Introduction

This Solvency and Financial Condition Report has been prepared in line with the requirements of the Solvency II Regulations, to assist clients of Lombard International Assurance S.A. ("the Company") and other relevant stakeholders in understanding the nature of its business, how it is managed, and its solvency position.

This Solvency and Financial Condition Report ("SFCR") covers the Company. In particular this report includes full reporting of the Solvency II valuation undertaken at 31 December 2022, and the associated capital position for the Company. Those results are also presented in the Quantitative Reporting Templates ("QRTs") that can be found in the Appendix to this report.

Business Overview

Lombard International Assurance S.A. (the "Company") is a leading provider of global wealth and succession planning solutions with over 30 years' experience. It has the strength and expertise to help high net worth ("HNW") and ultra high net worth ("UHNW") individuals and their families protect, preserve and pass on their legacy to future generations.

The business specialises in addressing the complex needs of high net worth clients. Whether that means providing solutions that enable cross-border wealth planning, the transfer of wealth between generations or structuring investments in unquoted assets.

The Company safeguards legacies and helps deliver better economic outcomes for clients. Lombard International Assurance's wealth planning experts and sophisticated technology platforms support customers in designing innovative solutions that allow them to prepare for the future in an uncertain world.

The Company serves over 25 markets across Europe, Latin America and Asia, providing multijurisdictional unit-linked life insurance on a global basis, with a deep understanding of local regulations, cultures and attitudes.

Funds managed by Blackstone Group L.P. own Lombard International Group. Blackstone Group L.P. is one of the world's leading investment firms with \$975 billion in assets under management as at 31 December 2022.

2022 Business Performance

Following another eventful year, the international economic and geopolitical landscape remains in a state of flux. In this current environment, while the expectations of wealth advisers, their clients and our own workforce continue to evolve at speed, the need for expert advice, to protect, preserve and pass on wealth will only continue to grow. This is where the very essence of the core purpose of 'making legacy count' comes to the fore.

After a strong 2021, last year continued in a similar manner, marking the Company's second-best year on record in terms of new business premium inflows.

The business delivered €4.6 billion of new premium income, with assets under administration ("AuA") of €44.7 billion as at 31 December 2022. This strong performance was achieved with noteworthy contributions from a number of core markets including France, Italy, Sweden, Portugal and the United Kingdom.

Our people are the Company's strongest asset and Lombard International Assurance is widely, and rightly, recognised as being home to some of the best talent and expertise in the market. Maintaining this, in 2023 and beyond, is a business imperative. As part of our comprehensive people and talent management plans, we continue to invest in training, encouraging and supporting our colleagues to broaden their expertise and skills.

Our robust, cross-border wealth, estate, and succession planning solutions for Upper Affluent, HNW and UHNW families remain best in class, delivered by our expert team of leaders and innovators across geographies. Last year we continued to be recognised by the industry for our market leading solutions. We secured "Most Effective Investment Service Offering" at the 2022 edition of the Private Banker International Global Wealth Awards. Most recently we have been awarded "Best Financial Services Group Europe" for the third consecutive year at the 2023 Global Banking & Finance Review awards, along with winning "Decade of Excellence Financial Services Group Europe".

The Company's strong new business performance further highlights the success and importance of its long-term strategy of continuing to invest in building a sustainable business and forging strong partnerships that supports its current and future clients across the geographies it serves.

Our approach to ESG

Like the wider industry, the business has been working to determine its Environmental, Social, and Governance ("ESG") targets, how it gets there, and how far along we are on that journey. In 2022 the Company published its approach to ESG, an inaugural paper outlining the Company's ESG journey, as well as its pathway to sustainability.

As we look ahead, UHNW/HNW individuals and families' expectations continue to evolve when it comes to ESG and sustainability. Legislation and regulatory requirements are also progressing at pace, with the Sustainable Finance Disclosure Regulation ("SFDR") Regulatory Technical Standards finally coming into force in January 2023. Our role is to support our partners and facilitate the increased appetite from clients for more sustainable investment options. We will be publishing an update to our "Approach to ESG" later this year.

Priorities for the year ahead

In 2022, the Company delivered strongly for its partners and clients. In 2023, the Company will continue to further enhance its business strategy and grow its business in each of its core markets.

The Company will also continue to invest in upgrading its processes and systems, enhancing its digital infrastructure and related offerings, as well as boosting its operational delivery.

It is well positioned, financially strong and fully equipped to deliver continued growth and value to its partners and clients.

In these times of uncertainty, more than ever, the Company's in-depth local expertise, combined with our leading cross-border solutions, are in demand. The Company is in robust health and financially strong as it continues to build excellent momentum and presence in its specialised sector.

Summary

This report covers the Business and Performance of the Company, its system of Governance, Risk Profile, Valuation for Solvency II Purposes and Capital Management. The ultimate administrative body with responsibility for all of these matters is the Company's Board of Directors ("BoD"), with the help of various governance and control functions that it has put in place to monitor and manage the business.

Business performance

The following table shows the growth in the AuA during 2022:

<u>Insurance Business AUA €m</u>	31 Dec. 2022	31 Dec. 2021
Opening	48,113.7	39,498.5
Gross Inflow	4,584.1	5,270.8
Outflow	(3,062.7)	(2,231.8)
Investment Return	(4,993.1)	5,576.2
Closing	44,642.0	48,113.7

The following table shows the solvency position as at 31 December 2022:

<u>Solvency €m</u>	31 Dec. 2022	<u>31 Dec. 2021</u>
Solvency Own Fund (A)	665.3	660.8
Solvency Capital Requirement (B)	482.4	524.2
Solvency II Free Assets (A-B)	182.9	136.6
Solvency Ratio (A/B)	137.9%	126.0%

The Company's Chief Financial Officer, Rui Pinto; Chief Actuary, Edward Maguire; and Chief Risk Officer, Ralph Ehrhard, confirm that, to the best of their knowledge:

- a) Throughout the financial year in question, the Company has complied in all material respects with the requirements of Solvency II Regulations as applicable; and
- b) It is reasonable to believe that, at the date of the publication of the SFCR, the Company continues to comply, and will continue to comply in future.

A. Business Performance

The business of the Company is predominantly the provision of unit-linked insurance contracts to high net worth and ultra high net worth clients.

A.1 Business

A.1.1 Name and legal form of the undertaking

Lombard International Assurance S.A. is incorporated in Luxembourg and is a company limited by shares ("Société Anonyme"). The Company's registered address is 4, rue Lou Hemmer, L-1748 Luxembourg.

A.1.2 Supervision

Under Solvency II, the Company is supervised by the Commissariat aux Assurances ("CAA") in Luxembourg. The CAA may be contacted at 11, rue Robert Stumper, L-2557 Luxembourg.

A.1.3 Position within the legal structure of the Group

The Company is an undertaking of Lombard International Assurance Holdings S.à r.l. ("LIAH"), the ultimate insurance holding company which has its head office in an EEA State, Luxembourg.

A.1.4 Holders of qualifying holdings in the undertaking

The person(s), to the knowledge of the Company, who were direct and indirect holders of qualifying holdings in the Company at any time during the reporting period and at the end of the financial year was LIAH, a private limited liability company incorporated in Luxembourg.

As at the reporting date, LIAH owned 100% of the shares of the Company and was able to exercise 100% of the voting power at any general meeting.

A.1.5 External auditor of the undertaking

The independent auditor of the Company is Ernst & Young, Société Anonyme, 35E, Avenue John F. Kennedy, L-1855 Luxembourg.

A.1.6 Material Lines of Business and Material Geographical Areas

The Company's primary business is unit-linked insurance.

The Company offers wealth structuring solutions in a number of key markets including Italy, France, the UK, Sweden and Belgium as well as a number of other jurisdictions.

A.1.7 Full Time Equivalent Employees

The number of Full Time Equivalent ("FTE") employees is 406.

¹ Average number of FTE during 2022.

A.2 Underwriting performance

The Company writes unit-linked insurance and life protection policies, and therefore has two lines of business under Solvency II: life and index-linked and unit-linked insurance. The unit-linked business has very low levels of insurance risk. In addition, the Company utilises reinsurance to limit its overall risk exposure as well as to reduce the volatility of its underwriting performance.

The table below shows the Company's premiums and claims for the year ended 31 December 2022:

<u>Premiums and claims €m</u>	31 Dec. 2022	<u>31 Dec. 2021</u>
Gross Premiums Written	4,584.1	5,270.8
Reinsurers' Share	3.1	1.9
Net	4,581.0	5,268.9
Gross Claims Incurred	3,061.2	2,230.6
Reinsurers' Share	0.0	0.0
Net	3,061.2	2,230.6

A.3 Investment performance

The Company conducts the business of writing unit-linked life insurance policies. In general, the investment performance of assets is passed on to clients through an equivalent variation in client benefits. Any change in benefits results in a proportionate variation in the administration fees, but the Company's matching policy ensures that at all times assets are in place to meet client liabilities.

Excess assets held by the Company are invested in short-term money market funds, which provide access to a diversified pool of high credit-quality assets. The expected investment return of these assets is low, because focus is on security rather than yield.

The tables below show the Company's investment income and investment charges for the year ended 31 December 2022:

<u>Investment Income €m</u>	31 Dec. 2022	31 Dec. 2021
Income From Participating Interests	3.4	0.9
Income From Affiliated Undertakings	0.0	0.0
Income From Other Investments	678.1	606.8
Realised Gains On Investments	2,063.2	2,621.6
Unrealised Gains On Investments	713.2	5,369.6
Total Investment Income	3,457.9	8,598.9
<u>Investment Charges €m</u>	31 Dec. 2022	<u>31 Dec. 2021</u>
Investment Management Charges	167.0	170.1
Realised Losses On The Sale Of Investments	2,199.6	1,080.8
Unrealised Losses On Investments	5,944.1	1,629.7
Total Investment Charges	8,310.7	2,880.6

The main driver of the negative performance during 2022 was the global decline of financial markets.

A.4 Performance of other activities

The Company does not perform any other activity.

B. System of Governance

B.1 General information on the System of Governance

B.1.1 Introduction

In order to ensure that risk management is appropriately embedded in the decision making process, the Company has implemented an efficient risk oversight conducted by governing bodies and adequate delegation of authorities. The Company has adopted the following risk governance structure, in line with the delegation of authorities from the BoD:

The BoD has overall responsibility for the management of risks. It has appointed three sub-committees to focus on specialised matters as follows:

- The RCC assists the BoD in fulfilling its governance responsibility for internal control, compliance monitoring and risk management;
- The AC assists the BoD in fulfilling its governance responsibility for financial reporting, and internal and external
 audit: and
- The Rem/NomCo assists the BoD in reviewing remuneration programs in accordance with business objectives and
 risk exposure.

The BoD further delegates authority to Management to carry out its strategy and the priorities as defined by it which include, among others:

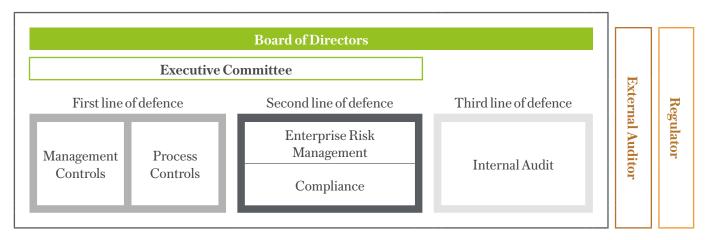

- Implementation of Board-approved corporate strategy;
- Management and supervision of commercial, operational and financial performance;
- $\bullet \quad \text{Development and implementation of policies and procedures to further corporate objectives};\\$
- Risk management and control;
- · Human Resources: planning management and control.

The ExCo is directly appointed by the BoD to carry out the BoD strategy. The ExCo is responsible for the overall leadership and management of the Company with the authority to make all decisions in matters delegated to it by the BoD. The ExCo delegated authority to sub-committees as follows:

- The ROC ensures that critical risks are identified, assessed, monitored and managed by appropriate control processes;
- The IOC oversees the risk management processes in relation to client investment risks as well as for the operational set-up related to client investments;
- The BAC assesses the overall risk of specific policy application files and decides on their acceptance or rejection, considering the risk appetite of the Company;
- The POC, is responsible for the product lifecycle, from analysis and design to development, launch, maintenance and review.

The Company's Governance Framework operates as a "three-lines-of-defence" model, in line with prudent market practices:

- The first line of defence is made up of the departmental management. Business unit managers and directors are accountable for the risks they run, and for the compliance and control environment in their units. They are supported by appointed risk-matter experts.
- The second line of defence is composed of Risk and Compliance. More information is available under Section B4.
- The third line of defence is assumed by Internal Audit. More information is available under Section B5.

There were no changes in the composition of the Company's BoD in 2022. The main change in the Corporate Governance relates to the establishment of a stand-alone audit and risk/compliance committees, which resulted in the division of the former Audit and Risk Committee into two parts: (i) Risk and Compliance Committee; and (ii) Audit Committee. Such new structure was established in September 2022.

B.1.2 Remuneration policy

The remuneration policy, in compliance with applicable regulatory requirements and best market practice, discourages risk taking beyond defined risk appetite, prevents non-sustainable decision making and avoids situations of conflict of interest.

Compensation schemes are designed to take account of competences required, evaluations, skills and performance.

The Company ensures equal, controlled and compliant remuneration practices that result in preventing non-sustainable business decisions, decisions in conflict with its clients' interests, risk taking outside of the risk appetite, fines from the Regulator(s), loss and/or demotivation of staff members. The Company is risk-averse to these risks, including sustainability risk such as environmental, social or governance events or conditions that, if occur, could cause an actual or a potential impact on the Company.

This policy applies to all staff members, with specific provisions for material risk takers.

The remuneration framework:

- ensures that remuneration is adequate and linked to the mandate of the individual;
- rewards the overall delivery of the business strategy, the achievement of financial results and long-term growth and sustainability;
- aims at paying fair base pay, based on market practice, and at recognising and rewarding collective and individual performance via variable remuneration;
- · encourages sound corporate governance and a strict compliance with internal rules and procedures;
- does not reward excessive risk taking outside of confirmed risk appetite;
- considers the principle of proportionality in defining the remuneration principles in such a way as to take into account the internal organisation and the nature, the scale and the complexity of the risks inherent to the business.

The remuneration includes:

- fixed remuneration:
- annual discretionary variable remuneration depending on the Company results and the performance of the employee. For material risk takers, a deferral mechanism is applied.

The individual performance assessment is subject to calibration sessions pursuing the following objectives:

- a consistent approach throughout the Company;
- relevance of the criteria used to evaluate performance;
- application of a fair process;
- · a dedicated conversation around low and high performers.

B.1.3 Material transactions

B.2 Fit and proper requirement

B.2.1 Specific requirements

The Fit & Proper Policy specifies the principles by which the Company, its subsidiaries, branches and related entities ensure that all Board Members, ExCo members including the Managing Director, all Key Function Holders and all Authorized Signatories are expected to demonstrate their fitness and propriety ("Fit and Proper") for performing their role pursuant to the regulations and the principles for what is deemed Fit and Proper therein.

The Managing Director, through the company secretarial team, must notify the Regulator of any changes to the identity of any Individuals in Scope with all the information needed to confirm these persons are Fit and Proper for the roles they will be fulfilling.

Any temporary replacement (termination or prolonged absence) shall be notified to the Regulator with a foreseeable date of actual replacement, which should not be longer than 12 months after the termination.

B.2.2 Process of assessing fit and proper requirements

Key Function Holders² (the "Individuals in scope") are subject to a Fit and Proper assessment based on the fitness and propriety criteria outlined below and that is performed by the Human Resources team with support from the relevant ExCo members and Compliance department, as needed (in case any conflicts of interest or independence issues arise):

- a) **Experience and qualifications:** taking into account the nature, scale and complexity of the business and the responsibilities of the position concerned.
- b) Good reputation: assessing reputation regardless of the nature, scale and complexity of the business and/or role.
- $\begin{tabular}{ll} c & \begin{tabular}{ll} Governance and Independence: when performing the assessment on the suitability of the Individuals in Scope, the overall functioning of the role within the corporate governance has to be assessed. \end{tabular}$

Assessments must be performed prior to the recruitment and/or in case of appointment at the ExCo or Board level, periodically (every 3 years) to ensure that Individuals in Scope are and remain Fit and Proper. It is the responsibility of each Individual in Scope to inform Human Resources of any event which may affect their suitability and declare any conflict of interest to the Compliance function as per the Conflict of Interest Policy. These events and/or conflict of interest may trigger a new Fit and Proper assessment.

Any Appointment of an Individual in Scope is done by the Board based on a written Fit and Proper report or may be granted conditionally, pending completion of a Fit and Proper assessment at the discretion of the Board.

Individuals in Scope and Authorized signatories no longer fulfilling the Fit and Proper requirements as from a particular point in time can no longer remain in such role or keep their signature power unless the requirements can and will be met again within one month.

B.3 Risk management system including the Own Risk and Solvency Assessment ("ORSA")

B.3.1 Risk Management

The roles, responsibilities, authorities, objectives and scope of the Risk Function in relation to the risk and control activities performed within the Company are outlined in the Risk & Control Charter.

The Company has developed the processes and procedures that are used to identify, assess, monitor, manage and report the short and long term risks that the Company faces, and to determine the capital required to ensure that its overall solvency needs are met at all times.

Enterprise Risk Management Framework

The Enterprise Risk Management ("ERM") Framework describes the processes in which all departments are involved within the scope of their tasks and the support the Risk Function provides in its global risk management activities.

As with all insurance undertakings, the Company faces different risks which are spread across the organisation. These risks are internally classified in three main categories: strategic risks, financial risks and operational risks. The latter also include sustainability risks, such as environmental, social or governance events or conditions that, if they occur, could have an actual or potential impact on the Company. To manage these risks, the Company has defined a risk strategy which is formalised through its Risk Appetite Statement.

This Risk Appetite is further translated and articulated in a number of corporate policies and procedures compliant with all regulations in force, which document the risk governance, mitigation and controls in place to address its major risks.

The Company's risk management processes are built, as below illustrated, to meet the risk identification, assessment, response, monitoring and escalation requirements.

² Individuals in scope are as follows: Board Members, Executive Committee members including the Managing Director, Chief Risk Officer, Chief Compliance Officer, Money Laundering Reporting Officer, Deputy Money Laundering Reporting Officer, Chief Internal Auditor, Chief Actuary; and Person(s) Responsible for the Distribution of the Company's products.

External Threats and Opportunities Monitoring process: This process is designed to ensure Company-wide early awareness of external threats and opportunities, including legal or regulatory changes. It allows for both expert and business input in the assessment of these threats and opportunities and on the appropriateness of associated mitigation steps. Finally, the process ensures an audit trail of the agreed risk strategy and mitigating actions.

Risk and Control Assessment process: Objective of this process is to provide a regular assessment of individual risks taking into account the existing risk exposure and effectiveness of controls and mitigating actions in place. For risks assessed as being beyond the risk appetite, mitigating actions are identified and implemented.

Key Risk Indicators Monitoring process: Key Risk Indicators are identified and measured to monitor, on an ongoing basis, risk exposure versus risk appetite. These can either be internal or external indicators. Targets have been defined, and when breached, rationale is investigated and mitigating actions are identified and implemented, where relevant.

Operational Incident Collection process: There is a logging and escalation process, available for every employee of the Company, to report any operational incident including control failures. Material operational incidents are investigated for root-cause analysis and lessons learnt. Corrective and preventive actions are established when necessary. Trend analysis is also performed based on incident data to surface and prevent non-material but recurrent issues.

Management Action Tracking process: All risk management actions coming from any ERM processes or risk governance meetings are centralised in a dedicated tool. Deadline rebasing is subject to restrictive rules managed by the Risk Function. Objective being to ensure that risks are appropriately and timely mitigated.

Outputs of all the above-mentioned processes contribute to the production of the "Corporate Risk" report which is provided on a quarterly basis to support the Non-Executive Audit and Risk Committee in its risk oversight duty.

This integrated ERM framework is embedded at the heart of the key decision making process. All key decisions made in the Company such as product initiatives, new projects, capital management, reinsurance arrangement review, investment strategy, marketing strategy and distribution strategy follow internal governance processes, which include an assessment of the risk exposure, mitigation strategies and a need for an ad hoc ORSA.

B.3.2 Own Risk and Solvency Assessment

In compliance with the applicable local law and European Solvency II requirements, overall performance of the ORSA requires the combination of multiple pieces of information coming from existing processes in the organisation. Overall ORSA process is coordinated by the Risk Function throughout the year.

Based on the CAA authorization on 7 May 2018, no separate ORSA report is prepared for the Company. Outcomes of the ORSA process are summarised in the ORSA Report and ORSA Supervisory Report of LIAH. The reports are reviewed and approved by the Board of Managers of LIAH and submitted to the CAA.

Before submission to the Board of Managers, the ROC validates and the RCC reviews the ORSA report, in order to confirm that:

- a suitable assessment of the risk profile and overall on-going solvency needs has been conducted;
- appropriate processes are in place to properly identify, assess, manage and monitor the risks and solvency position, including appropriate risk governance and risk awareness;
- the entity is projecting to have sufficient internal capital and liquidity to meet its solvency needs and obligations to policyholders over the business planning period, including stressed situations.

The ORSA is an integral part of the business strategy and is taken into account, on an on-going basis, in the making of strategic decisions and in planning processes. Since 2022, the ORSA also includes a detailed analysis of climate change risks and the potential implications for the Company.

Comprehensive management reporting ensures that the significant parameters of the ORSA are consistently monitored and reported regularly to the ExCo, the ROC and/or the RCC. This includes performance against regulatory and internal capital and liquidity requirements and performance against the risk strategy under the ORSA planning horizon.

As per the ORSA procedure and due to its evolving nature (based on business mix, environment factors, etc.), the Company has identified the material events that might trigger a re-evaluation and new iteration of the ORSA. This encompasses both internal and external triggers. Material risk profile changes captured through product initiatives, new projects, capital management changes, reinsurance arrangement reviews, investment strategy changes, marketing and distribution strategy changes already foresee in their operational processing an assessment for potential ORSA impacts where significant.

B.4 Internal Control System

The Company's Internal Control System aims at ensuring:

- that the Company adheres to applicable laws and regulations;
- that the instructions (including corporate policies and guidelines) issued by executive management are adequately implemented;
- that the Company's internal processes are in line with professional and ethical standards;
- the reliability of reporting, information and communication.

B.4.1 Internal Control

The Company has established an Internal Control Framework which is owned by the Risk Function as part of the second line of defence. The aim of the framework is to enhance and protect organisational value by providing the executive management with risk-based, independent and objective assurance on the design and effectiveness of the controls.

Regular reports are provided to the ROC and RCC contributing to the strengthening of the implemented control system.

Overall the Internal Control Framework brings ongoing assurance to the Company by monitoring on a regular basis its business activities and their effectiveness.

B.4.2 Compliance

Similarly to the Risk Function, the Compliance Function forms an integral part of the Internal Control System and operates on the second line of defence.

The roles, responsibilities, authorities, objectives and scope of the Compliance Function in relation to the compliance activities performed within the Company are outlined in the Compliance Charter.

The objectives of the Compliance Function are to:

- Act as an adviser in compliance matters within the organisation;
- Identify and assess the possible impact of any change in the legal environment on the operations of the Company;
- Assess the compliance risks of the Company;
- Organise, coordinate and structure compliance-related controls;
- Report accordingly to executive management, the ROC and the BoD directly or through the RCC.

The Compliance Function focuses on compliance risks, which are defined as the risks the Company may suffer following a failure to conduct business in accordance with the regulatory rules in force.

The main compliance risks are as follows:

- legal and regulatory risks;
- risk of sanctions;
- · reputation risk;
- risk of breach of ethical rules;
- risk of breach of the Company's policies and requirements.

Matters that fall under the Compliance Function's competence and/or scope are the following:

- Prevention of money laundering and terrorism financing;
- Market abuse, insider trading and insider dealing prevention;
- Clients interest protection;
- Monitoring of complaints management;
- Data protection and respect of professional secrecy;
- Prevention and management of conflicts of interest;
- Prevention of bribery, fraud, tax fraud and corruption;
- Inducements;
- Information security;
- Distribution network and activities;
- Policy Assets and Money;
- Policy Assets Compliance Management;
- Non-Traditional Assets:
- Product Oversight and Governance;
- · Record keeping;
- Swiss visits notification;
- Corporate tax reporting;
- Policy tax reporting;
- Remuneration policy and Fit and proper;
- Outsourcing;
- Pre-contractual documentation ("PRIIPs");
- Respect of Ethics and Deontology rules;
- $\bullet \quad Regulatory \ reporting-adherence \ to \ deadlines \ and \ completeness \ of \ reports \ submitted \ to \ the \ regulators;$
- Any change in the legal environment on the operations of the company.

The Compliance Function brings ongoing assurance to the Company by monitoring its key regulatory requirements as defined in the Compliance Risk Assessment and Compliance Monitoring Plan. The Compliance Function also, supervises the adherence to the regulatory reporting deadlines, by the relevant departments, of the regulatory reporting identified and scoped with the support of Legal and Wealth Structuring Solutions. Regulatory reporting governance oversight excludes corporate tax & VAT as well as policyholder tax reporting that falls under the direct oversight of Finance.

The External Threats & Opportunities Monitoring process monitoring cross-border regulatory changes (i.e. Regulatory Watch) is coordinated by the Compliance Function with the support of Regulatory Affairs.

In consideration of proportionality and subject matter expertise, the Compliance Function may delegate day-to-day management and responsibility to other functions while retaining oversight responsibility.

B.5 Internal Audit Function

B.5.1 Implementation

The position of the Internal Audit Function within the organization and its powers and responsibilities are outlined in the Internal Audit Charter, which sets out the role, authorities, objectives and scope of the Internal Audit Function in relation to the internal audit activity within the Company.

The purpose of the Internal Audit Function is to provide independent, objective assurance and consulting services designed to add value and improve the Company's operations. The mission of internal audit is to enhance and protect organizational value by providing risk-based and objective assurance, advice, and insight to the BoD via the AC and executive management.

The Head of Internal Audit submits, at least annually, a risk-based 12-month audit plan and a 4-year plan to the AC for approval. The plan can be revised and adjusted as necessary, in response to changes in the Company's business, risks, operations, programs, systems and controls.

Based on the annual plan, the internal audit activity evaluates the adequacy and effectiveness of controls encompassing the governance, operations, and information systems. This includes:

- Adequacy and effectiveness of risk management and control across the entire business;
- · Monitoring of compliance with the laws and regulations;
- Adequacy of the administrative, accounting and IT organisation;
- · Safeguarding of securities and assets;
- Adequacy of the segregation of duties and of the execution of transactions;
- Accurate and complete registration of the transactions and the provision of accurate, complete, relevant and
 understandable information available without delay to the Board, specialised committees and, where appropriate,
 Senior Management and the Regulators;
- Implementation of the decisions taken by the executive management and by the persons acting by delegation and under its responsibility;
- Compliance with the procedures governing the solvency or prudential regime;
- Operation and effectiveness of the second line functions.

B.5.2 Independence from other functions

Internal Audit remains free from all conditions that threaten the ability of internal auditors to carry out their responsibilities in an unbiased manner, including matters of audit selection, scope, procedures, frequency, timing, and report content.

The Head of Internal Audit reports administratively to the Managing Director of Lombard International Assurance S.A and functionally to the Chairperson of the AC, with whom direct bilateral meetings take place at least on a quarterly basis. The absence of direct operational responsibility or authority over any of the activities audited, together with this reporting structure ensures independence.

B.6 Actuarial Function

Responsibilities and scope of the activities performed by the Actuarial Function are described in the Company's Actuarial Charter. Key responsibilities and tasks include:

- Coordinate the calculation of the technical provisions, the best estimates and the regulatory capital requirements according to the provisions of prevailing regulation, ensuring appropriateness of methodologies and assumptions used and assessing the sufficiency and quality of related data, models and assumptions.
- Express an opinion on the underwriting policy and the adequacy of reinsurance agreements.
- Inform and advise the governing bodies on the above elements.
- Contribute to the effective implementation of the risk management system.
- Contribute to the monitoring of the profitability of new business.

B.7 Outsourcing

When choosing an outsourcing provider for any critical or important function or activity, the Company carries out all necessary steps to ensure that:

- a detailed examination is performed of the potential service providers' ability and capacity to deliver the required functions or activities satisfactorily, taking into account the objectives and needs;
- the service provider has adopted all means to ensure that no explicit or potential conflict of interest with the entity impairs the needs of the outsourcing provider undertaking;
- the outsourcing provider has the necessary financial resources to perform additional tasks in a proper and reliable way, and that all staff of the service provider who will be involved in providing the outsourced functions or activities are sufficiently qualified and reliable;
- the entity enters into a written agreement with the outsourcing provider which clearly allocates the respective rights and obligations of the entity and the outsourcing provider (even for intragroup outsourcing);
- the general terms and conditions of the outsourcing provider agreement are authorized and understood by the entity's management;
- the Company includes in its risk management systems and controls a process for monitoring and reviewing the quality and performance of the services provided according to the agreement;
- the outsourcing activity does not represent a breach of any data protection regulation or any other laws;
- the outsourcing provider is subject to the same provisions that are applicable to the entity regarding the safety and the confidentiality of the information related to its clients;
- the Company considers in its own contingency planning the possibility of having to face an emergency situation or business disruption arising from a failure or a problem of the outsourcing provided;
- the Company has to notify the supervisory authorities, in a timely manner, prior to the outsourcing of material (critical or important) functions or activities as well as any subsequent material developments with respect to those functions or activities;
- there are rules in place covering cloud outsourcing.

The table below lists the activities outsourced:

Activity	Jurisdiction	Internal / External
Fund Administration of Internal Collective Funds	Luxembourg	External
Creation, maintenance and printing of clients' communication and marketing communication	Luxembourg	External
Archiving management	Luxembourg	External
Payroll services	Luxembourg	External
Software Platform for creation and maintenance of pre-contractual documentation (Key Information Documents)	Italy	External
Tax services (submission of tax forms and tax payments where required)	France Italy Cyprus Malta Spain Portugal Greece	External
Tax services - Reporting solution	Luxembourg	External

C. Risk Profile

C.1 Underwriting risk

The level of insurance risk in the Company is immaterial. The death benefit on investment products is generally limited to 1% of invested assets and extensive use is made of reinsurance. The life protection product is fully reinsured.

C.2 Market risk

The unit-linked nature of the Company's products means market risk is borne by the policyholder. Investment procedures for the shareholder assets serve to minimise market risk.

C.3 Credit risk

Credit risk arises principally through exposure to debt security investments, bank deposits, derivative counterparties, and reinsurance counterparties, insurance and investment contracts receivables.

The Company has adopted a risk averse approach to such risks and has a stated policy of not actively pursuing or accepting credit risk.

C.4 Liquidity risk

The Company ensures that it maintains sufficient financial resources to meet its obligations as they fall due through the application of a liquidity risk policy and through the development of its liquidity risk management plan.

C.5 Operational risk

The residual risks are operational risks covering regulatory, litigation and taxation. Operational risks are assessed, monitored and minimised through the ERM and Internal Control processes wherever possible.

C.6 Other material risks

No other material risks.

C.7 Any other information

As part of the Company's ongoing risk management approach the Company performs a range of stress and scenario tests, reporting on the output as part of ORSA. The stress and scenario testing comprises two elements:

- sensitivity and stress testing of the financial and capital position to changes in key modelling assumptions;
- exploration of plausible adverse scenarios that may arise in the normal course of business these are derived from the
 key drivers of business and the schedule of significant risks to the Company. Where possible the Company undertakes
 quantitative analysis of solvency and profit and loss impacts, augmented with qualitative analysis if modelling is not
 appropriate. This scenario testing also includes analysis of new risks emerging in the business and a programme of
 reverse stress testing.

D. Valuation for Solvency Purposes

D.1 Assets

<u>Assets €m (31 Dec. 2022)</u>	Luxembourg GAAP ³	Adjustments	Solvency II 31 Dec. 2022	<u>Solvency II</u> <u>31 Dec. 2021</u>
Deferred Acquisition Costs	18.6	(18.6)	0.0	0.0
Intangible Assets	11.1	(11.1)	0.0	0.0
Property, Plant & Equipment Held For Own Use	2.4	0.0	2.4	2.6
Investments (Other Than Assets Held For Index- Linked And Unit-Linked Contracts)	98.0	0.5	98.5	81.5
Assets Held For Index-Linked And Unit-Linked Contracts	44,642.0	0.0	44,642.0	48,113.7
Reinsurance Assets	52.3	0.0	52.3	37.3
Insurance And Intermediaries Receivables	301.4	15.0	316.4	298.7
Cash And Cash Equivalents	64.4	0.0	64.4	83.0
Any Other Assets, Not Elsewhere Shown	2.4	0.0	2.4	3.5
Total Assets	45,192.6	(14.2)	45,178.4	48,620.3

D.1.1 Investments

Investments were mainly comprised of money market funds and fixed income securities.

a) Money Market Funds and assets received in advance from policyholders

As at 31 December 2022, the Company had €55.8m (2021: €49.8m) invested in money market funds and €17.5m as assets received in advance from policyholders (2021: €4.0m).

These investments were valued at lower of cost and market value in the Statutory Financial Statements.

Under Solvency II, the money market funds are valued at fair value, based on market prices at the reporting date, which are quoted prices in active markets. As these are publicly traded securities, the market prices are readily available and are actively traded. No significant estimates or judgements are used in the valuation of these investments. As at 31 December 2022, their market value is €55.9m (2021: €49.8m).

b) Participations

Participations in related entities are valued at lower of cost and market value in the Statutory Financial Statements. As at 31 December 2022, participations in related entities amounted to €0.4m (2021: €0.4m).

Under Solvency II, valuation of all assets and liabilities of the subsidiary Company and related entities is carried out in accordance with the valuation principles of Commission Delegated Regulation (EU) 2015/35. They are valued at €0.8m (2021: €1.4m).

c) Loans to affiliated undertakings

As at 31 December 2022, the Company does not have any loans to affiliated undertakings (2021: €4.0m).

³ Generally Accepted Accounting Principles.

- d) Fixed income securities
 - As at 31 December 2022, fixed income securities amounted to €14.0m (2021: €17.0m).
- e) Deposits with credit institutions
 As at 31 December 2022, deposits with credit institutions amounted to €10.3m (2021: €5.3m).

D.1.2 Receivables

Receivable balances are mainly related to fees receivable and foreign tax advances made in respect of applicable insurance policies. As at 31 December 2022, the Company had a total receivables balance of €316.4m (2021: €298.7m). Receivables are valued at fair value under Solvency II.

D.1.3 Cash and cash equivalents

Cash at bank and in hand, as at 31 December 2022, amounted to €64.4m (2021: €83.0m), of which £24.2m (2021: £32.2m) related to cash received from policyholders. Cash and cash equivalents are valued at fair value by the relevant financial institution, and the Company receives monthly statements at the period end to confirm the balances held. The value of cash and cash equivalents in the Company's financial statements is the same as for Solvency II.

D.1.4 Intangible Assets

Deferred acquisition costs balances and goodwill are valued at zero under Solvency II regulations and are effectively removed in the preparation of the Solvency II balance sheet. Intangible assets, other than goodwill, are recognised in the Solvency II balance sheet at a value other than zero, only if they can be sold separately, and it can be demonstrated that there is a value for the same or similar assets, that has been derived from quoted market prices in active markets.

D.1.5 Assumptions and judgements

The areas where assumptions and judgment are exercised by management include determining the value of deferred income taxes.

D.1.6 Reconciliation of Statutory valuation of assets to Solvency II valuation

- Accounting policy differences: As noted in D.1.4 above, goodwill, deferred acquisition costs, and other Intangible assets are reassessed at zero value under Solvency II. The associated impact on deferred taxes is reflected in other liabilities (D.3);
- Reassessment of participations: As noted in D.1.1 above, Solvency II requires that subsidiaries are valued using the equity method. The overall impact is positive principally as a result of positive net equity of the participations;
- Deferred tax: The adjustments listed resulted in an impact in the deferred tax liability.

D.2 Technical Provisions

D.2.1 Introduction

The Company has one material line of business that is unit-linked life insurance. The Technical Provisions were as follows:

<u>Technical Provision in €m</u>	<u>31 Dec. 2022</u>	31 Dec. 2021
Best Estimate (of future) Liabilities	43,760.0	47,214.0
Risk Margin	252.1	247.9
Total Technical Provisions	44,012.1	47,461.9

The Solvency II technical provisions have moved from €47,461.9m at 31 December 2021 to €44,012.1m in line with total assets.

D.2.2 Valuation methodology

Under Solvency II, the Technical Provisions comprise a Best Estimate Liability and a Risk Margin.

D.2.2.1 Best Estimate Liability

The Company's Best Estimate Liability has been calculated at a per-policy level for the policies in-force at the valuation date.

It is the present value of all future expected cash-flows allowing for claims, expenses and lapses. Allowance is made for reinsurance.

D.2.2.2 Risk Margin

The Risk Margin is determined as the cost of holding the Solvency Capital Requirement over the lifetime of the insured portfolio. This cost is determined by applying a prescribed cost of capital rate of 6% p.a. to each year's projected Solvency Capital Requirement, and then discounting these amounts at the risk-free rate.

The projected Solvency Capital Requirement figures have been determined using the Standard Formula approach, consistent with the calculation of the initial Solvency Capital Requirement, but only allowing for risks that are deemed to be non-hedgeable. The Company views the market risk arising from fluctuations in the value of its linked funds as being hedgeable, and therefore no allowance has been made for market risk within the projection of the Solvency Capital Requirement.

D.2.3 Judgements

D.2.3.1 Projection of Solvency II Capital Requirement for Risk Margin

Calculation of the Risk Margin requires projection of the Solvency Capital Requirement. Reflecting the relatively simple nature of the business and risks, a simplified method has been adopted in line with "Method 1" outlined in Guideline 62 of European Insurance & Occupational Pensions Authority ("EIOPA") guidelines on the valuation of Technical Provisions (i.e. the methodology involving the least simplifications). This uses a series of "risk drivers" to project how each component of the initial Solvency Capital Requirement runs off over the lifetime of the portfolio.

D.2.4 Assumptions

D.2.4.1 Mortality

The Company reviews the mortality assumptions on an annual basis, taking into account relevant industry information.

D.2.4.2 Lapses

Lapse assumptions (full and partial surrender rates) are based on analysing the Company's experience from 2018 to 2022. Some additional judgement may be applied where the Company expects the future to be different from past experience.

D.2.4.3 Expenses

The expense assumptions include allowance for administration costs and corporate overhead costs incurred. The corporate costs have been apportioned so that the total maintenance cost represents the anticipated ongoing expenses, including systems development costs, which are expected to arise in future years in meeting the policy servicing requirements of the in-force business.

D.2.4.4 Interest and Inflation Rates

The Solvency II regulations specify the risk-free interest rate term structure to be used. The Company used the Euro rates as provided by the EIOPA. The Company did not use the matching adjustment. Full detail of the Euro interest rate curve prescribed for use at 31 December 2022 can be found at https://www.eiopa.europa.eu/document/ download/5119d7b4-79c0-461e-9169-00d62b6bf730 en?filename=December%202022

The assumption for future inflation is derived from Euro denominated inflation swap data.

D.2.5 Uncertainty associated with the value of the Technical Provisions

The value of the Technical Provisions includes uncertainty in that they are based on the expected value of future cash-flows. The assumption-setting processes described above are designed to reduce uncertainty by using past experience with adjustments where there are appropriate reasons to expect that future expectations may differ from past performance.

D.2.6 Differences between Solvency II valuations and valuations for Financial Statements

The following table shows the differences between Solvency II valuations and valuations for Financial Statements:

<u>€m</u>	<u>31 Dec. 2022</u>	<u>31 Dec. 2021</u>
Luxembourg GAAP Insurance Contract Liabilities	44,694.5	48,151.2
Best Estimate of Future Liabilities under Solvency II	43,760.0	47,214.0
Risk Margin	252.1	247.9
Solvency II Technical Provisions	44,012.1	47,461.9

D.2.7 Matching Adjustments

No matching adjustments have been applied.

D.2.8 Volatility adjustments

The volatility adjustment, referred to in Article 77d of Directive 2009/138/EC has not been applied.

D.2.9 Transitional Risk Free Interest Rate

The transitional risk-free interest rate term structure referred to in Article 308c of Directive 2009/138/EC has not been applied.

D.2.10 Transitional Deduction

The transitional deduction referred to in Article 308d of Directive 2009/138/EC has not been applied.

D.2.11 Reinsurance Recoverable

At 31 December 2022, the reinsurance recoverables were valued at €52.3m (€37.3m in 2021).

There were no special purpose vehicles.

D.2.12 Material Changes

There have been no material changes made in the calculation of the Technical Provisions compared to the previous reporting period.

D.3 Other liabilities

The table below shows the other liabilities:

<u>€m</u>	31 Dec. 2022	31 Dec. 2021
Provisions Other Than Technical Provisions	8.3	26.1
Deferred Tax Liabilities	184.1	205.3
Insurance & Intermediaries Payables	144.9	37.4
Payables (Trade, Not Insurance)	147.4	209.3
Any Other Liabilities, Not Elsewhere Shown	16.2	19.3

D.4 Alternative methods for valuation

There are no other valuation methods used.

E. Capital Management

E.1 Own funds

The Company, in line with its Capital Management Policy, maintains capital at a level that enables it to carry out its current business plan within its risk appetite. The BoD of the Company sets an appropriate target level of solvency cover given the risks to which the business is currently exposed and those implicit in the Company's medium term business plan.

In 2022, the share capital was increased by £13.2m.

The composition of the Company's Own Funds is as follows:

<u>€m</u>	31 Dec. 2022	31 Dec. 2021
Ordinary Share Capital	40.8	27.6
Share Premium Accounts	10.7	10.7
Reconciliation Reserve	613.9	622.5
Total Basic Own Funds After Deductions	665.3	660.8
Adjustments For Ineligible Assets	0.0	0.0
Solvency II Excess Of Assets Over Liabilities	665.3	660.8

The reconciliation reserve at 31 December 2022 is mostly comprised of the value of future profits expected from the in-force business.

The table below reconciles the equity in the Financial Statements and the Solvency II excess over liabilities:

<u>€m</u>	31 Dec. 2022	<u>31 Dec. 2021</u>
Statutory Accounts Excess Of Assets Over Liabilities	166.0	159.2
Reassessment Of Participation	0.5	1.0
Accounting Policy Differences	498.9	500.6
Solvency II Excess Of Assets Over Liabilities	665.3	660.8

The Own Funds of the Company were impacted by the profit generated during the year.

The whole amount of the Own Funds is eligible to cover the Solvency Capital Requirement and the Minimum Capital Requirement.

There are no amounts within the Own Funds that arise from transitional arrangements, and no ancillary Own Funds.

<u>€m</u>	<u>31 Dec. 2022</u>	<u>31 Dec. 2021</u>
Deferred Tax Asset	0.0	0.0

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1 Introduction

The Solvency Capital Requirement and Minimum Capital Requirements have been determined using the Standard Formula approach set out in Commission Delegated Regulation (EU) 2015/35. No material simplified methods or undertaking specific parameters have been used in this assessment.

The amounts of Solvency Capital Requirement and Minimum Capital Requirement as at 31 December 2022 were as follows:

<u>€m</u>	31 Dec. 2022	31 Dec. 2021
Solvency Capital Requirement	482.4	524.2
Minimum Capital Requirement	217.1	235.9

E.2.2 Risk Modules

The table below shows the Solvency Capital Requirement of the Company by Risk Module:

<u>€m</u>	31 Dec. 2022	31 Dec. 2021
Mortality Risk	13.1	12.9
Longevity	1.0	1.0
Disability-Morbidity Risk	0.0	0.0
Lapse Risk	377.5	385.2
Expenses Risk	74.4	77.6
Catastrophe Risk	1.6	1.6
Revision	0.0	0.0
Diversification	(46.4)	(47.5)
Life Underwriting	421.2	430.8
Interest Rate Risk	3.9	7.4
Spread Risk	60.0	45.8
Equity Risk	249.1	329.1
Property Risk	0.0	0.0
Concentration Risk	11.9	4.0
Currency Risk	159.7	167.4
Diversification	(112.2)	(114.2)
Market Risk	372.4	439.5
Counterparty Default Risk (type 1)	2.7	4.7
Counterparty Default Risk (type 2)	1.4	1.8
Diversification	(0.2)	(0.3)
Counterparty Default Risk	3.9	6.2
Basic Solvency Capital Requirement (pre-diversification)	797.5	876.5
Diversification benefit	(168.2)	(186.5)
Basic Solvency Capital Requirement	629.3	690.0
Operational Risk	13.4	8.4
Adjustment for Deferred Tax Liability	(160.3)	(174.2)
Final Solvency Capital Requirements	482.4	524.2

The Company is not subject to any level of capital add-on.

E.2.3 Material changes

The movement in the Company's Solvency Capital Requirement during 2022 was mainly due to new business and investment performance which impact in particular Market risk and Lapse risk. Growth in the capital requirement generally moves in line with AuA. The final amount of the Solvency Capital Requirement is subject to supervisory assessment.

E.2.4 Adjustment for the loss-absorbing capacity of deferred taxes

<u>€m</u>	31 Dec. 2022	31 Dec. 2021
Adjustment for the loss-absorbing capacity of deferred taxes	(160.3)	(174.2)

The adjustment for the loss-absorbing capacity of deferred taxes is equal to the change in the value of deferred taxes of insurance and reinsurance undertakings that would result from an instantaneous loss of an amount that is equal to the sum of the following:

- a) the Basic Solvency Capital Requirement;
- b) the adjustment for the loss-absorbing capacity of technical provisions;
- c) the capital requirement for operational risk.

The adjustment for the loss-absorbing capacity of deferred taxes is tested for recoverability against future taxes on the value of expected future profits.

E.3 Use of the duration-based equity risk submodule in the calculation

The duration based equity risk sub module has not been used in the calculation of the Solvency Capital Requirement.

E.4 Difference between the standard formula and any internal model used

No internal or partial internal model has been used in the calculation of the Solvency Capital Requirement.

E.5 Non-compliance with Minimum Capital Requirement and noncompliance with the Solvency Capital Requirements

The Company has maintained Own Funds in excess of the Minimum Capital the Minimum Capital Requirement and Solvency Capital Requirement throughout the period.
