS only to investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market is not incorporated in the consideration of principal adverse impact on sustainability factors.

Governance

* 21. Corruption

* 24. Rule of law

This Sub-Fund considers the above governance PAIs when assessing the ESG profile of the sovereign bond issuers in the portfolio. A scoring methodology is implemented by the Investment Manager to assess E, S and G characteristics. This Sub-Fund commits not to invest in states that are severely failing the above PAIs.

What investment strategy does this financial product follow?

This Sub-Fund actively managed denominated in USD which invests its net assets primarily in sovereign and quasi- sovereign debt securities denominated in this currency. At any time, this Sub-Fund invests a majority of its net assets in bonds and other debt securities. This Sub-Fund will have nominal net exposure of between 80% and 120% to High Yield products via the use of CDS (Credit Default Swaps).

The Investment Manager will use several types of CDS among other but not limited to MARKIT CDX.NA.HY index (for a minimum of 80% of the net assets), the MARKIT iTraxx Xover Index (between - 20% and + 20% of the net assets) and the MARKIT CDX.EM Index (between - 20% and + 20% of the net assets).

Further information on MARKIT CDX.NA.HY index, MARKIT iTraxx Xover index and MARKET CDX.EM Index, who are rebalanced every 6 months, are available on Markit's website:

<http://www.markit.com/Documentation/Product/iTraxx> for iTraxx indices and

<http://www.markit.com/Documentation/Product/CDX> for CDX indices.

This Sub-Fund may invest in bonds issued under any law, including securities issued under the regulations known as REG S or 144A, in respect of the investment strategy of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

• **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

A minimum of 50% of this Sub-Fund's allocation to sovereign bonds will be invested in issuers deemed to maintain E/S characteristics as measured by MSCI ESG research or equivalent data providers. E/S characteristics are defined as an ESG rating equal or superior to BBB for developed markets issuers and equal or superior to BB for emerging market issuers. In the absence of a rating from MSCI or equivalent data providers, an internal rating may be assigned by the Investment Manager. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of those requirements.

The ESG investment strategy is based on three pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.

- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.

- A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

- Preference for green bonds and sustainability bonds with environmental objectives ("Green Bonds"). The preference for Green Bonds should be considered as an objective and is conditional to availability, liquidity conditions and relative value analysis.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund does not apply a minimum rate to reduce the scope of the investments. However, this Sub-Fund applies an exclusion policy in accordance with the Responsible Investment policy of UBP, the Investment Manager.

- ***What is the policy to assess good governance practices of the investee companies?***

The good governance practices are assessed alongside the environmental and social characteristics in the 2nd pillar of the ESG process described above.: ESG integration. Sovereign issuers deemed to have severe ESG deficiencies, based on the approach outlined above are excluded from the investment universe.

The above only applies to the allocation to bonds in this Sub-Fund.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

The planned asset allocation of this Sub-Fund will be a 51% minimum of bonds aligned with E/S characteristics.

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EUROPEAN CONVERTIBLE BOND
Legal entity identifier: O00000869_00000070

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental (E) and social (S) characteristics while investing in companies with good governance practices, in accordance with Article 8 of EU Regulation 2019/2088 for the disclosure of information related to sustainability within the financial services sector (SFDR). It aims to obtain a weighted average Industry-Adjusted ESG score which is higher than that of the Refinitiv Europe Hedged Convertible Bond Index (EUR) and a lower carbon footprint (as measured by the weighted average carbon intensity).

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

• What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of each of the environmental or social characteristics promoted by this Sub-Fund will be measured using weighted average carbon intensity and the Industry-Adjusted ESG score.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

This Sub-Fund takes into consideration the following negative impacts of investments on environmental, social issues and the respect of international standards:

- Exposure to Controversial Weapons: this Sub-Fund excludes companies which generate revenues from nuclear or other controversial weapons (cluster munitions, landmines, depleted uranium, biological/chemical weapons).
- GHG Intensity of investee companies: this Sub-Fund assesses companies' commitments to transition to a lower carbon economy during the fundamental extra-financial analysis stage. The analysis mainly focuses on GHG emissions level and trend, regulatory risk exposure and the quality of data disclosure.
- Board Gender Diversity: this Sub-Fund aims to identify and select companies with good governance practices among which it favours boards with superior gender diversity.
- Violations of the UN Global Compact principles (UNGC) and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises: this Sub-Fund

excludes companies whose activity is in violation of the UNGC principles or the OECD Guidelines for Multinational enterprises. The Investment Manager actively monitors violations alerts and engages systematically with companies through a third-party engagement services provider (Sustainalytics).

What investment strategy does this financial product follow?

This Sub-Fund aims at benefiting from the convex nature of convertible bonds to capture more of equities' upside than downside with lower volatility, thus enhancing the risk / return profile of an equity portfolio, with a maximum equity sensitivity of 70% at Sub-Fund's portfolio level.

This Sub-Fund follows a discretionary investment strategy: a dedicated investment process has been developed by the Investment Manager to assess investment opportunities in the convertible bond universe, and to isolate the names which should provide the best convex characteristics.

This investment process is built on three main pillars, which constitute the Investment Manager's DNA.

- The Investment Manager pays particular attention to the analysis of credit quality, both at issuer and issue levels. The Investment Manager's primary objective is capital preservation. This is, in the Investment Manager's view, the first leg of the convex profile and requires a solid bond floor for downside protection.
- Long-term alpha generation is mainly expected through the appreciation, over time, of the underlying stock of the convertible bond instrument. This is the second leg of the convex profile. To identify the convertible bond instruments whose underlying stock offers effective upside potential in the mid to long term, the Investment Manager adopts a bottom-up and fundamental approach. The option's technical analysis aims to validate the asymmetrical behaviour of the convertible bond.
- The Investment Manager believes that convexity needs time to express its full benefits. It therefore manages this Sub-Fund's portfolios with a long-term investment approach. This applies to both security selection and the management of the Investment Manager's Sub-Fund's aggregate sensitivities

This Sub-Fund denominated in EUR which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares

or similar securities, of rating minimum B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency, or an equivalent internal rating determined by the Investment Manager, of which the underlying and/or issuer is a company which has its registered office in a member country of the OECD or is listed on a European stock exchange, with at least two thirds of its net assets in companies which are domiciled or carry out an important part of their economic activity in European countries.

The equity sensitivity of this Sub-Fund shall not exceed 70%.

This Sub-fund will hedge non-denominated Euro currencies and residual direct exposure to currencies other than the base currency (EUR) will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the Investment Manager.

This Sub-Fund is actively managed and uses the Refinitiv Europe Hedged Convertible Bond Index (EUR) ("the Benchmark") for performance objective.

To achieve the environmental and social objectives promoted by this Sub-Fund, four steps are included in the investment strategy:

- Step 1: application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy

- Step 2: integration of extra-financial criteria within the fundamental analysis of the convertible bonds. This consists of a qualitative analysis of environmental, social and governance characteristics for each Sub-Fund portfolio's names. This analysis can be done internally or externally. The objective is to evaluate the ESG profil of each company in order to identify the ones that integrate sustainability issues and/or formulate any commitment to address them. The Investment Manager's internal ESG scoring methodology is based on the equal assessment of 4 pillars: Climate Risk, Environmental Strategy, Social Capital and Governance

- Step 3: the third step is this Sub-Fund portfolio's construction. This is done by looking for an overall ESG quality profile higher than that of the global convertible bond market index, Refinitiv Europe Hedged Convertible Bond Index (EUR) and a lower carbon footprint than that of the latter. The ESG quality profile of this Sub-Fund is measured by the weighted average Industry-Adjusted ESG score of the companies in which the Sub-Fund portfolio is invested. The carbon footprint is measured by the weighted average of the Sub-Fund's carbon intensity. Securities can be trimmed/sold based on a significant event or a deterioration affecting its extra-financial fundamentals.

- Step 4: integration of ESG criteria within internal control and risk management: the Investment Manager operates ongoing monitoring of the strategy and ensures that a minimum of 80% of the Sub-Fund's net assets is subject to an extra-financial analysis carried out internally or externally.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The investment strategy includes two constraints to the achievement of environmental and social objectives promoted by this Sub-Fund:

- Application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy;
- A minimum of 80% of the Sub-Fund's net assets is subject to an extra-financial analysis carried out internally or externally;

The overall ESG quality of this Sub-Fund's portfolio is measured against that of the Refinitiv Europe Hedged Convertible Bond Index (EUR) in order to ensure that this Sub-Fund maintains tends to have a higher ESG quality profile and a lower carbon footprint than that of the Global convertible bond market index.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager takes quality of governance into consideration in its assessment related to sustainability. Thus, the Investment Manager assesses factors such as accounting practices and the quality of the financial data disclosed, the composition of the board of directors, independence of the chairperson and the board of directors, the shareholding structure, dispersion of shares ownership, as well as remuneration policies and particularly the integration of extra-financial criteria.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 80% of its assets aligned with the promoted environmental and social characteristics.

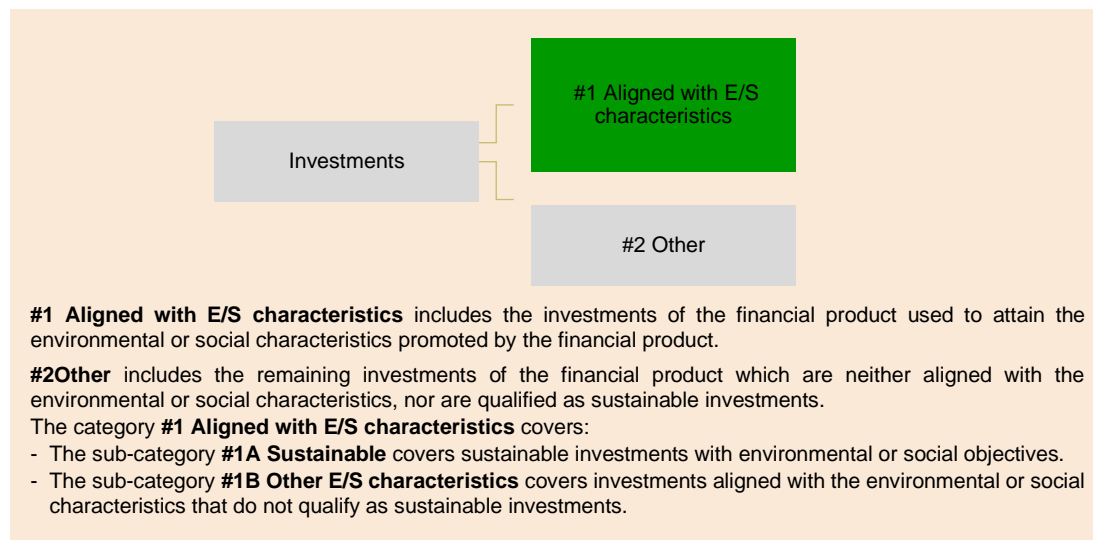

On an ancillary basis, this Sub-Fund may include investments not aligned with the promoted environmental and social characteristics, such as cash, derivatives and positions without

ESG coverage. These are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the investments not aligned with the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “No. 2 Other” relate to cash, derivatives and positions without ESG coverage. There is no minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL CONVERTIBLE BOND
Legal entity identifier: O00000869_00000086

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental (E) and social (S) characteristics while investing in companies with good governance practices, in accordance with Article 8 of EU Regulation 2019/2088 for the disclosure of information related to sustainability within the financial services sector (SFDR). It aims to obtain a weighted average Industry-Adjusted ESG score which is higher than that of the Refinitiv Global Hedged Convertible Bond Index (EUR) and a lower carbon footprint (as measured by the weighted average carbon intensity).

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The attainment of each of the environmental or social characteristics promoted by this Sub-Fund will be measured using weighted average carbon intensity and the Industry-Adjusted ESG score.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

This Sub-Fund takes into consideration the following negative impacts of investments on environmental, social issues and the respect of international standards:

- Exposure to Controversial Weapons: this Sub-Fund excludes companies which generate revenues from nuclear or other controversial weapons (cluster munitions, landmines, depleted uranium, biological/chemical weapons).
- GHG Intensity of investee companies: this Sub-Fund assesses companies' commitments to transition to a lower carbon economy during the fundamental extra-financial analysis stage. The analysis mainly focuses on GHG emissions level and trend, regulatory risk exposure and the quality of data disclosure.
- Board Gender Diversity: this Sub-Fund aims to identify and select companies with good governance practices among which it favours boards with superior gender diversity.
- Violations of the UN Global Compact principles (UNGC) and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises: this Sub-Fund

excludes companies whose activities or practices are in violation of the UNGC principles or the OECD Guidelines for Multinational enterprises. The Investment Manager actively monitors violations alerts and engages systematically with companies through a third-party engagement services provider (Sustainalytics).

What investment strategy does this financial product follow?

This Sub-Fund aims at benefiting from the convex nature of convertible bonds to capture more of equities' upside than downside with lower volatility, thus enhancing the risk / return profile of an equity portfolio, with a maximum equity sensitivity of 70% at Sub-Fund's portfolio level.

This Sub-Fund follows a discretionary investment strategy: a dedicated investment process has been developed by the Investment Manager to assess investment opportunities in the convertible bond universe, and to isolate the names which should provide the best convex characteristics.

This investment process is built on three main pillars, which constitute the Investment Manager's DNA.

- The Investment Manager pays particular attention to the analysis of credit quality, both at issuer and issue levels. The Investment Manager's primary objective is capital preservation. This is, in the Investment Manager's view, the first leg of the convex profile and requires a solid bond floor for downside protection.
- Long-term alpha generation is mainly expected through the appreciation, over time, of the underlying stock of the convertible bond instrument. This is the second leg of the convex profile. To identify the convertible bond instruments whose underlying stock offers effective upside potential in the mid to long term, the Investment Manager adopts a bottom-up and fundamental approach. The option's technical analysis aims to validate the asymmetrical behaviour of the convertible bond.
- The Investment Manager believes that convexity needs time to express its full benefits. It therefore manages the Sub-Fund's portfolios with a long-term investment approach. This applies to both security selection and the management of the Investment Manager's Sub-Fund's aggregate sensitivities

This Sub-Fund denominated in EUR which invests its net assets primarily in:

- convertible bonds
- bonds exchangeable into shares
- bonds repayable in shares,
- bonds with subscription warrants
- bonds indexed on shares

or similar securities, of rating minimum B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency, or an equivalent internal rating determined by the Investment Manager, of which the underlying and/or issuer is a worldwide company, including Emerging countries up to a maximum of 50% of the Sub-Fund's net assets.

The equity exposure of this Sub-Fund shall not exceed 70% (through investments in eligible assets, as detailed above). In this context, "equity exposure" refers to the aggregate equity sensitivity of the Sub-Fund's portfolio.

Euro is this Sub-Fund's base currency and non-Euro denominated currencies will be hedged. Residual direct exposure to currencies other than the base currency will be up to 10% maximum. In addition, indirect currency exposures can be hedged on an occasional basis at the full discretion of the Investment Manager.

This Sub-Fund is actively managed and uses the Refinitiv Global Hedged Convertible Bond Index (EUR) ("the Benchmark") for performance objective.

To achieve the environmental and social objectives promoted by this Sub-Fund, four steps are included in the investment strategy:

- Step 1: application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy

- Step 2: integration of extra-financial criteria within the fundamental analysis of the convertible bonds. This consists of a qualitative analysis of environmental, social and governance characteristics for each Sub-Fund portfolio's names. This analysis can be done internally or externally. The objective is to evaluate the ESG profile of each company in order to identify the ones that integrate sustainability issues and/or formulate any commitment to address them. The Investment Manager's internal ESG scoring methodology is based on the equal assessment of 4 pillars: Climate Risk, Environmental Strategy, Social Capital and Governance

- Step 3: the third step is the Sub-Fund portfolio's construction. This is done by looking for an overall ESG quality profile higher than that of the global convertible bond market index, Refinitiv Global Hedged Convertible Bond Index (EUR) and a lower carbon footprint than that of the latter. The ESG quality profile of this Sub-Fund is measured by the weighted average Industry-Adjusted ESG score of the companies in which the Sub-Fund portfolio is invested. The carbon footprint is measured by the weighted average of the Sub-Fund's carbon intensity. Securities can be trimmed/sold based on a significant event or a deterioration affecting its extra-financial fundamentals.

- Step 4: integration of ESG criteria within internal control and risk management: the Investment Manager operates ongoing monitoring of the strategy and ensures that a minimum of 80% of the Sub-Fund's net assets is subject to an extra-financial analysis carried out internally or externally.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The investment strategy includes two constraints to the achievement of environmental and social objectives promoted by this Sub-Fund:

- Application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy;
- A minimum of 80% of the Sub-Fund's net assets is subject to an extra-financial analysis carried out internally or externally;

The overall ESG quality of the Sub-Fund's portfolio is measured against that of the Refinitiv Global Hedged Convertible Bond Index (EUR) in order to ensure that this Sub-Fund maintains tends to have a higher ESG quality profile and a lower carbon footprint than that of the Global convertible bond market index.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager takes quality of governance into consideration in its assessment related to sustainability. Thus, the Investment Manager assesses factors such as accounting practices and the quality of the financial data disclosed, the composition of the board of directors, independence of the chairperson and the board of directors, the shareholding structure, dispersion of shares ownership, as well as remuneration policies and particularly the integration of extra-financial criteria.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 80% of its assets aligned with the promoted environmental and social characteristics.

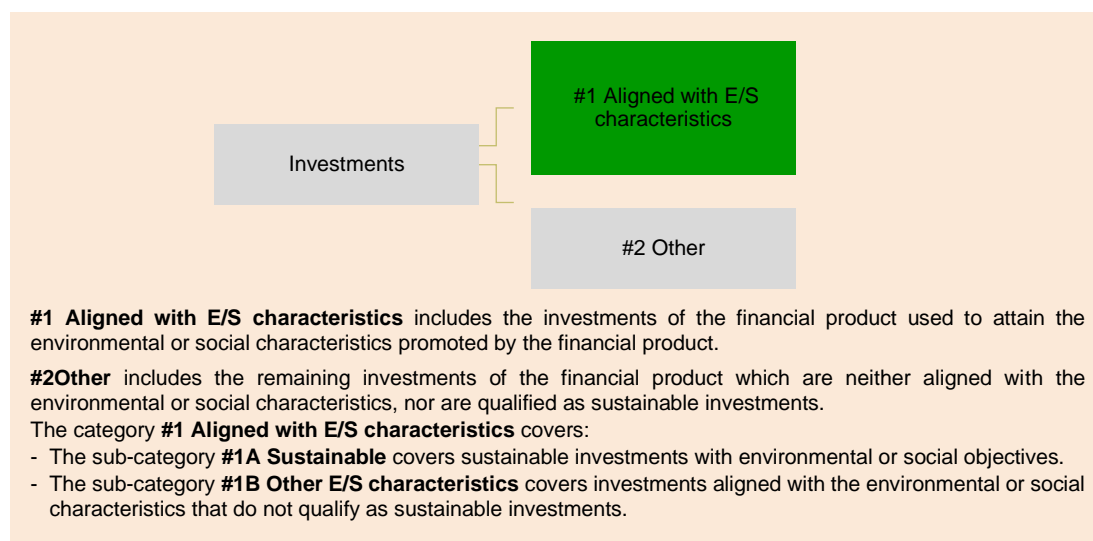

On an ancillary basis, this Sub-Fund may include investments not aligned with the promoted environmental and social characteristics, such as cash, derivatives and positions without

ESG coverage. These are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the investments not aligned with the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

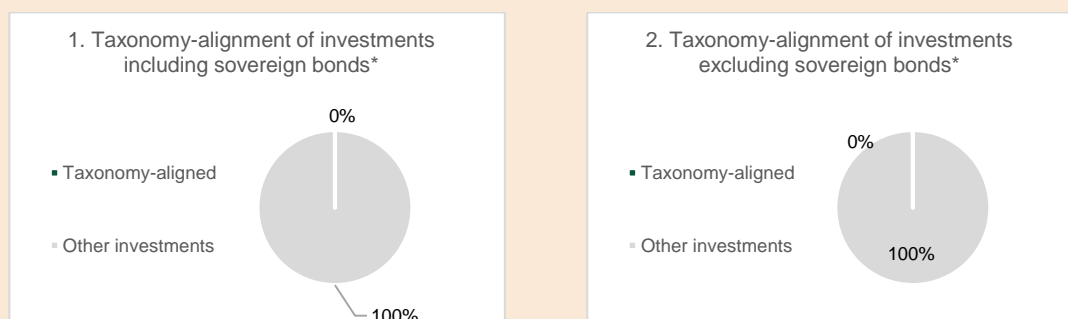

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures**

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “No. 2 Other” relate to cash, derivatives and positions without ESG coverage. There is no minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:
<https://www.ubp.com/en/investment-expertise/responsible-investment>.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL RESPONSIBLE CONVERTIBLE BOND
Legal entity identifier: O00000869_00000141

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☒ ☐ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund aims to maintain a higher average ESG score than the Refinitiv Global Hedged Convertible Bond (EUR) index at all times, as measured by the average Industry-Adjusted Score computed by MSCI ESG Research LLC. This index is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by this Sub-Fund.

This Sub-Fund also aims to maintain a lower average carbon intensity than its index at all times, as measured by MSCI ESG Research LLC. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

The focus of this Sub-Fund on companies that stand out for the quality of their sustainability practices fully encapsulates UBP's commitment to social considerations. Also, this Sub-Fund excludes companies in breach of UN Global Compact and the Investment Manager manages its exposure to companies in breach of other international norms and engages systematically with these companies through a third-party engagement services provider (Sustainalytics).

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

This Sub-Fund monitors 6 sustainability indicators on an on-going basis, on environmental, social, governance and human rights issues. These notably include the weighted average carbon intensity (for which the Sub-Fund's portfolio shall always show lower intensity vs. the index) and the exposure to companies in violation of the UN Global Compact and/ or International Labor Organization (ILO) (for which the Sub-Fund's portfolio shall always have zero exposure).

- Weighted Average Carbon Intensity
- Exposure to fossil fuel reserve
- Diversity program
- Gender diversity
- Board Independance
- Breach and Violations UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the environmental sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- Companies whose revenues are aligned with EU taxonomy
- Companies whose solutions promote energy efficiency: for example through investments in companies with revenues from products or services that help reduce energy consumption
- Sustainable use and protection of water and marine resources: for example through investments in companies with revenues from products or services that resolve water quality and supply issues

The objectives of the social sustainable investments that this Sub-Fund partially intends to make include but are not limited to:

- Major disease treatment: for example through investments in companies with derived revenues from products for the treatment or diagnosis of major diseases of the world
- Basic needs: for example through investments in companies with derived revenues from any of the basic needs social impact themes including nutrition, sanitation, major diseases treatment or affordable real estate.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm trough an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The Investment Manager seeks to limit the mandatory principal adverse impacts from Table 1 of Annex 1 on the environmental and social sustainable investments primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

This Sub-Fund takes into consideration the negative impacts of investments on environmental, social issues and the respect of international standards. The ESG criteria that the Investment Manager chooses to report on aim to ensure that we “do not harm” and are underpinned by the PAI. As such, our standard monthly/quarterly reportings for this Sub-Fund include indicators such as :

- GHG Intensity of investee companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Board Gender Diversity
- Exposure to Controversial Weapons

These indicators for adverse impact are taken into account at different steps of the investment process:

- GHG Intensity of investee companies: this Sub-Fund excludes companies whose activity is intensive in carbon emissions. It also aims to identify and select companies that are aligned with the international climate goals and progress on those in the future during the

fundamental extra-financial analysis stage. The analysis mainly focuses on GHG emissions level and trend, regulatory risk exposure and the quality of data disclosure. Finally this Sub-Fund complies with restrictions which prohibit it from investing more than 5% of its assets in “best-in-class” companies within the energy and utilities sectors. These latter companies are directly engaged by the Investment Manager.

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises: this Sub-Fund excludes companies whose activity is in breach and violations the UNGC principles or OECD Guidelines for Multinational enterprises. The Investment Manager actively monitor any breach/violations alert and engages systematically with companies through a third-party engagement services provider (Sustainalytics and RepRisk).
- Exposure to Controversial Weapons: this Sub-Fund excludes companies which generate revenues from nuclear or other controversial weapons (cluster munitions, landmines, depleted uranium, biological/chemical weapons).
- Board Gender Diversity: this Sub-Fund aims to identify and select companies with good governance practices among which it favours board with superior gender diversity. Understanding governance risks and opportunities in decision-making is critical, as poor corporate governance practices have stood at the core of some of the biggest corporate scandals. The analysis mainly focuses on Board gender diversity, balance of powers, transparency.

What investment strategy does this financial product follow?

This Sub-Fund denominated in EUR invests its net assets primarily in convertible bonds; bonds exchangeable into shares, bonds repayable in shares, bonds with subscription warrants, bonds indexed on shares and any other types of securities which may be considered as shares under local law Mandatory Convertibles, Preferred Convertibles, Mandatory Convertibles Preferred Shares, Mandatory Convertibles Preferred Stocks, Mandatory Exchangeable Bonds, Convertible Perpetual Preferred Stock etc...) or similar securities, with a rating of minimum B- (S&P or FITCH), B3 (Moody's) or an equivalent rating by another rating agency, or an equivalent internal rating determined by the Investment Manager, of which the underlying and/or issuer is a worldwide company, including Emerging countries up to a maximum of 50% of the Sub-Fund net assets.

This Sub-Fund aims to take advantage of the specific risk/return profile of convertible bonds within a sustainable framework through a fundamental, bottom-up investment process and a global allocation across major markets (US, Europe and Asia primarily).

In the context of this Sub-Fund, the “sustainable framework” is defined by the two sustainability objectives pursued by this Sub-Fund:

- to maintain a higher average ESG score than the Refinitiv Global Hedged Convertible Bond (EUR) (“the Index”) at all times, as measured by the average Industry-Adjusted Score computed by MSCI ESG Research. This index is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by this Sub-Fund.
- to maintain lower average carbon intensity than the Index at all times, as measured by MSCI ESG Research. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

The investment process combines six steps: steps 1 and 2 are about the financial analysis (screening on credit and liquidity criteria, convertible bond analysis) while steps 3 and 4 are specific to the extra-financial analysis (ESG exclusions, Sustainable analysis). Steps 3 and 4 aim to isolate companies that stand out by their commitment to sustainable development as per the four pillars mentioned below. The two final steps are about the portfolio construction (step 5) and the ongoing risk monitoring (step 6).

To reach our objectives, the integration of ESG considerations is done at 3 levels:

(a) ESG exclusion criteria (negative screening), based on binding exclusion and/or restriction criteria related to environmental, social and governance (step 3). In order to exclude

companies concerned by our defined ESG exclusion criteria, we primarily make use of the extra-financial analysis and inputs as provided by MSCI ESG Research. The application of our ESG exclusion criteria is done on securities of the initial investment universe that have not been screened out during steps 1 and 2 of our process (financial analysis).

(b) ESG inclusion approach (positive screening), based on internal qualitative ESG assessment of issuers and underlying equities (step 4). The Investment Manager's internal, qualitative sustainability analysis is performed on each security of its initial investment universe that has not been excluded during the first 3 steps of the process. It is based on the evaluation of 4 pillars: I) climate risk, II) environmental strategy, III) social capital and IV) governance. Sub-Fund's portfolio holdings' ESG criteria are reviewed on a monthly basis.

(c) through the portfolio construction (step 5). The combination of the Investment Manager's financial and extra-financial analysis allows the Investment Manager to select companies combining strong financial value and higher sustainable practices. Allocation is conviction-driven, with larger weight allocated to companies offering both sound financials and higher extra-financial standards, according to the Investment Manager's analysis. The application of defined ESG exclusion criteria, combined with sustainability assessment of companies, will lead to an exclusion rate of at minimum 20% from the eligible investment universe post financial analysis (post steps 1 & 2). At all times, a minimum of 90% of the Sub-Fund's net assets is invested in companies rated by MSCI ESG Score, and that comply with the Sub-Fund's ESG exclusion criteria. Sub-Fund's portfolio holdings' ESG values are reviewed on a monthly basis.

The net asset value is expressed in EUR. This Sub-Fund is actively managed and uses the Refinitiv Global Hedged Convertible Bond (EUR) ("the Benchmark") for performance objective.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

Binding elements for the investment selection include: (a) Sub-Fund's exclusion and/or restriction criteria; (b) the two extra-financial objectives pursued by the strategy - namely, to maintain at all times (1) higher average ESG score relative to its index (the Refinitiv Global Euro Hedged Convertible Bond index) as measured by MSCI ESG's Industry-Adjusted Scores; (2) lower weighted average carbon intensity in comparison to its index.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

The integration of above described ESG criteria will lead to an exclusion rate of at least 20% of the investment universe post the financial analysis

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager takes quality of governance into consideration in its assessment related to sustainability. Thus, the Investment Manager assesses factors such as accounting practices and the quality of the financial data disclosed, the composition of the board of directors, independence of the chairman and the board of directors, the shareholding structure, dispersed ownership of shares, as well as remuneration policies and particularly the integration of extra-financial criteria.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 10% in environmentally and/or socially sustainable investments.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash, derivatives and positions without ESG coverage. These are not expected to have any impact on the environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the investments not aligned with the environmental and social characteristics of this Sub-Fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases. The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 10% sustainable investments at all times. This minimum share of 10% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy ranging from 0% up to 10%. This share could be difficult to quantify at this time, as it can represent activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 10% sustainable investments at all times. This minimum share of 10% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% to 10%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” relate to cash, derivatives and positions without ESG coverage. There is no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No. The benchmark of the strategy is the Refinitiv Global Hedged Convertible Bond Index, which is a broad market index used as a proxy of the global convertible bond investment universe.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - 30 EUROPEAN LEADERS EQUITY
Legal entity identifier: O00000869_00000152

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of **1%** of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the MSCI Europe Equity NR, paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

This Sub-Fund also generally promotes investments in companies that protect biodiversity, cater to basic human needs, encourage sounder water and waste management, or enable the transition towards renewable energy with the common objective of transitioning towards a lower carbon economy.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some mandatory principal adverse impacts from Table 1 of Annex 1 are taken into account primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

In order to be considered as sustainable investments in this Sub-Fund, the investments need to be compliant with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, unconventional oil and gas extraction and thermal coal extraction as well as limited revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of UN Global Compact according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies in the European Union, in the United Kingdom, in the European Economic Area and/or in Switzerland.

This Sub-Fund is selecting companies which are expected to provide sustainably high levels of cash flow return on investment (CFROI®) that are higher than the Cost of Capital (CoC) and which grow their asset base while maintaining this spread. (Source: CFROI® Credit Suisse HOLT). This Sub-Fund will be mainly constituted as a high-quality, large market capitalization equity portfolio invested in around 30 European leading companies (“leading” implies e.g. having a leadership position due to the market share, innovation capabilities, brand recognition or superior management talents) combining superior returns and growth opportunities characteristics over the next 3-5 years.

The ESG approach is embedded in the investment process of this Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also partially excluded given their high carbon intensity:

- conventional oil & gas ;
- unconventional oil and gas extraction and other unconventional oil and gas activities;
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO2 emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be in breach of UN Global Compact
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment not only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy ranging from 0% up to 1%. This share could be difficult to quantify at this time, as it can represent activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under #2 Other” are cash held in the Sub-Fund’s portfolio for flows management purposes. There are no minimum environmental and social safeguards on the cash bucket.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - 30 GLOBAL LEADERS EQUITY
Legal entity identifier: O00000869_00000057

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☒ ☐ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of **1%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the MSCI AC World NR, paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

This Sub-Fund also promotes social characteristics by aiming to have a better corporate sustainability than its benchmark through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

The sustainability indicator used to assess any breach with UNGC is the UNGC Compliance Status from MSCI ESG Research and Sustainalytics.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

This Sub-Fund also generally promotes investments in companies that protect biodiversity, cater to basic human needs, encourage sounder water and waste management, or enable the transition towards renewable energy with the common objective of transitioning towards a lower carbon economy.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do not harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

- ↳ ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some mandatory principal adverse impacts from Table 1 of Annex 1 are taken into account primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas and have no exposure to thermal coal extraction as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a Sub-Fund's portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons.

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies worldwide (including Emerging countries).

This Sub-Fund is selecting stocks world-wide, primarily companies which are expected to provide growth and leading (i.e. sustainably high quality) levels of cash flow return on investment (CFROI®) that are higher than the Cost of Capital (CoC) and which grow their asset base while maintaining this spread. (Source: CFROI® Credit Suisse HOLT). The investment strategy is focused on the sustainability of such return and growth profiles, and hence shall be long-term oriented with little need for turnover. Consequently, this Sub-Fund will be mainly constituted as a high-quality, large market capitalization equity portfolio invested in around 30 global leading companies ("leading" implies e.g. having a leadership position due to the market share, innovation capabilities, brand recognition or superior management talents) combining superior returns and growth opportunities characteristics over the next 3-5 years.

The ESG approach is embedded in the investment process of this Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also completely (or partially) excluded given their high carbon intensity or environmental footprint:

- conventional oil & gas (revenue thresholds apply);
- unconventional oil and gas extraction and other unconventional oil and gas activities (revenue thresholds apply);
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO₂ emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

The binding element of the investment strategy used to select the investments to attain the social characteristics promoted by this Sub-Fund is the exclusion of companies in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics at all time. Social practices related information are also integrated in the proprietary forecasts of companies' cash flows.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This Sub-Fund applies a minimum 20% reduction rate, at all times, on its investment universe resulting from the application of ESG exclusion criteria. This reduction rate is calculated based on the number of issuers that are covered by MSCI ESG Research.

● ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy ranging from 0% up to 1%. This share could be difficult to quantify at this time, as it can represent activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% up to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under #2 Other” are cash held in the Sub-Fund's portfolio for flows management purposes. There are no minimum environmental and social safeguards on the cash bucket.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.ubp.com/en/investment-expertise/responsible-investment>.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - ANGEL JAPAN SMALL CAP EQUITY
Legal entity identifier: O00000869_00000061

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☐ ☒ ☐ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the MSCI Japan Small Cap NR, paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

This Sub-Fund also promotes social characteristics by aiming to have a better corporate sustainability than its benchmark through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO2 per million of USD revenues.

The sustainability indicator used to assess any breach with UNGC is the UNGC Compliance Status of the company as assessed by an external data provider.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas and have no exposure to thermal coal extraction as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.

- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by external providers.

- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons.

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Japan.

The ESG investment strategy is based on three pillars:

- Business activities exclusion, provided that data are available, covering harmful activities (such as controversial and conventional weapons, coal, unconventional Oil & Gas, tobacco, adult entertainment) as well as breaches of the UN Global Compact in line with the UBP Responsible Investment policy (available on <https://www.ubp.com/en/investment-expertise/responsible-investment>) – revenue thresholds may apply.
- ESG integration. ESG integration is implemented to select stocks. Stock selection derives from the analysis of both environmental, social and governance (extra-financial) factors and financial factors.

This process has two key inputs:

- Independent and forward-looking review of stocks ESG risks and opportunities relying on internal and external research. This review produces an ESG assessment.
- Independent and forward-looking review of the financial risks and opportunities relying on internal research. This review produces a financial view.
- Preference for stocks with reduced carbon footprint as well as good governance characteristics as assessed by internal research, which relies on active dialogue with companies' management as well as other sources of information. The preference for such stocks should be considered as an objective and is conditional to liquidity conditions and relative value analysis.

While this Sub-Fund seeks to promote a lower weighted average carbon intensity than the MSCI Japan Small Cap Index, the relevant data might not be available for all the stocks in which the Sub-Fund invests.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

Selected stock issuers should:

- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, thermal coal extraction, electricity generated from thermal coal, unconventional oil and gas, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).
- not be in breach of the UN Global Compact

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by external data providers, the analysis is conducted by the Investment Manager.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices are a prerequisite for companies' performance, and it also ensures the promotion of environmental and social characteristics. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to public disclosure, sound management structures, employee relations, management communication of strategy with stakeholders. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses all ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product***

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What is the minimum share of investments in transitional and enabling activities?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A

What is the minimum share of socially sustainable investments

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash and derivatives for share class hedging. There is no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - BELL GLOBAL SMID CAP EQUITY
Legal entity identifier: O00000869_00000140

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund is managed so that the ESG quality score, as measured by MSCI ESG Research, will remain superior to that of the reference index (MSCI World SMID Cap Index), at all times.

In addition this Sub-Fund also promotes environmental characteristics through a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ equivalent per million of USD revenues.

The sustainability indicator used for the ESG Quality score is the Sub-Fund's weighted average MSCI ESG Overall ESG Score versus the respective benchmark overall weighted average MSCI ESG Overall ESG Score.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ How have the indicators for adverse impacts on sustainability factors been taken into account?

N/A

↳ How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager considers the following PAI for this Sub-Funds:

- Table 1 - Environmental Factors 3 and 4: GHG Intensity and exposure to fossil fuel. These PAIs are considered through 1) the Sub-Fund's guidelines to limit exposure to coal and unconventional oil & gas as well as to coal or fossil-fuel powered electricity and 2) through the Sub-Fund's objective to have a limited weighted average carbon intensity

-Table 1 - Social Factor 10: Exposure to companies in breach of UN Global Compact and OECD Guidelines for Multinational Enterprises, through the Sub-Fund's norm-based screening

What investment strategy does this financial product follow?

This Sub-Fund invests primarily in small and middle capitalisation stocks world-wide that represent the Investment Manager's philosophy of Quality at a Reasonable Price to build a high-quality portfolio, without paying an excessive valuation premium. The Investment Manager defines Quality as companies with an optimal mix of six key factors: high quality management, consistent profitability, strong franchises, financial strength, favourable business drivers and strong environmental, social & governance (ESG) characteristics.

The ESG approach is embedded in the investment process of this Sub-Fund as the Investment Manager believes that integrating ESG factors will deliver superior long term returns to investors. ESG considerations can be important drivers or risks associated with an investment and its ability to maintain or improve the Quality of their business and ultimately their returns. The Investment Manager believes that as a steward of investors' capital, active ownership and engagement is paramount to the success of investments and is in the best interests of investors.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This Sub-Fund has the following binding elements which includes the following stock exclusion policy: The investment universe will screen out all companies that fail our international norms-based screen, including all companies that fail the UN Global Compact compliance and all companies that are on global sanction lists, all tobacco producers, all companies with ties to nuclear weapons, and all companies with ties to controversial weapons.

This Sub Fund's investment universe has at a minimum of 90% coverage in terms of ESG analysis and the objectives of this Sub-Fund the higher ESG Quality Score and the lower carbon intensity score than its benchmark.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

No minimum rate of reduction

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager assesses the governance practices of every company in their strategies through completion of Investment Manager's own proprietary ESG materiality assessment. Additionally, through the alignment to SDG's, the Investment Manager monitor various governance metrics such as 'women as a percentage of directors'. The Investment Manager also continuously monitor other metrics including 'board independence', 'directory overboarding', 'related entity transactions', 'auditors tenure', 'ownership and control' and 'executive compensation'. Analysis of these factors also contributes to the Investment Manager's engagements and proxy voting.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product

Asset allocation

describes the share of investments in specific assets.

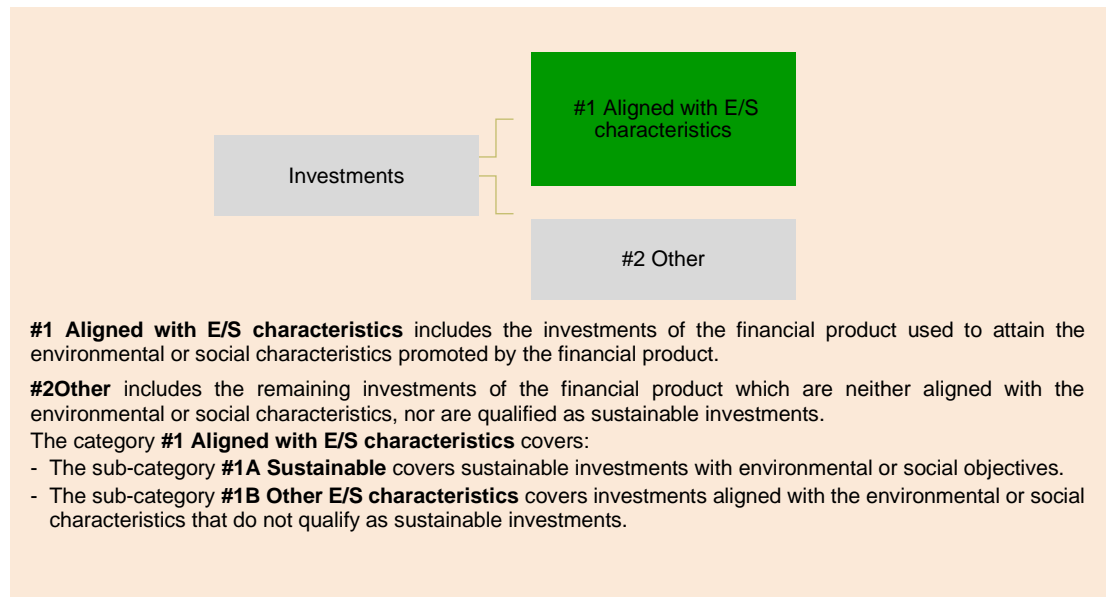

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash, derivatives and positions without ESG coverage. These are not expected to have a material impact on the environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the investments not aligned with the environmental and social characteristics of this Sub-Fund.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

Does this financial product have a sustainable investment objective?

☒ ☒ Yes

☐ ☐ No

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 80%**
- ☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: 0%**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

This Sub-Fund invests primarily in biodiversity “fixers” (companies which through their revenues are reducing biodiversity loss) and value-chain champion companies (companies which are not necessarily traditional impact companies but have huge supply chains (i.e. supply goods globally) and are taking this responsibility seriously (i.e. verify via key indicators that biodiversity goals are the main focus). Bilateral engagement is a critical element of the investment process. It consists in a long-term collaborative effort by the Investment Manager with the listed companies, involving investigation and guidance both ways, while promoting best practice as a key responsibility.

The benchmark is a standard reference representing the Sub-Fund’s universe but is not aligned with the sustainable objective of the Sub-Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

1. The intensity of impact (IMAP) is measured through The Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in this Sub-Fund.

2. other sustainability indicators:

- weighted average carbon intensity of this Sub-Fund,
 - % of companies in breach or under watch for breaches of the UN Global Compact,
- Each indicator is disclosed (vs. benchmark data, where possible) and monitored over time. The Investment Manager intend to beat the benchmark over the long term.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do not harm through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review (taking into account that the data availability is limited for certain indicators and does not allow us to reach a conclusion),
- controversies monitoring,
- overall ESG/governance quality assessments,
- an exclusion list,
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The principal adverse impacts on sustainability factors are considered at different stages of the investment process:

- through the exclusion list (e.g. Exposure to companies active in the fossil fuel sector, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises),
- in the context of the Investment Manager Investment Committee, the Investment Manager review all of the indicators available for the stocks in the portfolio (taking into account the fact that availability may still be low in some areas)
- in the Investment Manager's engagement with companies, both of individual and collective nature (including, but not limited to, GHG emissions, Activities negatively affecting biodiversity sensitive areas, Investing in companies without carbon emission reduction initiatives, etc.)

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses of external providers. If the stock is not covered by any external providers, the Investment Manager will conduct its own research to reach a conclusion.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager use a combination of exclusions, net materiality estimates (i.e. the percentage of sales that are judged by the Investment Manager to be aligned with the UNSDGs in the context of the IMAP score calculations), and engagement with companies through the Investment Manager Impact Engagement Framework. The information on PAI will be available in the annual report of this Sub-Fund.

For instance, these are the indicators monitored in table 1 of Appendix I:

- 1 GHG emissions: monitor, engage and aim for long-term reduction
2. Carbon footprint: monitor, engage and aim for long-term reduction
3. GHG intensity of investee companies: monitor, engage and aim for long-term reduction
4. Exposure to companies active in the fossil fuel sector: minimize through exclusions
7. Biodiversity: monitor and engage with companies having an exposure to sensitive areas
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinationals: minimize through exclusions
14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons): minimize through exclusions

And from table 2:

4. Investments in companies without carbon emission reduction initiatives: minimize through engagement

What investment strategy does this financial product follow?

This Sub-Fund build a concentrated equity portfolio of companies estimated to have a positive impact on the protection and restoration of biodiversity and a minimum IMAP score of 12 out of 20.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

• ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

IMAP Scoring System - measuring the impact intensity. Each company is analysed against four measures (scored out of maximum 5), the sum of which determines a unique Impact Score: Intentionality, Materiality, Additionality and Potential. A score of 12 is considered to be a minimum threshold for acceptance into the Sub-Fund's portfolio. Furthermore, the Investment Manager performs a negative screening based on the Sub-Fund exclusion list: Companies which are directly involved in the production of conventional, nuclear and controversial weapons are excluded, as well as companies which are directly involved in tobacco production, gambling, adult entertainment and thermal coal extraction. In addition, there are exclusions, with revenue thresholds applied, for those companies directly involved in Tobacco distribution. Conventional oil and gas extraction and Electricity utilities generating power from nuclear, oil and gas or coal are also subject to exclusion if they don't set ambitious SBTIs for emissions, or meet stated business criteria thresholds on capital expenditure and revenue exposure. Unconventional oil & gas extraction is subject to the same criteria, with the additional commitment of no increase in production or capex in absolute terms. Furthermore, this Sub-Fund excludes all companies in breach of international norms, such as the UN Global compact.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

The Governance element is monitored by the Investment Manager through its own analysis of resolutions proposed to shareholders, its engagement with portfolio companies on any governance issue raised by external ESG data providers, and the analysis of governance-related controversies.

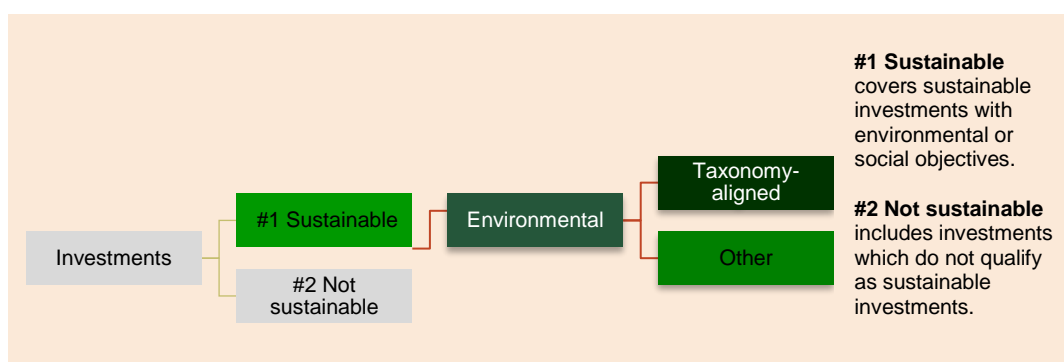

Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

This Sub-Fund will be primarily invested in environmentally sustainable investments (with a minimum of 80%). These sustainable investments will include at all times a mix of environmentally sustainable investments, including a minimum of 1% Taxonomy-aligned investments.

On an ancillary basis, the Sub-Fund may include other non-sustainable investments, cash and derivatives used for share class hedging up to 20%.

- **How does the use of derivatives attain the sustainable investment objective?**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have a minimum share of 1% in taxonomy-aligned investments.. The share of investments in transitional and enabling activities respectively will be dependent on investment opportunities over time. Therefore, each of these activities may individually hold a minimum share of taxonomy-aligned investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% at all times.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will maintain a minimum allocation of 80% in sustainable investments with social and environmental objectives, but the share of investments with an environmental objective within the sustainable investment allocation will depend on market conditions and investment opportunities identified by the Investment Manager.

The minimum environmental commitment is for both sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and those that are aligned. As the Investment Manager has limited data from the Sub-Fund's portfolio company about their level of alignment with the taxonomy, the Investment Manager doesn't consider them as aligned with the taxonomy, even though the Investment Manager expects some of them to be aligned with the EU Taxonomy once the information is disclosed by companies and all of the taxonomy is made public.

What is the minimum share of sustainable investments with a social objective?

This Sub-Fund does not commit to have sustainable investments with a social objective.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

On an ancillary basis, this Sub-Fund may include non-sustainable investments up to 20%, cash and derivatives used for share class hedging. These are not expected to have any impact on the sustainability objective of this Sub-Fund.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:
<https://www.ubp.com/en/investment-expertise/responsible-investment>.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EUROPE RESPONSIBLE SMALL CAP EQUITY
Legal entity identifier: O00000869_00000108

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The primary environmental characteristic promoted by this Sub-Fund is the lower carbon intensity versus its benchmark, the MSCI Europe Small Cap Index. This benchmark is a standard reference representing this Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by this Sub-Fund.

This Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products or services for the treatment or diagnosis of major diseases of the world.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and overall ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed to check that they do not cause severe adverse impact, provided that data is available and sufficient to make an informed decision.

Some PAI considerations are taken into account at the overall Sub-Fund level through for instance the exclusion of companies in breach of international norms, including the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 10), or the exclusion of companies involved in controversial weapons (PAI 14).

For others, the criteria depend on the PAI considered. As an example, a company having activities identified as negatively affecting biodiversity-sensitive areas (PAI 7) would not be included as part of the "sustainable investment" allocation.

The investment manager relies on well recognised external data providers for PAI information.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to external providers. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

PAI 3: GHG intensity of investee companies. This is done by limiting exposure to high emitters, with the objective of maintaining the weighted average carbon intensity of the portfolio below that of the reference index. In particular, the fund excludes companies involved in coal-intensive mining and electricity generation as well as in unconventional oil & gas (revenue thresholds apply). In addition, direct or collaborative engagement may be conducted to promote transparency and disclosure of carbon emissions as well as the adoption of more ambitious climate strategies, including science-based emission reduction targets.

PAI 10: Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises. This is done by excluding companies identified as in breach of international norms

PAI 14: Exposure to controversial weapons. This is done by excluding companies that develop, manufacture or sell controversial weapons, such as chemical and biological weapons, cluster munitions, landmines, incendiary weapons using white phosphorus, blinding laser weapons and depleted uranium weapons

What investment strategy does this financial product follow?

This Sub-Fund invests at least 75% of its net assets in equities issued by companies having their registered office in the European Union, in the United Kingdom and/or in the European Economic Area (excluding Liechtenstein) and, up to 25%, in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments. This Sub-Fund generally seeks to invest in sustainable quality growth business models: strongly financed, well managed, competitively advantaged companies with high or improving returns and exposure to growing end markets. Within this remit, there is a focus on companies that are exposed to positive internal (corporate strategy, management initiatives etc) and external (end market exposure) dynamics and hence there is a preference for companies which are exposed to enduring secular growth trends which should be well placed to weather shorter term cyclical fluctuations resulting from the broader macroeconomic environment. The Investment Manager will generally seek to pursue and engage with companies that demonstrate a willingness to implement strong ESG standards and promote an ambitious sustainability strategy as the Investment Manager believes this will enable them to be in a better position to reduce their carbon intensity, to solidify their competitive positioning and to achieve profitable growth on a sustainable basis. ESG criteria are an integral part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG

related information is entering the suitability screen of the stock selection process. The portfolio construction will consider ESG criteria as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when constructing and monitoring the portfolio. Through direct engagement with companies, and proxy voting according to its Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The ESG analysis covers 100% of investee companies. For companies not covered by external ESG research providers, the analysis is conducted by the Investment Manager.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

This Sub-Fund promotes a lower carbon footprint paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its investment universe. The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity in tons of CO₂ per million of USD revenues.

The Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening described below. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

Selected stock issuers should:

- not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by external data providers. In case a portfolio holding is "downgraded" as failing one of these global norms, the investment manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply); and with the aim to limit the Sub-Fund's carbon footprint:
- have limited exposure to conventional oil & gas revenues (revenue thresholds apply);
- have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas (revenue thresholds apply);
- have no exposure to thermal coal extraction as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are assessed through fundamental research through direct company engagements and analysis of public filings. Internal research is supplemented by ESG research from third party providers. The analysis covers matters such as, but not limited to, ownership structure, Board independence, Board diversity, compliance and anti-corruption policies, whistleblower provisions, potential controversies around matters of bribery or accounting practices, and remuneration structures. The Investment Manager monitors and assesses ongoing governance related controversies as part of the research process and seeks to engage with companies where new issues arise.

The norms-based screening also ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have any impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases. The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

Investments in environmentally sustainable investments may include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation.

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% up to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Investments included under “#2 Other” relate to cash and derivatives for share class hedging. There is no minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

MSCI Europe Small Cap Index has been designated as a reference benchmark. This benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and/or social characteristics promoted by this Sub-Fund.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.ubp.com/en/investment-expertise/responsible-investment>.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL EQUITY
Legal entity identifier: O00000869_00000099

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the MSCI AC World NR, paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

This Sub-Fund also generally promotes investments in companies that protect biodiversity, cater to basic human needs, encourage sounder water and waste management, or enable the transition towards renewable energy with the common objective of transitioning towards a lower carbon economy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some mandatory principal adverse impacts from Table 1 of Annex 1 are taken into account primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

In order to be considered as sustainable investments in this Sub-Fund, the investments need to be compliant with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, unconventional oil and gas extraction and thermal coal extraction as well as limited revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of UN Global Compact according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by companies worldwide (including Emerging countries).

This Sub-Fund seeks to invest primarily into stocks with exposure to growth opportunities. Investment concept is stock selection driven and focuses on companies with above market average revenue growth or improving growth rates as well as companies providing consistently economic value-add, i.e. sustainably earning their cost of capital. The investment process relies on fundamental analysis of the growth profile as well as the cash flow generation capacity of existing assets and future investments of companies. Discounting of these forecasted cash flows reveals over- and undervaluation of investment opportunities.

The ESG approach is embedded in the investment process of the sub-fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks

associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also partially excluded given their high carbon intensity:

- conventional oil & gas;
- unconventional oil and gas extraction and other unconventional oil and gas activities;
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO₂ emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be in breach of UN Global Compact;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy above 0%. This share could be difficult to quantify at this time, as it can represent activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% up to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under #2 Other” are cash held in the Sub-Fund’s portfolio for flows management purposes. There are no minimum environmental and social safeguards on the cash bucket.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - GLOBAL FINTECH EQUITY
Legal entity identifier: O00000869_00000128

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the MSCI AC World NR, paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective**

N/A

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, unconventional oil and gas extraction and thermal coal extraction as well as limited revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.

- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of UN Global Compact according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders

- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in worldwide equities and other similar transferable securities of companies specializing in financial technology (Fintech). In addition thereto, on an ancillary basis, it may invest in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by technology companies worldwide (including Emerging countries).

This Sub-Fund is selecting financial technology or financial technology-related stocks worldwide, primarily companies which are offering innovative financial products/services and companies offering Fintech technology/infrastructure, including services, software and hardware as a significant part of their business.

The investment strategy is focused on companies with strong and sustainable future growth, as well as high/stable or rising levels of Cash flow return on investment (CFROI®). (Source: CFROI® Credit Suisse HOLT).

The ESG approach is embedded in the investment process of this Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also partially excluded given their high carbon intensity:

- conventional oil & gas;
- unconventional oil and gas extraction and other unconventional oil and gas activities;
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO₂ emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be in breach of UN Global Compact;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

● ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices are a prerequisite for companies' performance and to ensure the promotion of environmental and social characteristics. Therefore they are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

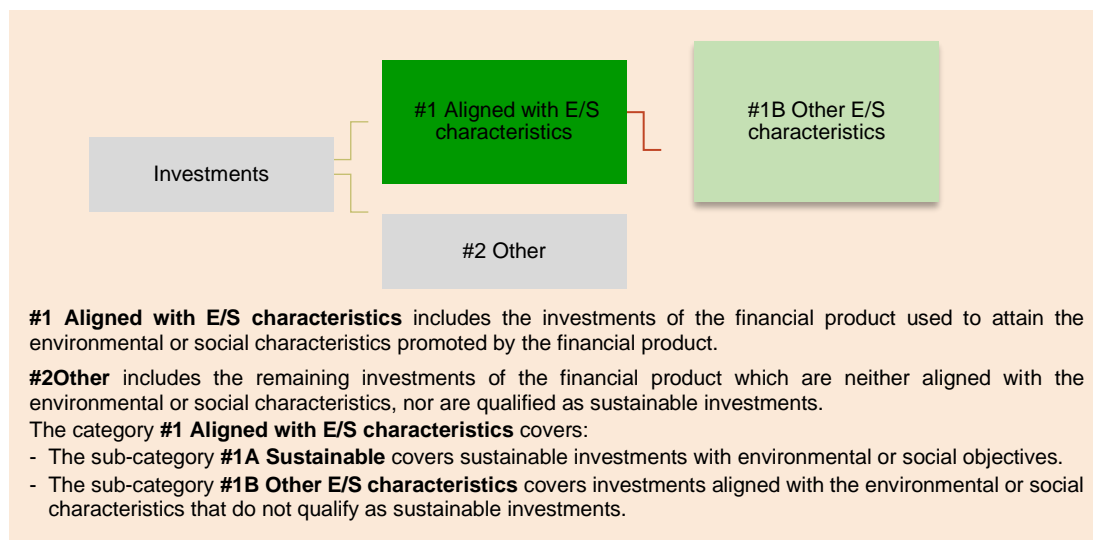

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted.

On an ancillary basis, the Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - POSITIVE IMPACT EMERGING EQUITY
Legal entity identifier: O00000869_00000139

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ Yes

☐ No

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 20%**
 - ☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
 - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☒ It will make a minimum of **sustainable investments with a social objective: 20%**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

This Sub-Fund addresses the UN's Sustainable Development Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies) with a focus on Emerging Markets Equities. The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations.

Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of this Sub-Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

1. The intensity of impact (IMAP) is measured through The Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in this Sub-Fund.

2. other sustainability indicators:

- weighted average carbon intensity of this Sub-Fund,
- % of companies in breach or under watch for breaches of the UN Global Compact,
- % of companies with sustainability linkage to pay
- % of companies that measure employee satisfaction

Each indicator is disclosed (vs. benchmark data, where possible) and monitored over time. The Investment Manager intend to beat the benchmark over the long term.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review (taking into account that the data availability is limited for certain indicators and does not allow us to reach a conclusion),
- controversies monitoring,
- overall ESG/governance quality assessments,
- an exclusion list,
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The principal adverse impacts on sustainability factors are considered at different stages of the investment process:

- through the exclusion list (e.g. Exposure to companies active in the fossil fuel sector, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises),
- in the context of the Investment Manager Investment Committee, the Investment Manager review all of the indicators available for the stocks in the portfolio (taking into account the fact that availability may still be low in some areas)
- in the Investment Manager's engagement with companies, both of individual and collective nature (including, but not limited to, GHG emissions, Activities negatively affecting biodiversity sensitive areas, Investing in companies without carbon emission reduction initiatives, Board gender diversity etc.)

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses of external providers. If the stock is not covered by any external providers, the Investment Manager will conduct its own research to reach a conclusion.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager use a combination of exclusions, net materiality estimates (i.e. the percentage of sales that are judged by the Investment Manager to be aligned with the UNSDGs in the context of the IMAP score calculations), and engagement with companies through the Investment Manager Impact Engagement Framework. The information on PAI will be available in the annual report of this Sub-Fund.

For instance, these are the indicators monitored in table 1 of Appendix I:

- 1 GHG emissions: monitor, engage and aim for long-term reduction
2. Carbon footprint: monitor, engage and aim for long-term reduction
3. GHG intensity of investee companies: monitor, engage and aim for long-term reduction
4. Exposure to companies active in the fossil fuel sector: minimize through exclusions
7. Biodiversity: monitor and engage with companies having an exposure to sensitive areas
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinationals: minimize through exclusions
13. Board gender diversity: monitor, engage and aim for long-term increase in diversity
14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons): minimize through exclusions

And from table 2:

4. Investments in companies without carbon emission reduction initiatives: minimize through engagement

What investment strategy does this financial product follow?

This Sub-Fund build a concentrated equity portfolio of companies estimated to have a positive impact on the 6 themes described above with a majority of sales or assets in Emerging Markets and a minimum IMAP score of 12 out of 20.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

IMAP Scoring System - measuring the impact intensity. Each company is analysed against four measures (scored out of maximum 5), the sum of which determines a unique Impact Score: Intentionality, Materiality, Additionality and Potential. A score of 12 is considered to be a minimum threshold for acceptance into the Sub-Fund's portfolio. Furthermore, the Investment Manager performs a negative screening based on the Sub-Fund exclusion list: Companies which are directly involved in the production of conventional, nuclear and controversial weapons are excluded, as well as companies which are directly involved in tobacco production, gambling, adult entertainment, thermal coal extraction and unconventional oil & gas extraction. In addition, there are exclusions, with revenue thresholds applied, for those companies directly involved in Tobacco distribution, Conventional oil and gas extraction and Electricity utilities generating power from nuclear, oil and gas or coal. Furthermore, this Sub-Fund excludes all companies in breach of international norms, such as the UN Global compact.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

The Governance element is monitored by the Investment Manager through its own analysis of resolutions proposed to shareholders, its engagement with portfolio companies on any governance issue raised by external ESG data providers, and the analysis of governance-related controversies.

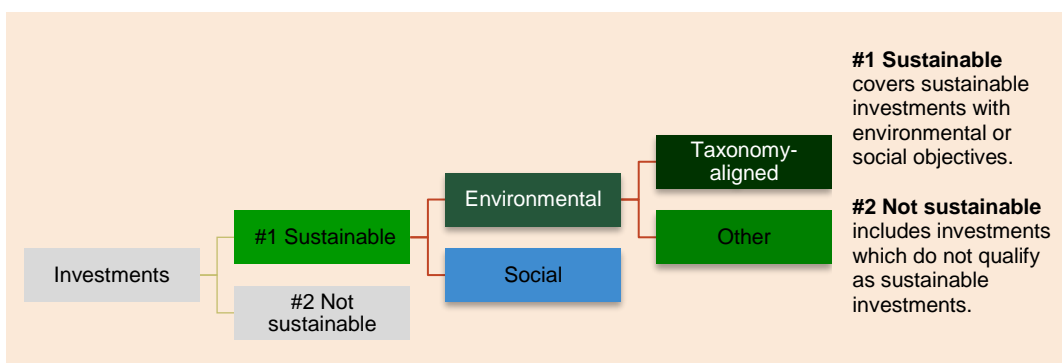

Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

This Sub-Fund will be primarily invested in sustainable investments, with a minimum of 80%. These sustainable investments will include at all times a mix of environmentally sustainable investments, including a minimum of 1% Taxonomy-aligned investments, and socially sustainable investments.

On an ancillary basis, this Sub-Fund may include other non-sustainable investments, up to 20%, cash and derivatives used for share class hedging.

- **How does the use of derivatives attain the sustainable investment objective?**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have a minimum share of 1% in taxonomy-aligned investments.. The minimum share of investments in transitional and enabling activities respectively will be dependent on investment opportunities over time. Therefore, each of these activities may individually hold a minimum share of taxonomy-aligned investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% at all times.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will maintain a minimum allocation of 80% in sustainable investments with social and environmental objectives, but the share of investments with an environmental objective within the sustainable investment allocation will depend on market conditions and investment opportunities identified by the Investment Manager.

The minimum environmental commitment is for both sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and those that are aligned. As the Investment Manager has limited data from the Sub-Fund's portfolio company about their level of alignment with the taxonomy, the Investment Manager doesn't consider them as aligned with the taxonomy, even though the Investment Manager expects some of them to be aligned with the EU Taxonomy once the information is disclosed by companies and all of the taxonomy is made public.

What is the minimum share of sustainable investments with a social objective?

This Sub-Fund will maintain a minimum allocation of 80% in sustainable investments with social and environmental objectives, but the share of investments with a social objective within the sustainable investment allocation will depend on market conditions and investment opportunities identified by the Investment Manager.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

On an ancillary basis, this Sub-Fund may include non-sustainable investments, up to 20% cash and derivatives used for share class hedging. These are not expected to have any impact on the sustainability objective of this Sub-Fund.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - POSITIVE IMPACT EQUITY
Legal entity identifier: O00000869_00000122

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ Yes

☐ No

- ☒ It will make a minimum of **sustainable investments with an environmental objective: 20%**
 - ☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
 - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☐ with a social objective

- ☒ It will make a minimum of **sustainable investments with a social objective: 20%**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

This Sub-Fund addresses the UN's Sustainable Development Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of this Sub-Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

1. The intensity of impact (IMAP) is measured through The Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in this Sub-Fund.

2. other sustainability indicators:

- weighted average carbon intensity of this Sub-Fund,
- % of companies in breach or under watch for breaches of the UN Global Compact,
- % of companies with sustainability linkage to pay
- % of companies that measure employee satisfaction
- weighted average R&D spend as a % of revenues

Each indicator is disclosed (vs. benchmark data, where possible) and monitored over time. The Investment Manager intend to beat the benchmark over the long term.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do not harm through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review (taking into account that the data availability is limited for certain indicators and does not allow us to reach a conclusion),
- controversies monitoring,
- overall ESG/governance quality assessments,
- an exclusion list,
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The principal adverse impacts on sustainability factors are considered at different stages of the investment process:

- through the exclusion list (e.g. Exposure to companies active in the fossil fuel sector, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises),
- in the context of the Investment Manager Investment Committee, the Investment Manager review all of the indicators available for the stocks in the portfolio (taking into account the fact that availability may still be low in some areas)
- in the Investment Manager's engagement with companies, both of individual and collective nature (including, but not limited to, GHG emissions, Activities negatively affecting biodiversity sensitive areas, Investing in companies without carbon emission reduction initiatives, Board gender diversity etc.)

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses of external providers. If the stock is not covered by any external providers, the Investment Manager will conduct its own research to reach a conclusion.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager use a combination of exclusions, net materiality estimates (i.e. the percentage of sales that are judged by the Investment Manager to be aligned with the UNSDGs in the context of the IMAP score calculations), and engagement with companies through the Investment Manager Impact Engagement Framework. The information on PAI will be available in the annual report of this Sub-Fund.

For instance, these are the indicators monitored in table 1 of Appendix I:

- 1 GHG emissions: monitor, engage and aim for long-term reduction
2. Carbon footprint: monitor, engage and aim for long-term reduction
3. GHG intensity of investee companies: monitor, engage and aim for long-term reduction
4. Exposure to companies active in the fossil fuel sector: minimize through exclusions
7. Biodiversity: monitor and engage with companies having an exposure to sensitive areas
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinationals: minimize through exclusions
13. Board gender diversity: monitor, engage and aim for long-term increase in diversity
14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons): minimize through exclusions

And from table 2:

4. Investments in companies without carbon emission reduction initiatives: minimize through engagement

What investment strategy does this financial product follow?

This Sub-Fund build a concentrated equity portfolio of companies estimated to have a positive impact on the 6 themes described above and a minimum IMAP score of 12 out of 20.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

IMAP Scoring System - measuring the impact intensity. Each company is analysed against four measures (scored out of maximum 5), the sum of which determines a unique Impact Score: Intentionality, Materiality, Additionality and Potential. A score of 12 is considered to be a minimum threshold for acceptance into the Sub-Fund's portfolio. Furthermore, the Investment Manager performs a negative screening based on the Sub-Fund exclusion list: Companies which are directly involved in the production of conventional, nuclear and controversial weapons are excluded, as well as companies which are directly involved in tobacco production, gambling, adult entertainment and thermal coal extraction. In addition, there are exclusions, with revenue thresholds applied, for those companies directly involved in Tobacco distribution. Conventional oil and gas extraction and Electricity utilities generating power from nuclear, oil and gas or coal are also subject to exclusion if they don't set ambitious SBTIs for emissions, or meet stated business criteria thresholds on capital expenditure and revenue exposure. Unconventional oil & gas extraction is subject to the same criteria, with the additional commitment of no increase in production or capex in absolute terms. Furthermore, this Sub-Fund excludes all companies in breach of international norms, such as the UN Global compact.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

The Governance element is monitored by the Investment Manager through its own analysis of resolutions proposed to shareholders, its engagement with portfolio companies on any governance issue raised by external ESG data providers, and the analysis of governance-related controversies.

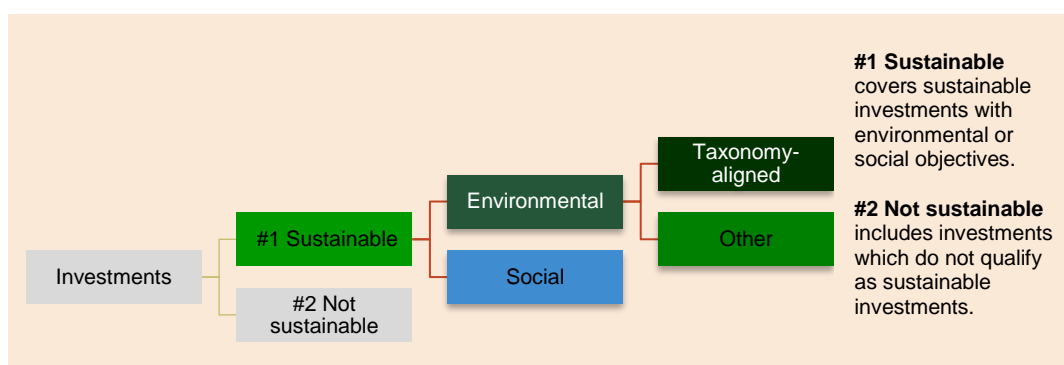

Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

This Sub-Fund will be primarily invested in sustainable investments, with a minimum of 80%. These sustainable investments will include at all times a mix of environmentally sustainable investments, including a minimum of 1% Taxonomy-aligned investments, and socially sustainable investments.

On an ancillary basis, this Sub-Fund may include other non-sustainable investments, up to 20%, cash and derivatives used for share class hedging.

- **How does the use of derivatives attain the sustainable investment objective?**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

• What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have a minimum share of 1% in taxonomy-aligned investments. The minimum share of investments in transitional and enabling activities respectively will be dependent on investment opportunities over time. Therefore, each of these activities may individually hold a minimum share in taxonomy-aligned investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% at all times.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will maintain a minimum allocation of 80% in sustainable investments with social and environmental objectives, but the share of investments with an environmental objective within the sustainable investment allocation will depend on market conditions and investment opportunities identified by the Investment Manager.

The minimum environmental commitment is for both sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and those that are aligned. As the Investment Manager has limited data from the Sub-Fund's portfolio company about their level of alignment with the taxonomy, the Investment Manager doesn't consider them as aligned with the taxonomy, even though the Investment Manager expects some of them to be aligned with the EU Taxonomy once the information is disclosed by companies and all of the taxonomy is made public.

What is the minimum share of sustainable investments with a social objective?

This Sub-Fund will maintain a minimum allocation of 80% in sustainable investments with social and environmental objectives, but the share of investments with a social objective within the sustainable investment allocation will depend on market conditions and investment opportunities identified by the Investment Manager.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

On an ancillary basis, this Sub-Fund may include non-sustainable investments, up to 20%, cash and derivatives used for share class hedging. These are not expected to have any impact on the sustainability objective of this Sub-Fund.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - SNAM JAPAN EQUITY RESPONSIBLE
Legal entity identifier: O00000869_00000124

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes to maintain an average portfolio's ESG score, based on the Investment Manager's analyses of companies ESG profiles using a proprietary scoring methodology, above the median ESG Score of the investment universe as defined below.

As environmental characteristics, this Sub-Fund promotes a lower carbon footprint than its benchmark, Topix TR.

This Sub-Fund also promotes social characteristics by aiming to have a better corporate sustainability than its benchmark through the exclusion of companies in breach of the United Nations Global Compact (UNGC).

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The overall ESG quality of the Sub-Fund's portfolio is measured by the ESG Score as defined by the proprietary scoring methodology.

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- companies with an identified portion of their revenues that contribute to objectives like decent work, adequate living standards and well-being, and inclusive & sustainable communities and societies. These revenues cover matters like nutrition, major disease treatments, education, sanitation, affordable real estate, SME financing and connectivity.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do not harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and overall ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

This is done in part through the application of the exclusion list and of the norms-based screening. PAIs are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

This Sub-Fund does not invest in companies flagged as being in breach with the UN Guiding Principles on Business and Human Rights according to the respective analyses by external providers. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by external providers.
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons.
- GHG Intensity of investee companies as measured by the weighted average carbon intensity.

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Japan.

In the context of this Sub-Fund, the “sustainable framework” is defined by the two sustainability objectives pursued by the Sub-Fund:

- to maintain an average portfolio's ESG score, based on the Investment Manager's analyses of companies ESG profiles using a proprietary scoring methodology, above the median ESG Score.

For the companies in the field of oil & gas extraction and electricity generation, to evaluate the strategies deployed by said companies to transition to a lower-carbon economy.

To reach these objectives, the integration of ESG considerations is done at 3 levels:

- ESG exclusion criteria (negative screening), based on binding exclusion and/or restriction criteria related to environmental, social and governance using the Investment Manager internal rating methodology.

- In addition, for the purpose of indication, for this Sub-Fund, exclusion criteria cover areas such as nuclear or other controversial weapons; shale gas or shale oil production; tobacco; international norms; coal-based electricity; nuclear resources; etc, (revenue thresholds apply – more information on <https://www.ubp.com/en/investment-expertise/responsible-investment>)

- Last, ESG inclusion approach (positive screening), based on the Investment Manager's internal analyses:

- First step, the Investment Manager's applies ESG exclusion criteria, combined with its sustainability assessment of companies. This will lead to an exclusion rate of at least 20% from the eligible investment universe defined as the best 300 Japanese listed stocks ranked according to the above mentioned ESG proprietary methodology among the 1000 most liquid Japanese listed stocks. The ESG analysis covers all of the Sub-Fund's investments. Stocks with no ESG Score cannot be part of the Sub-Fund's assets.

To accommodate for differing ESG concerns and thus priorities across sectors, the Investment Manager has mapped the 33 TOPIX ® sub-sectors to 4 sectors: Manufacturing, Consumer / Services, Finance and Public / Infrastructure. Then within each of these sectors, those evaluation segments that are deemed more material are given a greater weighting to the E, S and G scores. Having determined an E, S and G score for each company by sector, the Investment Manager then calculates a unique total ESG score for each company out of the 300 companies retained.

- Second step, the Investment Manager's applies an ESG approach which is further embedded in the valuation and investment process of the Sub-Fund and the selection of stocks include ESG criteria when assessing stocks' fair value and normalized profitability. ESG considerations can be an important driver for returns and risks associated with an investment.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

Selected stock issuers should:

- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).
- to have an overall GHG Intensity of investee companies as measured by the weighted average carbon intensity lower than the benchmark.

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by external data providers, the analysis is conducted by the Investment Manager.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

This will lead to an exclusion rate of at least 20% from the eligible investment universe defined as the best 300 Japanese listed stocks ranked according to the above mentioned ESG proprietary methodology among the 1000 most liquid Japanese listed stocks.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, the Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have a material impact on environmental and social characteristics of this Sub-Fund. There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

Investments in environmentally sustainable investments may include investments in corporates of good governance, which do no harm and contribute positively to the fight against climate change (e.g. renewable energy, green building...), but which are not subject to EU requirement for reporting on their potential taxonomy alignment. It may also include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation.

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% up to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash and derivatives for share class hedging. There is no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - SWISS EQUITY
Legal entity identifier: O00000869_00000024

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective: %**

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: %**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the Swiss Performance Index (SPI), paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

This Sub-Fund also generally promotes investments in companies that protect biodiversity, cater to basic human needs, encourage sounder water and waste management, or enable the transition towards renewable energy with the common objective of transitioning towards a lower carbon economy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some mandatory principal adverse impacts from Table 1 of Annex 1 are taken into account primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas and have no exposure to thermal coal extraction as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Switzerland.

The ESG approach is embedded in the investment process of the Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for

risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also completely (or partially) excluded given their high carbon intensity:

- conventional oil & gas (revenue thresholds apply);
- unconventional oil and gas extraction and other unconventional oil and gas activities (revenue thresholds apply);
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO₂ emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions)
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, the Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy ranging from 0% up to 1%. This share could be difficult to quantify at this time, as it can represents activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under #2 Other” are cash held in the Sub-Fund’s portfolio for flows management purposes. There are no minimum environmental and social safeguards on the cash bucket.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - SWISS SMALL AND MID CAP EQUITY
Legal entity identifier: O00000869_00000097

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the Swiss Performance Index Extra (SPI Extra), paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

This Sub-Fund also generally promotes investments in companies that protect biodiversity, cater to basic human needs, encourage sounder water and waste management, or enable the transition towards renewable energy with the common objective of transitioning towards a lower carbon economy.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some mandatory principal adverse impacts from Table 1 of Annex 1 are taken into account primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

This Sub-Fund does not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, have no exposure to revenues from unconventional oil and gas extraction and limited exposure to other revenues associated to unconventional oil and gas and have no exposure to thermal coal extraction as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions) according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Switzerland.

The ESG approach is embedded in the investment process of this Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

This Sub-Fund is selecting stocks, primarily companies with market capitalisation between CHF 100'000'000 and CHF 10'000'000'000.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also completely (or partially) excluded given their high carbon intensity:

- conventional oil & gas (revenue thresholds apply);
- unconventional oil and gas extraction and other unconventional oil and gas activities (revenue thresholds apply);
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO₂ emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be in breach of international standards (UN Global Compact, UN Guiding Principles on Business and Human Rights, OECD Guidelines for Multinational Enterprises or ILO Conventions)
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, the Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy ranging from 0% up to 1%. This share could be difficult to quantify at this time, as it can represent activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% up to 1%. This share could be difficult to quantify at this time as it can represent

economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under #2 Other” are cash held in the Sub-Fund’s portfolio for flows management purposes. There are no minimum environmental and social safeguards on the cash bucket.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - SWISS VALUE CREATORS
Legal entity identifier: O00000869_00000154

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This Sub-Fund promotes environmental characteristics by targeting a lower carbon footprint than its benchmark, the Swiss Performance Index (SPI), paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy in order to maintain the Sub-Fund's weighted average carbon intensity below that of its benchmark.

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicator used for carbon footprint measurement is the weighted average carbon intensity, in tons of CO₂ per million of USD revenues.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

This Sub-Fund also generally promotes investments in companies that protect biodiversity, cater to basic human needs, encourage sounder water and waste management, or enable the transition towards renewable energy with the common objective of transitioning towards a lower carbon economy.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

To ensure sustainable investments that this Sub-Fund intends to make do not cause significant harm, the Investment Manager assesses whether these companies do no harm through an internally-designed methodology which covers principal adverse impact, controversies, misalignment with SDGs and ESG/governance quality.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Companies having a share of their revenues contributing to a sustainable environmental or social objective are assessed for avoidance of severe adverse impacts, provided that data is available and sufficient to make an informed decision.

Some mandatory principal adverse impacts from Table 1 of Annex 1 are taken into account primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe. For other mandatory PAIs not assessed via the Sub-Fund's exclusion list and norms-based screening, these are assessed for each sustainable investment relying on external data providers.

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

In order to be considered as sustainable investments in this Sub-Fund, the investments need to be compliant with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. For issuers not covered by external data providers the Investment Manager undertakes and documents its own analysis based on company filings and other sources.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, unconventional oil and gas extraction and thermal coal extraction as well as limited revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of UN Global Compact according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities, in addition to, on an ancillary basis, warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued primarily by companies (i) having their registered office, or (ii) carrying on a major part of their commercial activity, or (iii) as holding companies owning predominant interests in companies with their registered office in Switzerland. The Sub-Fund invests in a concentrated portfolio of large, mid and small cap companies with sustainably high levels of value creation (levels of Cash flow Returns on Investments (CFROI®) higher than the Cost of Capital (CoC). (Source: CFROI®).

The minimum market capitalisation of any security in the Sub-Fund's portfolio will be CHF 100'000'000.

The ESG approach is embedded in the investment process of this Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers' greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also partially excluded given their high carbon intensity:

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The following PAIs will be taken into account by the Investment Manager:

- GHG Intensity of Investee Companies (Scope 1 and 2): With the aim to limit the Sub-Fund's carbon footprint selected issuers should have limited exposure to conventional oil & gas revenues, unconventional oil and gas extraction and thermal coal extraction as well as limited revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas.
- UNGC Principles/OECD Guidelines Violations: Selected stock issuers should not be in breach of UN Global Compact according to the respective analyses by both external providers MSCI ESG Manager and Sustainalytics. In case a portfolio holding is “downgraded” as failing one of these global norms, the Investment Manager will have three months to sell its position, unless facing exceptional market/liquidity conditions, in which case the selling period could be extended in the best interests of the Sub-Fund's shareholders
- Controversial Weapons Exposure: Selected stock issuers should not be involved in controversial and nuclear weapons

Generally, the Investment Manager seeks to limit the main principal adverse impacts primarily through the investment research, the application of the exclusion list and of the norms-based screening. These are also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

What investment strategy does this financial product follow?

This Sub-Fund invests its net assets primarily in equities and other similar transferable securities of companies specializing in technology or technology-related industries. In addition thereto, on an ancillary basis, it may invest in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities, money market instruments, issued by technology companies worldwide (including Emerging countries).

This Sub-Fund is selecting technology or technology-related stocks world-wide, primarily companies which are expected to provide growth and leading (i.e. sustainably high quality) levels of cash flow return on investment (CFROI®) that are higher than the Cost of Capital (CoC) and which grow their asset base while maintaining this spread. (Source: CFROI® Credit Suisse HOLT). The investment strategy is focused on the sustainability of such return and growth profiles, and hence shall be long-term oriented with little need for turnover. Consequently, this Sub-Fund will be constituted as a high-quality, large market capitalization

equity portfolio invested in global leading technology companies (“leading” implies e.g. having a leadership position due to market share, innovation capabilities, brand recognition or superior management talents) combining superior returns and growth opportunities characteristics over the next 3-5 years.

The ESG approach is embedded in the investment process of this Sub-Fund and the selection of stocks includes ESG criteria. ESG considerations can be an important driver for risks associated with an investment and for maintaining or improving Cash Flow Returns on Investment (CFROI®) of a company.

ESG criteria have always formed an integral and necessary part of the investment process. The Investment Manager performs a negative screening and a norms- based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures. Company specific and portfolio factors including ESG developments are considered when monitoring the portfolio and deciding to exit positions. Through direct engagement with companies, and proxy voting according to the Voting Rights Policy, the Investment Manager ensures obligations as responsible shareholders are fulfilled.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding element of the investment strategy used to select the investments to attain the environmental characteristics promoted by this Sub-Fund is the objective of maintaining a weighted average carbon intensity lower than the benchmark at all time by paying attention to issuers’ greenhouse gas (GHG) emissions and climate strategy while selecting investments. In practice, the Investment Manager avoids or excludes stranded assets which intrinsically represent value destructive economic growth and pose systemic risks and liabilities e.g. coal and other hydrocarbon resources. Certain industry segments are also or partially excluded given their high carbon intensity:

- conventional oil & gas;
- unconventional oil and gas extraction and other unconventional oil and gas activities;
- thermal coal extraction or power generation derived from coal, nuclear sources or oil & gas.

Moreover, the potential CO₂ emission compensation cost increase is taken into account in the Investment Manager's proprietary forecasts of companies' cash flows that drives investment decisions.

There are other exclusions that are also binding. Namely, selected stock issuers should:

- not be in breach of UN Global Compact;
- not be involved in controversial weapons, nuclear weapons, tobacco production or adult entertainment production;
- have limited exposure to other weapons, other tobacco revenues and other adult entertainment revenues (revenue thresholds apply).

Finally, the ESG analysis should cover 100% of the Sub-Fund's portfolio equity holdings. For companies not covered by MSCI ESG Research or other data providers, the analysis is conducted by the Investment Manager.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are a prerequisite for companies' performance and in order to ensure the promotion of environmental and social characteristics and are an integral part of the Investment Manager's selection criteria. The Investment Manager assesses good governance practices through its fundamental research sourced from company meetings and publications, which is supplemented and cross-checked by ESG data from third-party service providers. Particular attention is paid to sound management structures, employee relations, remuneration of management and staff and tax compliance, notably as part of the proxy voting decisions. Moreover, the norms-based screening ensures that global norms are respected and enables to assess the responsible conduct of businesses and potential human rights violations. Engagement is also an integral part of the investment process and encompasses ESG aspects including governance practices.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product

This Sub-Fund intends to have a minimum of 90% of its assets aligned with the environmental and social characteristics promoted, including a minimum of 1% in environmentally and/or socially sustainable investments.

On an ancillary basis, this Sub-Fund may include investments not aligned with the environmental and social characteristics promoted, such as cash and derivatives used for share class hedging. These are not expected to have an impact on environmental and social characteristics of this Sub-Fund.

There are no minimum environmental or social safeguards on the cash portion.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment not only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to have taxonomy-aligned investments. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 1% and, jointly and in aggregate, hold a minimum of 1% in sustainable investments at all times

This Sub-Fund intends to have a minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy ranging from 0% up to 1%. This share could be difficult to quantify at this time, as it can represent activities not yet measured given the lack of reporting by companies at this stage, as well as economic activities that are not yet aligned with the Taxonomy regulation (remaining four environmental objectives).

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 1% sustainable investments at all times. This minimum share of 1% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities.

This Sub-Fund intends to have a minimum share of socially sustainable investments ranging from 0% up to 1%. This share could be difficult to quantify at this time as it can represent economic activities that are not yet measured given the lack of reporting by companies at this stage.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under #2 Other” are cash held in the Sub-Fund’s portfolio for flows management purposes. There are no minimum environmental and social safeguards on the cash bucket.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - MULTIFUNDS ALLOCATION RESPONSIBLE
Legal entity identifier: O00000869_00000093

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☒ ☐ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The principal objective of this actively managed Sub-Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component.

Through its selection process, this Sub-Fund is committed to investing primarily in funds compliant with Regulation (EU) 2019/2088 Article 8, which promote environmental and/or social characteristics, or Article 9, which have sustainable investments as their objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager has a fund of funds approach. As such, the measure is done through the monitoring of the underlying funds (amongst the article 8/9) to make sure they promote E/S characteristics, have sustainability indicators to measure the attainment of those E/S characteristics and respect their own principles towards E and S. At least two third of the Sub-Fund's exposure to underlying funds will be made of

funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in funds with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in funds with revenues from products or services for the treatment or diagnosis of major diseases of the world.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

As part of its due diligence selection process, the investment manager seeks to select funds which have set up a proper process to ensure that the sustainable investments they invest in do no significant harm. In addition, the Investment Manager will monitor that the aggregate Sub-Fund and the selected underlying funds comply with the EU's "Do No Significant Harm" principle applicable to sustainable investments.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

It is part of the process to select funds which take into account the possible adverse impacts on sustainability factors when selecting sustainable investments. In addition, the Investment Manager will monitor the indicators chosen by the relevant selected funds

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

It is part of the process to select funds which include norm-based screening in their investment process. In addition, the Investment Manager will monitor the exclusion policy - including norm-based exclusion - chosen by the relevant selected funds.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager through its due diligence process, seeks to favour, where possible, funds that consider PAI in their investment process.

What investment strategy does this financial product follow?

The principal objective of this Sub-Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component in order to provide investors with regular return, stability of the value while respecting the principle of diversifying investment risks.

Sustainable considerations are part of the fund selection and the Investment Manager's overall investment process. Funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainability research relies on the Investment Manager's proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management firms managing those funds. Results are confronted with third party ESG ratings. All intentionality indicators provided in regulatory filing such as the prospectus will be assessed during the qualitative due diligence as well as other requirements at company and fund levels. Based on relevant information provided by the third-party fund managers and on Investment Management's proprietary due diligence process, which covers the assessment of funds' Sustainability, its intentionality and materiality, integration of Sustainability considerations is done at 3 levels:

Level 1: Exclusion criteria (negative screening)

The exclusion of controversial activities/sectors is determined by the Investment Manager's Responsible Investment policy which is regularly adapted to reflect the changing market environment. More information about said Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

Level 2: Inclusion approach (positive screening)

The Investment Manager's investment process is based on qualitative assessment of all underlying funds. This Sub-Fund aims to responsibly capture sustainable opportunities by favoring strategies classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

Level 3: Portfolio construction

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

The Investment Manager actively engages with all funds in order to promote responsible investing and invite them to converge toward industry's highest standard in sustainable investing.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy***

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

Through the due diligence of the selected fund, the Investment Manager assesses the good governance practice of the selected fund with the possibility to engage at the asset management level.

What is the asset allocation planned for this financial product

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR), including a minimum of 10% in environmentally and/or socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product***

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to invest at least part of its assets in funds committed to own some environmentally sustainable investments aligned to the EU Taxonomy. However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 10% sustainable investments at all times. This minimum share of 10% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities and on the investee Sub-Funds' allocation. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 10% and, jointly and in aggregate, hold a minimum of 10% in sustainable investments at all times. Investments in environmentally sustainable investments may include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation.

What is the minimum share of socially sustainable investments?

This Sub-Fund will hold a minimum share of 10% sustainable investments at all times. This minimum share of 10% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities and on the investee Funds' allocation. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 10% and, jointly and in aggregate, hold a minimum of 10% in sustainable investments at all times.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash and derivatives for share class hedging. There is no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The principal objective of this actively managed Sub-Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component.

Through its selection process, this Sub-Fund is committed to investing primarily in funds compliant with Regulation (EU) 2019/2088 Article 8, which promote environmental and/or social characteristics, or which have sustainable investments as their objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager has a fund of funds approach. As such, the measure is done through the monitoring of the underlying funds (amongst the article 8/9) to make sure they promote E/S characteristics, have sustainability indicators to measure the attainment of those E/S characteristics and respect their own principles towards E and S. At least two third of the Sub-Fund's exposure to underlying funds will be made of

funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in funds with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in funds with revenues from products or services for the treatment or diagnosis of major diseases of the world.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

As part of its due diligence selection process, the investment manager seeks to select funds which have set up a proper process to ensure that the sustainable investments they invest in do no significant harm. In addition, the Investment Manager will monitor that the aggregate Sub-Fund and the selected underlying funds comply with the EU's "Do No Significant Harm" principle applicable to sustainable investments.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

It is part of the process to select funds which take into account the possible adverse impacts on sustainability factors when selecting sustainable investments. In addition, the Investment Manager will monitor the indicators chosen by the relevant selected funds

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

It is part of the process to select funds which include norm-based screening in their investment process. In addition, the Investment Manager will monitor the exclusion policy - including norm-based exclusion - chosen by the relevant selected funds.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager through its due diligence process, seeks to favour, where possible, funds that consider PAI in their investment process.

What investment strategy does this financial product follow?

The principal objective of this Sub-Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component in order to provide investors with regular return, stability of the value while respecting the principle of diversifying investment risks.

Sustainable considerations are part of the fund selection and the Investment Manager's overall investment process. Funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainability research relies on the Investment Manager's proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management firms managing those funds. Results are confronted with third party ESG ratings. All intentionality indicators provided in regulatory filing such as the prospectus will be assessed during the qualitative due diligence as well as other requirements at company and fund levels. Based on relevant information provided by the third-party fund managers and on Investment Management's proprietary due diligence process, which covers the assessment of funds' Sustainability, its intentionality and materiality, integration of Sustainability considerations is done at 3 levels:

Level 1: Exclusion criteria (negative screening)

The exclusion of controversial activities/sectors is determined by the Investment Manager's Responsible Investment policy which is regularly adapted to reflect the changing market environment. * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to invest at least part of its assets in funds committed to own some environmentally sustainable investments aligned to the EU Taxonomy, However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold a minimum share of 10% sustainable investments at all times. This minimum share of 10% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities and on the investee Sub-Funds' allocation. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 10% and, jointly and in aggregate, hold a minimum of 10% in sustainable investments at all times Investments in environmentally sustainable investments may include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation.

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 10% sustainable investments at all times. This minimum share of 10% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities and on the investee Funds' allocation. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 10% and, jointly and in aggregate, hold a minimum of 10% in sustainable investments at all times

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash and derivatives for share class hedging. There is no minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A

- *Where can the methodology used for the calculation of the designated index be found?*

N/A

SFDR SCHEDULE

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - MULTIFUNDS SECULAR TRENDS
Legal entity identifier: O00000869_00000132

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☐ ☒ No

- ☐ It will make a minimum of **sustainable investments with an environmental objective: %**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- ☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - ☒ with a social objective

- ☐ It will make a minimum of **sustainable investments with a social objective: %**

- ☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The principal objective of this actively managed Sub-Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of funds having a sustainability component.

Through its selection process, this Sub-Fund is committed to investing primarily in funds compliant with Regulation (EU) 2019/2088 Article 8, which promote environmental and/or social characteristics, or Article 9, which have sustainable investments as their objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager has a fund of funds approach. As such, the measure is done through the monitoring of the underlying funds (amongst the article 8/9) to make sure they promote E/S characteristics, have sustainability indicators to measure the attainment of those E/S characteristics and respect their own principles towards E and S. At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that this Sub-Fund partially intends to make may include but are not limited to:

- environmental such as climate change mitigation through resource efficiency: for example through investments in funds with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources
- social such as major disease treatment: for example through investments in funds with revenues from products or services for the treatment or diagnosis of major diseases of the world.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective***

As part of its due diligence selection process, the investment manager seeks to select funds which have set up a proper process to ensure that the sustainable investments they invest in do no significant harm. In addition, the Investment Manager will monitor that the aggregate Sub-Fund and the selected underlying funds comply with the EU's "Do No Significant Harm" principle applicable to sustainable investments.

↳ *How have the indicators for adverse impacts on sustainability factors been taken into account?*

It is part of the process to select funds which take into account the possible adverse impacts on sustainability factors when selecting sustainable investments. In addition, the Investment Manager will monitor the indicators chosen by the relevant selected funds

↳ *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details*

It is part of the process to select funds which include norm-based screening in their investment process. In addition, the Investment Manager will monitor the exclusion policy - including norm-based exclusion - chosen by the relevant selected funds.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Investment Manager through its due diligence process, seeks to favour, where possible, funds that consider PAI in their investment process.

What investment strategy does this financial product follow?

The principal objective of this Sub-Fund is to responsibly capture investment opportunities by investing its assets in a diversified portfolio of thematic funds having a sustainability component in order to provide investors with regular return, stability of the value while respecting the principle of diversifying investment risks.

Sustainable considerations are part of the fund selection and the Investment Manager's overall investment process. Thematic funds are selected in a multi-level review process based on both positive and negative criteria (exclusion). Sustainability research relies on the Investment Manager's proprietary ESG analysis which focuses on a thorough understanding of how responsible selected funds are but also the asset management firms managing those funds. Results are confronted with third party ESG ratings. All intentionality indicators provided in regulatory filing such as the prospectus will be assessed during the qualitative due diligence as well as other requirements at company and fund levels. Based on relevant information provided by the third-party fund managers and on Investment Management's proprietary due diligence process, which covers the assessment of funds' Sustainability, its intentionality and materiality, integration of Sustainability considerations is done at 3 levels:

Level 1: Exclusion criteria (negative screening)

The exclusion of controversial activities/sectors is determined by the Investment Manager's Responsible Investment policy which is regularly adapted to reflect the changing market environment. More information about said Responsible Investment policy is available on <https://www.ubp.com/en/investment-expertise/responsible-investment>

Level 2: Inclusion approach (positive screening)

The Investment Manager's investment process is based on qualitative assessment of all underlying funds. This Sub-Fund aims to responsibly capture sustainable opportunities by favoring strategies classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

Level 3: Portfolio construction

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

The Investment Manager actively engages with all funds in order to promote responsible investing and invite them to converge toward industry's highest standard in sustainable investing.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR).

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy**

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- **What is the policy to assess good governance practices of the investee companies?**

Through the due diligence of the selected fund, the Investment Manager assesses the good governance practice of the selected fund with the possibility to engage at the asset management level.

What is the asset allocation planned for this financial product

At least two third of the Sub-Fund's exposure to underlying funds will be made of funds classified as Article 8 and 9 products under the EU Sustainable Finance Disclosure Regulation (SFDR), including a minimum of 20% in environmentally and/or socially sustainable investments.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product**

N/A

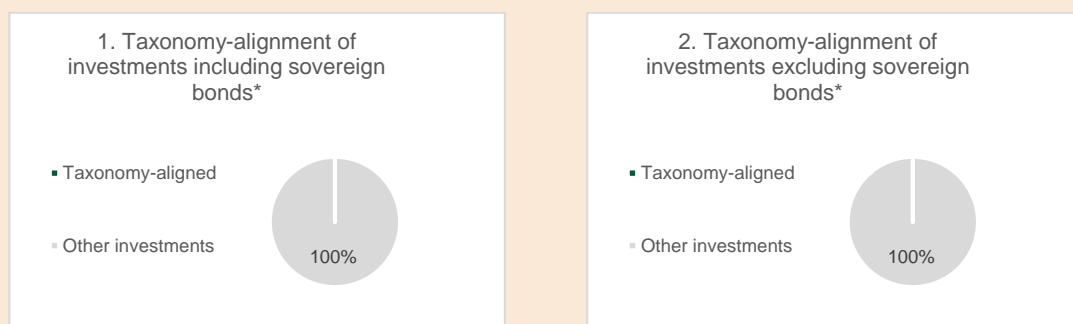

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

This Sub-Fund commits to invest at least part of its assets in funds committed to own some environmentally sustainable investments aligned to the EU Taxonomy, However, being mindful of the current lack of reported taxonomy-alignment data, the current commitment is 0% and is expected to increase over time as data availability increases.

The share of investments in transitional and enabling activities will be dependent on investment opportunities over time, hence the minimum for each activity type is 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This Sub-Fund will hold at all times a minimum share of 20% sustainable investments. This minimum share of 20% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities and on the investee Sub-Funds' allocation. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 20% and, jointly and in aggregate, hold a minimum of 20% in sustainable investments at all times Investments in environmentally sustainable investments may include investments in corporates of good governance, which do no harm and contribute positively to the environment (e.g. water management) which are not yet covered by the taxonomy regulation.

What is the minimum share of socially sustainable investments

This Sub-Fund will hold a minimum share of 20% sustainable investments at all times. This minimum share of 20% will be split between the three following buckets: taxonomy-aligned investments, other environmentally sustainable investments and socially sustainable investments, in proportions that may vary over time, depending on investments opportunities and on the investee Funds' allocation. Therefore, each of these buckets may individually hold a minimum share of sustainable investments ranging from 0% up to 20% and, jointly and in aggregate, hold a minimum of 20% in sustainable investments at all times

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash and derivatives for share class hedging. There is no minimum environmental or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes

No

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A

- *How does the designated index differ from a relevant broad market index?*

N/A
